Admissions Office Forced To Cut Recruiting Budget

By LARRY FIELD

The University’s admissions office is now preparing to tighten its recruiting budget for next year as an attack on the budget deficit, according to Provost Eliot Stellar.

"When we met last week to discuss the admissions budget, we agreed that we can and must reduce the recruiting budget," Stellar said.

The budget cuts are part of the University's overall effort to reduce its budget deficit. The University is facing a $200 million deficit this fiscal year, which has prompted budget cuts across the board.

"The University is doing everything it can to reduce expenses," Stellar said. "Reducing the recruiting budget is just one of the steps we are taking to address the deficit."
FOOD

Increased Cost of Sugar Sends Soda, Ice Cream Prices Soaring

by LACINCE TRACKEY

If you are a grocer with a sweet tooth, think twice about stocking up on sugar this fall. "Sugar is a price leader," said Wa&Wa President Lester Broadbelt. "If the price of sugar goes up, you have to pass the increase on to the consumer."

Increased Cost of Sugar

Sugar prices have soared in recent weeks, causing the price of bread, flour and grain prices have also gone up, causing the price of bread, flour and grain prices have also gone up, causing the price of ice cream and candy to rise. The price of chocolate in the coming months, said Grant, is "just a beginning." "The price of soda is not to be taken lightly," said Wa&Wa President Lester Broadbelt.

Sugar and the Economy

Sugar prices have risen due to a reluctance on the part of sugar producers to produce as much sugar as possible, said Grant. "People don't like to eat chocolate cake that's made with sugar," said Grant.

Bread and the Economy

Bread prices have also risen due to a reluctance on the part of bread producers to produce as much bread as possible, said Grant. "People don't like to eat bread that's made with bread," said Grant.

DINING

New Firm to Control U. Dining Services

(Continued from page 1)

Recently, the University of Pennsylvania received a $300,000 grant from the National Science Foundation to study the effects of increased costs on the university's dining service. The grant will be used to evaluate the impact of increased costs on the university's dining service.

The grant, awarded to the University of Pennsylvania by the National Science Foundation, will be used to evaluate the impact of increased costs on the university's dining service.

The grant will be used to evaluate the impact of increased costs on the university's dining service.

AHA Statement

AHA President Edward Grant asserted that all the problems are not caused by increased costs. "The problems are not caused by increased costs. The problem is caused by the university's management. If the university's management would do something about the problem, the problems would be solved."
Disputing Minority Hiring Charges

Marc Goldfinger's recent article "The Mental Health Worker" has left me wanting more. His article and the ensuing discussion (which I was unable to read) serve to disprove his points. I'm not sure what it was that he was trying to prove, but the result is that his arguments are not persuasive.

I agree that there is a need for more minority representation in the mental health field. However, the problem is not as simple as he makes it out to be. The real issue is the lack of qualified minority candidates.

One of the problems is that many minority students are not aware of the opportunities available to them. They may not have the same access to information and resources as their white counterparts. This is something that the University of Pennsylvania can do more to address.

I also disagree with his argument that affirmative action is necessary to address the issue of minority representation. I believe that this is a shortsighted approach. The real solution is to focus on improving the quality of education at minority-serving institutions.

In conclusion, I would like to suggest that we need to consider the broader context of the issue. Minority representation in the mental health field is a complex issue that requires a multifaceted approach. It is not simply a matter of hiring more minority workers, but rather a matter of ensuring that minority students are given the same opportunities and resources as their white counterparts.

I hope that we can all work together to address this important issue.
Get high. With a high fidelity music system from Tech Hifi. During our annual back-to-school sale you can save money on some great music systems and separate components.

Tech Hifi offers you a selection of over 100 name brands to choose from. Our thirty-day price protection policy always guarantees that we won't be undersold by any hifi store offering similar services. And during our month-long sale, you still get a seven-day money-back guarantee, ninety-day 100% trade-in, sixty-day defective exchange, one-year speaker trial, an optional five-year warranty, and eleven more policies. We try very hard to take the worry out of getting high fidelity.

That's why everyone's so high on Tech Hifi.

But even if you're not quite ready to buy yet, come on in anyway. We'll give you a nifty "Get High" button, or a Tech Hifiyer (it's like a frisbee - but it's a freebee), or even a packet of deluxe rolling papers!

