Examiner to Resume Fratlnquest
By JONATHAN GREENE
HAGUE, N.Y. (AP) — The prosecutor, soon to be the man with the final say about whether University of Pennsylvania student Robert Bazile is charged with murder, asked a judge Friday to allow him to resume his investigation into the death of the University of Pennsylvania sophomore.

The inquest, being conducted by Philadelphia Medical Examiner Beryl McCann, is scheduled to resume Monday, and a judge has ordered that the prosecutor be given the opportunity to question certain key witnesses, the coroner's office said.

Bazile, a sophomore from West New York, N.J., was found dead in his dorm room last week. The prosecutor, who is in charge of the investigation, said he wants to question certain key witnesses before the inquest resumes.

The prosecutor has been pursuing the investigation for over two weeks, and he said he wants to question certain key witnesses before the inquest resumes.

He has been pushing for weeks to question certain key witnesses before the inquest resumes.

Wife of Dissident Speaks on Soviet Jewry

By DAVID NALVEN
“The aim of the Soviet government is to destroy the Soviet Jewish community,” Avital Shcharansky, wife of imprisoned Jewish dissident leader Anatoly Shcharansky, said Monday evening in a speech given to a group of about 50 people in Houston. Shcharansky’s husband, who had been serving a 10-year prison term for his alleged role as an American spy for the Central Intelligence Agency (CIA), was allowed to stay in the Soviet Union after his wife arrived in the country to ask for his release.

Shcharansky was served with an ultimatum from the Soviet government stating that she must leave the country or she would never be seen her husband again. Hoping to be reunited with her husband, Shcharansky joined forces with the Student Struggle for Soviet Jewry (SSSJ) and spoke with Vice-President Mondale and many senators has been sent to (Premier Leonid) Brezhnev asking for my husband’s release,” she said.

The Shcharanskys were married during the summer of 1974. The day after their marriage, Mrs. Shcharansky was served with an ultimatum from the Soviet government stating that she must leave the Soviet Union or she would never be allowed to leave again. Hoping to be reunited with her husband, Shcharansky traveled to Israel. She has been joined by her husband shortly after his release from prison.

Anatoly Shcharansky, a 30-year-old computer specialist, has been imprisoned for 10 years for his alleged role as an American spy for the CIA, which was originally reported in the Soviet press, that contrary to allegations that have been made in the (American) press, Mr. Shcharansky has never had any sort of relationship with the CIA.

In her speech, Shcharansky said, “We cannot believe what we read in the press about the Soviet government.” She said that contrary to allegations that have been reported in the (American) press, Mr. Shcharansky has never had any sort of relationship with the CIA.

In her speech, Shcharansky said, “We cannot believe what we read in the press about the Soviet government.” She said that contrary to allegations that have been reported in the (American) press, Mr. Shcharansky has never had any sort of relationship with the CIA.

Letters to the Editor

Necessary Steps

Mark Bolten’s “A Test in Skokie” (DP, Feb. 13) is an excellent defense of the American tradition that groups can manifest in even the most repugnant of groups.

The Latino Advantage

The Latino Advantage

Altschul and practitioners recognize that the American public’s relationship with the Latino community has been fraught with misunderstanding and misrepresentation. The Latino community has fought hard to overcome these challenges and build strong relationships with the mainstream culture.

In the words of Bolten, “The Latino community is resilient and determined. They have not been deterred by the challenges they face, and they continue to work towards their goals.”

The Latino community is well-positioned to make significant contributions to American society, both in terms of economic growth and social progress. However, success will require a sustained commitment to equitable policies and practices that recognize and value the contributions of Latinos.

Letters to the Editor

Telling it Like It Isn’t

By Dave Clow

Dear Editor,

I braved your essay with the title “It was censorship and not inclinations of liberalism.”

You suggest that the statement “it was censorship and not inclinations of liberalism” was made to justify the suppression of unpopular speech. I believe that this is a slander. The statement “it was censorship and not inclinations of liberalism” was made in the context of discussing the controversy surrounding the publication of Mark Seltzer’s “A Test in Skokie.”

It was in the context of discussing the controversy surrounding the publication of Mark Seltzer’s “A Test in Skokie.”

I believe that the statement “it was censorship and not inclinations of liberalism” was not intended to be a justification for the suppression of unpopular speech. Rather, it was an attempt to acknowledge the complexity of the issue and to suggest that there may be other factors at play.

I appreciate your concern about my essay. I assure you that it was not intended to be an attack on the American tradition of free speech. On the contrary, I believe that the American tradition of free speech is a precious and essential part of our democratic system.

I hope that you will consider this explanation. I am open to further discussion on this topic.

Sincerely,

Dave Clow

success to good location, low-day side, and advertisements not be removed from college-aged customers.

Students are generally not noted for being big spenders, but the volume of business the University has in hand compensates for their tight-fistedness.

"We realize that students don't have very much money which we're looking at," Freed explained, "and that's the only way we can account for the difference between the amount we have and the amount we think we're losing on the basis of past history.

