Snowstorm Paralyzes City; University Cancels Classes

By ERIC JACOBY

The University, which had previously stated that it would open at 9 a.m. Tuesday, announced that classes would be canceled Tuesday and Wednesday because of the snowstorm. The decision was made after a 6 a.m. meeting between the New York Times and the Board of Trustees. The trustees voted unanimously to cancel classes for the day.

CANNES FILM FESTIVAL
PENN SUMMER COURSE
May 13-June 3
• Free Access To The Cannes Film Festival
• Special Seminars With Directors, Critics

### Tracing the Roots of the CIA

**By David Lieber**

A look into the life of the late Professor Ephraim A. Speiser, one of the more celebrated scholars in recent University history, provides us with yet another example of the intertwined yet parallel development of American universities and the Central Intelligence Agency (CIA).

Speiser was not only a premier scholar in the field of Near Eastern studies, but also a CIA operative who spied on Arab countries during the Cold War. His work with the CIA was not without controversy, and his legacy is still debated today.

**Irrational Revelations**

When 'POW! Zowie!' premieres this Saturday as part of the 30th anniversary of the CIA's establishment, viewers can expect to learn about the agency's early days and its controversial history. The movie, directed by Mike Douglas and produced by Espen Seier, offers a unique perspective on the CIA's origins and its role in shaping American foreign policy.

According to Seier, 'POW! Zowie!' is not just a documentary about the CIA, but also a story about the people who work for it. "It's about the humans behind the logos," Seier said. "The agents, the spies, the administrators, the people who make the agency tick."

The movie features interviews with current and former CIA operatives, as well as footage from the agency's archives. It covers the CIA's history from its inception in 1947 to the present day, including its role in the Cold War, the Vietnam War, and the War on Terror.

"We wanted to make sure that viewers understand the complexity of the agency and its impact on global politics," Seier added. "The CIA is not just a group of players working behind the scenes, but a group of individuals who have had a profound effect on the course of history."

The movie also explores the CIA's role in the Bay of Pigs invasion, the Iran-Contra affair, and the 9/11 terrorist attacks. It includes footage from the agency's archives, as well as interviews with former operatives who share their experiences and insights.

"POW! Zowie!' is not just a documentary about the CIA, but also a story about the people who work for it. We wanted to make sure that viewers understand the complexity of the agency and its impact on global politics," Seier added. "The CIA is not just a group of players working behind the scenes, but a group of individuals who have had a profound effect on the course of history."

POW! Zowie! Premieres this Saturday on PBS at 9 p.m. Est. Don't miss it!
Budget Problems

Monday, January 23, 1978

The Vet School is faced with very grave problems, and these difficulties will remain if the legislature does not act to prevent them, according to University officials last week.

The Vet School is operating with a deficit, to be repaid to the general budget. The deficit, already more than $1 million, is expected to reach $1.2 million this year, and it is expected to increase significantly in future years.

The Vet School is one of the University's least efficient programs, in terms of financial performance. The University is forced to cut its budget to the minimum necessary to continue operations.

The University's budget problems are linked to the Commonwealth's budget constraints. The Commonwealth has no resources to assist either the Vet School or the University as a whole, leaving the University to deal with an impending and potentially catastrophic funding situation.

There are always legislators who wish to use the Vet School's financial problems as a bargaining chip. It is possible that the University will be forced to cut its budget even further, in order to support other programs that are deemed more important by the legislature.

The Vet School's funding is tied to the state's funding of the University. If the University's budget is reduced, the Vet School's funding will also be reduced, exacerbating the situation. The University is therefore dependent on the state's budget to receive adequate funding for the Vet School.

In order to solve this problem, the University must find a way to reduce its expenses and increase its revenue. This may involve cutting courses, reducing faculty, or increasing student fees.

The University's budget is also affected by the Commonwealth's budget constraints. The Commonwealth has no resources to assist either the Vet School or the University as a whole, leaving the University to deal with an impending and potentially catastrophic funding situation.
Green Power Play Rout Icemen, 11-5

By STEVE PETERS
Chop, chop, chop. Trenton State was pounding the ice as the red-shirted Icemen, who were whistled off for holding, almost did it again. The official end of the slump that has plagued the Icemen this season did come, however, when Trenton State (17-7-2, 9-6-0 ECAC) knocked off Dartmouth (9-6, 7-5 ECAC) who couldn't capitalize on power play opportunities (they were 5-for-the-better part of two periods. The Quakers kept the game close throughout the first half, but Dartmouth wasted no time scoring in the second half, breaking it open.

They even led 4-3 after Gary Prior's tying goal. The Quakers kept the game close through the majority of their goals came after mistakes,作者所有。
