Condon Bars Fallat, Two Others From Further WXPN Participation

By IAN BERGER

In its first direct action since taking control of radio station WXPN, Student activities Director Jerry Brater on Monday has phoned in two WXPN program managers and told them they will not be present if WXPN's constitution is not suspended.

Brater, who also serves on the University's Undergraduate Affairs Council, chairs a committee of campus representatives that examines the WXPN constitution.

Brater announced Monday that WXPN Program Director John Epstein and Assistant Program Director Heidi Solomon have been suspended.

Brater has said the move is "correcting a number of problems" that have existed at WXPN since he took over the campus radio station in August, he said.

"That's enough," he said of WXPN after adding that the move was part of a "progressive" program of both management and student movement to "correct some of the problems that have been going on at WXPN." He added that the move was "an attempt by [the] Undergraduate Affairs Council to correct some of the problems that have been going on at WXPN," he said.

Brater added that WXPN is "an important part of the University's cultural and intellectual life" and that it "wants to make sure that WXPN is able to continue to function as a viable cultural and intellectual center.

FAS To Vote On Changes In UGCRD Criteria

By MARTIN GREGG

The University has approved a series of changes to the Undergraduate Affairs Committee's general criteria for funding proposals, the University announced Monday.

The changes, which were made in response to a number of requests from students, are designed to make the criteria more flexible and responsive to the needs of the students.

In his annual budget message to the state legislature March 11, Shapp proposed a $5.2 million cut in University's appropriation of $5.2 million. The cut would be spread out over 15 months rather than the conventional 12 months, because state guidelines called for an equal spread of the appropriation.

The proposed cut would result in a 4.2 per cent increase in the state's appropriation to the University for 1974, which was set at $5 million in 1973.

The University sent a request for $5.2 million in the University's appropriation when he asked the legislature for the appropriation.

In addition, the Governor proposed to allocate $5.2 million in the University's appropriation for FEWC scholarships for students in the state.
Freshman

(Continued from page 1)

However, Assistant Admissions Dean Ted Langford and Monday's residence of the admissions staff is "strange" to the student. It's better to come up with too many students an hour than for them during the summer," he explained.

Langford said the slogan "produces the percent of students who will enroll." The slogan "because of the nature of the student," was used by the residence of the admissions staff.

Other problems in predicting the yield might arise because of the changes in the admissions of freshmen, Langford explained.

Murphy said the yield in the past four years has averaged 46 percent, but the number of students from 554 last year to 603 this year, according to the residence of the admissions staff. The Engineering School, whose average yield has been 46 percent in recent years, is also a target for the 554 last year to 603 this year.

This is in producing the total student. Langford said, because they're reducing enrollment because of the changes in the schools which yield the

Assembly Chairman Bud Stein and PCP, chairman Jerry Macris, said that events were not at all as such; it is simply that events have occurred that seemed appropriate a month or so ago.

Theater

The department never expected him for the year, but did expect the students to come, he explained. However, because "we're not in the business of producing students," now to people before the five year period ended, I didn't think the one day, and they didn't offer," Broer said.
Richard Beeman
Nominated for National Award

By MITCHELL NOREK
Associate Professor of History Richard Beeman has been nominated for the National Award in Biography for his recently published study of Patrick Henry. Beeman said Monday he was "pretty happy" about the nomination, but admitted, "I don't think I had a chance of winning" the award. Beeman is of the 18th century, a period for which he received the $10,000 prize in biography.

The National Book Awards, which are presented annually, will be announced April 14 in New York. The announcement of the awards is traditionally scheduled to be made April 14th because of its significance in the life of Patrick Henry, "life as a man." The National Book Awards are given to distinguished writers for their "nonfiction work of the year." Beeman's book was nominated in the category for "nonfiction" and was also nominated for the "National Book Award in Biography." Beeman is the only Virginia Governor to win a National Book Award in Biography.

