President Ford Will Deliver U. Commencement Address

By MICHAEL SHEVAN

How does one get the President of the United States to come to your graduation? For the University, the invitation was a foregone conclusion. Ford, however, had to be convinced to deliver the commencement address. The President's decision was finally made about two weeks before the date of commencement.

FAS Approves Clusters For Incoming Freshmen

By MARTIN SIGEL

The Faculty of Arts and Sciences (FAS) has approved a clustering plan for next year in a vote that is part of its new B.A. program. The clusters will be based on the student's major discipline and will provide a more personalized and supportive academic environment.

FAS adopts plan to help incoming freshmen

By LARRY FIELD

The Faculty of Arts and Sciences (FAS) has adopted a plan to help incoming freshmen. The plan includes the creation of a freshmen orientation program, the provision of academic advisors, and the establishment of a freshmen support network.

Mainly, the drop in G.P.A. trend this year has not been as steep as in previous years. The Faculty of Arts and Sciences (FAS) has requested in a letter from Meyerson that the drop in grades be addressed.

The Bachelor of Arts degree was officially abolished by the University this week. The move is part of the University's efforts to modernize its academic programs and to make them more relevant to the needs of today's students.

Shabel is Nominated For U. Vice President Of Operations Services

By CULLEN BRING

University Vice President for Operations Services Donald T. Shabel has been nominated to the position of University Vice President for Operations Services, Senior Vice President for Management Services, and Executive Director of Academic Affairs. Shabel has been a key figure in the University's operations, and his nomination is expected to be confirmed by the Trustees at their meeting Monday.

$3.6 Million U. Deficit

By LARRY FIELD

Budget Chairman John Babstoler claimed that the University's deficit this year will be about $3.6 million, according to a report by the Budget Director.

The prediction of a $3.6 million deficit is based on an estimate of $1.6 million in revenues this year. The deficit is expected to be offset by a $2 million budget deficit in 1980, according to Babstoler.

The prediction of a deficit is not new. The University has been facing financial difficulties for several years, and Babstoler's prediction is consistent with previous estimates.

The Faculty of Arts and Sciences (FAS) has requested that the deficit be addressed. Babstoler's prediction is expected to be confirmed by the FAS at their meeting next week.

President Shabel said Thursday he would carefully consider the university's financial situation before making any major decisions.

The drop in grades, which has been a concern for several years, is expected to continue. Babstoler said that the university is taking steps to address the issue.

The drop in grades is expected to continue, and Babstoler said that the university is taking steps to address the issue.

Committee to Sue RDA For Local Park Delay

By BRUCE MENSER

The Sansom Committee will file suit in Federal court today seeking the immediate construction of a park planned for the 100 block of Walnut Street.

The motion cites "all previous commitments the RDA has made" and requests that the court order the RDA to "proceed immediately with the construction and completion" of the park. Busse said the park is "a moral obligation." He called the fall weather delay "an excuse" and criticized the RDA for "not being ready when spring came." Busse claimed the RDA "had promised the park in order to convince the public to permit demolitions. When they saw that they dropped the whole idea." Busse said the RDA "has not made any definite starting date." He charged that the KIM project manager is not "very likely" considering the public commitment the RDA made to the public.

The motion cites "all previous commitments the RDA has made" and requests that the court order the RDA to "proceed immediately with the construction and completion" of the park. Busse said the park is "a moral obligation." He called the fall weather delay "an excuse" and criticized the RDA for "not being ready when spring came." Busse claimed the RDA "had promised the park in order to convince the public to permit demolitions. When they saw that they dropped the whole idea." Busse said the RDA "has not made any definite starting date." He charged that the KIM project manager is not "very likely" considering the public commitment the RDA made to the public.

John Buse

"They dropped the whole idea" to us and declared further comment: "The Court can order the RDA to begin park construction "in just ceasing the suit," Busse explained. However, he added, any order to them would require a hearing.

A contract for the park, said Busse, is "very likely" considering the public agreement the RDA made to the public.

The Daily Pennsylvanian
U pragad: Elections: Who Is Who?

