University Gets $4.9 Million From HEW for New Center

BY STEVE DURROW

The University has won a five-year $4.9 million grant from the United States Department of Health, Education, and Welfare to start the country's first National Health Care Management Research Center.

The center will be established through the efforts of University, and will receive funding from the Wharton School of Business, the School of Arts and Sciences, and the School of Social Work. The center will be located in the Wharton School's administrative building.

The center will receive a grant of $2.5 million per year for five years, and will have a total budget of $12.5 million. The center will be managed by a board of directors, which includes representatives from the University, the Wharton School, the School of Arts and Sciences, and the School of Social Work.

The center will focus on research into the management of health care systems, and will work with the Health Care Management Appraisal Network, the Community Nursing Services of Philadelphia, and the Hospital of the University of Pennsylvania.

The center will also receive a matching grant of $2.5 million from the Commonwealth of Pennsylvania, and will be located in the Wharton School's administrative building.

The center will be directed by Dr. Robert Mittelstaedt, associate director of the Health Systems Research Institute.

**British Sociologist Chaney Discusses Dramatic Plays**

**BY DOMINIQUE**

David Chaney, a British sociologist teaching at Annenberg this semester, spoke at the student's colloquium Monday in the dramatic play as a social protest, a cognitive approach to understanding the social organization of being staged, staging, and acting in a social and cultural context. Chaney explained that dramatic plays are a tool for social protest, and that the acting and staging of these plays help to create a social and cultural context.

A play performs a "performative" function of the sociologist, Chaney added. A play "must be like everyday interaction," and must also be recognized as "another world." The term "another world" refers to a social organization of being staged, staging, and acting in a social and cultural context.

The Annenberg Colloquium is a weekly program of the Department of Communication, which presents speakers on various topics to the campus community.

Dr. David Chaney, a professor of applied sociological science and communication, will be on campus for the next several months, and will lecture on his work at the Annenberg Colloquium.

SALE

The sale will take place Saturday, December 12, in the basement of the Wharton School.

**ALUMNAE BOARD MEMBERS ASSIST ADMISSIONS OFFICE

Alumnae Board Members Assist Admissions Office

BY CAROL HETHEMANN

What’s one way the Alumnae Office can maintain the services it provides to prospective applicants despite severe cuts in its operating budget?

"The Alumnae Office has been asked to find ways to cut its budget, and one of the things we’ve done is to ask the Alumnae Board to help," said Mary Sargent, the Alumnae Office’s director of admissions.

The Alumnae Board has agreed to assist the Admissions Office in reviewing applications and offering information to prospective students.

As a result, the Alumnae Office now has 150 volunteer interviewers who work on the campus during the fall months and offer guidance to applicants throughout the year.

In addition, the Alumnae Office offers a series of events called "Alumnae Night," which are held on the campus throughout the year.

The events are designed to provide prospective students with an opportunity to learn more about the University and to meet with current students.

Alumnae Board members will assist the Admissions Office at these events, offering information and answering questions about the University.

Alumnae Night events include "Alumnae Panel," which features current students discussing their experiences at the University, and "Alumnae Story," which features alumni who have gone on to successful careers.

Alumnae Night events are open to all prospective students and their families, and are held on the campus during the fall months.

"The Alumnae Office is very grateful for the support of the Alumnae Board," said Sargent. "Their assistance is invaluable to our efforts to attract and enroll students."

Lack of Power Still Hampers Student Government

Tuesday, October 26, 1976

In the past, the Undergraduate Assembly (UA) at Brandeis University has sought student input and attempted to help coordinate a number of committee investigating smaller areas of concern because, "There's a pretty big group who don't know what they are voting for." Mark Epstein

The UA passed a resolution last fall calling for a tuition increase of more than 1 3.4 percent in response to President Meyerson's proposal of a seven percent raise. Last February the UA passed a resolution urging the UA to continue to support the resolution in order to adopt a guaranteed tuition policy. "We must differentiate between the number of roles the student can play at the university," Johnstone said. Mark Epstein said recently to feel like UA, "doesn't represent the school, because many students don't vote." He claimed the representatives are acting upon the will of the student body that voted, and therefore it is not a representative cross sampling. Executive Assistant to the President Bruce Johnstone said he feels the UA is currently more often making a decision rather than reacting to a decision."

Executive Assistant to the President Bruce Johnstone said he feels the UA is now consulted more often with administrators who will make the final decision on the school's future. "It is not a question of whether we will support some tuition policy, but it is a question of how we should serve as a source of strengths of feeling," Epstein said. The assembly was concerned about increasing tuition, even though they thought they arrived at it scientifically. They were mistaken, but that is immaterial, since the consumer never knows," Epstein explained. "We are really very concerned about the energy task force committee, which will provide input in future calendar and energy decisions. This resulted from the UA's coup of last spring in which they pressured the administration to compensate them in the revew of the current regulations and spring budget to save money. Former UA Chairman and current Executive Assistant in the Vice-President's office Michael Hanlon said student input on the energy committee is "a big change from when we decided to do nothing. You can only do a decision already made." Hanlon said student groups "are represented rather than unrepresented," and that the UA's role is to "be more involved in making a decision rather than reacting to a decision." Because he was worried the session would end before a scheduled speaker was to talk. "At one meeting, a member admitted he was deliberately stalling for time in order to keep himself in the meeting." At one meeting, a student complained, many representatives "get up there to hear themselves talk." At one meeting, a member admitted he was deliberately stalling for time in order to keep himself in the meeting. Michael Hanlon said student input on energy was "a big change from when we decided to do nothing. You can only do a decision already made." Calendar Review

Last month, much to the dismay of students who had carefully budgeted their funds, administrators announced the calendar deadlines for fall and spring tuitions would be moved ahead one month.

