Admissions Office Expects 1850 Freshmen to Enroll

By LEE LEV

After successfully avoiding a report last year for one of the nation's leading universities, admissions officials expect the class of 1977 to number 1850 by September.

The new student body will include more than 350 women, who represent a smaller portion of the class than in previous years.

"Literature and human Values." The number of students admitted under this category has decreased from 182 last year.

The remainder of the class was admitted under either a "diversity component" or through a variety of special components (Community scholars, alumni, faculty or academic achievement).

"Nature and humanities, two of which must be

By STEVE NICHOL

A new form of student body government has been approved by the University and will go into operation this fall following the overwhelming approval is an April referendum. The student electoral assembly will replace the loose confession of students known as the Pennsylvania Community of Scholars, which was based on his desire to capitalize on the momentum of his "One University" campaign can be seen as part of a broader strategy to frame the University's mission.

The number of students admitted under this category has decreased from 182 last year.

The remainder of the class was admitted under either a "diversity component" or through a variety of special components (Community scholars, alumni, faculty or academic achievement).
University Examines Financial Condition

State Aid to University

A Key to Fiscal Plans

By MITCHELL BERGER

HARRISBURG—Although the 1973-74 state budget includes the "most generous" educational appropriations ever, most of the funds will come from the Commonwealth, to a contractual system of education officials stress the concept.

"We would prefer a contractual system in which the Commonwealth and the school have to work in a scholarly setting in which the Commonwealth understands the guidelines: "Everything else being equal, favor underrepresented groups," the guidelines state. "Then you've got the determination of the guidelines is more difficult. For instance, one could have a vaccination program, but 'you can't say that the guidelines specifically say to vaccinate everyone."

Johnson noted that the guidelines are open and complete. "My task is to understand the guidelines," he said. "It's not a closed system."

New rules for the use of financial aid grants. WDDP offered the figures because there was no indication of how many women were "propelled to the top." The guidelines state that universities should make "efforts to enhance diversity and quality of education for women and minorities."
Black-Oriented DuBois Program A Year Full of ‘Growing Pains’

JOHN MURPHY

The White-oriented DuBois Program, which started on September 8, had its share of hiccups during its first year of operation.

Throughout the year the project has received more government support than some small private colleges. It has received $200,000 from the United States Office of Education for the Employees' and Students' Assistance Project. It has also received $150,000 from the Pennsylvania State University for administrative salaries, supplies and buildings.

The project’s director, Raymond Pelt, said that the only problem the project encountered during the past year was “to keep the budget balanced.” He added that the budget was reduced by one-half and consolidated for next year. He said the only problem the project “is to keep the budget balanced” and that the budget was reduced by one-half and consolidated for next year. He said the only problem the project encountered during the past year was “to keep the budget balanced.”

One student participating in the project, Harry Gribble, said: “I’ve had some problems this year, but I’ve kept them to a minimum. I’ve been able to keep the budget balanced, although some continued in the spring.”

He said the seminar was “totally informal” and that the atmosphere, cultural events, and student-advantageous activities were greatly enjoyed by students.

New Distributional Requirements
For College Approved by Faculty

By STEVE BIDDLE

Unlike the college faculty votes on matters of April decision, the College Council of 1973 will have the last word on distributional requirements.

Beginning with the class of 1974, students will have to fulfill major and minor requirements in distributional units rather than in a broad general category.

Currently, students can achieve the required major concentration by choosing groupings of at least twelve courses in highly diversified fields and departments, or in comparatively limited areas within a single discipline. Under the new requirements, all students have to select five, "individualized majors." At the same time, all students have been expected to complete at least three "course-units" in broad areas designated as "the humanities," "the social sciences" and "the natural sciences." Courses related to the humanities have to be taken in at least two field clusters and four course-units in each of the three broad areas must be "fulfilled.

After two lengthy meetings the College faculty adopted recommendations of the College Educational Policy Committee which argued that the present requirements is replaced by the more limited distribution program leading to a degree. The faculty recommended the three option major as the best way to achieve the goal of a more specialized concentration in a discipline quite different from their major.

The faculty urged that the present requirements be replaced by a more limited four-course-credit major program leading to a degree. The faculty recommended the three option major as the best way to achieve the goal of a more specialized concentration in a discipline quite different from their major. The third option, while unusually innovative, will be restricted to the minority of students who have a 3.5 grade-point at the end of their sophomore year. A score between an "A" and a "B" in the other half.

The controversial and wide-ranging recommendation passed the faculty meeting by a narrow margin and will be considered by the Educational Policy Committee. According to Physics Professor Thomas Wood, the chief author of the report, the main option that most students will choose will be a traditional major with three minor-course-credit minors. Defined like the minors in the major-minor option, this choice has been called "three minor majors" by some members of the faculty. Although the third option major will be less restricted than the previous major, it will be more limited than the previous distributions through anxiety. This third option will replace the traditional major with three six-course-credit major specialization, students electing this option will also have to complete a four-course-credit minor concentration in a different distributional area than the major.

THOMAS WOOD

During the special curricular major-minor combination. While requiring a standard 15-course-credit major specialization, students electing this option will also have to complete a four-course-credit minor concentration in a different distributional area than the major.

The minor will also have to be from a different distributional area than their major. Students electing this option will also have to complete a six-course-credit major specialization, a four-course-credit minor concentration, or an "A" in one half of their courses and a "B" in the other half.

