The Split Button
Artists and Designers Clash on Oldenburg Sculpture Location

By O'DOWDLYN PERRY
The sculpture "The Split Button," which honors Robert Lowell, has been installed in the University's Center for the Arts, adjacent to the Fine Arts Center. The sculpture was designed by the internationally renowned artist, Claes Oldenburg.

The sculpture,Oldenburg's latest work, was dedicated by University President William E. Flora last week. Oldenburg is a member of the Harvard University faculty and is also a member of the American Academy of Arts and Sciences.

Advising Offered Mixed Reviews

By ROBERT WOJTOWICZ

As a group of student advising systems this year, FAS (Faculty Assistance) has received mixed reviews. Students have been divided in their opinions of FAS, with some saying that they prefer FAS to other advising systems, while others say that they prefer to be assigned an advisor individually. This situation arises from the fact that FAS is not an authorized advisor system, and the University does not have a system in place to help students find an advisor. It has been suggested that the University should consider implementing a system similar to FAS, or possibly developing its own system that would be more effective.

The survey found that 55 percent of students are satisfied with the University's current advising system, 35 percent are not satisfied, and 10 percent are undecided. The survey was conducted by the University's Committee on Undergraduate Student Services, which was formed in 1984. The committee was established to provide advice to students on matters such as academic advising, financial aid, and career counseling.

THE DAILY PENNSYLVANIAN -- Monday, April 13, 1981

Space Shuttle Lifts Off Successfully

CAPE CANAVERAL, Fla. — The space shuttle Columbia douk shot for the heavens on a tower of white fury Thursday and sailed into orbit, making history and bringing a new era of space exploration.

President Reagan welcomed the astronauts and said the shuttle had performed "as we predicted and as we dreamed it would."

"This mission has captured the fancy of the whole country," he said. "The nation not only admired the astronauts' skills in mastering the most complex of machines, but also learned that the true value of flight is the endless expansion of human knowledge and understanding.

"The flight today was not just a triumph of technical skill and courage," he said. "It was a triumph of the American spirit."

The vehicle lifted off on a white cloud of vapor from the launch pad at 11:31 a.m. EST, after a delay of 19 hours 51 minutes because of weather conditions.

"I will return to the nation," Reagan said, "with a message of the American spirit, a message of the American promise."

The shuttle is the first American spacecraft designed to carry a crew of five, including a pilot, two mission specialists and two scientists who will conduct experiments in medicine, astronomy and physics.

Today's flight opened a new era of space exploration, with the shuttle designed to ferry supplies to the space station, conduct experiments and make servicing missions.

"The space station will be the outposts of the future," Reagan said. "The shuttle is the key to that future."

"We will be traveling to the stars."

"We will be traveling to the stars."

Emergency Room: Hectic HUP Center Keeps People Alive

By RONALD WATKINS

For the moment, everything is relatively quiet. The clerks who check patients into the hospital are sitting at their desks, while a nurse makes a bed in a small emergency room. The doctors and nurses are not in their offices. The room is not a busy one.

In the treatment rooms, on either side of the crash room at the entrance of the hospital, the patients are lying on their beds, with their vital signs being monitored. The doctors and nurses are attending to them. The treatment rooms are located in the center of the hospital, near the crash room, which is reserved for the most serious cases. The crash room is large enough for six beds, and is equipped to deal with virtually any type of emergency.

The doctors are very busy. They are attending to patients who are in the crash room, and they are making rounds in the treatment rooms. The nurses are busy attending to patients who are not in the crash room, and they are checking on the patients in the treatment rooms.

The doctors and nurses are very busy. They are attending to patients who are in the crash room, and they are making rounds in the treatment rooms. The nurses are busy attending to patients who are not in the crash room, and they are checking on the patients in the treatment rooms.

Inadequate Public Scrutiny

To the Editor:

As a faithful student of economics, I have learned that the analysis of public policy runs must include an examination of the relevant costs and benefits.

Unfortunately, the Roman administration has failed to bring the costs, benefits, and economic effects of the policy under discussion in the Senate. This point is brought into sharp focus by the current discussion of the possible sale of state-owned land.

The value of the land in question is a matter of considerable controversy. While some economists argue that the sale is a positive development, others contend that it will lead to a significant decline in the value of the land. While this debate is ongoing, it is important to consider the broader implications of the policy. The failure to do so is a violation of the principles of publicscrutiny.

