Fund Lag Eases For Researchers

RE: STEPHEN A. MARGULIS

The University is beginning to recover financially from a three-month federal research funding lag. Vice President of Research Donald Langenberg reported Tuesday.

In a letter to the faculty Monday, he said the University, unsure whether total research grants in the University's fiscal year 1977 will equal the federal data. "Federal support received during the first three months of the 1977 year is about $1 million higher than the 1976 level. If the 1977 year is completed within the federal budget year, it will be the highest

The budgeting,Langenberg said, is based on a federal decision to begin the government's fiscal year in October rather than in July as a result. He said, "the government--bridged fiscal year 1977 and fiscal year 1978 with a three-month transition period. Thus, for the fiscal year 1977, no new funding will be available until the end of the calendar year or early January 1978."

The university's fiscal year ends June 30.

The funding delay, Langenberg said, is based on a federal decision to begin the government's fiscal year in October rather than in July as a result. He said, "the government--bridged fiscal year 1977 and fiscal year 1978 with a three-month transition period. Thus, for the fiscal year 1977, no new funding will be available until the end of the calendar year or early January 1978."

The university's fiscal year ends June 30.

Hewryk also said that to make a decision to begin the government's fiscal year in October this year, rather than in July as a result. He said, "the government--bridged fiscal year 1977 and fiscal year 1978 with a three-month transition period. Thus, for the fiscal year 1977, no new funding will be available until the end of the calendar year or early January 1978."

The university's fiscal year ends June 30.
Spectral Art Exhibited at ICA

By JONATHAN GREER

When sunlight is directed through a prism, it separates into its seven distinct colors, or bands of light. This is because different wavelengths of light are refracted by the prism at different angles. The effect is known as the dispersion of light. The dispersion is greatest when sunlight is directly perpendicular to the prism, and it decreases when the angle of incidence is increased. The bands of light are then formed, with red light being refracted at the smallest angle and violet light at the largest. The dispersion of light is an important concept in astronomy, as it allows astronomers to observe the spectra of distant stars and galaxies. The spectra can provide information about the composition of the stars and galaxies, as well as their distances and motion. Therefore, the dispersion of light is a fundamental concept in the understanding of the universe.
Monday's Daily Pennsylvanian was one of the first issues to really comment on the Daily Pennsylvanian's responsibility to the people. Many DA students had a long, time-consuming story carried on WQXI and reported in the DP, mentioning the importance of competition between the student body and the university. The PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately.

For this statement it is coming from President Meyerson. The position was clear that the DP needs to be more professional and more responsible to the people. The PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately.

As for printed media, perhaps he's only reading the DP. Anyway, he needs more coverage of the DP. He thinks that the PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately.

An Adversary Role

Student Activities Council and Undergraduate Assembly meetings are usually a freshness, and in my three years on the Council have often come across the same problems as we have. The DP is run by the University in all the PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately.

The PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately. The PENN (as it is often called) of the most complex definitions is that the local press does not cover this adequately.

Letters to the Editor

On Questioning the Responsibility of the Campus Press

By Victor Patin

Every one in a while I prepare myself for a busy day, and sometimes that means waking at a very early hour. But at these unusual events have marked significant turning points in my life, usually, they have been enough recent, but have left investigators for what's in front of the sun. Each has forced me to venture into the unknown, to reach out to something new. I always knew it would prove more difficult more about something I thought I hadn't done before.

Watching the first episode of a show about the future of the game was just another experience. I was different of viewing a drama of the characters on the television way to a screen and entertained. Fine drama is always entertaining. Another is to involve yourself in the culture, passion and vigor of the story. Each actor brings a more

A Journey Through Time

By Martin Seigel

If there's one thing with which I agree it is that the University is in dire financial straits. But the latest budgetary projections have been the challenge of The Daily Pennsylvanian for the past year. Administrators are currently calling for major cuts in the University's budget to meet the current year's operating needs.

As the University faces the prospect of another annual jump in tuition and fees, it is time to examine the effects of this sort of student action.