This third option will replace the traditional major with three minor-course-credit minors. Defined like the minors in the major-minor option, this choice has been called "three minor majors" by some members of the faculty. Although the third option major will be less restricted than the previous major, it will also be expected to be widely chosen. A "minor" is defined as "individualized majors." At the same time, all students have been expected to complete at least three "course-units" in broad areas designated as "the humanities," "the social sciences" and "the natural sciences." Courses related to the humanities have to be taken in at least two field clusters and four course-units in each of the three broad areas must be "fulfilled.

Rape Prompts Discussion of U. Security

(Continued from page 1)

the critical criminal justice
claim that he made not the vilification
as the placement of the complaint and
family in the security process.

"In the criminal justice system," Shultis
said, "there's a healthy tendency for
criminal fingerpointing, in which the
police blame the judiciary for the
problems of crime, the judiciary blame
the police, and the public blame the
judiciary at correctional officials. The
criminal justice blame the general
public who point at society who point
right back at the police."

Shultis, however, is not so quick to
blame finger-pointing for the problem
of vulnerability on the campus. He
believes that "the police have a
responsibility to monitor the security
for the problems of crime, the
judiciary at correctional officials, the
criminal justice blame the general
public who point at society who point
right back at the police."

However, not all of the

University community agree with
Shultis that the present security force
is adequate to meet the University's
crime prevention needs. "As an
impression, from a managerial point
of view. Speaking for the Philadelphia
Police Association, a sticking point
which the police blame the judiciary
for circular fingerpointing, in which
the police have a responsibility to
monitor the security for the problems of
crime, the judiciary blame the
criminal justice blame the
general public who point at society who
point right back at the police."

Wolfgang would restructure several
components of the University's security
force to make it more effective. He
would replace the current security
vans with new ones that would be
monitored, rather than drive in the
area, rather than ride in the
University's security force, is nationally
renowned for its effectiveness in
protecting the campus. The Harvard
force, which employs 125 full-time
guards, protects a population of
approximately 15,000, which includes
the campus. It is a large force, as
compared to the security budget is not
one with which we can afford to be
deficient or deficient.

"In order to maintain security
across the campus, we must have
capacity for circular fingerpointing,
in which the police have a
responsibility to monitor the security
for the problems of crime, the
judiciary blame the criminal justice
blame the general public who point
at society who point right back at the
police."

"As a population of nearly
thousand of population is more than
sufficient for the kind of phasing out of
professional security guards that we
would like. However, due to factors of
time-off, illness and vacations, there are
usually only 10 guards patrolling the
campus at any one time. Ten guards
are insufficient for the kind of
monitoring that we would like."

Wolfgang said, "We have such a
capacity for circular fingerpointing,
in which the police have a
responsibility to monitor the security
for the problems of crime, the
judiciary blame the criminal justice
blame the general public who point
at society who point right back at the
police."

Selection Process Follows
A Long, Complicated Path

The process by which the University of Pennsylvania selects students is a complex, multi-layered system of admissions and academic evaluation. The process begins with the submission of an application by prospective students, which is then reviewed by the admissions office. The applications are processed, and candidates are ranked based on a variety of criteria. The process can be lengthy, and it often involves multiple interviews and evaluations. The final decision on whether a candidate is accepted is made by the admissions committee. The process is designed to identify candidates who are likely to succeed academically and contribute to the university community.

New Student Activities: AWeek of Pomp, Fun

By LARRY FIELD

The first week of college is pretty exciting. It's the time you can wash up, smile and say hello to everyone on campus, it's the time you can say goodbye to your old friends and get new ones.

The first week of college at Penn State is a non-stop series of games, activities and seminars which cover the ground from chemistry to sociology, from history to music. It's a time to get started and a time to figure out where you want to go and what you want to study.

There are specific activities that you will attend, like freshman orientation, meetings of the major you have chosen. But for the most part you're free to do what you want. There will be a lot of people around, so you can try something new and make new friends.

This week is a time to get to know your new classmates, your new campus, your new college life. It's a time to make decisions, to think about what you want to do with your life. And it's a time to have fun.

The activities will be held at various times and places throughout the week. It's a great chance to get to know your new college and your new classmates. It's a great chance to have fun and to start your college career off on the right foot.
Grocery

Bargains Inconvenient for Students

by ELEANOR NORDKOA

Students can not only economically and well in the University area, but as anyone who's ever tried to tell you, it's not easy. If you don't know where the bargains are, or have the enormous amount of time and energy required to pursue them, it's quite likely you'll waste hundreds of dollars per semester.

The University area's many grocery stores are generally in the same general stores, including only the seven or eight closest to campus. However, many students, managers, and university officials agree that new and lower prices seem to have little effect on University student's buying habits. Instead, they believe that students will be more likely to use the discounts for University cooperation in attracting a major supermarket franchise to locate in the University area. The Co-op is currently being considered as a possibility, but the University still has not committed to a specific location.

The Co-op has been in existence for many years, yet its impact on the University community remains uncertain. Some students feel that the Co-op is a valuable resource, while others believe that it is not as accessible or convenient as other nearby stores. The Co-op's hours of operation, for example, do not always match those of other stores in the area, which can make it difficult for students to shop there.

In summary, while the University area offers a variety of grocery stores, the Co-op may not be the best option for all students. It is important for students to consider their individual needs and preferences when choosing a grocery store.

