Hike in U. Tuition, Fees Second Greatest in Ivies

By PETER Gergen

The University's $80 tuition and $800 room and board increases (a total of $960) are the second highest increases ever for any U. campus. The Increases in 1974 were $80 in tuition and $800 in room and board, for a total of $880.

According to the U. president, the increases will be used to cover the cost of operating the university. The increase in tuition will cover the cost of teaching, while the increase in room and board will cover the cost of providing housing.

The increases are in response to the rising costs of operating the university. The president said that the university is facing a financial crisis and that the increases are necessary to keep the university running.

The increases will go into effect on August 1. Students will be billed for the increases in September.

Suspect Arrested In Law School Incident

By ANTON NAPOLI

A suspect has been arrested in the recent incident at the University of Pennsylvania Law School, the university announced today.

The suspect, a student, was arrested after a series of incidents occurred on the campus. The incidents included a disturbance in the law library and a protest by students calling for the suspension of a faculty member.

The university said that the suspect had a history of disciplinary problems and that he had been suspected of involvement in previous incidents.

The university is investigating the incident and is working with the police to determine the suspect's role.

Experts' Panel To Study Topic Of Aggression

A panel of experts will study the topic of aggression. The panel, which will be chaired by Dr. David Rockerfeller, will meet in the College of Arts and Sciences.

The panel's goal is to develop a set of recommendations for the university and for the community. The panel's work will be based on a review of the literature and on consultations with experts in the field.

The panel's work will be ongoing and will be reported to the university in the fall.
Inquiry

Rockefeller (Continued) From page 1)

"I think they've made a mistake," said one of those most knowledgeable in the field, "in the way this is being presented. But I think you have to choose between two alternatives: a very high rate of return, or a relatively low rate of return where you can say that you're getting the money back. It's an extremely high-risk investment." Rockefeller is known for his financial acumen and has been cited as saying that oil was a highly speculative business and that there was a high probability of losing money. He is also known for his ability to make quick decisions and his ability to handle high-pressure situations.

The Rockefeller family is one of the wealthiest in the world and has been involved in various business ventures, including oil production and refining. Rockefeller is known for his philanthropic work, particularly in the field of education, and has donated millions of dollars to various causes. He is also known for his interest in art and culture, and has been involved in various art-related endeavors.

The Rockefeller family has been involved in various political campaigns, including the 2000 presidential election, where they were active in supporting the candidacy of Al Gore. Rockefeller is known for his political acumen and has been involved in various political campaigns, including the 2000 presidential election, where he was active in supporting the candidacy of Al Gore. Rockefeller is also known for his interest in the environment and has been involved in various environmental initiatives, including the establishment of the Rockefeller Environmental Fund.

Editorial, Reporting Termed "Inadequately Researched"

In response to your editorial concerning the YSSA, I would like to point out that your discussion is unfair and inaccurate. You make several assertions about the activities of the YSSA that are not based on fact. For example, you state that the YSSA is involved in political activities that are not consistent with its stated goals. This is not true. The YSSA is a political organization that is committed to the principles of socialism and its goals are clearly stated in its constitution. You also make several assertions about the YSSA's membership and funding that are not based on fact. You state that the YSSA is a small organization with little membership and few resources. This is not true. The YSSA has a large membership and substantial funding. You also make several assertions about the YSSA's activities that are not based on fact. You state that the YSSA is involved in activities that are not consistent with its stated goals. This is not true. The YSSA is a political organization that is committed to the principles of socialism and its activities are consistent with its stated goals. You also make several assertions about the YSSA's relationship with the university that are not based on fact. You state that the YSSA is not a legitimate student group and that the university is not responsible for its activities. This is not true. The YSSA is a legitimate student group and the university is responsible for its activities.

In conclusion, I would like to state that your editorial is unfair and inaccurate. You make several assertions about the YSSA that are not based on fact. You should be more careful in your reporting and make sure that your assertions are based on fact before you publish them. Your editorial is not a fair representation of the YSSA and its activities. I would like to see you publish a correction of your editorial and apologize for your inaccuracies.
Research Project Shows Faculty, Students Satisfied With Bookstore

Students and faculty are generally satisfied with the bookstore, according to a marketing research project recently completed by the University Bookstore.

The results of a consumer satisfaction survey conducted recently in the Almanac will be used "to pin down" the areas in which improvement can be made, according to Joel Allison, the bookstore director.

"The main reason for this survey was to find out what the people really want so that we can better serve the community," Allison said.

The survey, which was conducted in late spring, was willing to answer any further questions which may arise. The booklet is available free of charge on the third floor of Houston Hall, and at high Ross East and the quaint Ross Residence Office.

Penn Consumers Board Releases Renting Booklet

The results of a questionnaire published recently in the Almanac will also be used. "The problem with Dorm Shop sales," Purgen said, "is that the goods do not attract enough demand. The problem is not a question of management or convenience."

Allison said he wanted to "pin down the areas in which improvement can be made." For example, he said, "we are interested in expanding in the clothing area. We now carry Lewis and Woolrich shirts. The survey pointed out the need to sell more student-related clothing such as Galbreath's."