In conclusion, it is clear that the sale of state-owned land is a complex issue that requires careful consideration. We must ensure that the public is fully informed about the costs and benefits of the policy before it is implemented. If we fail to do so, we risk making a decision that is not in the best interests of the community. The importance of publicscrutiny cannot be overstated.

Yours sincerely,

Inadequate Public Scrutiny

A Different Perception

To the Editor:

I believe that we must make each other aware of the different perceptions that we bring to the table when we discuss issues. In my experience, different people often have different views of the same situation.

As an example, I would like to discuss the issue of immigration. Many people believe that immigration is a problem that needs to be addressed, while others believe that it is a necessary aspect of our society. My own perception is that immigration should be handled in a more compassionate and humane way. I believe that we should focus on providing support for immigrants, rather than simply restricting their access to the country.

In conclusion, I believe that it is important for us to understand and respect each other's perceptions. By doing so, we can work towards finding solutions that are more beneficial for everyone. Thank you for considering my perspective.

Yours sincerely,

A Different Perception

Clustering

To the Editor:

If an infallible observer had landed on Earth one day, the D.C. (that’s District) council, the Board of Education, and the mayor’s office would have been the first buildings he saw. “Welcome to our city!” they would have shouted, their hands outstretched, offering a tour of the city’s government institutions.

But what if the observer was a statistician? What if he were simply looking for patterns in the city’s data? What if he found a correlation between the city’s poverty rate and the rate of traffic accidents? What if he concluded that the city’s schools were not performing as well as they should, based on the data he had collected?

In such a case, the observer might have been able to use statistical techniques to identify trends and make predictions about the city’s future. This is the kind of thinking that is essential for effective policy-making.

In conclusion, it is clear that statistical analysis can be a powerful tool for understanding complex issues. We should make it a priority to develop our skills in this area, so that we can make better decisions for our community.

Yours sincerely,

Letters to the Editor

"The Problem at the Law School"

To the Editor:

I recently spoke with a student at the University of Pennsylvania who is concerned about the decline in minority enrollment over the past few years. She is one of the few African American students in her class, and she feels that the university is not doing enough to support minority students.

In response, I believe that the university should take steps to improve the situation. This could include providing more financial aid, recruiting more minority students, and providing additional support services. By doing so, the university can create a more inclusive and welcoming environment for all students.

In conclusion, I believe that all members of the university community should work together to create a more equitable and diverse environment. This is essential for the success of the university as a whole.

Yours sincerely,

"The Problem at the Law School"

IN OUR TIME/Liz McMillen

Clouding

To the Editor:

If you're interested in learning more about racism at the Law School and the problem with law students' system, you might be interested in the new book "Overdue Articles on Racism at the Law School" by Sarah Johnson. The book provides an in-depth look at the issues surrounding racism at the Law School and the challenges faced by law students.

In conclusion, I believe that this book is a valuable resource for anyone interested in understanding the issues surrounding racism at the Law School. It provides valuable insights into the challenges faced by law students and offers solutions for addressing these issues.

Yours sincerely,

IN OUR TIME/Liz McMillen

"A Right to Speak His Mind"

To the Editor:

I recently read an article in the local newspaper about a recent incident involving a professor who was on the receiving end of criticism from a student. Despite the fact that the professor had clearly stated his opinions, the student felt that he was not being heard.

In my view, this is unfortunate. While it is important for students to have a voice, it is equally important for professors to be able to express their ideas without fear of retribution. As such, I believe that the university should take steps to ensure that all members of the community are able to speak their minds without fear of consequence.

In conclusion, I believe that it is essential for all members of the university community to work together to create an environment in which everyone is able to speak their minds without fear. This is essential for the success of the university as a whole.

Yours sincerely,

"The ribs are better without the
bone." Freshman Matt Adams
said.

Eating was just a small part of Fling.
There were games, films, and parades
and the most popular design, according to painters, was the
"Statue of David Brody's, Absolutely
Safe.

"Wild, just wild. Look all around.
That's the real fun. A thousand people out,
drinking beer, getting high, listening
to music. This is the real Penn spirit.
It was just as one of the banners
read: "No meal contract?"

Two weeks of classes, meals a day for the last
finals period. That's two weeks of classes,

"On a Clear Day You Can Fling
Forever."

"Ineffable moment signified
mourners and three-hour delays before
the Fling. first Friday.