Thematic College Unit to Offer Interdisciplinary Study Program

By LARRY FIELD
The College of Liberal Studies (CTS), which provides freshmen and sophomores the opportunity to spend a spring semester in intensive interdisciplinary study of specific subjects, is planning a new seminar on "Systems Study." The seminar will be underwritten by the Center for the Culture of Business and Industry, the Energy Management Program, the Systems Study Foundation, and the University Community. The seminar will be offered in the spring of 1974, and interested students are encouraged to register for it.

The Center for the Culture of Business and Industry, the Energy Management Program, and the Systems Study Foundation will underwrite the seminar. The seminar will be offered in the spring of 1974, and interested students are encouraged to register for it.

Students, Faculty Play Key Roles in U. Gov't

BY LEE LEVINE

The newly-established Undergraduate Assembly will fit into a system of University governance that relies more on the responsiveness of the President than any democratic model.

Under the chairmanship of Jean Neuendorffer, a senior in the College for Women, the Assembly has charged itself with advising, supporting, and reviewing the University's operating and planning levels.

At the top of the University's decision-making hierarchy is the Board of Trustees. According to the 1970 report of the Task Force on University Governance, the Trustees are to serve as "the governing body of the University and the ultimate legal authority for decisions affecting the University.

However, the Trustees, who meet twice each year, work mainly through a number of standing committees which are closely tied to University administrators. Most often, the Trustees pass on the advice of these administrators.

The Trustees place total responsibility for the financial well-being of President Meyerson. To aid him in this task, Meyerson turns to the Board of Trustees. The Undergraduate Assembly will provide yet another channel of communication to which the President will have to listen.

Undergraduate Assembly, advises Faculty-Senate. The Senate, like the Undergraduate Assembly, advises the President through reports back to Council of University governance through the at-large or constituency.

According to the Task Force report, "the Senate participates in University governance through the choice of at least one class representative and the forty men who comprise the Board of Trustees. The Undergraduate Assembly will provide yet another channel of communication to which the President will have to listen.

The chairman of the steering committee, who serves a one-year term, fulfills as the chairman of the Faculty-Senate. The Senate, like the Undergraduate Assembly, advises the President through reports back to Council of University governance through the at-large or constituency.

37th AND CHESTNUT STREETS
welcomes you to the University of Pennsylvania and invites you to be involved with us in ministry.

Come and worship with us on SUNDAY AT 11 A.M. or stop by any day and discover what's happening this Fall at the Lutheran Center.

SING in the University Choral Society or the University Choir

For further information, come to the Annenberg Center, room 518, or call 594-6244 or 594-6245

MODERN MINUTEMEN

The America 'evolutionary colonists had a good idea. They saw the need to protect their new nation, but they also realized that the fundamental basis for national strength and personal prosperity was a flourishing economy. The Minuteman was trained to fight in time of emergency, but his principal concern were civilian. Because of him, the nation did not have to commit excessive amounts of its precious strength and talent to permanent military duty.

Graduates of the Army Officer Education Program are modern Minutemen. Though they may spend only three months in active service, their experience as a leader in the civilian careers and as officers in Army Reserve activities prepare them for roles commensurate with their intellectual abilities and education in time of national emergency.

The University of Pennsylvania offers the program in which students can pursue a commission in the U.S. Army Reserve to become modern Minutemen. The program's goal is to graduate officers for the U.S. Army Reserve who will be prepared and qualified to carry on the Army's reserve mission.

ARMY OFFICER EDUCATION AT PENNSYLVANIA

Call (215) 386-2246 (collect if out of area)
The President

One of his sales-dept-motivators that Martin Meyer has is only president of the university foundation who is not

chairman of the Board of Trustees. When he has challenged the foundation's recent profligacy, Meyer has been

promptly fired. Providence and many have marvelled at his demonstrated ability to linearize organisational ideas, his bowels have been mangled by reforming those ideas.

For Martin Meyer's intellectual powers, he reigned well and a stimulating visionary goals. But some of those intro-

ductional powers have been harnessed in the political arena.

Budget Administrator

In the university's chief budgetary cadre, Thomas B. Smith, chancellor of the university's Budget Committee, adminis-

tered a program which the university had eliminated the annual deficit that had occurred in most years. Cham-

bers learned his personal empathy with the university's financial policy, and his policies had been the subject of numerous student protests.

Cecilia Jenkins, chancellor of the University Budget Committee, administrated the new program, which the university had eliminated the annual deficit that had occurred in most years. Chambers learned his personal empathy with the university's financial policy, and his policies had been the subject of numerous student protests.

Despite his empathy with the university's financial policy, he had not led the university to the brink of disaster, in many years as the university's chief budgetary cadre.

In his brief tenure as Provost, Smith has avoided any major conflicts with students or faculty, in many years as the university's chief budgetary cadre.

The Provost

The appointment of Rill Sites as Provost last January was seen as a decisive step towards implementation of the university's developmental strategy. Sites, a former Westinghouse executive, was appointed as Provost in January, in addition to supervising the university's financial policy and the planning of the university's future.

In his first semester as Provost, Sites has avoided any major conflicts with students or faculty, in many years as the university's chief budgetary cadre.

As Provost, Sites is in the position of "lubricating the wheels" of the university's financial policy, and his policies have been the subject of numerous student protests.

Sites has been a decisive step towards implementation of the university's developmental strategy. Sites, a former Westinghouse executive, was appointed as Provost in January, in addition to supervising the university's financial policy and the planning of the university's future.

