Energy Panel May Change Scheduling Of Classes

By ROBERT WITZKOWICZ

The scheduling of the academic calendar may be drastically altered in the future according to a University faculty panel that presented its findings at the meeting of the Faculty Senate last night. The panel, headed by Professor Joseph Sondak of the College of Arts and Sciences, presented the panel's report to the Senate.

The panel suggested scheduling the first week of classes after the Labor Day weekend so that students would avoid problems that arise with returning to classes after summer vacations. The panel also suggested that classes be held on weekends, if necessary.

The report is expected to be approved by the Senate within the next two weeks, and then forwarded to the Academic Council for consideration.

Open Entrances Cited As Crime Contributor

By JON GOLD

The University's Academic Council has recently studied the issue of open entrances and has concluded that they are a major contributor to the University's crime rate.

The council, which is made up of faculty members from various departments, conducted a survey of all University buildings and found that nearly half of them had open entrances.

The council has recommended that University buildings be closed at night and that security personnel be stationed at all entrances.

Myers Charged In Congressional Bribery Scandal

By THE ASSOCIATED PRESS

James W. Myers, a Democratic representative from Pennsylvania's 13th Congressional District, has been charged with receiving bribes from a businessman in exchange for legislative favors.

The charges were filed in Federal Court in Philadelphia last week. Myers is accused of accepting $5,000 in cash and a $1,000 check from the businessman, who is not named in the indictment.

The indictment alleges that Myers agreed to introduce a bill into Congress that would provide federal funding for a new highway project.

The House Ethics Committee has opened an investigation into the matter.

Dorm Residents Submit Petition Protesting Maintenance Deficiency

By LEE MARSHALL

Dorm residents have submitted a petition to the University's maintenance department demanding better maintenance services.

The petition, which was signed by 100 students, cited numerous problems with the maintenance department, including broken windows, malfunctioning elevators, and poorly maintained hallways.

The petition was delivered to the department's director, who promised to look into the issues raised.

Philadelphia Community Discussed In Symposium

By LARRY WEATHERBY

A symposium on the Philadelphia community was held last week, with panelists discussing the city's strengths and weaknesses.

The panelists included representatives from various community organizations, as well as city officials.

The symposium was sponsored by the University's Department of Community Affairs.

U. Council To Act On Proposals To Change Committee Structure

By MARTIN KNEEL

The University's Academic Council is expected to act on several proposals to change the structure of the University's committees.

The proposals include creating a new committee to oversee the University's financial affairs, and creating a new committee to oversee the University's academic affairs.

The proposals are expected to be voted on at the next meeting of the Academic Council.

International

Iran Accepts Commission

Airlift Radio Iran and the ruling Revolutionary Council announced yesterday that they have agreed to make a new batch of Iranian hostages available for the deposed State President Mohammad Reza Pahlavi.

A U.S. Secretary General Kecalsy, would be committed by brushing and shaving. Representatives from the United States may also be sent to the scene to examine the situation and arrive in Iran. A spokesperson for the government noted that such a committee would be instrumental in resolving the fate of the American hostages, not by that day's. All rights reserved.

Pakistan Aid To Increase

HBLRAID PAKISTAN: Zbigniew Brzezinski, President Carter’s national security adviser, said yesterday that the United States would be willing to provide a significant aid to Pakistan. We hope other countries also will indicate what they can contribute.

National Safety

Seige Ends at Prison

SAINT FE, N. M.: National Guardsmen and state police yesterday ended the siege of the New Mexico State Penitentiary. The proposal yesterday offered all the remaining hostages were allowed to be held safely by 5 hours to extort demands.

Runaway Inflation a Hardship for Many Students

While Gilson never took out any loans during his undergraduate years at the University, he has already borrowed $3000 from the National Direct Student Loan program this year and plans to do the same for the next two years. His chief concern is what will happen in the fourth year of dental school, when the $15,000 maximum borrowing limit will be reached. "That fourth year will be the toughest time for me," Gilson said. "There are several things I could do that last year - borrow from the bank at 12 percent or whatever, solicit in the National Health Service and work for two years in a rural area or even enlist as a health professional in the Air Force. But I don't want to delay my dental career, so I'll have to do the best I can." Gilson stresses that almost all University dental students are in a financial position similar to his.

Some University students endure more than just economic hardships when they come here. A prime example is Jonelle Thornton, a 24-year-old FAS student who comes from a Mennonite family in Philadelphia. While the Psychology major probably is not the majority of her group, she is an investment in my future." She comes from a large family - her parents were divorced when she was five and her mother died six years later. The spent the last three years of high school in South Hadley, Mass., the beneficiary of a program for financially disadvantaged students. "When she gained admittance to the University, her "family" income was about $3000 a year, most of that earned in the form of social security payments. Thornton received over $800 this year in scholarship money from the University, Commonwealth and federal government. The balance comes from loans and social security money gained from her earnings.