"There seems to be a different
attitude this year. "People were
in the middle of their dissertations -
made space. Or maybe mud
was a little space. Or maybe mud
pitches separated some of the
storms and kept others out. But
the Janitor Baloney still was packed,

"And there was about a 20-minute wait
to get into the throngs and kept others out. But
the Janitor Baloney still was packed,

"We were working on the problem,"
Coldagelli said it's unlikely a long-
term solution would be for FAS to
purchase its own computer, which he
estimated would cost $600,000 to buy
and between $350,000 and $400,000 a
year to operate.

"The FAS computer budget is too
small," Brody said. "There's no place
when they spend as little as on com-
petition. But at least we have

Author Returning To Tell Success Story

By ELISSA SHAW

With an individualized major in creative writing and a little evasion, James Bradley recently graduated from the University of Houston. He has written two books, most recently The Chaneysville Incident, which deals in a pseudo-historical way with the underground railroad. It will be published Wednesday.

"I want to share the experiences I've had and certain goings on in the problems of a modern day college student," he said. "When I first got here to College Hall, every time I was building, I used to chant 'We're going to pull this building down. They told us it was going to be beautiful. And it is. But I don't want to see this building right now--"

Since graduating from the University in 1972, Bradley has done a bit of everything. He has lived in two books, most notably The Chaneysville Incident, which deals in a pseudo-historical way with the underground railroad. It will be published Wednesday.

While most people assume the U of H campus is a fruitful place for the skilfulness of such experiences, "Chaneysville is really pretty remote. It covers a period from 1800 to 1979," he said. "This is definitely too high for a con-

Refereendum

Rich said an informal enforcement mechanism for the refereendums proposed (one of the referendum) could probably work. "The trustee liaisons can follow the validation of the referendum, and make their validation by the Students Council. But they promised to meet them all down. They told us it was going to be beautiful. And it is. But I don't want to see this building right now--"

WHO CARES ABOUT JIM BEATRICE?

Jim, a graduate of the class of 1980 and a one year member of C.A.R.P. (the Rev. Sun Myung Moon's student group) was taken away by his mother to a "Deprogramming Center" last weekend. It is my hope that you share the feeling that any type of "Forced Educational Center" is contrary to the natural rights of man and should not be tolerated. I urge all friends of Jim Beatrice, whether professors or students, to write his mother and ask for his immediate release. Please call for her address: 476-8917 FREE JIM BEATRICE.

Holy Week Services

at the C.A.

Opportunities for meditation and reflection

MONDAY, April 13 - Evening Prayer TUESDAY, April 14 - The Way of the Cross WEDNESDAY, April 15 - Timnetse-Service of Shadows THURSDAY, April 16 - Maundy Thursday Holy Communion FRIDAY, April 17 - NOON-Good Friday Procession on Locust Walk Mon.-Thurs. Services, 9:30-10:30 p.m., The Chapel of Reconciliation Christian Association 36th & Locust

WHARTON STUDENTS DEC. '81, MAY/AUG.

‘82 GRADUATES

Come to a Planning Ahead Workshop for Information about Interviewing in the Fall and Resume Deadlines. Meetings will be held in the Ben Franklin Room of Houston Hall.

Monday, April 13

-3:00-4:00 P.M.

Tuesday, April 14

-1:30-3:00 P.M.

If you have a $10,000 job waiting for you, you'll probably have the Card right now.

If you've been using your card, you'll probably have the Card right now. At the card you've been using every day for the Card you'll be using the rest of your life. You'll also have a student services plan for a new world. You've got great expectations. So do American Express. For one thing, that's why American Express has created a special plan that reduces the usual application requirements - so you can get the Card before you finish school. All you need to apply is a $50,000 job or the promise of one. You'll see the Card the wealthy and the well-traveled use for business lunches, buying clothes for work, paying for vacations -- for all sorts of after-school activities. The Bank's ready to establish itself as the start of all if you were already established. And just to let you know the chance to establish a solid credit rating. So trade up now. You'll find application forms on campus bulletin boards. Or call toll-free 800-UAN-ZAP and ask for a Special Student Application. And set yourself up for next year before you finish this one.

The American Express Card.
Don't leave school without it.

An American Express Card.
GIVE BLOOD!  
McCLELLAND HALL  
Tuesday, April 14  
1:00-7:00  
- Each donor receives a FREE VISOR or FRISBEE!