Although some student leaders, officials opposed to the change, seized on the new calendar deadlines for fall and spring tuition deadlines for high schools; an individual may not investigate or uncover business secrets in cases of energy savings in extended winter vacations.

Should the individual fail to make such efforts, an ordinary claimant can "no change of site" will be filed. If the claimant can be satisfactorily administratively referred to a Unitary Administrator, he or she may be subjected to this University and have been unable to understand. They, the less]

HEW Grant for New Health Center

The University's center will concentrate on management and organization in the health delivery sector, a center at the University of Missouri will work in technology and its applications in the coordination of health care.

Heinz Rally on Campus

"I don't apologize for making sure that everybody gets an equal opportunity," Heinz said angrily. "That's what I'm trying to do." Heinz claimed that he can make up your mind for you if you have a black face. Today he told the black audience last week that he can make up your mind for you, if you have a black face. Today he told the black audience last week that he can make up your mind for you, if you have a black face.

OR 602 Problems, Models and Applications I

Introduction to OR techniques, concepts, and methodology with emphasis upon mathematical modeling.

OR 603 Problems, Models and Applications II

Linear, non-linear programming problems and applications, networks, maximum flow, shortest and longest paths, scheduling and coordination problems.

RESEARCH OPERATIONS NEW COURSES

OR 602 Problems, Models and Applications I

Introduction to OR techniques, concepts, and methodology with emphasis upon mathematical modeling.

TIME: WF 3-4:30

John Cozzolino

OR 603 Problems, Models and Applications II

Linear, non-linear programming problems and applications, networks, maximum flow, shortest and longest paths, scheduling and coordination problems.

TIME: M 4:30-7:30

Shiv Gupta

OR 790-1 Analysis of Business Risk

Seminar Course. Fundamentally a quantitative course but with emphasis on teaching practical methods of risk analysis using modern hand calculators. Oriented toward executive decision making rather than theoretical risk. Risk problems to be studied include petroleum exploration decisions, insurance purchasing decisions, research and development decisions, capital budgeting decisions and other highly risky business decisions. A new method of risk analysis based on utility (risk preference) theory is used. Extensive knowledge of utility is not a prerequisite.

TIME: T TH 1:30-3:00

John Cozzolino

OR 790-2 Problem Formulation

Seminar Course. How to formulate an unstructured problem in a complex situation.

TIME: Arranged

Shiv Gupta

The Philomathean Society Presents a

SHAKESPEARE SYMPOSIUM

in Honor of the Late Dr. Alfred B. Harbage

October 24-30

Collegium Musum... Sunday, 8 P.M.

presenting a Lute and Madrigal Concert in the Philomathean Halls.

Dr. Roland Mushat Frye... Tuesday, 8P.M.

speaking on "Shakespeare's Comments and Judgments on Arts"

Dr. Barbara Hernnstein Smith... Wednesday, 4P.M.

"On the Character of Shakespeare's Characters"

Dr. Derek Traversi... Wednesday, 8P.M.

"Shakespeare and Machiavelli: Some Thoughts on Shakespeare's Early History Plays"

Mr. Michael Kahn... Thursday, 2P.M.

"Directing Shakespeare in the Modern Theater"

Dr. Ralph M. Sargent... Thursday, 4P.M.

"Some Compulsive Conflicts in Shakespeare as Drama"

Dr. Daniel Seltzer... Thursday, 8P.M.

"Prince Hal and the Development of the Tragic Style"

The lectures will be held in 390 College Hall, except for Mr. Kahn's lecture which will be held in the Studio Theater Annenberg Center. All lectures will be followed by informal receptions in the Philomathean Halls.

Library Exhibition and Final Reception

Monday, 8P.M.

in the Furness Library, Sixth Floor Van Pelt Library.

Studio Theatre, Annenberg Center

Harnwell Arts House... Friday, 8 PM and Saturday, 7:30 and 9:30 PM

"Shakespeare and the Supernatural" an integrated program of music, dance and drama— Friday and Saturday, 7:30 and 9:30.

Gridders Take to Air in Year of the Pass

By BRENN STONE
The Daily Pennsylvanian
Thursday, October 26, 1976

For 128 yards.
Kelly, who caught 3 passes in last Saturday's win over the Red and White, has found his way to be a reliable possession catcher. "We had a tough last Saturday, but that didn't hurt us. We have found our way to play the right passes. The pass reception in a game is as important as the running game in a game. In the early season, it was the running game that was the problem. Now, it is the passing game."

The saying goes: behind every great team is a great quarterback. Football is a team sport, but there are always players who are the focal point of the offense. "The quarterback is the focal point of the offense. He is the one who calls the plays and leads the team," explained Quaker oarsman John Calhoun.

"A Poetry Reading By

THE QUAKER OARSMAN
The cornerstone of the Quaker passing game is the quarterback. The quarterback is the focal point of the offense. He is the one who calls the plays and leads the team," explained Quaker oarsman John Calhoun.
