SCUE Recommends Replacement Of Present Grading Evaluation System

This is the second of a two-part series on University grading policy. The Student Committee on Undergraduate Education (SCUE) has released a proposal to replace the current letter-grading system with a comprehensive major course evaluation system to be instituted at the start of the spring semester. This evaluation system would provide a more accurate measure of a student's performance and would allow for the assessment of both written and oral exams. The proposal calls for the examination system to be conducted by the student's major department and a faculty member of the department. The examination would consist of written and oral sections and would be administered by the student's major department.

The written part of the examination would cover the student's major courses and would consist of written and oral sections. The examination would be conducted by the student's major department and a faculty member of the department. The examination would be conducted by the student's major department and a faculty member of the department.

Officials Have Differing Opinions On Proposed Merger of Libraries

By SEBASTIAN G. TERRA

Although Libraries Director Richard DeGennaro and President Gerald Ford have both verbally called for a merger of the Penniman and Fine Arts libraries into Van Pelt, the move is still under consideration by the planning committee of the Penniman committee.

According to DeGennaro, the move is still under consideration because of the current economic climate and the need for cost-saving measures. He said that the move would be more clearly understood by the administration if it were presented as a plan for the future.

Hopefuls Finish Campaigns In State Primary Election

By ED DAVIES

President Gerald Ford will face opposition today in a primary that most Democratic candidates failed to win. However, some major presidential candidates left in the race.

In a last-minute effort, the three major candidates, Senator Henry Jackson, Representative Morris Udall and former Georgia Governor Jimmy Carter—coming across the state in separate campaigns—were making last-minute television appearances. Riding on the coattails of six primary victories, Carter predicted that he will best Ford in the presidential vote today as long as voter turnout is high. At 49 percent Democratic turnout is expected. "If our vote is strong, I believe that we can come out on top, and we will dispel the feeling that Carter cannot carry a major industrial state," said Carter.

Undergraduates Attend Schools From England to Iran

By Richard Lambert

Recently, some programs have been added to the University's list. In 1974, the Engineering School entered into an agreement for student exchange with the University of Technology at Darmstadt in Germany. In 1975, a similar program was established with the University of Nantes, France. And in 1977, a program was established with the University of Wurzburg, Germany. These programs have been successful in attracting students from both institutions.

The Green Paper Chase

By Mitchell Berger

Being a pre-law student can be more than just boring. It can be exciting.

For years, the pre-law profession has been known as "the good grade" profession. How do we change that image? We have several initiatives in place to help.

Initiative 1: Creating an atmosphere where the students are encouraged to take risks and experiment. This will help them develop critical thinking and problem-solving skills.

Initiative 2: Implementing a new grading system that rewards students for taking a variety of courses, even those outside their major.

Initiative 3: Establishing a mentorship program where pre-law students can be paired with successful alumni or professionals in the field.

We believe that these initiatives, along with others we are planning, will help change the image of the pre-law profession and make it more appealing to students across the country.
Grades

(Continued from page 1) as well as major courses taken by the student will form the basis for a great deal of individuality, Keller said. "It would depend in part on the student's individual program."

Some faculty members have questions aspects of the proposal, especially in regard to whether instructors with large classes, could adequately allocate their time to lecture and to students in small recitation sessions. In lecture classes, small recitations are from 30 to 80 students, by both instructional Committee Chairman Tom Knapp. The plan is desirable for evaluative aspects to take three away from the teaching time."

If the evaluative process of the teaching process, Keller continued. "Increasing the faculty is important as inquired demand by students."

The SCUE plan however recommends "reallocating present teaching resources" to reducing the number of medium-size courses, small recitation courses, SCUE courses, small recitation sessions are number of small seminars. In lecture from 30 to 80 students), by both

Keller said he does not foresee infinitely more problems than our present student's individual program."

"We hope to receive very few recommendations based on the general grading system, though, that may involve more guidance than our recommendations."

Merger

(Continued from page 1) recommends "increasing the amount of time would have to be put into the SCUE aspect of the maintenance of the Penniman library extract."

De Gennaro pointed out that he was "not trying to sell them on the basis of budget cuts." In addition to increasing enrollments, the plan also can take many money in staff reductions by attrition and consolidated use of computer resources in "at least double book projects," Keller said.

“Different Drummer Beat” Sets Pace for Ex- Stickman

By JORDAN NINTZ

“An individual’s ability to play, is to some degree, the sum of his or her performance on the floor always gives us some peace of mind.”

—Coach John Ansley

As last year’s champion, the University of Pennsylvania’s Ex-Stickman team entered the 1976 EIGA tournament with high expectations. The team had been playing together for several years, and many of the players had represented the school at previous tournaments. The anticipation was palpable.

The tournament was held at Franklin Field, where the Quakers had held their home games. The field was filled with fans, and the excitement was electric.

The tournament began with a preliminary round, where teams were seeded based on their past performances. The Ex-Stickman team was seeded high, and they were expected to make a deep run in the tournament.

In the first game, the Ex-Stickman team faced off against a tough opponent. Despite a valiant effort, they were unable to overcome the competition and lost the game.

In the second game, they played against a team that they had defeated in the past. This time, they were able to win the game, and it set them up for a shot at the championship.

The championship game was highly anticipated, and the Ex-Stickman team came out strong, leading from the first whistle. They played a well-balanced game, using their speed, agility, and teamwork to keep their opponents at bay.

In the end, the Ex-Stickman team emerged victorious, securing their championship title. The players celebrated their hard work and dedication throughout the season, and the fans packed into the stands to celebrate with them.

The following day, the team hosted a victory party, and the energy in the stands was electric. The players were all smiles, and the fans were overjoyed.

The Ex-Stickman team had proven themselves to be a force to be reckoned with, and their victory was a testament to their hard work and dedication. The team was hailed as heroes, and their names were celebrated throughout the country.

The season was a success, and the Ex-Stickman team had achieved their goal of becoming champions. They had proven that hard work and dedication pay off, and they were ready for whatever challenges lay ahead.
