Penn Gays File Charges Against Frat

BY DAVID MANN

Gays of Penn, a campus organization founded to monitor and file charges against certain fraternities and to provide an educational forum for all students, has filed an official harassment complaint against Phi Kappa Sigma fraternity. The complaint was filed with the University Judiciary, a special committee of the Student Council, for the purpose of investigating Phi Kappa Sigma's alleged violations of the University's nondiscrimination policies.

Gays of Penn president David Fair commented on the charges. "We've made an official complaint because we have evidence that Phi Kappa Sigma has failed to adhere to the University's nondiscrimination policies. We believe that Phi Kappa Sigma's discriminatory practices are a violation of the University's policies and we are taking action to correct this situation."

The complaint alleges that Phi Kappa Sigma has engaged in a pattern of discrimination against gay students. The organization has been involved in several incidents of harassment and discrimination, including the denial of membership to gay students, the exclusion of gay students from fraternity activities, and the use of derogatory language and slurs.

Gays of Penn hopes that the complaint will lead to a change in Phi Kappa Sigma's policies and practices. The organization is committed to upholding the University's nondiscrimination policies and ensuring that all students have equal access to educational opportunities. Gays of Penn is urging other students to come forward with evidence of discriminatory practices in order to ensure that the University's policies are enforced fairly and consistently.

Housing In Ivies Is No Bed of Roses

By RICHARD E. GORDON

At Columbia University, Janice Mitch Bowers said recently, "the housing rows are starting to get really out of hand." At Cornell University, said sophomore Jamie Sophir, "There’s a horrible scene on the other side of the fence.

At Princeton, students are really happy to be off campus. At the University of Pennsylvania, a new student center is now under construction at Dartmouth. "It should give us a new perspective on the campus," Sophomore Ray Bertolino said. "It’s a good thing that we’re off-campus that you aren’t really alienated," she added.

At Harvard, Yale, and Brown, students are really happy to be off-campus. At Harvard, said sophomore Jamie Sophir, "There’s a horrible scene on the other side of the fence.

According to the Columbia housing office, approximately 1300 Columbia students have to find off-campus housing. Only freshmen are guaranteed a room.

"A lot of the off-campus apartment complexes are really rundown," Sophir, who lives off-campus, said. "They take advantage of students.

"I don’t like living off-campus much, but there is a mass of people who live off-campus if you aren’t really intentioned," she added.

Another aspect of the housing situation is the extent of the fraternity system, which includes more than 150 fraternities. "There are a number of frat houses, Sophir said. "Because there are so many fraternity members, about 10 percent no longer have space to live.

Professor Chris Klyza said that the social aspects of fraternity life is due to the housing shortage and also to the lack of sufficient dormitory social life. "The bars are real big," Klyza noted. "We can get away from the same people..."}

According to Bache, there are only 20 or 30 women in his 600-student dormitory. Probably the main source of parties is Brown, with off-campus housing...
Pease Science: Back to the Roots

By Vartan Gregorian

The second part of a two-column series on Peace Science.

Peace Science was founded in 1970, but the idea for a Peace Science Unit at the University of Pennsylvania was first proposed in 1969. The first proposal was made by Peter Wolf, a psychology professor at the University of Pennsylvania. Wolf proposed the establishment of a Peace Science Unit in order to explore the nature of peace and its role in society.

The idea was motivated by the growing interest in the study of peace and conflict resolution. The proposal was endorsed by a group of faculty members who believed that the University should take a more active role in promoting peace and understanding.

The proposal was presented to the Provost, who at the time was William W. Proctor. Proctor was skeptical of the idea, but he agreed to explore it further. He appointed a committee to study the proposal and make recommendations.

The committee consisted of John E. P. Dupont, a political scientist, and Charles E. Merriam, a sociologist. The committee recommended that the Peace Science Unit be established as a separate department within the University.

The Unit was formally established in 1972, and its first director was Isard. The Unit quickly grew in size and influence, and it became a leader in the field of Peace Science.

For more than 50 years, the Peace Science Unit has been a hub of research and scholarship on peace and conflict resolution. The Unit has produced numerous books, articles, and reports, and its work has had a significant impact on the field.

The Unit has also played a role in the development of educational programs in Peace Science. The Unit has offered courses in Peace Science for students at the undergraduate and graduate levels, and it has been a leader in the development of Peace Science programs at other universities.

The Unit's success has been due in large part to the leadership of its directors, including Isard, who served as director for more than 20 years. The Unit has also benefited from the support of the University administration, which has provided the necessary resources and support for the Unit's growth.

The Peace Science Unit has had a significant impact on the University, and it has become an important part of the University's mission. The Unit's work has contributed to the University's reputation as a leader in the field of Peace Science, and it has helped to shape the University's approach to education and research.

The Unit has also had a significant impact on the broader academic community, and it has helped to shape the field of Peace Science. The Unit has played a key role in the development of Peace Science as a discipline, and it has helped to establish Peace Science as a serious and respected field of study.

The Peace Science Unit has also played a role in the University's broader mission of promoting peace and understanding. The Unit has worked to promote peace and understanding through its research, education, and outreach programs. The Unit has also worked to promote peace and understanding through its partnerships with other organizations and institutions.

**Quaker Talk Tests Hawks' Hurting Hurlers**

By MAURY HELLER

While the majority of the Penn pitching chores were absorbed by the Quakers' two veteran hurlers, Lisa Silverstein and Nancy Post, a few of the freshmen have been showing promise as well.

LISA SILVERSTEIN

"I knew the [Harvard] match was going to be tough, and it was," she noted. "But it could have been a lot worse. They're going to win their matches."

Collins. "They were a good bunch so we lost. It was a close game. It wasn't a rout."

"I think the girls were intimidated by the presence of the Carmines," said Zasloff. "We were expecting to be up there, to be the dominant team. We didn't do that at all."

"I think the pitchers did what they could. They pitched a complete game. They gave no ground, sweeping 7-5, 6-2 and 16-4."

"I've relied heavily on Lemisch and Sanchez," said Quaker coach Bob Seddon. "Jared, he's our number one pitcher, and Sanchez, our number two."

"The Catholic colleges really get up for games like that," said Zasloff. "They're going to win their matches.""}

"I didn't decide it was over for the team and I really was a lot of fun. I chose Harvard only because I thought I could get a better education at a small school. Lacrosse never entered my mind."

"I'm really happy with the end result," said Seddon. "We were able to pick up the pieces and get back on track."

"It's all mental, if you get a guy going and he's thinking about the last error or trying not to get too excited about it and it gets too ridiculous. The jawing is mainly for show."

"We had trouble gripping a baseball, but we handled the bat well. It was a complete game victory over Earlham College. The Hawks are the best team we've played so far this year."

"We were weak with the fundamentals. We have trouble gripping a baseball, and we have trouble handling our offense."

"But it can affect your play if you really think about the last error or anything about it."

"They (the players) were disappointed with the way we played on the offensive side."

"They have trouble gripping a baseball, and they have trouble handling their offense."

"I think the girls were intimidated by the presence of the Carmines," said Zasloff. "We were expecting to be up there, to be the dominant team. We didn't do that at all."

"The Catholic colleges really get up for games like that," said Zasloff. "They're going to win their matches."
