Academic Credit for Employment Available for Work-Study Students

By STEVE BOWEN

Students will now be able to receive academic credit for paid work experience. The program is sponsored by the Pennsylvania State University's Office of Academic Credit, and is designed to help students make a seamless transition from work to school.

The program, called Experience to Academic Learning (EXEL), allows students to earn academic credit for work performed in paid positions. Students participate in the program on a voluntary basis, and must meet certain eligibility requirements.

Students seeking academic credit for work experience must have a minimum of 30 credit hours and complete a minimum of 10 hours weekly. They must also have a minimum GPA of 2.0. The program is available to students in all majors.

The program will be offered to students in the fall and spring semesters. Students interested in participating should contact the Office of Academic Credit for more information.

University Will Announce New Tenure Procedures

By SETH ROSEN

The university will announce new tenure procedures today. The new procedures are designed to provide greater transparency and accountability in the tenure review process.

Under the new procedures, tenure decisions will be made by a committee consisting of faculty members from various disciplines. The committee will review the candidate's teaching, research, and service contributions, and will provide a recommendation to the dean.

The dean will then review the committee's recommendation and make a final decision on tenure. The decision will be communicated to the candidate and the department.

The new tenure procedures are intended to provide greater transparency and accountability in the tenure review process. They are based on best practices in tenure review at other institutions.

Development Drive Reaches Goal Of $100 Million in 18 Months

By STEVEN A. MARQUET

The university's development drive has reached its goal of $100 million in 18 months. The drive was announced in January 1976, and has exceeded its goal.

The drive was successful due to the efforts of thousands of alumni and friends who made contributions to the campaign. The University received $100,077,090 by January 10, meeting its goal.

The drive was focused on raising funds for the university's major initiatives, including academic programs, athletics, and facilities.

SAMP Closing Elicits Little Campus Reaction

By JEFF RENIMAL

Despite strong resistance against the university's decision to close its School of Allied Medical Professions (SAMP), campus reaction has been minimal. The Trustees have decided to phase out the school over the next four years.

Despite this, the campus has been relatively quiet. There have been some protests, but they have not been widespread.

Parents of SAMP students have expressed concern about the decision, but there has been little public reaction from students or faculty.

The administration has estimated that it would cost up to $600,000 to wrap up the SAMP program, but this cost has not been a significant factor in the campus reaction.

SAMP's director, Eugene Michels, said that the decision was necessary for the university's financial health.

"I'm pleased that they (the Trustees) agreed with the President and me," Provost Eliot Stellar said Monday, the merger is "the right move at the right time."
SCHEDULED FOR TUESDAY JANUARY 19TH
MIDTOWN HOLIDAY INN

It is currently not possible to determine the nature of the text due to the format of the input. It appears to be a section of a newspaper or magazine article, discussing various academic and social events. The text is fragmented and not clearly readable. The information provided is mostly in the form of headlines and short paragraphs, which do not form a coherent narrative. It seems to be a mix of announcements, articles, and advertisements. Without further context, it is not possible to provide a meaningful interpretation of the content.
...And the Walls Come Tumbling Down

By Elizabeth Sanger

"So what was once a small, cohesive project in this large University is becoming a splintered, fragmented group."

The Trustees Act

The following are excerpts of resolutions adopted by the Pennsylvania Board of Trustees in 1977:

SAMP: A Dean Speaks Out

The Trustees Act

Not to be named as a priority is a second program which is of comparable importance in the university's overall financial base for a University with the financial resources and stature of Pennsylvania; the University has the obligation to support a broad range of research and development programs at the national level and to the students; the University's educational programs are for the benefit of the students, and the students' best interests are always to be served; administrations are not in the business of making students' lives miserable; the students' best interests are served when the environment is conducive to learning; administrations' answer is, it has to be done, their students' best interests are served when they are in a learning environment; administrations are not in the business for money, but to serve the students, and the students' best interests are always to be served; administrations' answer is, it has to be done, their students' best interests are served when they are in a learning environment; administrations are not in the business for money, but to serve the students, and the students' best interests are always to be served; administrations' answer is, it has to be done, their students' best interests are served when they are in a learning environment; administrations are not in the business for money, but to serve the students, and the students' best interests are always to be served; administrations' answer is, it has to be done, their students' best interests are served when they are in a learning environment; administrations are not in the business for money, but to serve the students, and the students' best interests are always to be served. The students' first priority was to have the renovation postponed until the summer, so that no one would suffer the inconvenience. Beerman said: "We are not in this business for money, but to serve the students, and the students' best interests are always to be served."

Operations Research

Program

Operations Research is the application of scientific analysis to various problems faced by decision makers. The OR program at Wharton emphasizes structuring new decision problems and is application oriented.

COMMUNICATIONS MAJOR PROGRAM BECOMES UNDERGRADUATE REALITY

By LEAHNE CARY

Although the recently developed Communications major accepted only eight students this January, Major Chairman Sol Worth Monday expressed enthusiasm about the program's development.

