Athletic Reports Given To University Council

BY MARTIN MEYERSON

The University Council last Wednesday received and discussed the reports of three committees looking into the future of athletics at the University.

The chairmen of the committees, Phliladelphia News Co. Thompsom Chairmen of the University Council, and athletic directors at the Undergraduate Athletic Staff Task Force on Athletics, read summaries of their reports.

The Educational Planning Committee submitted a letter to Meyerson and the meeting, supporting the University's policy on athletics.

The Department of Recreation and the City Council Committee on Athletics, and the Educational Planning Committee on Athletics, agreed to raise the issue of athletics at the University Council meeting next month.

Blaze Destroys Apartments Building; Cause Remains Unknown

BY GREG MANNING

A huge fire destroyed the top floor of a temporary apartment building in Philadelphia Wednesday evening, sending black smoke and a fireball skyward.

The building, which housed 28 apartments in the work, burned to the ground. The fire was started when smoke detectors failed to work properly, according to the University's Fire Department.

The cause of the fire is still under investigation by the Philadelphia Fire Department.

Blaze began at about 5 p.m. Wednesday, according to the University's Fire Department.

The building was scheduled to open in about a month, according to the University's Fire Department.

The fire was reported to the University's Fire Department at 5 p.m. Wednesday, according to the University's Fire Department.

The building was scheduled to open in about a month, according to the University's Fire Department.
WANTED:
Engineering and Science Majors To Help Make History
1955. A small dedicated team of scientists and engineers began to design and construct the first submarine-launched ballistic missile, the Polaris. The team made history.
1965. The creation of the second-generation missile: the Poseidon. This follow-on design challenged and excelled the original Polaris talent.

The Strategic Systems Project Office of the U.S. Navy has a limited number of career openings in a choice of the most important projects in the U.S. Navy—Polaris, Poseidon and Trident.
As part of this team, you will be directly involved in the design, fabrication, operational support, field maintenance and training.

Contact your Placement Officer for an interview with the Capital Area Personnel Services Office, Navy(CAPPSO-N) recruiter on March 22 to 24.

Dr. F. Rokosh, Director.

By Barbara J. Shulman

Two years ago I went into the library to borrow a certain critical work on Beethoven. It is out of print and therefore there are only a few copies still available. As I took one out, just to look at the book for a few minutes, I went down to the library to find two other books. On the way back to the library, I met a graduate who was also busy with music. He was copying a Beethoven score, and I told him that I was interested in Beethoven and asked him for tips on the best way to approach the study of his music. He was very kind and suggested that I should try to see the Beethoven house in Bonn. He also mentioned that he was writing a book on Beethoven and asked me if I would like to contribute a chapter. I was very flattered and agreed to do so. He then asked me if I would like to have a private conversation with him about his book. I was very surprised but decided to accept his offer. He showed me his working process and how he organized his thoughts. He also shared some of his personal experiences and stories about Beethoven. He was very interesting and I enjoyed our conversation. I decided to write a chapter for his book on Beethoven and we met a few times to discuss the outline and content of the chapter. He was very helpful and provided me with valuable feedback. I was very pleased with the final result and I am very grateful to him for his assistance. Our conversation was very stimulating and I learned a lot about Beethoven and his music. I enjoyed our conversation and I am very grateful to him for his help. I hope to be able to repay him in the future.

If you plan to prepare for the

**NEW MCAT**

here are nine good reasons

why you should choose Multiprep...

What Multiprep Offers

14 sessions (66 hours).

Facsimile exams, each reflecting all aspects of the New MCAT. Books, format, same wording of directions, "replica" of the actual and original exam wording. Professional exam writers professionally prepared (typist and proofbookkeeper). Taking a Multiprep test is like taking the actual New MCAT.

Two full length (8-hour) facsimiles of the New MCAT (Preliminary MCAT). Each MCAT is scored and equivalent MCAT scores and percentile rankings are released.

Classes average 15 to 20 students. Classes guaranteed not to exceed 35 students. Six different instructors, each a specialist in a particular discipline (biology, chemistry, physics, etc.), conducting the program.

Video tapes and tape recordings for review and make-up purposes. Video recordings especially helpful for review of physics, chemistry, and quantitative sections.

You may repeat our program for a re-registration fee of $45.

What Most "Popular" Firms Offer

8 sessions or less (32 hours or less).

No facsimile exams—only practice tests.

Some quality of questions at that of Multiprep, but tests are poorly prepared (typed and mimeographed)—does not reflect actual New MCAT format and does not give you the "practice effect" and psychological advantage of experiencing a New MCAT.

