MAY RECONSIDER WALNUT STREET SURVEY

By LARRY FIELD

The Department of Housing and Urban Development (HUD) is expected to reexamine the environmental effects of the shopping and office complex proposed for University City. For the black block of Walnut Street, this would mean another round of public hearings. A revised special Environmental Impact Statement (EIS) could lead to rejection of the proposed project if it is found to be significantly detrimental to the environment or if no alternative proposal is endurable in the current condition. Penn Union Concerts Hit by Many Setbacks

By JEFF BARON

In September, Electric Factory began promoting rock concerts at the Hubert Theater. The theater held 1,500, compared to 900 at Magid, however, does not have the same share of the audience because when he produces concerts in another theater, he is in competition with other managers bidding for the same audience. Magid has been making more money at the Hubert because he has better control of the audience. Magid also agreed to take on other duties, thus gaining more control over the audience, and agreed to take over the management of the theater itself, which would also give him a share of the theater's profits.

I'm full confident that nothing is impossible. As long as you have the drive, you can achieve your goals. (Continued on page 3)

Recently-Manufactured Computer To Greatly Increase U.'s Capacity

By MARC GOLDSTEIN

A new computer system that will be operational within the next few months. The system can be used by any department of the University. It is expected to be used by the University's second floor of Van Pelt Library.

Until the present system is operational, the second week of February. The new computer system is manufactured by the Digital Equipment Corporation. The system is high-speed processor, a central memory bank of storage

128K words of information, and additional storage capacity of 403 megabytes. It is expected to be operational by the summer of 1974.

The computer system is expected to be used to replace the regular computer, which is used to replace the regular computer, which is a mainframe computer.

What time sharing does is spread the use of the machine over a large base. The system is expected to be operational by the summer of 1974.

The University security force has acquired a 1965 Cadillac to augment regular patrol vehicles, giving added ability to campus police.

Since Early September, film cancellations and concert famine reportedly sold out. Shortly after that, many movies cancelled started two hours late. I'm the bald minutes, another 20 minutes. They screening Thursday, it was curbed Friday with the film "A Clockwork Orange," said in December that he recalled by the distributors before cell due to damages. One third of approximately 400, is equipped with a 16 mm projector. Irvine Auditorium each month, where lower activities None of this money supports the Palestra's adverse conditions. The last concert was 1970's Poco, for example, is $15,000. The minimum offer accepted by Seals tower, the Shubert, or the Spectrum was unsuitable for the building's poor acoustics. The sound system has not been improved since, although PUC is currently examining the possibility. "The Penn student body," former PUC advisor Mary-Ellen Josephs said, "wouldn't have had many this semester to support student activities. None of this money supports the Palestra's adverse conditions." When asked why the popular film "A Clockwork Orange" was cancelled, PUC Chairman Ken Kaplan said, "We are interested in keeping ticket prices as low as possible." When asked about the lack of communications with the student body, Kaplan said, "There is a lack of information within the Student Council. We simply don't know what's going on." Films should be planned for winter months. Two screenings in December are scheduled. A project officer who recently reviewed the meeting minutes said, "A judge gave us the necessary law." StVEWSTEIN

"Those Thoughts"

Gazette Denies Charges of Misrepresentation

Diane Bolender and Jacqueline Wolfe's piece on misrepresentation of women in the pictorial essay which appeared in the December issue of the Gazette may have been misconstrued. We refer you to the article on page 18.

Mary Ellen Stecklow and Alice Mathes' article in the December issue of the Gazette may have been misunderstood. Our intention was to provide a historical perspective on the development of comics and to highlight the unique qualities of each medium. We did not suggest that comics are inferior to other forms of media. Instead, we emphasized the importance of recognizing the strengths of each medium and understanding their distinct contributions to entertainment and society.

We agree that comics and other forms of media have the potential to influence people's beliefs and behaviors. As responsible creators and consumers, we should be aware of the potential impact of our work and strive to create content that is responsible and respectful.

Write Us

The Daily Pennsylvania welcomes responses from the University community in the form of editorial columns and letters to the editor. Material should be typed approximately 48 characters to a line, double-spaced and signed, although names will be omitted upon request. Address to: 4th and Chemla Halls, Philadelphia 19104. New Light on Energy Crisis

By Steve Stecklow

The energy crisis continues to be a major concern for both the United States and the world. The recent cold spell has only exacerbated the situation, and it is clear that we need to find solutions to this problem as soon as possible.

In this article, I will discuss some of the potential solutions to the energy crisis, including the use of alternative energy sources such as solar, wind, and geothermal power. These sources of energy are renewable and can provide a long-term solution to our energy needs.

I will also address the role that government policy plays in addressing the energy crisis. The government has a significant role to play in encouraging the development and adoption of alternative energy sources, and there are a number of policies that could be implemented to support this goal.

I hope that this article will provide some insight into the energy crisis and the potential solutions that are available to us.

Day in the Life

Dear Mister Fantasy-Man

By Gerald Early

In his new book, "The Art of Fantasy," the celebrated illustrator and author explores the rich history of the genre and its impact on modern culture.

The book is divided into three sections: "The Beginnings," "The Golden Age," and "The Contemporary Era." Each section provides a comprehensive overview of the key figures, movements, and trends that have shaped the genre.

The "Beginnings" section covers the early years of fantasy illustration, from the 19th century to the mid-20th century. It includes discussions of iconic artists such as Gustave Dore and John Bauer, as well as lesser-known but equally important contributors.

The "Golden Age" section focuses on the period between the two world wars, when fantasy illustration reached new heights. It highlights the work of such luminaries as Maxfield Parrish, Virgil Finlay, and Basil Gogos.

The "Contemporary Era" section looks at the developments in the genre since the mid-20th century, with a particular emphasis on the impact of digital technologies.

Overall, "The Art of Fantasy" is a comprehensive and engaging account of the genre, suitable for both die-hard fantasy fans and those new to the world of fantasy illustration.

I hope you enjoy reading this book as much as I enjoyed researching and writing it. Happy reading!

Oil Industry Accused of 'Cheating'

WASHINGTON (UPI) - See, Abraham S. Ribicoff, D-Conn., chairman of the Senate permanent subcommittee on investigations, accused the oil industry of cheating the United States in the pricing of imported oil.

Ribicoff, in a statement released Monday, said the oil industry had been accused of cheating by the United States Customs Service.

Ribicoff said that the oil industry had been accused of cheating by the United States Customs Service.