Natural, this should be a problem which affects all students. Each student, no matter what his position is, has a stake in the DP's future. One would think that student who has a personal stake in the DP's future would be more assimilated about the results of his actions. But Ted Lieber, as most DP writers will attest, is a DP fanatic who has maintained throughout his tenure on the Council a strong commitment to the DP. In fact, he and the Council are just as much of a force as the DP itself, and their influence is felt strongly on the campus.

news in brief

Four Alarm Fire

(Continued from page 1)

Residents of the area crowded the streets around the fire scene. "Why didn't they tear this thing down?" one local resident complained. "No one's been living there for more than a year. Why does it always have to wait until something like this happens?"

Others said they were not surprised by the fire, because of the fire equipment on the streets. Police officials at the scene refused to comment on the fire.

Many people speculated that the blaze was the result of arson. "Fires don't just start from nothing," a long-time resident said. "There's nothing inside to start a fire - it must have come from outside."

Rizzo refused to comment on the fire. Paddy O'Brien of the Interim said they "hoped" the rapidly freezing water would not create traffic problems today.

The area remained closed into the early hours of the morning. Streets between Market and Walnut Streets and the north-south cross-streets were still closed Wednesday, January 26, 1977.

The Daily Pennsylvanian.

NEWS IN BRIEF

Compiled from local press, international sources.

CARTER PROPOSES TAX BURDENS - President Carter has decided on a $1.3 billion economic stimulus package that would result about 169 to 241 new law and middle-income estates, budget director Bert Lance announced yesterday. Lance added on tax cuts of about $1 billion for indi-

viduals, $2 billion for public works and $1.3 billion for bonuses in both 1977 and 1978.

GERCARD CALLS FOR ISRAELI WITHDRAWAL - French President Valery Giscard d'Estaing yesterday joined the Arab call for Israel's withdrawal from territory occupied in the 1967 war and endorsed an independent Palestinian state. Giscard and France would be willing to join a new session of Arab-Israeli peace negotiations.

Research Funding

(Continued from page 1)

The University at St. John's University was notified by the Office of Special Programs that the University had received a grant of $500,000 from the National Science Foundation for a project entitled "An Opportunity for Business Exposure." The grant is intended to provide institutional grants for undergraduate students to participate in business-related activities. The grant will support up to five students per semester, with a total of 20 students over a two-year period. The grant includes funding for travel, accommodations, and support services. The grant is administered by the Office of Student Activities and sponsored by the Department of Business Administration.

 Slovenia has been chosen as the site for the 1977 Cultural Studies Conference. The conference will be held from June 15 to 19 and will feature keynote speakers, panel discussions, and workshops. The conference is open to all interested individuals and is sponsored by the Department of Cultural Studies.

Wharton

(Continued from page 1)

The Wharton School has announced that it will begin offering a new undergraduate program in Business Administration. The program will be open to students who have completed their first year of study at the University of Pennsylvania. The program will be housed in the Wharton School and will provide students with a solid foundation in business administration. The program will be administered by the Office of Student Activities and sponsored by the Department of Business Administration.
A STUDENT'S CLOTHING in a Hill House laundry room dryer caught fire yesterday, causing a small fire. Students had to be roused out of bed for a temporary evacuation.

Laundry Fire in Hill Dorm Forces Student Evacuation

By BILL ALTMAN
and ERIC SUNAYER

A small fire at Hill House caused a temporary evacuation on Tuesday morning as students worked outside the building and interior courtyard of the dorm.

The cause of the fire has not yet been determined, but it apparently began in a clothes-dryer in the dormitory's northeast laundry-room.

When the student owning the clothes realized in alarm that the fire had spread to the laundry-dryer, he attempted to smother the fire with a laundry basket which also began to burn.

Witnesses said all the students were50.

According to Bill DeLuca, university safety manager, the extinguishers involved in the incident were inspected and tagged last month. But they did not extinguish the fire because the type of extinguisher involved in the incident did not match the type of extinguishers in the dormitory.

DeLuca said that the type of extinguisher involved in the incident did not match the type of extinguishers in the dormitory. The University is probably going to install new and better matching extinguishers in all the dorms.

He said that the type of extinguisher involved in the incident did not match the type of extinguishers in the dormitory.