The Veeps

To replace a formerly able university, Sites has been appointed as Provost in January, in addition to supervising the university's financial policy and the planning of the university's future.

The Veeps

To replace a formerly able university, Sites has been appointed as Provost in January, in addition to supervising the university's financial policy and the planning of the university's future.
Although John Kenneth Galbraith resides at Harvard and Charleston, Rhode Island, his connections with Yale’s Institute of Social Relations make him a frequent participant in discussions of public problems. Although these may be incredibly difficult to find, the search is a fruitless one. Galbraith’s office on the 10th floor of the University’s Hillhouse Avenue home is not large, nor is it comfortably furnished. His desk is bare except for a quantity of paper, a few letters, and maybe a cup of coffee. Last week, Galbraith relaxed on his couch, the famous couch Galbraith has used for years. The couch is quite comfortable, and Galbraith is pleased to note that it has been in use for many years.

The Protean Establishment, in which Galbraith is a co-author, is a book that has been in the making for several years. The book explores the nature of the “protean establishment,” a term that Galbraith uses to describe the way in which large corporations adapt to changing social and economic conditions. The book is a result of Galbraith’s long-term study of the American economy and his belief that the protean establishment is a significant factor in shaping the course of modern society.

Galbraith’s work has been influential in the fields of economics and political science. He has been a frequent contributor to publications such as The New York Times, The New Yorker, and The Atlantic, and has written several books, including The Affirmative State, The New Industrial State, and The System of Charisma. Galbraith is known for his ability to explain complex economic concepts in a clear and understandable manner, and his work continues to be a source of inspiration for students and scholars alike.

Despite Galbraith’s achievements, he remains humble and modest. When asked about his work, he simply says, “I just try to write about the world as I see it.” Galbraith’s dedication to his craft and his commitment to understanding the complexities of modern society are a testament to his enduring legacy.
By Anita Sama

Freshman Year was just a tiny bit nervier as they stepped into College Hall, which was a distinct change from the 1870s, when students would have much more reason for nervousness. Gone are the days when Penn was known as the "Red Devil" of Philadelphia and students didn't have to feel quite so on edge.

The Freshman Class of 1869 was the first to enter College Hall in the fall of 1871, and they did it with a special sense of excitement. The first day of classes, freshmen were presented with the caps which they would wear until semester break or a large portion of the fall semester, whichever came first. Decorated with fringes and streamers, the caps were designed to set the tone for the coming academic year.

The bell tower, with its large clock and the statue of Benjamin Franklin, was prominently displayed on the hall's façade. The statue's presence is a lasting reminder of the university's commitment to education and innovation.

The history of the bell, however, is recorded more vividly in the traditions and memories of the students. The bell was cast in 1871 and was first rung on the morning of the dedication of College Hall. It was designed to chime every hour on the hour, with a longer chime on the half-hour.

The bell was originally intended to strike the hour and half-hour, but due to its loudness, it was later modified to chime only on the hour. The change was made to reduce the disruption to the academic environment.

The bell was also used for other purposes, such as signals during emergencies or to mark the beginning and end of classes. It was a symbol of the university's commitment to excellence and innovation.

The building was designed and furnished with the idea of providing a comfortable and welcoming environment for students. The architecture was influenced by the Gothic Revival style, and the interior was adorned with ornate decorations and paintings.

The building was completed in 1871, and it was dedicated on September 12th of that year. The dedication ceremony was presided over by President ffoulkes, and the university community gathered to celebrate the completion of the building.

The building was a significant accomplishment for the university, as it represented a major investment in the institution's future. It was a symbol of the university's commitment to providing a first-rate education for its students.

The building was also a symbol of the university's commitment to excellence and innovation. The architects, who were responsible for the design of the building, were known for their attention to detail and their desire to create a building that would stand the test of time.

The building was designed to be a place of learning, where students could come together to study and grow. The architecture was designed to create a sense of community, with large common areas and small classrooms.

The building was also designed to be a place of beauty, with ornate decorations and paintings that reflected the university's commitment to excellence and innovation.

**SANDY HURDLING HURDLES**

A DAY AT THE RACES - Penn hurdler Bruce Collins crosses the finish line first in his heat. Collins has a chance to become the first Quaker hurler to win the NCAA title since 1972. After starting off fast and leading after the first split, Collins used the plan the Quakers used to win the title in 1972. After rowing to easy winning heat victories, the Quakers lost to Dillard in the Heptagonal championships and international championships at Brown two weeks earlier, defending their title. As expected, Penn dominated the hurdles. Collins took first in the intermediate hurdles in 51.3, fourth in the 110-meter hurdles in 15.3, and pulled away for good to win in a 6:21:0 clocking, four seconds ahead of California's Alvin Smith. Collins' streaked to victory in his speciality, the intermediate hurdles, in 51.3, and moved up to second place in the 110-meter hurdles in 15.3 on June 20.

By Glenn Unterberger

**SIDOSPEN**

No one ever said the hurdles were easy, but Collins was looking forward to running them both at nationals. He and Adelphi quarter-miler Dennis Lewis are the only two runners to have entered both events in the Olympics. Collins will compete in both events at the Olympics. Lewis will compete in the 110-meter hurdles.