All you have to do is come in and say: high.
We invited a few friends for dinner and they helped clean up the Genesee River.

With the aid of a few thousand pounds of microorganisms, we helped solve the water pollution problem in the river. Maybe the solution will help others.

We need to control the processes in a way that uses some of the most efficient water-purifying systems. We've learned how to do it.

One process is called "activated sludge," developed in England. It involves a water-purifying system that has been used to treat sewage. The process is cheap, and it can be used in a variety of environments. The activated sludge process involves the use of microorganisms to break down organic matter in wastewater. It is an efficient and cost-effective method for treating municipal and industrial waste.

At Kodak, we were working on an environmental improvement project involving the use of activated sludge. We built a pilot plant in Rochester to test the feasibility of the process. The pilot plant was successful, and we were able to achieve a significant reduction in the amount of pollution entering the Genesee River.

The process involves the use of microorganisms to break down organic matter in wastewater. The microorganisms are grown in a tank called an anaerobic digester. The digested material is then pumped into a second tank, where it is aerated. The oxygen in the air helps the microorganisms break down the organic matter.

The sludge that results from this process is then filtered and treated to remove any remaining impurities. The treated sludge can then be used as fertilizer or as a source of energy. This process is cost-effective and helps to reduce the amount of pollutants entering the Genesee River.

We are proud to have played a role in solving this environmental problem. We believe that by working together, we can make a positive impact on the world around us.
University Professors to Warn Students With Unpaid Tuition Bills

BY JACOB BERGES
Beginning this semester, University professors will be doing more than teaching and research. Through the registration policy which became effective August 30, professors have been asked to warn and ultimately eject these students in their classes who have not paid their tuition. The Registrar's Office is sending the names of unpaid students to the first which was distributed last Friday.

According to a memo from University President Charles E. Orten, it is because, "a new feature of these class lists is the ability of professors to eject students after a student's name," indicating that the University administration has promised his bill. Students whose names lack this notation in the initial list will not be ejected by the professor that the payment has failed.

This Friday professors will receive a second mail call regarding this matter, if the double strike is still missing, the memo continues, "the student is not entitled to remain in class."

Assistant Registrar Evelyn Barkworth Monday she said the administration policy "necessary" because of the elimination of class cards. She called the new policy a "huge TABALA and day-to-day." She emphasized the importance of the cards were proof of tuition payment for previous years, she explained, class bills, etc. The memo continues, the student is not "necessary" because of the elimination of class cards.

Two were participating in the various cost-parmn. Fellowship Program, now in its fifth year which has been given special importance to students a class expense to the workings of government and the relationship between the public and private sectors of the economy. The students worked for at least three months in a government office to cover their training in business or management.

Students were placed in both govern- mental offices in the Federal and local level, including the Small Business Administration, the Philadelphia School District, the Philadelphia Parking Authority, the Consumer Com- mission, the Consumer Product Safety Commission, the State Council and the Federal Environmental Quality.

Students were divided into the program in the following basis: the first year for the first which was distributed last Friday.

Students were divided into the program in the following basis: the first year for the first subdivision of the registration department. Students in the second year for the second subdivision of the registration department. Students in the third year for the third subdivision of the registration department. Students in the fourth year for the fourth subdivision of the registration department. Students in the fifth year for the fifth subdivision of the registration department.

Grant Creates Center to Study Muscle Disease
By LARRY MITCHELL

The Muscular Dystrophy Association of America has presented the University with a $1.75 million Grant for 1979, the first of a three-year series of grants designed to establish a research center here which would cater to the needs and goals of people with muscular dystrophy.

The new center, presently in operation, is called the Henry M. Wolf, Sr. Neuromuscular Disease Research Center, dedicated last October 12 by Philadelphia philanthropist who since 1945 has served as president of the MDA.
The center is one of a number of research facilities supported by the MDA, which actually constitutes one of the nation's largest single research programs. The center is located in the medical school building on Magee Avenue, in the offices of Dr. William Richardson, professor of orthopedics, and Dr. Richard Zeman, its director.

Chairman of the Medical School's Department of Neurology, Dr. Zeman said he is trying to determine whether the select group which suffers muscular dystrophy differs in muscle or nerve cells. The type of muscular dystrophy is in animals, especially mice.

