Relocation of Officials Planned in Emergency

By RICHARD K. EPSTEIN

In an extraordinary decision aimed at preventing striking workers, a fire, or other natural disaster, the University is already preparing to evacuate the College Hall, the main administrative center, if an "emergency coordination plan" that would require the evacuation of College Hall is drawn up in 1971 after two demonstrations in the fall. This plan is based on the assumption that the University would be operating its administrative offices in College Hall "in an emergency," and have a "remainder" in the event that College Hall was taken over.

A confidential memo which was a part of the proposed plan said that College Hall would be "completely occupied" by officials, secretaries, and students. If an "emergency" occured in 1972, another College Hall "sit-in" might be occupied for several days. Another College Hall "sit-in" might be occupied for several days. The plan was written in 1973 after two demonstrations at the University, one in the event that College Hall was taken over.

The landscaping is the first impression made by visitors to the University. The plan in its basic form was adopted by the University administration. If the University would have been forced to move its offices, the University administration would have been able to rehire all of the fire housekeepers.

The University administration fell, however, that the University would have to negotiate a contract with the same union while bearing the added costs of the labor dispute. This will affect the University's budget next year, and the University is likely to have to make it even more difficult for administrators to further contend with the Teamsters.

The Teamsters' initial contract was held up for several years, University administrators said Thursday. The Teamsters had been cleared of the NLRB charges of discrimination, the threat of a strike could be delayed, but they also saw the possibility of increased costs at least for this year.

University administrators have been working with the Teamsters for the past several years, and have set aside extra labor costs for the future. The Teamsters' contract had been renewed, but the University had recognized the Teamsters as the official representatives of the University housekeepers and calling them "unlawful," and that the University would have to rehire all of the fire housekeepers.

The loss of the labor dispute, however, means that the University would have to negotiate a contract with the same union while bearing the added costs of the labor dispute. This will affect the University's budget next year, and the University is likely to have to make it even more difficult for administrators to further contend with the Teamsters.

Out From Under the Table

By Laurin Orland

Laurin Orland is a junior majoring in English. This is her first column.

I wish to express my outrage at the recent resolution that took place. In order to pass this resolution, the faculty members engaged in a discussion that has caused much consternation and concern among many students. The action taken has been met with widespread criticism and has led to a number of protests and demonstrations on campus.

I am writing to express my deep concern about the recent decision to ban all non-faculty members from using the college houses system. This decision has been made without the input of the student body and has been met with widespread opposition from students and faculty alike.

The faculty members who voted in favor of this decision have failed to take into account the unique experiences and perspectives of students, who are the ones who actually use the college houses system. The faculty members who voted against this decision have disregarded the needs and desires of the student body.

I strongly believe that this decision is discriminatory and unfair. It is a violation of the rights of students and a violation of the principles of democracy and participation. I urge all faculty members to reconsider their decision and to engage in a dialogue with students to find a solution that is fair and just.

I ask all students to stand up against this decision and to demand that the college houses system be open to all members of the student body.

Laurin Orland is a junior majoring in English.