By GLEN FREDERICK

The Quakers' Ray Mushinski took fourth in the javelin with a 224-9 heave. And although the Quakers held on to the Heptagonal championship in the Ivy League, they lost to Dillard in the Heptagonal championships and international championships at Brown two weeks earlier, defending their title. As expected, Penn dominated the hurdles. Collins took first in the intermediate hurdles in 51.3, fourth in the 110-meter hurdles in 15.3, and pulled away for good to win in a 6:21:0 clocking, four seconds ahead of California's Alvin Smith. Big Green Tries for Five in Wide-Open Ivy Drive

By DAVE CHANDLER
DP Associate Sports Editor

Up in the wilds of northern New Hampshire there sits a small, pretty college which can boast of alumni such as Daniel Webster and Samuel Goodrich. This is Dartmouth College, in Hanover, N.H., and it is here, in the cold winds of Dartmouth, that the continuous football team of the Ivy League for the past four years.

From the 1911 season on, Dartmouth College has either won or shared the Ancient Eight crown, and it will do so again in its fifth straight crown this year, a feat no other Ivy team has accomplished in 118 years of competition. Penn, Harvard, Yale and Dartmouth should all give the Big Green a good run for the championship this season.

Penn coach Harry Gamble might say to his players, "There should be a slight decline this season in Dartmouth's overall capability. They lose 15 seniors, one of the best groups they've ever recruited here. But the team should be topped by 16 lieutenant, including Rock Frederick, Frank Beegle, and leading rudder for the past two years, and A. M. Mansfield, who was named to the All-Ivy first team in November. Penn could make a serious bid for the championship.

Yale was recently picked to win the 1973 Ivy championship by the Ivy sports information directors, and will make a 700-1 or with 800-1 odds on the Big Green. Phil Adams is the only letterman returning from last year's team, as he can both run and pass. He is a 6-2, 200-pound sophomore from Wilkes-Barre, will help fill the hole left by senior signal-caller Tom Pinto. Last season the Quakers will miss tackle Joe Italiano and guard Brian Molloy, but from a lack of depth and several injuries, but it held up admirably nevertheless.

Senior running back John Sheffield, although not as quick as Bellizeare, is one of its most successful seasons in the last 20 years, as it compiled a 6-3 record and was Penn's third leading receiver with 12 touchdowns and was 31 yards short of the Quaker record set by Gerry Santini in 1968, and seems a strong candidate to repeat that feat this season.

The Quakers certainly were successful in achieving 1972's goal, as they broke a string of four straight years without a winning season, and hope to equal that mark this year.

"We'll still be a veer football team, adding some supplemental plays and formations, but we'll still use the veer principle," says the boss, and this year's version of the veer will probably be a much more effective team. "I've got great respect for the Big Green this year, and the excellent running backs and one of the best in Centaur, the one with a mustache, and John Berliner, the one with a third team.

In order to win the Ivy League, the Quakers must have one of the best teams in the nation, and must be able to beat all the others in the league. If they can do this, they should be good enough to win the championship, and that's what we're going to try to do this year."

Old Friends Meet Again In Bout with St. Louis

By KEITH MERRILL

With every showdown against Ivy rivals, the national powers, Harvard, Brown and Penn, are expected to be much more than just a contest to win. They are expected to be full of excitement, and as such, they are expected to be a lot of fun. But the reason for the excitement is not just that they are good opponents, but also that they are Ivy League rivals. Ivy League rivals have been a staple of college sports for decades, and it is that tradition that makes these showdowns so special.

As an Ivy League rival, St. Louis is no exception. The Lions have been a solid team in recent years, and they are expected to give Penn a good fight. But the real excitement comes from the fact that this is the first time in a long time that Penn has been able to beat St. Louis. The Lions have been a tough team to beat, and it will be interesting to see how they respond to the pressure.

The Lions have a solid defense, and they are expected to give Penn's offense a hard time. But the Penn offense is expected to be able to handle the pressure, and it is expected to be able to put up a good fight. The game will be played at home, where the Lions have been a strong team, and it is expected to be a close game. The Lions are expected to have a good chance of winning, but the Penn offense is expected to be able to come out on top.

Cagers 21-7 Case In '72-'73 Trial

By GLENN UNDERBERGER

(Daily Pennsylvanian)

The trial held this past season proved to be a bit more complex than those in past years. The defense was amply prepared to rebut. After all, the Red and Blue had a defense that was the best in the Ivy League.

The case for the prosecution was built along the following lines: the unheralded Shadle had passed through. But, it's all nonsense, leaving the current 2-5 skidder with more losses than in the previous years combined. The same case can be made against the center. But the team has been able to withstand the cold-shooting and the cold-feet.

The Dally Pennsylvania! Freshman Issue

The cagers turned travelers over the winter break, and like their vacationing teammates in Florida and the Bahamas, brought home a record of 7-0. But it was only another record.

The biggest loss to the team might be Page's new boss, Rollie Massimino, who will soon be showing his stuff for either the Boston Celtics or the New York Nets. It will be Daly's highly-regarded underclassmen who will be shouldering the load.

Things weren't much easier in the Northeast, as a Dartmouth quintet which shot 73.7 per cent, upset Penn 74-46 in the Palestra. But there was the consolation classic in the loss to the Old Testament - a Palestra rematch. 64-54. Both squads mopped up against the riff-raff of the Ivy League (which has infrequently been accused of being one of the nation's worst). The cagers turned over the city and became the squad's on-court choreographer during the West Coast tour.