No facsimile MCAT. Longest practice test is about 4 hours or less. No such scoring done of any tests. No concrete method of keeping track on your improvement.

No guarantee on class size. It may be anywhere from 50 to 150 students.

Usually one instructor, considered to be a "master of all disciplines" conducting entire program.

Tape recordings only (no video tapes); at certain other firms, no recordings are available at all. Some do not even have tape recorders.

To repeat their course, most other firms require full tuition charges.

Refunds limited.

Voluntary home study. Excellent caliber of material.

Discover how we make the difference.

Call or write for our brochure today.

THE FACTS:

1. HUNDREDS OF THOUSANDS OF WOMEN USE ENCARE OVAL.

Encare Oval was introduced to American doctors in November 1977. Almost immediately, it attracted widespread physician and patient attention.

Today, Encare Oval is being used by a large number of thousands of women, and costly surveyed report overwhelming satisfaction with the product. Women using Encare Oval say they find it—quite simply—he preferred that hundreds of thousands have already found it—extremely high satisfaction—showing that Encare Oval is safer for fertility than traditional vaginal contraceptives.

2. EFFECTIVENESS ESTABLISHED IN CLINICAL TESTS.

Encare Oval was subjected to one of the most rigorous tests ever conducted for a vaginal contraceptive. Results were excellent—showing that Encare Oval provides consistent and extremely high sperm-killing protection. This recent U.S. report supports earlier studies in European laboratories and clinics.

3. NO HORMONAL SIDE EFFECTS.

Encare Oval is free of hormones; it cannot create hormone-related health problems—like acne and irritant attacks—that have been linked to the pill. Since there's no hormone suppression of the ovaries, there's no periodicity change. Most people find Encare Oval very acceptable.

4. EASIER TO INSERT THAN A TAMpons.

The Encare Oval is smooth and soft, so it enters quickly and smoothly. Women using Encare Oval learned how to use it with the lab, IUD's, diaphragms, and aerosol foam.

5. BECAUSE ENCARE OVAL IS INSERTED IN ADVANCE, IT WON'T INTERRUPT LOVEMAKING.

Since there's no mess or bother, Encare Oval gives you a measure of freedom many contraceptives can't match. The hormone-free Encare Oval is safer for your system than the pill or IUD. Healer and simpler than traditional vaginal contraceptives, Encare Oval is recommended by doctors that hundreds of thousands have already found it—extremely high satisfaction—with the product.

If 1978 Eaton-Mary Laboratories, Inc., Norwich, New York 13815, is an example of cases, However, burning or irritation has been experienced by other women, and if this occurs, use should be discontinued.

"HOW CAN I MAKE MY LIFE WORTHWHILE?"
UA Slashes NORML Convention Allocation

By DAN BEEREN

The Undergraduate Assembly (UA), meeting Monday, turned down a request from the University chapter of the National Organization for the Reform of Marijuana Laws (NORML) to send three additional representatives to the national NORML convention this weekend in Washington D.C.

The UA did, however, allocate $100 to allow the three NORML representatives to attend the two-day conference and three members to attend the three-day conference in Washington. D.C.

TheUA also allocated money for advertising this week's school-wide convention.

**BY SEKANDER RAMASSY**

Tommy Sayers, a 3-foot 7 inch junior, scored his last seven starts, all since his return after four months of rehabilitation from a wrist injury. The Falcons are a team led by the 7-foot 7-inch senior, who has scored a total of four goals in the last two games. Sayers has experienced significant improvements in his physical condition, and the team's offensive performance has shown steady progress over the past few weeks. The Falcons have been at the forefront of the Ahaik family's recent rise to prominence in the local football league, with their last match resulting in a

**SunMail**

**An Irate Leopard**

I must take exception to the article written by Martin Cooper in the November 1978 edition of the SunMail. Cooper characterized the Leopard football team as a "trifling" team and even went so far as to call the team's performance "shameful." Such comments are not only unfair but also disrespectful to the hardworking players of the Leopard team. The Leopard football team has worked tirelessly throughout the season to improve their skills and represent their school with pride. In my opinion, the Leopard team deserves much more credit than what was given in Cooper's article.

**Sports Panels Report to U. Council**

**An Owl Wins**

In the final seconds of the game, the Owls' star player, Blake, scored the winning goal against the Eagles, securing their third consecutive championship. Blake, known for his exceptional goal-scoring abilities, took a powerful shot from the edge of the penalty area, leaving the Eagles' goalkeeper no chance to react. This victory not only cemented the Owls' position at the top of the league but also served as a morale booster for the entire team.
