Systems Renovation of Vance Hall Expected to Decrease Energy Use

By JACOB JACOB
A major mechanical renovation of one of the university's oldest buildings is expected to begin within the next few weeks.

Vance Hall, the 1896-era Wharton graduate center, will be the first project to undergo a series of modernizations in a university-wide building renovation effort, 'not only to improve the physical plant, but the people in the building probably won't like it too much,' said University Vice President Jack Davis.

Davis, who served as a member of the $204.3 million University Retirement Fund's endowment committee during the 1970s, said the $2.5 million renovation, which he said would be 'substantial,' would not begin until the next budget year.

The change in the computer facility and the study lounge, such as they can be, could be completed during the next academic year.

Another important part of the renovation is the installation of sensors and controls in the building to be connected with a central energy monitoring computer in the Franklins building.

Gary Bomar, the project's energy consultant, said the change would involve between $332 million and $38 million in government subsidies.

A major goal of the renovation is to improve the building's energy efficiency and to extend its useful life.

Bomar noted that the renovation was considered important because of the building's anticipated use in the next few years.

"We felt the poster series has pretty much accomplished its mission and we're moving on to other matters," said University Communications Director Steve Allred.

The number of applications for Vance Hall has increased significantly in recent years, Bomar said, and the University has requested $9 million for the renovation.

"We're not sure where we're going to go from there, but that's what we're going to try to do," Bomar said.

Bomar said the renovation would begin in the spring at the University's School of Business.

In the meantime, the school is expected to pay back about 10.2 million in federal student loans over the next few years.

"I think that's a pretty good way to approach it," Bomar said.

"It's been a great help to us," Bomar said, "and it's something that we're trying to do."
CAMPUS EVENTS

TODAY
- 11:00 AM - 1:00 PM: LUNCH MEET UP IN THE GROVE
- 12:00 PM - 2:00 PM: STUDENT AFFAIRS OFFICE HOUR

The Daily Pennsylvanian
Increased Security Force Requested in UA Proposal

By JONATHAN GREER

The Undergraduate Assembly (UA) requested an increase in the number of campus policemen, but members of the Security Committee were concerned that the proposed increase in the number of security force members might increase the force to 92 men.

In addition, the NEC Fair Practices Committee issued an endorsement for the resolution. The NEC will begin training a new member of the force and a new member of the Security Committee. The proposal was presented to the NEC for consideration and approved by the NEC Fair Practices Committee.

The NEC resolution endorsed the proposal to increase the number of security force members by 72 from the present number of 44. Christine Yarris, a Security Committee member, said that the reason for the increase was due to a lack of people on the force. Four to six members of the security force are in training school at a given time.

Yarris estimated that the cost of each additional security officer would be $12,000, bringing the total cost of implementing the proposal to $135,000. UA members argued that without proper documentation from Security Committee members, the proposal could not be endorsed as costly.

Student Loans

President Student's proposed elimination of the National Defense Student Loan (NDLS) program is extremely disturbing and will create serious difficulties for many undergraduate students.

Many students are forced to depend on NDLS as a result of spiraling educational costs. Currently, the University's financial aid and recieptive efforts towards this loan offer at three percent. Very serious difficulties would arise if the elimination of this loan and any other loan that charges lower-income students would charge higher interest rates.

In addition, President Student has attempted to increase funding in other areas such as Basic Educational Opportunity Grants for lower-income students. However, it is not true to call these recipients who also need aid.

Therefore Congress should override Student's recommendation and continue the low-interest loans.

Student Loans

When you want to be like a rock, you really look that way, I guess, and you've probably always been that way. But there's no one who I've ever seen who always has everything in view. It's not going to make me a more person in my second or third term of the University.

I'm usually not like anyone else I've ever met but I have always wanted to have the most fun. It's not going to make me a more person in my second or third term of the University.

The problem with student narrow-mindedness is that there is no way to escape from it. It's not going to make me a more person in my second or third term of the University.

You can always be the one who is the most fun. It's not going to make me a more person in my second or third term of the University.

Mermen Crave Victory
In Final Season Swim

By DANNY BOREMAN
The men's swimming team will become the last Ivy League team to hold a meet this season and will be the first to hold a meet this season. This is because the Ivy League has announced that it will not hold any meets until after the conference championships have been held.

The combined Ivy League record of the men's swimming team is 1-11, and the team has not won a single meet this season. The combined record of the women's swimming team is 2-1, and the team has won two meets this season.

The Penn fencing team has high aspirations. "We haven't competed in foil," according to Micahnik. "We'll be going at it like this meet is the foil championships at West Point, so the two teams is a disheartening 1-11, but everyone has given their all. Everyone has a personal best during the season and that's what it's all about. The spirit has been great and we've had a good time."

Fencers Face Fearsome Foe in Finales

By FRED ROLLMAN
As if facing an undefeated Princeton contingent isn't enough of a problem, the Penn fencing team faces another obstacle during the season and that's what it's all about. Everyone has given their all. Everyone has a personal best during the season and that's what it's all about. The spirit has been great and we've had a good time.

Thinking 'Cornell Only', Hoopsters Head North

On Ivy Title Quest

BY JONATHAN LANNEME

Just that a score of the Big Five title races is not enough, the Penn basketball hoops can get back to reality—come back to the Ivy League crown. The Quakers (1-5, 4-11) have little to show for the last week — the red and blue line in Cornell (6-7, 14-16) looks a little thicker than the orange and white.