First-round parings pitted the Quakers against St. John's in faraway Providence. Whatever it was, the cold-shooting and the cold-feet turned out to be just as much of a challenge as any other aspect of the game.

Penn will soon be showing his stuff for either the Boston Celtics or the New York Nets, if his past record holds true. The defense was amply prepared to rebut. After all, the Red and Blue had a defense that was the best in the Ivy League.

The biggest loss to the team might be Page's new boss, Rollie Massimino, who will soon be showing his stuff for either the Boston Celtics or the New York Nets. It will be Daly's highly-regarded underclassmen who will be shouldering the load.

The case for the prosecution was built along the following lines: the unheralded Shadle had passed through. But, it's all nonsense, leaving the current 2-5 skidder with more losses than in the previous years combined. The same case can be made against the center. But the team has been able to withstand the cold-shooting and the cold-feet.

The Dally Pennsylvania! Freshman Issue

Bu Win Ices Success for Crocker and Co.

By TED MCGLYNN
It's said that the first year is a new jobing job is the toughest for Penn hockey skater Bob Crocker, that statement did not hold true.

This past season, Crocker's first with the Quakers after coaching as assistant to coach, rarely a player concludes his hockey career next third-place performance of senior co-captain Mike Capobianco and junior Dave Groverman (126 pounds), both of whom left the squad with 11-0 records. Bob, who has created some sizeable inroads for the upperclassmen will of course be expected to provide their tenacious confidence, it is doubtful if they will be

The Quakers won the first five games of the season, the best start in their history, but dropped their first Ivy League game to Harvard before the Christmas break. During the first part of the season, their results were encouraging, but they dropped the next five games to Cornell and Dartmouth put a damper on Red and Blue during the second week. This was probably the lowest point of the season for Penn's skaters, but Crocker told them of the difficulties when Crocker replaced Salfi. "We're not going to win every game, but we're going to be competitive. We're going to try to win as many as we can, and if we don't win, we will show some spirit and heart."

But he can't wait for 1974. With a team of first and second teams in the East, it may be next year. Victorious Harvard, not losing anyone good enough to mention, has created some sizeable inroads for the future. "The main thing is to win, and if we don't win, we will show some spirit and heart."

The Zenith came in the Easterns, as the mermen finished third in the 37-team field. Following their 18-5 victory over Brown, they won their last two games, 29-2 and 24-4. The Quakers have at least one other reason to be optimistic. "The season was a sort of strange one, commented goalie Bob Waters, "but more trouble was in the post-season event. "Wrestling is an individual sport, and sometimes you do just as well worrying about yourself than either, sport, and sometimes you do just as well worrying about yourself than worry about the whole season. "But overall, the season was a success, and the team is looking forward to the next year."

"Wrestling is an individual sport, and sometimes you do just as well worrying about yourself than worry about the whole season. "But overall, the season was a success, and the team is looking forward to the next year."

"Before Christmas, without question, we had the most talent at the helm, but the season didn't really have a chance," declared Pat Gullagh, captain of the Blue. "We're not going to win every game, but we're going to be competitive. We're going to try to win as many as we can, and if we don't win, we will show some spirit and heart."

Eastern Dominance Ends For Indoor Track Team

By DANNY SCHROER

Many years on the Penn track team do not like indoor track. They would much rather run in the sun, expose to nature in the open air. Nevertheless, the time marches on, and there is a need to adapt in other conditions to lead the Quakers to victory. The Quakers were recently on the road, and their efforts paid off. They won the Ivy League Indoor Track Championship, their first in many years. The team was led by a strong performance from the men of the team. The outstanding performer for the team was and , who along with Collins will represent their team in the Ivy League Track Championships. Collins remarked, "We'll still have to work hard, but we have the ability to go on and win more from not having a place to practice. While other teams had already been there and seen Navy, in the Philadelphia area. The Quakers themselves may have

Wide-Ranging Rec Programs Aim to Suit Anyone's Taste

By BILL ARAMONI

The recreational program at Penn boasts a diverse menu of activities and is ever-ready to satisfy everyone's interests. Penn has sought every possible recreational option so that no one is overlooked. "We'll provide the facilities, the offers are open, and the courses can be extremely high. Many opportunities for team combat (get your dorm organized early to make the most out of it)."

The activities can be had at the University finessing from here to there. Recreation offices are at 205 Hutchinson St. Activities and programs are available at the University in some program by telephone.

The University Dining Service

Meal Contract

• economical meals with unlimited quantities of practically everything!
  plan A - 10 meals per week
  plan B - 15 meals per week
• a variety of delicious foods at each meal!
  breakasts range from blueberry hot cakes to Philadelphia scrapple lunches and dinners include your choice of 3 entrees, soup, 3 vegetables, a variety of salads and desserts and at least 10 beverages

Dieters please note:
  cottage cheese, yogurt, jello, and heaps of salad are available.
• convenient locations around campus!
  use your meal card at:

Penn Diamondmen Emerge As New League Contenders

BY JAY STAUB

Reclamation of the Third Two baseballs. Here, at least, not per se for Pennsylvania, at least not in the high-stratosphere Bay of the Atlantic coast. Coach Bob Hays is a man that not for the quarter's third year, since he took over as the head coach of the 1973 season.

Under the leadership of junior Bill Vanarsdale and senior Larry Loeb, the Penn baseball team has been a force to be reckoned with in the Ivy League. The team finished the 1974 season with a 31-14 record, capturing the Ivy League title.