By TAMAR EMBED

When the primary elections for the 1974 State Legislature were held Tuesday, two things happened. First, as had been expected, a record 25 percent of the eligible voters turned out to vote. Second, the candidates on the ballot included one of the most expensive and sophisticated campaigns in the state's history.

As a result, many people were surprised when the results of the Democratic primary for the 43rd Assembly District turned out to be 2-1 in favor of liberal cònstituency leader, Joseph R. Corletta King. The primary election was so close that the margin of victory was only 1000 votes.

The campaign was, in fact, a classic example of how politics can be run today. Both candidates spent millions of dollars on television commercials and other forms of advertising. Both candidates also used consultants to manage their campaigns. The consultants, in turn, used highly sophisticated techniques to poll the electorate and to target their messages to specific groups of people.

The campaign was so successful that both candidates won the primary election. Joseph R. Corletta King won the primary election with 51 percent of the vote. His opponent, Paul H. Green, won the primary election with 49 percent of the vote.

The victory of Joseph R. Corletta King was a historic event. He is the first African-American to be elected to the New York State Legislature. His victory was a landmark for the Democratic Party and for the people of the 43rd Assembly District.

The election of Joseph R. Corletta King was a testament to the power of the people and to the strength of the Democratic Party. It was a reminder that the people have the power to make a difference in their lives and in the lives of their communities. It was a reminder that, when people stand together and work for what they believe in, they can achieve great things.

The election of Joseph R. Corletta King was a victory for hope and for change. It was a victory for the people of the 43rd Assembly District, and it was a victory for all of us.

Author's Note: This article is a fictional account of the 1974 Democratic primary election for the 43rd Assembly District. The information presented is not intended to be a factual representation of the events or people involved in the actual election.

**WASHINGTON**

Washington: President Ford angered by a joint statement of Congress Thursday night to request nearly $1 billion for a "humanitarian" aid to South Vietnam.

President Ford's "state of the world" message touched on every aspect of American foreign affairs, with primary emphasis on Vietnam and Malaysia. Ford hailed his audience "assistance to South Vietnam as the key to the situation and adequate."

In addition to the appropriation, the President requested that Congress "clearly, immediately, and meaningfully" approve a $250 million program to form in Southeast Asia for the limited, agreed-upon, purposes of national development and aid to South Vietnam. "We are confident," he said, "that this program is called for by events and the need for it is not a contingency.

As for the proposed $1 billion, Ford called it "an important, practical, and timely statement of our national policy toward peace." He also asked Congress to restore $250 million to the development program.

The President quoted extensively from a letter written by acting Cambodian President Saukham Khoy calling for

Third Presidential Lecture Hosts Noted Biophysicist

Noted scientist British Chance explained the fundamental role of oxygen Thursday in the health of a cell at the fourth annual speech by President Macrissan. Chance said oxygen is a key molecule for sustaining life, noting it's less reactive with biological materials and hence safer to use than other reactive molecules.

The first lecture of the year was well-attended and featured Nobel laureate David Coddard, who spoke about his work in the field of biophysics.

 Chance also delivered a brief discussion of the diseases caused by a lack of oxygen, such as stroke, and heart failure—and described the modern research techniques used to determine the lack of oxygen in the body and its impact on the cell. On the way to his presentation, Chance was interviewed by President Macrissan on the topic of biophysics and its relevance to the modern world.

Conradni Prosecutors Call Final Witness

The trial of the accused of murder in the stabbing death of a fellow student continued Thursday as the prosecution presented its final witness. The witness, a friend of the victim, testified that the accused had a history of violent behavior and had previously threatened to harm others.

The final witness's testimony was followed by the defense, which presented an alibi and called several character witnesses to support their case.

Oil Conservation Bill Passes Senate Vote

WASHINGTON (UPI) — The Senate passed an energy conservation bill Thursday that would provide subsidies to oil producers. The bill, sponsored by Senator Brown, was passed with a vote of 51-49, with all Democratic senators voting yes and all Republican senators voting no.

The bill would provide subsidies to oil producers for the next five years, with a rollback after that time. Opponents argued that the bill would cost too much and would not significantly reduce oil prices.

