Students May Receive Rebates For Saving Energy in U. Housing

By ELLIN S. KREISBERG
The Pennsylvania Student Lobby, a group of students pushing for lower energy costs by the University, has stirred up interest on campus. The proposal has not been approved; it is shown here as a possibility.

In 1974, William Manchester has presented us with a visit to the University campus. He stated that "The University's commitment is to maintain all facilities and equipment at a cost that is reasonable and affordable to the student body." He mentioned that if the college were to raise the price of electricity, "People might be shooting out lights and reducing energy use." He also commented that "People would not be willing to stay in the building if they were not comfortable." This is not the case at the University, where students are comfortable in their rooms and buildings. However, if the college were to raise the price of electricity, students might be forced to reduce their energy use. This is because the cost of living at the University is already very high, and students do not have enough money to pay for their rent and bills.

The University's decision on how to handle the energy crisis is not reflected in financial savings. The proposal should definitely be implemented. The committee on energy conservation between the University and students should be persuaded to continue. They are convinced that the University's decision on how to handle the energy crisis is not reflected in financial savings. The proposal should definitely be implemented. The committee on energy conservation between the University and students should be persuaded to continue.
The faculty has not yet formulated any concrete guidelines for approving individualized clusters.

You really think you’re saving something. Like the time it takes for the cluster plan to settle; the cost of the cluster plan to take up each of these three subject areas.

The first column lists sample course selections satisfying CW and pre-core course requirements in each of three subject areas. The second lists courses arranged to satisfy current College distributional requirements in each of three subject areas.

The second column lists courses arranged to satisfy current College distributional requirements in each of three subject areas.

The faculty has yet formulated any concrete guidelines for approving individualized clusters.

Many faculty members favor the cluster plan as an administrative and bureaucratic nightmare as well as a restriction on students’ initiative in experimenting in course selection. As one faculty member noted, the vote may come down to “choosing the lesser of two evils.”

Some faculty members found that 50 percent of the student senate voted against the courses in clusters in out of three distributional areas. Solomon said that many of the courses could come about from research and development and that faculty consensus is centered in the cluster proposal. Faculty members are not in favor of the cluster plan as an administrative and bureaucratic nightmare. While they cite the loosely structured CW distributional plan as being “academically deficient,” they tend to enfore the cluster plan.

Since Springer committee proposal and an alternative proposal came down to “choosing the lesser of two evils.”

The Myth of The ‘60s

By Cary Dymalski

The period of the ‘60s departed so far from the ideals espoused by its leaders that to call it a failure is to oversimplify the scope of the actual rebellion. The differentiation between Blacks and white kids, with the tensile strings that separated those between America and America’s ‘mainstream’-falling which did end the eventual economic crash bit. This double knockout punch forced most people to leave their more irrational views of society behind. Many of the kids became ‘hippies’ for a time and “hate” became a part of the hippie scene, and were from the middle classes made up the “groups” that existed both then and now. Outlandish fashions, “common denominators shared by rebellion.” Among these groups were those who fight for economic survival, those who have approached Mr. Lubert with the students and who are playing “college” with their ranks swelled by economic recession.

Grades, Grades, Grades, Grades, Grades... The feverish competition for grades, the obsession with the inflated grades of the ‘80s, has given rise to a distortion of our educational system. This feverish competition for grades, the obsession with the inflated grades of the ‘80s, has given rise to a distortion of our educational system. This feverish competition for grades, the obsession with the inflated grades of the ‘80s, has given rise to a distortion of our educational system. Ford Requests Kissinger Remain in His Post

PRAGA
WASHINGTON—President Ford has asked Secretary of State Henry A. Kissinger to stay in his post through the end of this term.

Kissinger told him Sunday morning in the Oval Office early last week and said, "I hope, the end of this term. It is my desire.

Kissinger replied, "I also am

"Kissinger was disgruntled at events
time Ford was opening a one day
paring warhead headed by reports
Kissinger was disgruntled at events

In April 1975, the United States, Soviet Union, and four Arab nations agreed to begin peace talks in Geneva, Switzerland. The talks were to include discussions on a number of issues, including the status of Israeli settlements in the occupied territories, the future of East Jerusalem, and the rights of Palestinian refugees. However, the negotiations proved to be difficult and contentious, and progress was slow.

The United States had been a key player in the Middle East peace process, but President Ford's administration faced challenges in balancing its interests with those of the other parties involved. Ford's request for Kissinger to remain in his post until the end of his term reflects the importance he placed on the ongoing negotiations and the potential for a resolution to the conflict.

The Geneva talks were also significant because they marked the first time the United States had explicitly supported the idea of a Palestinian state. This was a significant step forward in the peace process, as it recognized the legitimate aspirations of the Palestinian people.

In conclusion, President Ford's decision to request Kissinger to remain in his post through the end of his term highlights the importance he placed on the ongoing negotiations in the Middle East. The Geneva talks were a critical step in the peace process, and the United States played a crucial role in facilitating them. The stakes were high, and the potential for a resolution to the conflict was significant.

The Paleteros have been the breed of some amazing performances in the sport of basketball throughout the years. But this week it took its place beside Wilt Chamberlain and Bill Russell with a 35-point gem effort, a 40-point game, and a 31-point performance, setting off a three-fold winning streak. The winning streaks are now down to the final two games of the season. Wade, seeded fifth in the tourney, defeated three of his opponents, and with another man inside the final day, the Paleteros are now 17-0.

**UCLA, Kentucky Win In NCAA Semifinals**

TIED 77-77, both teams needed another game in the closing stages. UCLA and Kentucky were the only teams left standing in the 1975 NCAA basketball tournament. The Bruins and Wildcats, two of the top teams in college basketball, met in a showdown of the century. The game was played in Philadelphia, and the final score was 77-77.

**Trackmen Triumph on Two Fronts**

Although the NCAA outdoor track championships are more than two months in the future, Penn internationals Harold Schweb and the Quaker 4x4 relay team of Freese, Gansle, James, and Gansle have made an early statement by posting an excellent early season 800-meter relay time.

**ONE DOWN… MORE TO COME—Penn international Harold Schweb takes a big step over an intermediate-sized obstacle during a heat in the 440 hurdles at the Big Ten Relays at Franklin Field. Schweb took a big step toward the NCAA indoor hurdle races Saturday when he won the event in a meet record time of 11.4.**

**Cragg Connects at NCAA’s in Diving**

Cragg scored 20 points in the 10-meter event to tie for first place at the NCAA championships. Cragg, a senior at Penn, had scored 20 points in the 10-meter event at the Big Ten Relays and retained his position as the nation’s top diver.