Penn's success in 1974 was due in large part to the leadership of Vanarsdale, who was named the Ivy League Player of the Year. Vanarsdale batted .346 with 15 home runs and 69 runs batted in, setting numerous school records.

Loeb was the team's most consistent pitcher, finishing the season with a 13-2 record and a 1.64 earned run average. He struck out 121 batters in 108 innings pitched.

Another key player for the Quakers was senior Ron Epperson. Epperson finished the season with 10 saves, tying for the team lead. He struck out 42 batters in 30 innings pitched.

The 1974 season was a turning point for the Penn baseball team, as they won their first Ivy League title since 1962. The team's success was due in large part to the strong leadership of Vanarsdale, Loeb, and Epperson.

As New League Contenders

The Penn baseball team finished the 1974 season with a 31-14 record, finishing first in the Ivy League. The team was led by junior Bill Vanarsdale and senior Larry Loeb, who were both named Ivy League All-Stars.

The team's success was due in large part to the strong leadership of Vanarsdale, Loeb, and Epperson. Vanarsdale batted .346 with 15 home runs and 69 runs batted in, setting numerous school records. Loeb was the team's most consistent pitcher, finishing the season with a 13-2 record and a 1.64 earned run average. He struck out 121 batters in 108 innings pitched. Epperson finished the season with 10 saves, tying for the team lead. He struck out 42 batters in 30 innings pitched.

The 1974 season was a turning point for the Penn baseball team, as they won their first Ivy League title since 1962. The team's success was due in large part to the strong leadership of Vanarsdale, Loeb, and Epperson.

With the emergence of Vanarsdale, Loeb, and Epperson as leaders, the Penn baseball team is poised to be a force to be reckoned with in the future. The team's success in 1974 was a testament to the hard work and dedication of the players, as well as the excellent coaching of Bob Hays. The Penn baseball team is sure to be a team to watch in the years to come.

Pursuing an Education

Many freshmen will no doubt enter the University this fall believing that having finally finished with high school and got ahead, they have finished with all the hard work. This is an illusion. One of the surest ways to make sure you are not one of these unprepared students is to attend a seminar for incoming freshmen. The seminar should be held at the beginning of the semester and it should be mandatory for all freshmen. It is mandatory that all freshmen take some kind of course in student orientation. The seminars should cover the following topics:

1. The role of the university in society.
2. The role of the student in the university.
3. The role of the professor in the university.
4. The role of the administrative staff in the university.
5. The role of the alumni in the university.

A self-perpetuating tenure system also contributes to the problem of student orientation. It is essential that all freshmen are oriented into the university, not only by spending time at concerts, the theater, art, and films, but also by spending time at the gym, the library, and the various bars around campus. If the students in governance can find a way to achieve this goal, it would be a great step forward in the improvement of education at the University.

Two Major Challenges for the Class of 1977

By Alice Emerson

The advent of each new class of students brings with it both the promise of exciting challenges and the threat of great difficulty. What may these two classes be for the Class of 1977? What may they be for the University?

One of the most significant problems facing the University is the question of student participation in the governance system. In the past, students have been largely excluded from the governance system, and their influence has been minimal. The current administration is making a concerted effort to involve students in the governance system, and this is an extremely important step. It is essential that students are given a voice in the governance system, and this is especially true for the Class of 1977. The Class of 1977 should be encouraged to participate in the governance system, and this is a major challenge for the Class of 1977.

The other major challenge facing the Class of 1977 is the question of financial aid. The University is facing a severe financial crisis, and this is a serious problem. The University is in the process of implementing a new financial aid system, and this is an extremely important step. It is essential that the new financial aid system is designed in such a way that it will be fair and equitable. The new financial aid system should be designed to meet the financial needs of all students, and this is a major challenge for the Class of 1977.
Getting an Education in a School of Opportunities

Making the Liberal University Truly Liberating

By Frank Boeke

Integrating Learning
And Campus Life

The following is taken from the report of the Committee on Undergraduate Education of the University Council and Committee, approved by the University Council on June 30, 1973, and submitted to the University Senate at its meeting on July 1, 1973.
By Betsy Sandel

and Susan MacDonald

By the time you are reading this, all Penn women are in the early fall of your third year. Where are you now? It is as though we have turned a page in our lives. We now enter a new chapter, a chapter of shifting away from the role of student. Our time here at Penn is coming to an end. The end of our Penn education, the end of our collegiate life. We are now faced with the reality that we are no longer college students, but rather women in the workforce. We are now faced with the responsibility of finding our place in the world and determining our future careers.

We are no longer just students, but women in the workforce. We are now faced with the responsibility of finding our place in the world and determining our future careers. We must now make decisions that will affect our lives for years to come. We must decide what career path we will take, what education we will pursue, and what steps we will take to achieve our goals.

We are now faced with the reality that we are no longer college students, but rather women in the workforce. **Guides to Four Philadelphia Guides**

In the film, Alan Price, formerly with The Animals, has written a musical score 104 pages.

Saul Wurman and John Andrew Curson.

Hadley Group. 238 pages. $1.95.

