Transfers Increase Markedly

by APROGIRLE VALLERET

The number of transfer applications and acceptances at the University is on the rise, according to Dean of Admissions Jane Stetson.

Stetson said yesterday that 30 percent of all entering 1976 transfers had matriculated a year earlier in another college, adding that the number of transfers has been steadily increasing since 1973, when the acceptance rate was 70 percent.

The transfer applicant pool reached a peak in 1976 when the number of applications and acceptances doubled. However, the increase has continued even though the percentage of transfers accepted has decreased. Last year's application was 76 percent, yet Stetson noted that the number of applications was up 30 percent.

"I couldn't begin to tell you why," Stetson said. "But we're finding an increased interest in the University," Stetson said. "We're seeing the University, not just for the first time, but for the second and third time.

Their interest is increasing as they look more carefully at the University and find that the programs offered and the choices made by professors are changing. They're seeing the University as an integrated part of their total career plans.

We're seeing a steady increase in the number of applicants and acceptances because we are offering more opportunities for students to continue their education here. We're offering more courses, more majors, and more minors.

The number of transfer applications and acceptances has increased dramatically since 1973, when the acceptance rate was 70 percent.

ACLU Compromise Postpones Suit Against Pope's Platform

The agreement was consummated last night despite the fact that it was announced that the city would be forced to close the pope's platform if the suit was not withdrawn.

The agreement provides for a postponement of the suit until the next Court of Appeals hearing on the Pope's visit.

The suit was brought by the ACLU and the city, charging that the pope's visit was illegal under church and state.

The agreement was reached after prolonged negotiations between the ACLU and the City of Philadelphia.

The ACLU has agreed to withdraw the suit in exchange for the postponement of the pope's visit.

The pope's visit has caused controversy in Philadelphia and around the world.

The pope is scheduled to arrive in Philadelphia on March 25, 1976.

The suit was filed by the ACLU on behalf of local residents who were opposed to the pope's visit.

The ACLU has argued that the pope's visit is a violation of the constitutional separation of church and state.

The city has argued that the pope's visit is a matter of national importance and that it is necessary to allow the pope to enter the country.

The agreement has been praised by both sides as a compromise that will allow the pope to enter the country while also addressing the concerns of those opposed to the pope's visit.

The pope's visit is expected to draw large crowds and will be a major event in Philadelphia.

The agreement was reached after several days of negotiations between the ACLU and the city.

The ACLU and the city have both agreed to abide by the agreement and to work together to ensure a peaceful and successful pope's visit.

Stealing a phone call isn't a game.

Most students play by the rules when placing a long distance call. They take advantage of bargain rates and make their calls during the discount periods. If you're not sure when you can call or discount rates, check your phone book.

A few students think it's O.K. to break the rules by stealing free telephone calls. They're not beating the system; they're taking advantage of all of us, because it drives you and I to pay more for providing telephone service.

Students who break the rules also run the risk of paying a large fine. Spending time in jail. And getting themselves a permanent police record.

It's not worth it.

Student Nurses Protest Movie

By CHRIS BURDICE

The Philadelphia Union Council's Student Nurses, scheduled to meet on September 9th, debated between the Perm Union and the Physicians Union about the film "Student Nurses." According to the students, the film was not available, and pertains only to the curriculum.

"We're trying to look away from the title," said Susan Smith, president of the Student Nurses organization.

Benefits of Historic Districts

By SHIRLEY PERKINS

The University's Center for Environmental Sciences, in conjunction with the Bucks County Conservancy, is preparing an audiovisual presentation on the nature of historic districts. The presentation will be completed in November and will be a clarifying effort.

Funding for the project will come from a $10,000 grant from the National Endowment for the Arts.

The purpose of the audiovisual presentation is to explain the significance of historic districts.

The number of transfer students from the nurses' school, according to Ms. Perkins, is 200.

The project will be completed in November, with the public invited to view an educational exhibit.

On March 14, 2020, the presentation will be made available in any size area. Robert MacLeod, a graduate student, said yesterday.

The students were asked to view the presentation on the nature of historic districts.

The presentation will be available in the same area.

Spikers Open Toughest Schedule With Hens

By RAY BAKER

What a year to be a Penn volleyball team, at least for the players who are on the basketball team. But other full spring classes and a term break may frequently arise in conversation: Is it a summer with a difference? The schedule continues Delicate for the intramural champ. It has been a long and slow process for the team to become a viable contender in the Ivy League for the first time in many years.

The men's season got off to a strong start in the season opener against the women's volleyball squad. The men will be especially important.

Schedule

The men's team is scheduled to open the season at the University of New Haven, the top eight teams in the Northeast Conference in New Haven, the team that won last year's superb 10-2 campaign, in the Ivy League, in the 1980-81 season.

The winning attitude of both the men's and women's teams is second only to the University of Pennsylvania, number two in the nation, and will be a definite improvement over last year's fifth-place finish. The top two teams in the Ivy League are the top two teams in the nation.

Outlook: If Dumont develops into a quarterback, the offense will improve, the defense will be strong, and the team will be competitive. If Dumont develops, the team will be competitive.

The offense is a major concern, as the team must replace the graduation of All-American quarterback John Biondi, the right arm of the offense. With Biondi gone, the team must find a replacement, or the offense will be一团糟.

The defense is a major concern, as the team must replace the graduation of All-American linebacker John Gardner, the leader of the defense. With Gardner gone, the team must find a replacement, or the defense will be一团糟.

Defensive Linebackers

The defensive line will be a strength of the team, with several experienced players returning. The defensive line will be led by senior linebacker John Gardner, who was the team's leading tackler last year. Gardner will be joined by junior linebacker Rick Villella and sophomore linebacker John Etter.

The secondary is a major concern, as the team must replace the graduation of All-American cornerback Carol Whipple, the leader of the secondary. With Whipple gone, the team must find a replacement, or the secondary will be一团糟.

Outlook: If Dumont develops into a quarterback, the offense will improve, the defense will be strong, and the team will be competitive. If Dumont develops, the team will be competitive.
