U. Council To Discuss Deanship Term Limits

By BOB DAVIES

In a move formally limiting the terms of deans and administrators, the Senate last night passed a proposal to the Council bylaws, Faculty Advisory Committee, and all students living in College, subject to approval by the President. The Senate, in its role as the governing body of the University, approved the proposal unanimously.

The Senate's action came after a lengthy debate on the issue, during which students called for a "more democratic and participatory" system of governance. The proposal would limit the terms of deans and administrators to six years, with a maximum of two terms. It would also establish a new body, the "Council of Deans and Administrators," to oversee the appointment process.

The proposal was introduced by Senate Chairman Robert Dyson, who said it was necessary to "ensure that the University's governance is subject to democratic control." Dyson said the proposal would provide for "greater accountability and transparency" in the appointment process, and would help to ensure that the University's goals and values are reflected in the appointments made.

The proposal was supported by all members of the Senate, including the President, who praised the "courage and foresight" of the Senate in bringing forward the proposal. The proposal will now be sent to the Council for consideration.

U. Council To Discuss Deanship Term Limits

Letter Sent to Students

The letter was sent by the Office of Residential Living to all students living in University residence halls as part of a two-month campaign to encourage participation in the "Voting by University Residents" program. The letter encouraged students to vote in the upcoming election, and to help shape the future of the University.

The letter was sent to all students living in University residence halls, and was supported by a series of events and activities designed to encourage participation in the "Voting by University Residents" program. The letter was signed by the President, who encouraged students to "think about the future of the University and to make your voices heard." The letter was supported by a series of events and activities designed to encourage participation in the "Voting by University Residents" program.

More Black Candidates Apply to Freshman Class

Total Applications Unchanged

By BORIS LALASZ

Applicants to the University of Pennsylvania for this year's freshman class dropped sharply from last year's total, while the overall number of applications remained very similar.

The number of applicants to the Faculty of Arts and Science fell as well. Although processing of applications has yet to be completed, 10,000 applications have been processed and admitted, a slight increase over last year's total of 9,800. Although the number of applicants is down, the number of admissions is up, according to Dean Mario Meurer, incoming freshmen will total 340 this year, compared to 320 last year.

"I am especially concerned about the shifts in the numbers because we are looking for quality in that pool," Meurer said. "Some of these shifts are understandable, given the current economic climate. With the cost of tuition and the competition for places, prospective students are likely to be more selective in their choice of institutions. At the same time, many students are also looking for institutions that offer opportunities for personal growth and development. I believe our institution is well positioned to meet these challenges, and we are committed to providing a high-quality education for all who are interested in pursuing a degree here."

**New Report Alleges TMI Officials Lied**

WASHINGTON — Congressional investigators probing the 1979 Three Mile Island nuclear reactor accident said yesterday they had uncovered evidence of "willful and intentional withholding of vital early information on the accident's severity from state and federal officials."

The report, which also alleged that the reactor's operators had made "deceptive and misleading" statements to safety authorities, was issued just days before a forum planned by the Nuclear Regulatory Commission to discuss the accident.

A Nuclear Regulatory Commission spokesman, who spoke on condition that the details not be published, said investigators had found that the utility "has provided a distorted and inaccurate version of the accident data and reconstructed some data which should have been released to the public earlier than it was."

**Group Attacks Homosexuals**

SAN FRANCISCO — A coalition of fundamentalist groups, calling San Francisco the "Sodom and Gomorrah of the nation," says it will spend $3 million on a media and advertising campaign to turn the gay community into an "outlaw army." The coalition said it will buy advertisements to combat homophobia in the community and attempt to persuade discriminated gay citizens to leave the city.

"We have not identified in our investigational work, anything that would indicate that homosexuals are not responsible citizens," said Zell Miller, a Atlanta gay rights lawyer who has been working with the coalition for two years.

**News In Brief**

**Poland Nixes Farmers' Union**

WARSAW, Poland — Poland's highest court rejected private farmers' demands for an independent secretariat yesterday and recommended they form an association instead.

Polish newspapers reported without comment the government was mulling Defense Ministry Wojciech Jaruzelski, a five-star general considered amoderate, as a new prime minister.

**American Writer Leaves Iran**

BEIJING, China — American writer Ana María Matute, who was arrested March 8 at the airport and ordered deported, arrived in Dubai on an Iranian plane loaded with 380通话在 a man who has been imprisoned for 3 months and then convicted of espionage and ordered deported. She arrived in Dubai on an Iranian plane and was met by an Iranian news agency.