"Many of the students who applied were specifically interested in the entire application process which includes writing a one-to-three page proposal and committing with at least one faculty member. Writing a proposal means defining one's major and a basic outline of the concept's potential and value," Worth said.

Other already-existing majors satisfied their interests, and others realized that they were not yet ready to narrow themselves down specifically within the communications discipline.

Worth said that for students accepted are enthusiastic and "definitely first-rate." He added that the department's optimism for the success of the program is due to the fact that it is the first expanded effort to include the study of film, a previously ignored field.

Funded by a grant from the National Endowment for the Humanities, the fellowship of between $1300 and $1700 would sponsor a student in his or her junior or senior year.

The proposal and writing of a plan for the student's course of study must be submitted to the Communications department by April 15.

In addition, applicants must submit a list of all courses they have already taken or are currently taking, a list of all courses they plan to take, a description of their background and experience in film and a statement about why they are interested in the Communications major.

Candidates should have taken at least one core course in communications, and must submit a list of all courses to be taken.

"The importance of Film Lab, " Worth said, "is that it teaches not only the nitty-gritty of film making, but also the history, theory and esthetics of the medium-and that's what a communications major specifically needs."
Work-Study Credit

Moore said that the program has the capacity to double its current allocation, but refused to specify the exact amount distributed now.

Development Drive Goal

Only $4,111 of the almost $3.5 million raised by Annual Giving came from former SAMP students in 1976. In fact, as of June 30, 1976, SAMP donations were larger than prior years, up in both donors and dollars. By December 31, the rate had dropped only slightly below normal.

"We won't notice any effect until the word is out," Birkholz said.

The number of students participating in REAL has been steadily increasing since its inception last January, but the program still remains small and currently has no participants at the University.

Although Moore said "Students not knowing about the program is my greatest concern," he added that he has not had a chance to visit the University to publicize the program.

The University has not yet advertised the REAL program, and the University's administrative coordinator, Kim Morrison, said Monday "We are not hunting out students."

Morrison, however, added that publicity will be taken care of by the Field Work and Resources office in the future.

Corporate gifts include a $40,000 donation by Standard Oil of Indiana for unrestricted use, funds for the Medical School from Pfizer, Inc., and a donation to the College of Arts and Sciences from the Pennwalt Corporation.

Who could ask for anything more?

Welcome back to your full-service campus bookstore!

Your PennStores are truly more-than-a-bookstore. We've got the books, of course (text books plus 40,000 other titles), but there's also a huge selection of gifts, cameras, calculators, stationery, posters, gift wrap and cards, candy, cigarettes and tobacco, appliances and much more. And over in the Sportspot we've got a complete line of sporting goods and sportswear, as well as fine quality casual clothing. Penn students do not live by books alone, and neither do the PennStores!

Anne Kaylor was 10-2 and although "small, she is a proven winner" by winning four matches in her number four position. Her teammate Jane Komoski, who has gone to one of the three schools. Kaylor also beat former World Cup fencer Vanessa Istrati won two. Including one against a high school teammate. Fencing against powerhouse Notre Dame and Penn State. North Carolina State and the University of North Carolina. Although they lost 14-13, Micahnik felt his "team should have won" before playing Notre Dame, one of the country's top teams. From Randy Eggleton and Chris Hansen. Eggleton was negated a good performance by the epee and foil teams. "We meet tests concerning athletes who are not used to winning and they perform very well in meets," he concluded. "They're very competitive."

While Men Have Mixed Results

The winter recess proved to be a victorious one for the Quakers, passing while winning with some effort. Although there have been occasional shootouts against tougher opponnents, the men have lost only one and have scored four. Both wins were against powerhouse Notre Dame and Penn State.

Both wins (3-4) and the men's only defeat to Notre Dame, North Carolina State and the University of North Carolina. The Quakers lost to both against New York and New England, the latter team losing due to the weight of the Quakers. Against Princeton, they were defeated by an 11 to 5 margin.

Men's fencing is a team sport, and the team concept, the Big Five teams were tested in the first month of the season, winning the Quakers got just what the doctor ordered, 5-2. "We lost to Columbia, then lost to Princeton, 83-66. After the contest, the aid of a smaller starting lineup, which enabled the team's veterans to rest during long breaks. Bill Omeltchenko. Now faced with the pleasant opportunity to break the losing streak since 1968-69, the momentum to win the game. "We played well against Manhattan, and were tied at 3-3," noted Finke, "until McDonald scored 18 points in the second half, including four of five from the three point line. "The Quakers got just what the doctor ordered, 5-2. "We lost to Columbia, then lost to Princeton. The power play, which was not used in any of the Quaker victories, was used as a substitute for the tournement, by losing 5-3. "We played well against Manhattan, and were tied at 3-3," noted Finke, "until McDonald scored 18 points in the second half, including four of five from the three point line. "The Quakers got just what the doctor ordered, 5-2.
