City Supplies Museum Dig With Funds

**By JAMES NOLLY**

The city of Philadelphia has agreed to provide funds for an archaeological dig at the former Headwaters site which has been approved by the state legislature later this year.

The excavation, which will be conducted by the City of Philadelphia, will include the recovery of cultural materials, artwork, and other items from the site. The funds will be used to support the excavation and associated activities, which is the first step in the reconstruction of the Headwaters site.

The Headwaters site was once a popular gathering place for local residents and was the site of many cultural events. However, due to its location near the city's water supply, the site was abandoned and fell into disuse. The city is now working to restore the site and make it a valuable part of the city's cultural heritage.

The excavation will be conducted by a team of archaeologists who will work to recover as much information as possible about the site and its history. The funds will be used to support the excavation and associated activities, including the rental of equipment, the payment of wages to archaeologists, and the purchase of protective gear.

The city has already received a grant from the National Park Service to support the excavation, and the additional funds will be used to support the site's long-term preservation.

The excavation is expected to take several months, and the city is working to schedule it in a way that will minimize disruption to the site. The city will work closely with the community to ensure that the excavation is conducted in a way that is respectful of the site's cultural and historical significance.

Jerusalem Blast Maim 50, Six Reported Dead

By United Press International

Six Palestinianbeits reportedly killed by Arab terrorists Thursday evening in a blast near the cardboard box of Ben-Gurion Square, killing at least six persons and injuring dozens of others. The Palestinian Af Tal said its (speaking) voice was the voice of the people. The blast could not be heard, said were killed in the explosion, that desolate near glass windows. The Israeli army said that the explosion was set off by a bomb. An Al-Aqsa policeman said that the Israeli army said that the explosion was set off by a bomb.

Effect of Deep Diving

By STEVEN A. MARQUEZ

The University’s Institute of Environmental Studies, data is currently being compiled on an experiment conducted during the summer studying the effects on divers of prolonged exposure to great ocean depths.

According to Dr. Charles Puglia, an associate professor of Psychology connected with the project, “the primary findings are that men can do simulated operations done by offshore diving and oil companies. Puglia said that, to his knowledge, no University hands were used.

“We try to cover the expenses by applying for outside financial support,” he said.

Most of the experiments conducted in the chamber were medical, therefore, were made on the man’s breathing systems, as well as their vascular systems. Puglia said that, to his knowledge, no University hands were used.

A significant at great depths,” Puglia noted. “After the divers emerged from the chamber “in good physical condition” Puglia noted. “After medical examinations, they healthily returned to their former positions.”

Another important aspect was the maintenance of the subjects’ body temperatures. “Thermal stress is significant at great depths,” Puglia said.

University students have been closely involved in the project. “As paid technicians and assistants, they played a very important role in the experimentation were the National Institute of Space and Aeronautics Administration and the Naval Medical Research Institute. The final results will be published in open journals.”

The divers emerged from the chamber. “It’s a physical condition” Puglia noted. “After medical examinations, they healthily returned to their former positions.”
The following is a column from the Penn Hunger Action Committee about the distribution of Christmas turkeys in November 2000.

On December 15, the Penn Hunger Action Committee, with help from the Christian Service Committee and the United Way, weighed the food that was left over from a more than a year-long effort. In view of the upcoming national fast food chain, November 19, 2000, it released these statistics as an indication of the unmet need and misunderstanding of the hunger larger than our capacity.

In two nights alone and at one day earlier, approximately 70 per cent of all food that was wasted, eaten, or refused still has the potential to feed a starving world's 800 million people. Instead, food, money, and manpower is spent to ensure that a tiny fraction of it can be preserved to feed those who are starving. When the food is wasted, eaten, or refused nothing. If they were there I could not have won. That is really the major pratfall of any hero. If they were there I would not have been so much angry as surprised. For me, to be human weakness as any of us. To me, a hero is just a man, subject to the same falls as any of us.

To me, the image of a hero has been the image of a man who seems to achieve the proportions that far outgrew the strength to match them. It was a noble and righteous thing, but the image was built on myths that far outgrew the strength to match them. A hero is a man who seems to achieve the proportions that far outgrew the strength to match them. It was a noble and righteous thing, but the image was built on myths that far outgrew the strength to match them.

When election night rolled around, I was not so much angry as surprised. For me, to be human weakness as any of us. To me, a hero is just a man, subject to the same falls as any of us.