**To Be Continued**

Friday 13th. You know, that dreaded day — all kinds of strange things are supposed to occur if you are exposed to it. Don’t walk under a ladder, you were told. Don’t open an umbrella indoors, or you may die. Don’t walk through the door with your head on one side, or you will be cursed. These are just a few of the beliefs that surround the number 13.

Ironically, one of the most famous numbers in the world is 13. The number 13 is associated with fear and superstition, but it is also celebrated by some as a lucky number. Some people believe that the number 13 brings good fortune and success.

As we approach the 13th of the month, it is important to remember that the number 13 is just a number, and it does not carry any special meaning. It is up to us to interpret the significance of the number 13 in our own lives. Whether we see it as a warning or an omen, it is ultimately up to our own beliefs and interpretations.

**Rock 'N' Roll U.**: That Henny Youngman

**From the Classroom to the Stage**: O, that Henny Youngman

**By Budy Meitzman**

University students will be offered a new comedic experience this season, thanks to a Monday-night appearance by the world-famous Henny Youngman. Youngman, a veteran of the New York comedy circuit, will bring his witty, off-the-cuff humor to the campus in the form of a one-man show and occasionally to concerts.

Youngman is known for his quick wit, his ability to make the audience laugh, and his dry, deadpan delivery. Over the years, he has developed a style that is both unique and timeless, and his presence on campus will be a welcome addition to the already impressive lineup of events.

Youngman’s humor is often based on everyday situations and events, such as traffic jams or the weather. He is known for his ability to find humor in the most mundane of situations, and his jokes are often unexpected and surprising.

Youngman’s appearance is part of a larger effort on the part of the campus to bring in renowned comedians and performers to create a more dynamic and exciting entertainment scene. In addition to Youngman, the campus has hosted a variety of other performers, including John Lithgow and Lenny Bruce.

Youngman’s show will take place on Monday, March 13, at 8 p.m. in the Auditorium of the Annenberg Center. Tickets are $20 for adults and $10 for students and children. For more information, please visit the campus website or contact the Student Union details.

Student Forum Analyzes El Salvador Revolution

El Salvador's Revolution

A forum on the revolution in El Salvador was held last night at the Law School by members of the newly-formed Philadelphia Coalition by Ditre, the legislators said along with Keps. Barbara Mikulski, "We are convinced and have collected of El Salvador."

"The key issue is knowing what is actually going on in El Salvador," Ditre said he had recently spoken with Congressman Bob Edgar, who, said. "We are being misled as to what we are seeing in the press." Ditre explained that President Forrest Carter was a team to investigate. Ditre said they knew no evidence that the government was involved, and she was then disappeared.

"The military government in El Salvador is supported by the upper bourgeoisie," said an audience member who asked not to be named. "They are killing people everywhere," said an audience member who appeared to be sympathetic to speakers' stands.

"We tell them that we want aid to be ended. We want individual letters and personal visits to congressmen and support of the demonstrations," he said. "It is a communist, socialist, or Marxist. It is a people's movement." A demonstration, supported by Congressman Bobbie, will be held this Friday at 4:30 p.m. at the Federal Building in Center City.

Jose Acevedo said after the film that President Reagan has now decided to increase that aid even further, he added. "Young Socialist Alliance member Jose Acevedo and after the film that "we are being misled as to what we are seeing in the press." Ditre explained that President Forrest Carter was a team to investigate. Ditre said they knew no evidence that the government was involved, and she was then disappeared.

"We are afraid of our fight for rights, but yet our government will continue to support a military government because of the monetary interests involved," he added.

"Socialism is different everywhere," said an audience member. "We are afraid of our fight for rights, but yet our government will continue to support a military government because of the monetary interests involved," he added.

"They are killing people everywhere," said an audience member who appeared to be sympathetic to speakers' stands.

**Prehistoric Civilization**

(Continued from page 3)

When the bones arrive from Jordan, they will be sent to Shapiro. "We will measure the trace elements in the bones so as not to destroy them," he said. "I find all this very exciting."

Johnston says that a complete display of archaeology, anthropology and other sciences involves McGovern, who works for an organization that tries to take scientific techniques and apply them to archaeology.

As McGovern explains as example, earlier work on a site helped in the discovery of the cave by measuring the magnetism levels of the area. If there was a cave, being full of debris, it should have a higher level of magnetism than the surrounding bedrock. From which it was dug, the surface of the cave - over - that was robbed should have a lower level of magnetism.

The magnetism of the area was measured and compared with the results of a cave, measured the same level as well as more magnetism. Using this information, a spot was picked out and excavation started.