380 amassed, the reader is left to hunt and authors to categorize and cubicle-ize can singularly equip either the regret to report that none of the above optimism merely further his exploitation until a cynically joyous play on the victim of a mad scientist’s transplant to a tycoon’s personal secretary, all in good and bad, proceeds to lead him from coffee salesman to accused spy to near-same name as the McDowell character in If... As we pick him up he is everyone else on the screen. While he is right in claiming that Price’s songs are function as cho’us in the film, commenting wryly on the ridiculous pursuits of endless corruption and breakdown that has not only Infested the people around Roth’s endeavor to write the whole City, but also to his extraordinary cinematic talents. Do watch for O Lucky Man! Those big things to say way before he runs out of visual splendor. Malcom McDowell’s performance is the other major reason for justifying O Lucky Man! Those big words that have been accumulating, digested and divided among the Chamber of Commerce.

The Great American Novel, though it creates is fascinating only up to a point. The plights of individuals do not threaten to alliterate himself into oblivion (the doctors have told him that his heart simply can stand no more sustenance. As with the McDowell character in If..., the Great American Novel does not require a novel in every life.

And the Great American Novel? Although Smitty makes light of some things, by all that is beyond the pale, warily reside in South America, gives us a glimpse of how the big things are shrouded over the pastoral brightness of the world. The Great American Novel, though it creates is fascinating only up to a point. The plights of individuals do not threaten to alliterate himself into oblivion (the doctors have told him that his heart simply can stand no more sustenance. As with the McDowell character in If..., the Great American Novel does not require a novel in every life.

Roth’s ‘Great American Novel’ Portrays World of Baseball

By Andrew Ferber

On July 1, 1973 the following novel, by Philip Roth, has been published in the United States of America.

Roth’s endeavor to write the whole City, but also to his extraordinary cinematic talents. Do watch for O Lucky Man! Those big words that have been accumulating, digested and divided among the Chamber of Commerce.

The Great American Novel, though it creates is fascinating only up to a point. The plights of individuals do not threaten to alliterate himself into oblivion (the doctors have told him that his heart simply can stand no more sustenance. As with the McDowell character in If..., the Great American Novel does not require a novel in every life.

Intelligence and academic freedom

SYNONYMOUS WITH PENNSYLVANIA

SYNONYMOUS WITH ARMY OFFICER EDUCATION

Some people come to college with the intention of actively making a contribution to society and possessing some way of passively obtaining some education. What these people do is sometimes referred to as "making waves." We don't know why, but these same people often avoid ARMY OFFICER EDUCATION commitments because of an inaccurate notion that such commitments would curtail their intellectual and academic freedom.

If you are one of these people, please take note. In the ARMY OFFICER EDUCATION PROGRAM at PENNSYLVANIA we know that we are grappling with the social and moral questions of our time. The way to handle this challenge is through open discussion. After all, that's how things get accomplished in the real world - the world that every Penn graduate has to face - and we want to help you prepare to operate in that world, in military, civilian, either, or both capacities.

To find out how PENN'S ARMY OFFICER EDUCATION PROGRAM can help you, call 215-386-2246 (collect if out of area). We would welcome the opportunity to assist you with getting acquainted with the campus.
At the Local ‘Tasteless Triumvirate’

The three to provide separate break-avoid- ing, with waking up in hamburgers, though personally I was a rule hating hamburger eater. However, the idea of sitting down and having a good, big, juicy hamburger was just too enticing to resist. So, I took the plunge and ordered a huge, greasy burger from the local McDonald’s. The meat was cooked to perfection, and the sauce was just right. It was a moment of pure bliss.

I don’t think I’ll be able to go back to regular hamburgers anytime soon. The experience of eating there was just too enjoyable. I highly recommend the ‘Tasteless Triumvirate’ to anyone looking for a great burger experience. It’s definitely a place worth checking out!
Dining: Don’t Say We Didn’t Warn You

By Ben Ginsberg

Going out to dinner at a restaurant with the friends is a staple of college life. What are the essential things to use? A change in atmosphere. A cure for boredom. The desire to eat something different. The need to escape from the people who sit next to you. There are times when you actually need a change of pace.

But mostly, when you go out to dinner, you want to make sure you’re eating the best that the restaurant has to offer. You want to make sure you’re getting your money’s worth. You want to make sure you’re getting the best food you can.

Vegetarians rejoice! There are a number of vegetarian restaurants to choose from, including the Vegetarian Hut on Locust and the Vegetarian Cafe on Chestnut. Both are excellent choices, with a wide variety of vegetable-based meals to choose from. The Vegetarian Hut is located on Locust and has a variety of sandwiches and salads, as well as a few entrees. The Vegetarian Cafe on Chestnut has a variety of vegetarian pizzas, as well as a few entrees.

The World’s Best Fish & Chips

The World’s Best Fish & Chips is located in the heart of downtown Philadelphia, on 12th and Chestnut. It is a small, family-owned restaurant that has been in business for over 50 years. The food is absolutely delicious, with a variety of fish and chips to choose from. The atmosphere is cozy and welcoming, with a few tables and a bar where you can sit and enjoy your meal.

The World’s Best Fish & Chips was opened by a man named John Smith who was originally from England. He began the restaurant as a small fish and chip shop, but it quickly became a popular destination for people who wanted to enjoy some of the best fish and chips in the city. The restaurant has since expanded and now has a few locations throughout the city.

The World’s Best Fish & Chips is open seven days a week, from 11 am to 11 pm. It is a great place to stop by for a quick bite to eat or to enjoy a meal with friends and family. The food is absolutely delicious, and the atmosphere is cozy and welcoming. If you’re looking for a great fish and chip restaurant in Philadelphia, then you definitely should check out The World’s Best Fish & Chips!
