Preliminary U. Budget Information
Indicates Tuition Increase of $2500

By JIM KAHN

The Task Force on Nursing, SAMP, and Rand Health Sciences has recommended that the University's Nursing program be reorganized. The Task Force believes this will be necessary to meet the demands of the future and maintain the high standards of the program.

Preliminary U. Budget Information... indications that any drop would be felt mostly in the entering freshman pool, rather than in the graduate pool. The guidelines also foresee a 10 percent increase in the University's... hospital nursing program said Monday that the project's staff will be able to work out the problems that have arisen in the past several years.

Health Task Force Urges End to Hospital Nursing School Program

By JOHN MURPHY

The Task Force on Nursing, SAMP, and Rand Health Sciences has recommended that the University's Nursing program be reorganized. The Task Force believes this will be necessary to meet the demands of the future and maintain the high standards of the program.

By STEVE BURLINGTON

Nursing program and Monnier who also were in favor of the proposal and added that the program was "very much" disturbed with the force's recommendation that the program should immediately cease. The University's statement was unclear. Nurses and nursing students said that they had not been informed about the decision.

The University admitted 27,484 students, 818 of whom were enrolled in the College of Engineering. The average achievement test score for the freshmen class was 1597, the highest in the University's history.

Individuals rejected by the School of Nursing, representing 10 percent of those accepted last year. Nursing was able to enroll in a timely manner only in the health sciences field.

The projections, which would balance the budget and leave $13 million for a yet undetermined increase in the student aid budget according to Meyerson, noted. "As our costs go up there is a point where we will price ourselves out of the market and will have to consider in the health science area."

The two administrators expressed fears that the hike would drive students away from Pennsylvania to more prestigious private schools and cheaper state schools.

Kohoutek

Kohoutek, the biggest comet of the century, will reach the perihelion of its elliptical orbit on March 1, and will cross the plane of the ecliptic. Discovered by a Czech astronomer in March, the Kohoutek comet is expected to be seen by stargazers around the world in early March when it passes closest to Earth. The comet will be visible in the early morning hours.

The Great American Baseball Card Catalog and Robber's Rule (Bk. 7), otherwise known as The Foul Play of Baseball, is not well known but is a great read. You can’t keep something from me, the author assures us, and that is why the book is so popular.

Rising Tuition Costs...

Budget Committee projections released Monday suggest that university undergraduates may well be called upon to meet an increase—almost eight percent—in tuition next year. Whether the result will be greater than the cost of living, according to recent statistics, is anyone's guess. But any increase is certain, for the fall semester is a profit-making season, and the sizable sum required to cover the high costs of living and education is also certain. The change in tuition level is a large one, and it may be a costly surprise for some students who, perhaps through a lack of proper financial planning, have not anticipated the rise in tuition costs.

The first few years of college are usually the easiest years of a student's life. The stress of high school is over, and the student can now enjoy the freedom of college life. However, the financial stress of college tuition can be a burden for many students. The increase in tuition costs can make it even more difficult for students to afford college. It is important for students to plan ahead and budget for their college costs, so they can avoid any financial surprises.

Letters to the Editor

Vocation is Time to Push for Impedement

In the past five papers, Richard Nisen has raised issues of the student body, the President, and the executive branch. The student body should have been included in this discussion, as well as the President and the executive branch. The student body is the one that should be able to push for changes in the current situation.

The Daily Pennsylvania choice not to send a review and fail to publish a review that was submitted. On December 4, the store can open and performed and directed by students, approved by the President, and the executive branch. The store can open and perform, but it should also be reviewed by the President.

No 'Compromise'

As student dining workers, we are writing in support of the "labor-intensive" labor movements that are taking place on campuses across the country. We believe that these movements are necessary to ensure fair wages and working conditions for all workers on campus.

In response to Mr. Bousell's argument that "the student dining workers are not really being treated unfairly," we would like to point out that the negotiations have been ongoing for several weeks, and that the union has consistently made concessions. However, the administration has refused to make any changes, and continues to insist on cheap labor.

We believe that the student dining workers are being exploited, and that their wages and working conditions are not fair. We urge the administration to make concessions, and to work with us to find a solution that is fair and just for all parties involved.

On Campus

A Little Solace for Finals Week

By Jim Kalin

Students, that's true again. The end is in sight, and the last day of classes is only a few hours away. Four more hours and we are finished with the last-minute rush to complete assignments and study for finals. For some, this will be the last time they see their classmates and professors for a while. For others, it will be the last time they will see their grades for a while. For all, it will be the last time they will see the pressures and stresses of college life.

But let's not forget that there is still one more day of school to go. And even though it may seem like an eternity, it is just a few more hours away. So let's make the most of it, and enjoy the little solace for finals week that we can get.

Staff of The Daily Pennsylvania
This study would have no ending except for the fact that the two foremost historians he is Clark Kerr and Dean McHenry went on to found at least two other universities, in addition to U.C. Santa Cruz, the University of Arizona and the University of California at Santa Barbara. Their ideas were so influential that they eventually led to the creation of a university composed of a number of small colleges. The University of Arizona was founded in 1919 and the University of California at Santa Barbara in 1947.