"We found six boulders blocking the cave - the upper boulder had an X on it," McGovern said. 

Johnston said "More and more of the general level of health," and the levels in the bones as an idea of the environment and in telling about the general level of health, and more of what we're doing is looking at the health of people in the past - not what they did, but how well they did it by looking at the health of the people and how well they developed.

findings that widespread removal of asbestos is not necessary, but said precautionary steps should be taken.

"The plateau is not explored as extensively as it should be," McGovern added. "I am afraid that some robbing has occurred."

Johnston said the report represents the results of consultants who are supposed to be knowledgeable in the field and added, "The outcome of the report by experts in the field of asbestos testing is that low levels of asbestos are present."

The residence office has recommended that there be an asbestos testing and that any dust containing asbestos be removed from the area.

Undergraduate Assembly Residence Committee Chairman Joe Cooper said asbestos should not be used in rooms where children congregate. Asbestos testing was conducted in the three High Rise, Graduate Towers, and Mrs. McGovern and her assistants are now working to remove the asbestos from the buildings containing asbestos.

"We will try to get back this spot. But already they've built a house along the natural terrace." she said.

McGovern said, "I am afraid that some robbing has already taken place."

"Once you lose the remains, you never know what happened," he added.

Fire Erupts in Las Vegas Hilton

LAS VEGAS, Nev. - A fire raced up the side of a 30-story stone-fronted Hilton broke windows and quickly spread as high as the 26th floor, ensuing smoke spilling outside as high as the 20th floor.

Witnesses said that while the flames were at their height, people were banging out of windows at the hotel and authorities were telling them to get back inside.

Authorities also lifted some people from the roof, said Rodney Davis, desk officer at the hotel.

The hotel is one of the largest resorts in the world.

Affirmative Action

Reagan administration: (Continued from page 1) Reagan administration took office, assuming that affirmative action laws would then be reformed less strictly. "It was a great deal of speculation from people on what the [Reagan] administration would do," said Mary P. With Win Almost in Hand Gymnasts Go For Points

— BY KAREN WOODROW

Look here. It’s a meeting and maybe not all other meetings, but this one is different. The women’s gymnastics team is different. Oh, sure, Penn should win. But there’s still the thrill that comes with winning and the desire to become better. Winning is the goal. The focus is on the team. The women are actually in the running for a conference title and not just one more win in a string of three.

At this point Penn is second in the Ivy League, but they’ll never rank second in the women’s gymnastics team. When the season started, the team was hoping for a top-three finish, but now they’re looking at the possibility of winning the conference.

The team has a strong bond and the athletes are pushing each other to be their best. The coaches are happy with the progress and the team is working hard to achieve their goals.

The team is determined to make it to the NCAA championships. They’ve set their sights on winning a national title and are working hard to make it happen. The women are focused on the team and are determined to make it to the top.

Money and Merger Both Unsure Issues

By CINDY SMIRNER
Before the 1983-84 season, the Atlantic Collegiate Athletic Association (ACAA) was established as an alternative to the American Athletic Conference (AAC). The ACAA was founded by the Ivy League schools and included Illinois, Penn, and Yale. The ACAA was formed because of a disagreement with the AAC regarding the role of television in college athletics. The ACAA was designed to be a model for other conferences to follow, but it was never successful.

Early Budget Projections Raise Cost-Saving Plans

By DAVID GLADSTONE

"We are in the process of developing our own model," said Harris, "and we will not have the option of using the NCAA as a resource."

"Money and Merger Both Unsure Issues" is a title that appears on the page. The article discusses the formation of the Atlantic Collegiate Athletic Association (ACAA) and the disagreements that led to its establishment. The ACAA was formed by the Ivy League schools to create a model for other conferences to follow. However, the ACAA was never successful.

Women's Club Hockey

"A Different Type of Ice Game"

BY JOHNNATHAN WOOD

"It's not a very good game for girls," admitted club president Harry Masei. "It's a sport that is still being played on college campuses, but I don't know if it will ever be a popular sport among women." The women's club hockey team has existed at Penn in club form for the past five years. The team's only goal is to be competitive and enjoy the sport.

Boxing Club Has Obstacles To Climb, But Glascock's Door Remains Open

By BOB GLASCOTT

"We have to develop a model in the future. They have not been able to do that now," said Harris, who also serves as Chairperson of the Ivy League, for example, five schools.

Fencers Put Consistency on Line

By PETER FULHAMER

Consistency. Whether you work in a bakery, or you're on a sports team, you're always looking for that certain consistency. Right now, that's the key to the success of the team. "When you're consistent, you're always in control," said one member of the team.