Washington University's Department of Biology professor, Dr. David Coddard, delivered a lecture on the topic of biophysics Thursday at the university. Coddard spoke about his research on the role of oxygen in cellular function and its importance in various fields of science.

Coddard also discussed the potential applications of his research, such as in medicine and biotechnology.

Coddard's presentation was well-received by the audience, which included students, faculty members, and interested members of the public.

Summer at Columbia

One of the finest summer session programs anywhere, plus New York City.

If you're thinking about summer school, then why not get the most out of it? At Columbia, you'll find that Columbia of New York City.

Over 500 graduate and undergraduate courses, including Chinese and Japanese, world resources, premed, law, architecture, natural and social sciences, and humanities. Ample all courses are taught by Columbia faculty. Campus residence halls are available at reasonable rates.

Two main sessions: May 19 to June 27 and July 1 to August 9. A schedule of special sessions in selective departments.

In addition, courses in French language, literature, and art will be given in Paris, and courses in Italian language and culture in Rome.

For information and reservations, call (212) 264-3386.
Clusters Approved

(Continued from page 1) the departmen came." Students explained.

The committee of both Solomon and Cmd, Determined the students on the committee who prepared the advisory distribution plan, "We felt there would be a probable need for more clusters in the near future because the number of students has increased dramatically."

Under the cluster plan, students will be required to take a three-course cluster in two distributional areas outside their majors. The distributional areas will be translational, social sciences, and natural sciences.

A course cluster is defined as any three related courses, lacking one after another as a pre approved cluster from the Cluster

Micro Basket. In form or form cluster.

Individual clusters will either be approved by the FAS distribution coordinator or by the chairman of the department from which the three courses are taken.

The cluster plan, however, is not in good favor with all students. Currently there is just one council plan, in which students will be able to fulfill their distributional requirements. The second option would require students to take a three-course major and a specific minor in a "distinct" distributional area.

To satisfy the third option students must complete three six-course, all different distributional areas. However, students considering this option will be required to complete the FAS equivalent on distributional requirements for approval.

Under this first three options, students will be able to take any course in their minor and only one course in each cluster plan as a major.

The fourth option, intended only for students with considerable extracurricular activity and purpose, would require only a major program with no specific distributional requirements.

A committee of four, including Solomon, created the ballot. Wednesday. Respondents said every ballot was counted at least three times, and there was not very much change of a negative.

Solomon said she was surprised by the closeness of the vote in the amendment. She noted at least the vote will act to make the faculty aware of what they're doing and perhaps make them more liberal in their approval of clusters.

Cambridge Site of Diamond Shoot-out

B-PAUL SINGER

Hustlin’ Harvard Hosts Wary Luxmen

About both games at 3:15 and 5:35, Murray Harvard went on to win the EIBL, and NCAA District 1 playoffs, before being knocked off in the Collage World Series in Oswego.

Sure enough, the barriers in that first game were real and multicolored, the Crimson convinced nothing but a blue ribbon for Harvard and a red ribbon for Penn. Despite the outcome, Penn had yielded only four hits to Murray’s eight, but that is not the end of it.

The Harvard men, who won the battle with a 2-1 score, also won the game, 7-5. The Crimson had a one-run lead in the fourth inning, and that was as close as the Red and Blue got until the seventh, when they tied the game at 6-6.

The next day, the Crimson won again, 3-0, as senior pitcher John Adams allowed only two hits and one walk in eight innings. Harvard scored all three runs in the first inning, and then held off the Quakers in the ninth.

But Saturday’s game was a different story. The Crimson won, 10-2, as junior pitcher John Muhlstock yielded only five hits and one walk in seven innings. Harvard scored seven runs in the first inning, and then held off the Quakers in the ninth.

The Crimson were led by senior catcher Andy Muhlstock, who went 3-for-4 with a home run and two doubles in the game. He also had two runs scored and two runs batted in. Muhlstock also had a single in the first inning, and added another one in the second. He also had a triple in the third inning, and finished the game with four total hits.

The Quakers were led by senior pitcher John Adams, who allowed only five hits and one walk in seven innings. Harvard scored seven runs in the first inning, and then held off the Quakers in the ninth.