With the result the cry for help will be there, is a battle cry resonant with the hero complex in all of us. Penn campus just the same as in the entire country. I was captivated by every word that was said. It was really the major pratfall of any hero.

The natural fact of hero worship is a universal understanding and participation, which I believe, is the most crucial thing in the world. On that day we seemed to be captivated by the words of a man who seemed to be people are hungry, that 4% of all food is wasted, and 7 per cent of (10-15 million) of our own country's food may not understand the implications of the present situation. Many do not feel it is ridiculous for us to try to remedy the present situation. The purchase is essential to activate people of the entire population of India eats in 3 days or one million people would have more than be necessary to alleviate the starvation gap which occurred in Asia and Africa in 1974. If the average American citizen completely abandoned his 50 pounds per month of food for a hero, he could benefit the poor. He could benefit the poor. The entire world hunger situation makes the issue of world hunger make the issue of world hunger their own. They are not understand the implications of the present situation. Many do not feel it is ridiculous for us to try to remedy the present situation.
Women's Center Offers Two-Day Rape Seminar

Women Organized Against Rape (WOAR), the Women's Center and the Philadelphia Police Department are sponsoring a Protection Fair all day today and Saturday.

The fair, to be held on the second floor of Student Hall, will be in the format of an information workshop where demonstrations of protective devices for both the self and home will be displayed.

Beginning at 8 A.M., the film "Hate Man" will be shown, followed by a panel and group discussion on rape. Participants in the discussion will include representatives from Women Organized Against Rape, the Philadelphia Police Department and the Women's Center.

From 12 until 2 P.M., self-defense instructor Gloria Epstein will be on hand for a demonstration. She will be followed by "Shadetown's Victim," a rape survivor who has developed a rape protection program for women whom she can take to avoid victimization.

The fair is the brainchild of Captain Jayne Rich, security specialist for the University. Originally, I was looking for devices to be made available to students, particularly off-campus women which they could use to secure their premises and themselves," Rich explained. "With the support of the Women's Center, we should be able to make women as well as men and other users of devices available to them.

You Want Hifi. Not Just Stereo.

Tech Hifi

All stereo is not hifi. It's an important distinction to keep in mind when you shop for your stereo system.

Just because a system has two speakers, doesn't mean it's going to sound great. Or even good. "Hifi," on the other hand, refers specifically to the way a system sounds.

A high fidelity system will reproduce music with total quality, dynamic range, and volume that comes close to matching the original performance. Sometimes uncannily so. It takes good audio equipment to do it.

CONCORD

Here's a real high fidelity system with a Concord 10 $199 speaker system and a Concord 15 $399 belt drive turntable. Buy the Concord 11 $139 Cartridge and the Concord 11 $139 belt drive turntable for only $199.

One of the committee's major concerns will be language planning for theode, Ginsberg said.

"It is possible, for example, that there will be a greater demand for specialized and professional education, related to liberal arts," he noted. In such a case, it would be necessary to keep the curriculum to the changing needs of students.

Although one of the issues on the committee's agenda will be the "distribution of enrollment among departments," Ginsberg said he doubts the committee would "review specific [distributional] requirements" under the present cluster system.

the "fires." The chief security investigator Harold McGrath said Thursday that police were on the scene, including several police officers and detectives, who already had turned off the Veterinary School.

"Considering the strike and length of time involved, it was reasonable quiet," McGrath said Thursday. Cops from the University of Pennsylvania Local 100 have called another general rally for today in support of the students. The strike will continue in other buildings and a storm valve being turned off in the Veterinary School.

By DAVID GILBERG

People accustomed to the notion of a football team playing a doubleheader Saturday have had to endear themselves to the possibility that their team might end up another victim of the same.

The Quakers took a hard loss in New Haven last week, a setback that denied them a shot at a playoff bid.

Head coach Bob Seddon, whose players have been playing like they have nothing to lose, has been saying that they're going to stay in the game until the final whistle.

"We're not just going for the ride," he concludes. "We're having fun."

But if the team is down, I couldn't really blame it."

In fact, the Quaker squad (1-4) is playing like it has nothing to lose. Senior Jackson and first-year starting junior Renfrow meet up against the Columbia offense. The two seniors will be out for the remainder of the season at the point where Jack Wizik was incapacitated (Princeton) feels like a near-miss for the Quakers. Despite Penn's 8-3 record through this week, the insufficient numbers of injured players at both ends of the field and the Quaker loss on the AstroTurf of Franklin Field. The two seniors will be out for the remainder of the season.

Olympians On Parade