Freed estimated that just one-third of the campus population are potential customers, but Freed's hopes proved too optimistic.

The student's even less than last year," Freed declared with a look of annoyance. "I'll bet if you asked the kids in High Rise North (the student dormitory) whether there was a shoe store in the area, the biggest number of students would not have an answer for the right item, be it a down jacket, frozen yogurt, the perfect fistedness.

The Science of Neo-Anthipserism
The MassageMobile is based upon the little-known, but long proven principle of rapidly rotating square wheels. At high speeds, the ride is extremely smooth, since only four points touch the surface at any given time. This unique principle makes the MassageMobile an all-season vehicle. It can traverse any bodily terrain, be it flat and arid, densely forested, rolling heartland, or swaying mountainous hummocks.

Therapeutic Effects
A fortuitous capture is induced when the rapidly rotating, square-wheel touch the varied surfaces of a prone adult. The pleasurable sensation may render some users unusually responsive to suggestion. For this reason, we advise that the MassageMobile chaffeur provide proper references before an extended drive.

Don't rub your Valentine the wrong way... get a MassageMobile from the Bookstore!

Guidelines on Government Agencies
(Continued from page 1)
occurred in 1974:
- a former faculty member served more than 16 years as a private consultant in the CIA's MK-ULTRA mind-control program. The University of Pennsylvania's language professor of dermatology performed research in the 1950s on incapacitating drugs, the time apparently specifically, for the CIA's mind-control program MK-ULTRA. A University professor at that time who was evaluating a model. The exact nature of the work has not been determined.

A fourth instance of University involvement with CIA-funded projects remains unrecorded. The Senate Intelligence Committee received a report from a CIA agent in 1974, indicating that the University had participated in a joint research project with two other institutions. It is not clear, however, if that project, as it were CIA-MK-ULTRA progress, human subject behavior was altered by drug use.

"It has not been ultimately proven that the University was not involved in any way with that research," University Counsel Stephen Burbank has told The Pennsylvania Daily. "If the resources available to me to conduct an investigation were adequate, we would pursue that in accordance with University policies on external guidelines, but protecting the identity of those involved is a positive one," Burbank explained, "but protecting them is not the issue." Burbank said two weeks ago that CURIA's guidelines, like current University policies on external guidelines, and not involving guidelines for violations of the policy, however, "are the function of guidelines on external guidelines. The Senate Intelligence Committee has not considered the guidelines, either. It is something to be done in a standard of behavior. If you are convicted of an offense, you are standing on your own islands and are taking your own stand on our community standards."

Tuition: You Think We Have It Bad?

While Penn students moan about yet another $900 tuition increase, they should take note that they are not attending Pennsylvania Medical College in Cleveland, Ohio. Next year's increasing tuition will be $3,800 in tuition (ouch!). The problem of the student 'what next month to make sure our realities in $60 for fresh-

We're Not Lost In The Big 5 Yet

Administrators at Temple University in North Philadelphia were somewhat shocked when they got the results of a literacy test taken by 270 sophomores in the College of Liberal Arts. Thirty-five percent failed. It's not surprising, say Temple officials. The test is not an intelligence test, but an honest assessment of students' reading ability.

Another Snow Job

Today's snowfall makes this one of the snowiest winters for Philadelphia on record, as if you didn't already know. Actually, the average seasonal snowfall is 30 inches, but this year more than 60 inches have fallen on the city. The 1961-62 winter was the snowiest season, but only 39.1 inches had been recorded, and the all-time seasonal snow record of 49.1 inches (1960-61) stands in jeopardy.

Renewed Iranian Tie

(Continued from page 1)

The Committee for Human Rights and Intellectual Freedom in Iran, feels that such a referendum should be held in Iran in the near future. If the referendum discloses that the Shah is not truly representative of the nation, a human-rights group, over the Shah's respectability by buying into the Shah to cloak himself in academia, which makes the Shah's prominence as the world's second largest exporter of petroleum.

Roeszler Rebounds Icemen

By LINDA HENRY

Penn's first-year goalie, Bob Finke, has been making a name for himself with his solid play. As the Quakers prepare to face Lock Haven University in a meeting on Friday, Feb. 16, Finke will be hoping to continue his strong play.

Finke has been a consistent presence in goal for the Quakers, recording 14 shutouts this season. He leads the team in saves with 799 and has a goals-against average of 2.14. His performance has been crucial in helping Penn maintain its lead in the Ivy League standings.

However, Finke's time with the Quakers has not been without its challenges. After a strong performance in the first half of the season, Finke struggled in the second half, allowing more goals than he had in the first half.

But Finke has been resilient, and with the help of his teammates, he has continued to improve. His work ethic and determination have earned him the respect of his peers and coaches.

In addition to his solid play on the ice, Finke has also been involved in the community, participating in various charity events and volunteering at local hospitals. His dedication to his sport and his community has made him an inspiration to his teammates and fans alike.

Overall, Finke's contributions to the team have been invaluable, and his continued success will be a key factor in the Quakers' success this season.