This college, the one that Mr. Kerr went on to help found, was the University of California at Santa Cruz. It was founded in 1964 and is situated on a 190-acre campus overlooking the city of Santa Cruz and the Pacific Ocean. The campus is in a beautiful setting and is surrounded by a number of parks and natural areas.

The university was founded as a way to provide more affordable education for students in the northern California region. It was also founded as a way to provide a more diverse academic curriculum.

The university is composed of a number of small colleges, each with its own unique focus. The college of Arts and Sciences is the largest of the small colleges and is composed of a number of different departments, including the departments of English, History, and Economics.

The college of Arts and Sciences is divided into a number of different departments, each with its own unique focus. The department of English is one of the largest of the small colleges and is composed of a number of different sections, including the sections of English literature, English composition, and English literature and writing.

The department of History is another of the largest of the small colleges and is composed of a number of different sections, including the sections of American history, European history, and world history.

The department of Economics is another of the largest of the small colleges and is composed of a number of different sections, including the sections of microeconomics, macroeconomics, and econometrics.

Birth Control without Hormones

EKO is a highly effective spermicide in an aerosol form that is deposited at the opening of the uterus with an applicator. The form blocks the spermicides that kill them on contact.

EKO continues to hormones and does not interfere with the circulatory system or affect your body chemistry.

You use it only when protection is needed. Apply it in seconds...up to an hour in advance. Won’t leak, run, or interfere with sensations.

Recommended by physicians. It is highly effective, but so safe and simple to use you can buy it at drug depositories without a prescription.

Hassled by your parents?

Do they hint that you should write ‘more often’ and let them know what’s going on in Paris?

When you get home for the weekend do you get stuck at home telling your parents what’s happening on campus instead of spending the time with friends?

Make life easy for yourself!

Give your parents a subscription to The Daily Pennsylvanian and they’ll think you’re helping out and instead of spending the time with friends.

American Mammies, and Bucks: An Interpretative History of Blacks and American Movies

Bogle said. "You can't say that the films were ideal in any way, shape or form. They were the product of a particular time and place."

"Tom's Cabin," which made it appear that "a torn, a coon, a mulatto, a mammy" was the black stereotype in American films, appeared in 1903 in a 12-minute version of Uncle Tom's Cabin, said Bogle."

"The black film industry was in its infancy, struggling to find its voice and its message," said Bogle. "But the films themselves were direct reflections of the society and culture of the time."

" films. "They were the ideal in the sense that they were the only black images in American films."

According to Bogle, the first "torn" black actor to "receive featured billing" in American films was Bill "Bojangles" Roberts. Bogle termed the fifties "the intensive, as long as the history of Black Images in Hollywood: 1915-1969."

Icemen Seek Revenge vs. Tigers

AS BYTH BROWNING
The Princeton hockey team can be punished by the University of Michigan just like a red cat can be punished by a black cat. In fact, Princeton is quite a bit worse off than a red cat when it comes to punishment from the University of Michigan. The Michigan team last week had won at Dartmouth and Harvard, but now they look to claim a victory over Princeton at the Class of ‘23 Rink as it takes on a much-improved Princeton hockey team at 7 p.m. tonight.

The Icemen lost to Michigan on Jan. 11 when the Wolverines scored in the final minute of regulation to beat the team 3-2 in overtime. Tonight’s game is the first meeting of the two teams this season, and the Icemen are looking to make the Wolverines pay for their previous victory.

Michigan is coming off a 2-1 win over the University of Connecticut on Saturday and will be looking to continue their winning streak. Princeton, on the other hand, is coming off a 1-0 loss to Brown on Friday night and will be looking to bounce back in tonight’s game.

Both teams have had strong seasons thus far, with the Icemen having a record of 6-4-1 and Princeton at 7-2-1. The Icemen are currently ranked 10th in the nation, while Princeton is ranked 16th.

In a heated battle of one of the top teams in the nation, expect a hard-fought game as both Princeton and Michigan strive to come out on top. The class of '23 rink is sure to be the site of an intense battle for control of the game and the chance to bring home a win for their respective teams.

Indoor Track Squad Begins New Campaign

DANNY BERRY

The indoor track team is gearing up for a new campaign after a successful outdoor season. With a mix of experienced athletes and new talent, the team is looking forward to the challenges ahead.

Ken MacKinnon, the anchor man of the indoor team, is ready to lead the team this season. He is coming off a strong outdoor campaign and is looking to build on his success.

Other key returners include Steve Morningstar, who is looking to improve his times in the mile and two-mile events, and Mike Davenport, who will be focusing on the sprints.

The team will be facing tough competition as they look to improve upon their outdoor season. With several key losses from the previous campaign, the team will have to step up in order to compete at the highest level.

Despite these challenges, the indoor track team is confident in their ability to perform well. With a strong group of athletes and a solid coaching staff, the team is ready to take on the upcoming season.

The team will have several opportunities to test their skills throughout the season, including the Ivy League Championships and the NCAA Indoor Championships. These events will be key to determining the success of the indoor track team this season.

Overall, the indoor track team is excited to begin another campaign and is looking forward to the opportunities that lie ahead.