When she checked into her dorm room last September, the first thing she bought was a set of books. "I had to have them," she said. "I was so excited to be here."

Although she carefully watches her expenses, "I don't begrudge the family's income was around $3000 a year, most of that earned in the form of family income was around $3000 a year, most of that earned in the form of social security payments. Thornton received over $800 this year in scholarship money from the University, Commonwealth and federal government. The balance comes from loans and social security money gained from her earnings.

Towards an Effective Judiciary

By Gary Binder

It's no secret that the University's judicial system is a rickety one.

Everyone at the University who has anything to do with the system knows of its limitations. And with good reason. From Vice President Janet Napolitano to the members of the Judicial Council who serve as the University's legal officers, people who have a role in the system have a different perspective on what is the problem. Everyone who has been involved with any of the cases and controversies that have come through the system has a different perspective on what is the problem. Everyone who has been involved with any of the cases and controversies that have come through the system has a different perspective on what is the problem.

The present judicial system is a bureaucratic maze of courts and regulations that has been in place for more than a century. It is a system that is designed to oversee the behavior of students, faculty, and staff. It is a system that is designed to enforce the rules and regulations of the University. It is a system that is designed to provide a mechanism for the resolution of disputes.

However, the system is not without its problems. It is a system that is slow and cumbersome. It is a system that is not always fair and just. It is a system that is not always effective.

The time has come for the University to take a hard look at the judicial system and to make some changes. The University cannot afford to continue to tolerate a system that is inefficient and ineffective.

The University needs a judicial system that is effective. It needs a judicial system that is fair and just. It needs a judicial system that is efficient.

The University needs a judicial system that is effective. It needs a judicial system that is fair and just. It needs a judicial system that is efficient.
U. Professor Awarded $15,000

For Discovery of New Vaccine

BROOKLYN, N.Y. — University professor Robert Bok, who did research on the Philadelphia polio vaccine this year, was named a winner of the annual MacArthur Foundation Award in November. The award, which carries a stipend of $15,000, is given to promising young scientists, engineers, and social scientists of diverse backgrounds. Dr. Bok, who has been a professor at the University of Pennsylvania for 20 years, is a leading research worker in the field of virology and has made significant contributions to the understanding of the polio virus. His research has led to the development of a more effective and safer vaccine that has been widely used in the United States and abroad. The MacArthur Foundation Award is one of the highest honors in science and technology, and is given to individuals who have shown exceptional creativity and contribution to their field.
All students who will be enrolled as full-time graduate students in FAS or eligible holders of fellowships must:

- Be citizens or permanent residents of the U.S.
- Demonstrate that the Middle East is a major career focus.
- Study Arabic, Persian or Turkish.

The company that presently services the laundry machines bought out the previous company, but has continued to service the University, Beamann said. Though, in contrast with the new company has never been established.

"If the students are not getting the service they need, I have no problem about pursuing this issue to see if their concerns are heard.

**The Daily Pennsylvania, Monday, February 10, 1986**

**Cagers Roll Into First Over Lions, Red Team Balance Keys Weekend Sweep**

**By JOHN MILLER**

Friday night, it was a tit for tat battle for both 6-7 and 20 rebounds. The result was a win for the Penn lions, 80-62, on a 20-point night by senior forward Timmy Smith.

After a thorough talking-to by head coach Bob Weinhauer following the Penn-Drexel game last Sunday, the Lions came out hot and jumped to a 15-2 lead in the first 2:47. The Quakers were able to cut the lead to 16-15, but the Lions scored nine more points in a 4:30 run to 25-15.

In the second half, the Lions pulled away to a 57-38 lead, needing only a 19-13 second half to secure the win.

Despite the emotional nature of the loss, the Quakers did not play bad basketball. After all, with 37 points and four assists, it was still the best game of the season for Penn. Following the loss to Princeton on Saturday, the Lions were able to pull away to the lead and secure the win.

With 13 points and 13 rebounds, senior forward Timmy Smith was named to the Ivy League best team for the second half of the season.

The Lions were led by senior forward Timmy Smith with 20 points and 14 rebounds, followed by junior forward Kenny Hall with 14 points and 14 rebounds.

The Quakers were led by sophomore forward Dylan Jacob with 17 points and 11 rebounds, followed by junior forward Mike Brown with 16 points and 9 rebounds.

The Lions were able to pull away to the lead and secure the win with 13 points and 13 rebounds, followed by junior forward Kenny Hall with 14 points and 14 rebounds.

The Quakers were led by sophomore forward Dylan Jacob with 17 points and 11 rebounds, followed by junior forward Mike Brown with 16 points and 9 rebounds.

The Lions were able to pull away to the lead and secure the win with 13 points and 13 rebounds, followed by junior forward Kenny Hall with 14 points and 14 rebounds.