Wharton Forecasters
Predict Unemployment Will Continue to Rise

By ELLEN GINSBERG
"We're not out of the doldrums yet," said Dr. George T. Adams, Wharton EFA director, last Wednesday. "Our forecast for the nation's economic outlook is a sad one." He added the economy faces the "most severe and extended recession of the postwar period."

Adams claimed the forecast of inventory readjustment, accompanied by minimum growth in production and employment, will continue to dominate the economy during the first half of the year, he said. However, the Wharton forecast claimed this process of "inventory readjustment" will end by this fall and normal production will resume. The forecast predicted increased consumer spending would continue to generate "a powerful upturn late in the year." Adams predicts moderate inflation, economic growth and a slight increase in the rate of unemployment will continue to ease in the rate of inflation and a drop in the rate of unemployment will continue.

The Wharton EFA secretary-treasurer Adams said "the story of the economy forecast is a sad one." He added the economy faces the "most severe and extended recession of the postwar period."

Adams explained decreased sales were caused by a "devaluation of domestic purchasing power." Efforts to reduce these severe inventories through cutbacks in production and employment will continue to dominate the economy during the first half of the year, he said. However, the Wharton forecast claimed this process of "inventory readjustment" will end by this fall and normal production will resume. Shapp's Shoddy Plans

Governor Shapp's budget message stood out work alone's an amazing lack of understanding and sympathy for the University's serious financial plight.

It was especially surprising for a governor who has claimed commitment to the quality of top-flight colleges and universities within the state. The Governor's failure to appreciate the University's financial situation wasbaraful. The more committed he is supposedly to the University, the more he fails to understand its problems.

The Governor, like all his predecessors, is among the most hardheaded of the elected officials, and this is especially evident in his handling of the University's budget. He has consistently failed to recognize the University's financial difficulties, and has ignored the University's sincere request to increase state support for the University's education and research programs.

The Governor's inattention to the University's financial situation is evidenced by the fact that he has failed to provide adequate funding for the University's educational programs. He has repeatedly refused to increase state support for the University, even though the University has consistently demonstrated its ability to provide high-quality education at reasonable costs.

The interior Department immediately announced it will resume plans to lease 12,000 square miles of seabeds between Long Island and Cape Bettas. Geological surveys indicate the area may contain more than 100 miles out to sea at some points.

Blue Ribbon quality means the best tasting beer you can get. A quality achieved only by using the finest ingredients and by adhering to the most rigid of brewing standards.

In Milwaukee, the beer capital of the world, Pabst Blue Ribbon continues to be the overwhelming best seller year after year. Blue Ribbon outsells its nearest competitor nearly five to one. That's why we feel we've earned the right to challenge any beer.

So here's the Pabst challenge: Taste and compare the flavor of Blue Ribbon with the beer you're drinking and learn what Pabst quality in beer is all about. But don't take our word for it. Taste our word for it.

Pabst. Since 1844. The quality has always come through.
Every generation has its own films — works that capture the spirit of its times. It may be years, or only a few months, before the film’s strengths or weaknesses become clear. Today we turn to the films of the outsiders, thejerkies, the rebels of the 1970s who are rediscovering their audience now that they have aged into the Establishment.

Early Fellini

For many critics, Fellini’s early films are among his most memorable works. They also heralded a new form in film history: the exploration of the human mind. Fellini’s so-called “mental cinema” was born out of his interest in the relationship between the subconscious and the conscious, and in the way it shapes our everyday lives. He was a master of the surreal, and his films are characterized by their ability to evoke the irrational and the unknown.

Fellini’s first major film, Le Notti del capo (1955), was a critical and commercial success, and it established him as a major figure in the Italian New Wave. Over the next decade, he would go on to make a series of groundbreaking films, including Nights of Cabiria (1957), La Dolce Vita (1960), 8 1/2 (1963), and Satyricon (1969).

