Fiscal Planners Contend With Health School Deficits

By ROBERT BEUTLER

Budget administrators are increasingly focusing on ways to cut health costs and are concentrating on innovative ways to reduce expenditures, according to experts in the field.

At a recent meeting of the Pennsylvania Medical Society, Dr. John R. Smith, president of the society, said that the health care system is facing a crisis.

"The current health care system is unsustainable," Smith said. "We need to find ways to reduce the cost of health care and improve the quality of care."}

Wharton Faculty Approves Motions Lengthening Time Period for Tenure

By EILEEN RANGER

A motion to lengthen the probationary period for faculty members was approved by the Wharton faculty at its quarterly meeting on Tuesday.

The motion, which was proposed by Professor Robert A. Carlin, was approved by the faculty after a two-hour discussion.

The motion calls for the probationary period to be extended from three to five years, and the time for tenure from seven to 10 years.

The motion was approved by a vote of 9 to 3, with two abstentions.

The Carlin motion was approved unanimously by the faculty.

The motion was proposed by Professor Robert A. Carlin, who noted that the current probationary period for faculty members is too short and that the time for tenure is too long.

He said that the current probationary period is too short and that the time for tenure is too long.

**ISA Rebirth Underway**

A campaign is underway to revive the International Students Association (ISA), whose center has been dormant for over a year in the PAM. ISA leaders hope to re-establish the ISA as a viable entity by attracting new members and reestablishing its role as a center for international students. The campaign will include efforts to increase student participation, organize social activities, and provide a forum for international students to discuss their experiences and share their cultures. The campaign is being led by ISA representatives who are working closely with the Students' Union to develop a comprehensive plan for the ISA's revival. The campaign is expected to involve student leaders, staff members, and faculty to ensure its success. The ISA hopes to reestablish its presence on campus and provide a welcoming environment for international students.

**Quad Grille Reopens**

The Quad Grille will open Thursday through Sunday nights for the rest of this semester. Hours are 7:30 PM to 11:00 PM on Fridays and Saturdays and 6:30 PM to 11:00 PM on Thursdays and Sundays. The Grille will be open Thursday through Sunday nights for the rest of this semester. Hours are 7:30 PM to 11:00 PM on Fridays and Saturdays and 6:30 PM to 11:00 PM on Thursdays and Sundays. The Grille offers a variety of food and beverage options, including grilled meats, burgers, hot dogs, and vegetarian options, as well as a selection of craft beers and wines. The Grille is located in the lower Quad and is open to all students and faculty. The Grille has been closed since the end of the fall semester and is excited to reopen for the remainder of the semester. The staff is looking forward to serving the campus community and providing a comfortable and enjoyable dining experience.

**Cultural Trust Gallery Exhibits Quilt Collection**

A collection of unique and colorful quilts from the late twentieth century are currently on display at the Cultural Trust Gallery in the PAM. The exhibit features quilts from around the world, showcasing the rich history and cultural diversity of quilt-making. The quilts are on loan from various museums and private collections and highlight the craftsmanship and creativity of quilters from different cultures. The exhibit is open to the public and provides an opportunity to appreciate the beauty and history of quilts. The Cultural Trust Gallery is located in the PAM and is open Monday through Friday from 10:00 AM to 5:00 PM.

**The Physicists**

Richard Dix as Hamlet and James Noble as the Duke of York in the upcoming production of *Hamlet* at the University Theatre. The production is directed by Peter Tarre and is scheduled for March 6. The Physicists is a play by William Congreve, and the production promises to be a thrilling and thought-provoking experience. The cast includes well-known actors and actresses, and the production is directed by Peter Tarre. The Physicists is a play about the relationship between science and society, and it explores the themes of love, deception, and ethics. The production is scheduled for March 6 and is expected to be a highlight of the University Theatre season.
Talking Southern Style

By Fred Schneere

Schneee. Carnegie's general section victory had a profound impact on the entire campus, and the change of Washington's party in favor of Carter was in large part due to the campaign to eliminate the last vestiges of the opposite party's accomplishments.

FROM THE FOURTH ESTATE

Americans from Maine to California have written in the past few days to say that they are in order. An "editorial" seems to be in the present tense, indicating a change in the past tense. This is not the case. The '40s Yankee version-

Origins of Modern Film Principles
Discussed by Ex-Soviet Professor

Karetnikova, a professor at the Soviet Union's Academy of Cinematographers, said Monday at a colloquium held at the Annenberg School of Communication that the basic principles of cinema existed before the camera or film were ever invented. "Leonardo da Vinci was the first great innovator of film," Karetnikova said. "In the movie "Whispers," he used the energetic works of nineteenth-century Impressionist artists to exemplify the expression of movement within a single painting. "After the seventeenth century, paintings and Egyptian art were both essential visual principles from the laws of painting, which have existed for thousands of years. The basic principles of cinema for thousands of years were used to express meaning in film as it is used in painting. "The movement only three colors were used-white, black and red," Karetnikova said. She said the intensity, evolution and clash between colors symbolically told the story of a human life. She explained how the element of movement was not lost; it is used in painting. "In the movie "After Magritte," she said, explaining how he used his paintings of paintings and Egyptian art to express movement over time." Some Impressionist art, she said, was "bugging you?" Karetnikova also outlined the artistic precedents of "moving pictures." Some basic principles of modern electricity and more importantly saved mankind. A new system, however, was brought into the single story of a human life. Whatever it seemed that paintings of the period were reaching for, could only be fully expressed in film," Karetnikova said.
*Haley Speech*

Monday-practicing Muslims prayed for him at a temple. "Pray to Allah to call us to consciousness," he told them.

Haley said that he hoped Roots would inspire pride in his people. "If any black person in America knows his original name in African and when his ancestor was taken out of Africa, he can be put in touch with a wizened old griot," he said. Roots is really about "the family of humanity," Haley said, adding, "I hope Roots will inspire all immigrants to search out their roots.

After signing autographs at the end of his speech, Haley was scheduled to meet Dining Service employees for a coffee-hour and discussion at Hill House. However, the meeting was cancelled because Haley said he felt ill.

Admissions

(Continued from page 1)

DeFunis, who was denied admission to the University of Washington Law School, although 36 minority applicants with lesser credentials were accepted. The case reached the Supreme Court, but was declared moot after an order by a lower court forced the law school to accept DeFunis.