According to Schellhammer, the division of the research being done to sum up with two questions, "If the involvement is on the nervous system's, then it's abnormality" and "If there is some infraction on the muscle membrane." University researchers have been working in the field of neuromuscular diseases for many years. One of the major reasons for the recent wave work here is due to the late Dr. Milton P. Byer, a pioneer in the study of muscular dystrophy.

Researchers, according to Schellhammer, have been looking for answers in the muscular system, including muscles and nerve cells. The current research is focused in the area of muscle cells, especially in animals as mice. Researchers are working to determine whether the select group which suffers muscular dystrophy differs in muscle or nerve cells. The type of muscular dystrophy is in animals, especially mice.

Recruiting Budget Cut

(Continued from page 1) RICHARD'S RECORD

An Introductory Meeting of POOR

Faculty Senate Created
By School of Dentistry

By RANDY MARKS

In an effort to deal with salaries, recruitment, and problems associated with the University's dental faculty, the dental school has created a faculty senate. The new policy, based on a motion made by the Dean and the dental faculty, includes every full time member of the ranks of assistant professor or above and clinicians who spent a major part of their time at the school. Dean D. Walter Jacob will chair the group, while Professor of Radiology Harlan Horsley has been designated as secretary for a one-year term.

According to Chairman of Dental School Hammond, the new dental faculty policy is an outgrowth of the continuing Dental School policy problem. The school has always been considered the Senate will have an "inevitable" that the Senate will have been able to solve the problem, he said. By School of Dentistry

For Said to Have Sought Nixon Confession

WASHINGTON (UPI) — David Eisenhower said Thursday that his father, President Richard M. Nixon, had suggested making a run for the presidency in 1976 rather than seek re-election to the White House.

"Nixon and his father, David, have had a lot of discussion in the past few weeks," Mr. Eisenhower said. "I think Nixon has no plans to run for the presidency in 1976 unless he is asked to do so by the Republican Party or unless he can come up with a better candidate than the incumbent.

"But Nixon is deeply depressed and has no plans to run for the presidency in 1976 unless he is asked to do so by the Republican Party or unless he can come up with a better candidate than the incumbent.

"But Nixon is deeply depressed and has no plans to run for the presidency in 1976 unless he is asked to do so by the Republican Party or unless he can come up with a better candidate than the incumbent.

SOPHS ARE EVERYWHERE IN BOOTERS' '74 CAMPAIGN DRIVE

By TOM BETTERA

What possible role can a young, untried, untested club fill in its season, its team, its university? Our answer: a big one.

Our young club is the 74' Bucola Bucolos. It is the first team of the new era which has been formed to carry on the traditions of a storied Bucola tradition.

The key word here is tradition. Our team will be built around the tradition of excellence and hard work which has been the hallmark of the Bucola Bucolos.

The team will be comprised of sophomores and juniors who have shown their ability to compete at a high level. They will be led by the senior leadership of Captains Steven Hasselback and Michael Murphy.

The team will be a hardworking, disciplined group which will be committed to excellence. They will be a team that will give its all in every game and every practice.

We are looking forward to a successful season and we believe that our team will be a credit to the Bucola Bucolos tradition.

Brown Heads Soccer Foes

By BOB PALMER

Rhode Island is a flavorful, salty team that has been a diplomatic force in the nation. It is a team that has been invited to play in several international tournaments and has been successful.

The team has a strong defense which is complemented by a solid midfield and a potent attack. It is a team that is well-balanced and has the ability to keep possession of the ball and create scoring opportunities.

The team has a few key players who are expected to make a big impact this season. Senior forward John Borozzi is a key player who is expected to lead the team in terms of scoring. Senior midfielder Dan LaPorte is expected to add leadership and experience to the midfield.

The team has a strong schedule and is expected to compete well against some of the top teams in the nation. It is a team that has the potential to make a deep run in the conference and possibly even the NCAA tournament.

The team has a strong coaching staff led by Head Coach Mike Formosa. The staff has a wealth of experience and is expected to provide strong leadership to the team.

The team has a strong fan base and is expected to have a strong home field advantage. It is a team that has a strong following and is expected to draw a large crowd to its games.

The team has a strong tradition and is expected to continue the legacy of success established by its predecessors. It is a team that has a strong commitment to the sport and is expected to give its all in every game.

The team has a strong future and is expected to continue to build on the success established by its predecessors. It is a team that has the potential to make a deep run in the conference and possibly even the NCAA tournament.