Fellini’s films are known for their use of dreamlike imagery and their exploration of the human psyche. He was interested in the way that the mind works, and he often used his films to explore the nature of the subconscious. His films are often characterized by their use of symbolism and their exploration of the human condition.

Quality of Research Keeps Funds Flowing

The University’s research programs continue to be a major source of funding for the institution. The University’s research funding has increased by more than 10% over the past year, and it remains one of the top sources of research funding in the country.

The growth in research funding is due in part to the University’s efforts to attract and retain top researchers. The University has invested heavily in new research facilities and has created new positions to support research efforts.

Research grants are awarded to University researchers who propose projects that align with the University’s strategic priorities. The University’s research programs are also supported by federal and state funding agencies, as well as private foundations and corporations.

The University’s research programs are diverse and span a wide range of disciplines, including the arts, humanities, sciences, and social sciences. The University’s researchers are involved in a wide range of projects, from basic research to applied research.

Research is essential to the University’s mission of teaching, learning, and discovery. The University’s research programs are a major contributor to the University’s overall success, and they are a key factor in the University’s ability to attract and retain top students and faculty.

By LEE FRANKEL

The Princeton men's and women's track teams proved they are a force to be reckoned with at the NCAA Indoor Track Championships this past Saturday at Detroit's Olympia Sports Center. After a quick glance at the scoring summaries, Princeton's performance was truly impressive. With a third place finish overall, the men's team accrued 55 points, while the women's team scored 69 points, both significantly ahead of the competition. These performances solidified Princeton's status as a dominant force in collegiate track and field.

The Princeton men's team was led by strong individual performances and a cohesive team effort. Quaker sprinter Mark Stebbins, known for his exceptional speed, showcased his abilities once again with a strong showing in the 60 yard dash. His time of 6.52 put him in the top three and contributed significantly to the team's overall score.

On the women's side, the Quakers were equally impressive. Notably, senior Louise Doublin, a standout in the middle distances, earned All-American honors with her performance in the 3000 meter steeplechase. Her time of 9:50.6 placed her third, adding valuable points to the team's tally.

In addition to individual achievements, the Quaker relay teams performed exceptionally well. The women's 4x400 meter relay team finished 13th in the nation with a time of 3:32.0, demonstrating the team's strong teamwork and speed.

Looking ahead, Princeton's track and field program is looking towards the NCAA Outdoor Championships, hoping to maintain their momentum and achieve even greater success. The Quakers are one of the teams to watch as they aim to continue their impressive run of achievements in collegiate track and field.

Formula Zero

The South Shore Buccaneers' 127-123 victory over the Wisconsin Badgers in the second half secured their spot in the NCAA tournament, ensuring they will be among the nation's top teams. The Buccaneers' performance was a testament to their resilience and determination.

The win proved crucial as the Bucs faced stiff competition throughout the season. Their ability to overcome challenges and emerge victorious demonstrates their prowess in the sport. As they prepare for the NCAA tournament, they will be looking to continue their winning streak and make a significant impact on the national stage.

Fencers Glide into Third at IFA's

With the Easterns swimming championships nearing its conclusion, the Princeton men's and women's swim teams continue to impress. The women's team captured third place overall, significantly ahead of the competition. Their performance was a result of a cohesive team effort and individual standout performances.

Aided by the likes of Princeton, Harvard, and Yale, the women's team's consistent showing underlines their strength and potential to challenge for a top spot. Their strong showing in the 4x100 relay, a testament to their speed and coordination, solidifies their standing as a competitive force in collegiate swimming.

The men's team also delivered a strong performance. They placed third overall, a testament to their dedication and hard work. Their individual achievements, such as Chris Thayer's gold medal in the 100 yard backstroke, were crucial in their overall success.

Throughout the competition, Princeton's swim teams demonstrated their ability to excel on the national stage. With another Easterns title under their belt, they will be looking to continue their winning streak as they prepare for the NCAA championships. Their performances speak to their commitment and passion for the sport, setting them up for another successful season.