The project has provided "insights for improving services and profits and loss figures," according to Purgen. "It allows us to keep close check on the needs of the community and to test new service concepts and changing tastes and desires among the university population."

Take a real long look at me.

That shouldn't be any hardship because I'm handsome. A thousand years of Irish inbreeding have produced these fine features, this pug nose, this pugnacious jaw. Moreover, I have a penetrating wit, a fanciful imagination, and my eyes are bluer than Paul Newman. I drive a yellow Volksswagen. I'm a hypochondriac. I believe in love of all kinds—carinal, platonic, fraternal, maternal, religious, etc. I'm too amiable, too unworldly, too disinterested to be a burlesque queen. It's Conroy, not Conrack but if you want to call me that, go ahead. I'mbeginning to like the sound of it."

I'd now like to hear some wild cheering.

JON VOGT

"CONRACK"

"HOW I MISSED THE PUCK AND BECAME A BETTER SPORTSCASTER."

When I started out in broadcasting, I'd just retired from football. (Involuntarily, after the Chicago Bears had broken my leg by jumping up and down on it a few dozen times.)

Anyway, for a while I carried over the football mentality—that we were the toughest, and that people who played any other sport were a little soft by comparison. Hockey, in particular. I looked on as some form of organized chaos. Anyway, the Flyers invited me over to work one day, and like a fool I accepted. I put the skates on and got out on the ice and tried to check guys and bounce them around a little.

Well, the only thing that bounced around was me. I bounced off the ice, the boards, everything.

So finally the guys put the puck in front of an empty net and said, "Go ahead, score, Brookshier."

Well, I took a look at that damn puck, and missed it clean and went sliding into the net like a sack of flour.

The Flyers were doubled up laughing.

Anyway, the Flyers invited me over to work one day, and like a fool I accepted. I put the skates on and got out on the ice and tried to check guys and bounce them around a little.

Arms Limitation Negotiations Remain Stalled

(Moscow - United States and the Soviet Union acknowledged today that Secretary of State Henry A. Kissinger had broken the deadlock at the Strategic Arms Limitation Talks (SALT) in Geneva, but it did not say what progress, if any, had been made toward that goal, indicating that the breakthrough Kissinger sought had failed. Kissinger said before leaving Moscow that the two sides of SALT had now reached a point where a comprehensive agreement was within reach. The announcement of a future SALT meeting would come later. Thursday, April 4-7, 1974)

Importance of Human Resources
Stressed by Swedish Auto-Maker

By ROBERT H. SCHER

"One important part of our strategy is people," Pehr Gyllenhammar, president of Sweden's Volvo Corporation, told a Vance Hall audience Wednesday.

Gyllenhammar said Volvo's philosophy is to deal more with people than with increased technology. "We think that we are more dependent on human resources," he said.

"It's money well spent," he said, adding that he needed more time to explain, worker identity with the product, and to be proud of their workmanship.

Gyllenhammar criticized the U.S. for emphasis on higher education, after people receive a college education, he said, they often refuse to work for perfect jobs and nonprogressive jobs.

"Do more you train a person, the higher his standards of interest will be," he said. "The more we educate people, the more we give them in.

In the U.S., he said, "you have made jobs poor, it's absolutely incredible. You are turning good workers into trash."

Commenting on the size of his company, Gyllenhammar said, "there are a lot of advantages of being small. Smaller factories mean in a beauty."

"One of our strategies is to stress our smallness," he said, adding that he knew how much company is an underdog. Volvo's small size, he continued, has allowed it to "fall flat on your face."

"I think it's a good position to be an underdog. You can do something, but you need to work even more efficiently," he said. But he concluded that a small firm "can have some drawbacks."

"You have to compromise for smallness in certain areas," he said. For example, he went on, a small company should not put too much into re- research and development. Otherwise, he said, it can "fall flat on your face."

When asked if the general tendency for auto manufacturers to produce small cars was a threat to Volvo, Gyllenhammar answered that Voltos's cars are different from American small cars. American cars play up luxury and extra features, he said, while Volvo are more conservative.

"We feel Volvo's biggest competitors will be other foreign cars," Gyllenhammar said in a formula for a successful Volvo Corporation is "stay with a narrow program in a narrow segment and to specialize."

"Volvo in currently expanding its factory production to the United States. It is the only non-U.S. car company to build plants here."

Volvo, in commenting on its factor production to the United States, is the only non-U.S. car company to build plants here. It is the only non-U.S. car company to build plants here. Twelfth-ranked Laxmen Attempt Rebound vs. Ninth-ranked Rutgers

By CHARLES SERVICE

In a team with 23 New Yorkers and an attack named David, the 12th-ranked Quaker lacrosse squad (1-1) will attempt to pull itself out of the doldrums Saturday afternoon at 3:30 P.M.

Teddy McDonald has given this team a chance to be among the leaders of the Easterns, held early in March. The Rams finally broke the ice in their first outing of the year. Petit passed balls, and their pitchers were behind most great scorers there is a #1 margin. The Rams might have won the tournament. Last year's mainline.
