**President**

To Be New U. Council Moderator

**BY PETER CANELLOS**

For the first time in its history, the University of Pennsylvania has been honored by the issuance of a special program by the University Council.

The move to establish the Democratic party and to take it into the future was made last month.

President Sheldon Huber said yesterday that the University Council is a very effective area for the University community. He added, "I think we should celebrate this important anniversary by having a "day of celebration.""

**University Council Scene:**

Community Chairmen Phoebe Leiby and Hackney have failed to serve as moderates, shortly after being accused of sexual harassment.

(Continued on page 10)

**DuBois Master Speaking Tour To Begin**

**BY ROBERT HUBER**

Huber will accompany Hackney next week to meet a wide representation of Penn alumni, many of whom have taken positions in various areas of the country.

The master will be "on a speaking tour" as a means of getting in touch with the alumni and partially in touch with the University, and to partially improve the University's image through the tour.

"As we meet with alumni in various areas of the country, we will be able to see how they view the University," Huber said. "We will be able to take their views into the primary sessions of the University Council." (Continued on page 7)

**Police Hold Fraternity Liable After Marijuana Seizure in Gym**

**BY DONALD WATNICK**

University Police are holding an unfraternal grand jury investigation into a large quantity of marijuana and two scales that were discovered in a Gimbel Gym locker on Wednesday morning.

"We were put on alert," said Gimbel Gym supervisor L. Robert Burke yesterday. "We discovered what appeared to be marijuana and two scales on Wednesday morning.

"We were put on alert, and we discovered what appeared to be marijuana (and two scales). The Gimbel Gym supervisor, Mike Carroll, said yesterday. "We were put on alert, and we discovered what appeared to be marijuana, and we were put on alert." (Continued on page 6)

**Stumping for Alumni**

**Hakney To Hold Speaking Tour**

**BY PETER CANELLOS**

In an effort to discuss University affairs with alumni, President Sheldon Huber will be taking the alumni tour every month in the next few months.

"The best way to do this," Huber said yesterday, "is to have a speaking tour. It is a way of getting in touch with alumni, and it is a way of getting in touch with the University." (Continued on page 6)

News in Brief

Egypt Sets Security Plans for Funeral

CAIRO, Egypt - The Egyptian government, anxious about security, set up a virtual state of emergency yesterday for the state funeral of former President Anwar Sadat, and in southern Egypt police opened fire on a group of Modernist city of Aswan.

Security forces said there were no incidents among the crowd of dead and wounded in the shooting outside a mosque in the 320 miles south of Cairo on the Nile River. Few other details were available.

A presidential spokesman said the funeral would be continued tomorrow. Sadat was killed a week ago today in a hit-and-run accident in southern Egypt.

The change of plans was to protect the funeral. They include Secretary of State Alexander Haig, former President Jimmy Carter, Gerald Ford and Richard Nixon, special Assistant to the President, and Henry Kissinger.

A presidential spokesman said the funeral was to be held at the 88,000-seat Adanmos mosque in Cairo's main square, about 1 mile from the parade grounds. The site was changed because the mosque area is barrenly percent.

Sadat's final resting place, a mausoleum in the new city of Giza, is on the outskirts of Cairo, not in the center. The site was the entry in the 1930's.

Elwyn Institute Provides Jobs for the Handicapped

R. JOSEPH KORBAN

Every day of the year the clients of Elwyn Institute work at their own pace, doing the things they like to do. Many are not able to do these things as they would without the aid of others.

For some clients, Elwyn is a training ground for skills which may be required later in life. For others, it is a workplace where they can be productive and self-sufficient, doing the tasks they enjoy and providing a source of income for their families.

"We're not just giving people a job," Korbans said. "We're giving them a chance to be productive and self-sufficient, doing the tasks they enjoy and providing a source of income for their families."

Dear Editor:

As a student of the University of Pennsylvania, I am writing to express my concern about the recent events in the student government. It is clear that the actions taken by the student government are not in the best interest of the university.

The student government has been making decisions without considering the opinions of the students. For example, the decision to cut funding for the debate club was made without consulting the members of the club. This is a clear example of the student government not representing the interests of the students.

Moreover, the student government has been making decisions without considering the long-term effects. The decision to cut funding for the counseling center will have a negative impact on the mental health of the students. The counseling center provides essential services to students, and its closure will make it difficult for students to seek help when they need it.

I urge the student government to reconsider its decisions and make decisions that are in the best interest of the university and its students. The student government should listen to the voices of the students and make decisions that reflect their needs and interests.

Sincerely,

[Your Name]

University Politics: Not Something 'Yell About'
NEW Club Out To Boost U: Spirit

'Red and Blue'

Nearly 200 students and faculty members, including Pres. Richard H. Weinek, attended a meeting to plan a new student organization, the Red and Blue, that will promote school pride and unity. The club, according to those in attendance, will be a nonpartisan cooperative effort of students and faculty.

The organization was born at the first meeting of the student group's officers and faculty sponsors held last Monday in the Theatre Arts Building on the campus of the University of Chicago.

President Weinek said the organization will be a "uniting force on campus." He said the group will be nonpartisan and will be open to all students and faculty members, regardless of political affiliation.

The club will have a board of directors made up of faculty members and students who will be elected by the membership. The board will be responsible for the management and policy decisions of the organization.

The club's goals will include promoting school spirit, enhancing the university's image, and contributing to the community's cultural life. The club will also work to increase awareness of the university's alumni network and its role in local and national affairs.

The club's first event will be a "Red and Blue Day," which will take place on October 26. On this day, students and faculty members will wear red and blue clothing and participate in various activities that promote school spirit.

The club will also sponsor events such as a "Red and Blue Ball" and a "Red and Blue Day," which will take place on October 26. On this day, students and faculty members will wear red and blue clothing and participate in various activities that promote school spirit.

Harriers Set to Grab Bull(dog)
By Horns As They Seek 1st Win

R. PETER FIEDLMAH
For the second season in a row the Harriers have not been the most successful for their team's success. The season is determined that today's hot against Yale will be different story. The Harriers are young, but they have the potential. "If we can't capture Charlie, we've got to go after the others," assistant coach Ken Nolles said. "We're pretty well set in this one." 

The Harriers have two last chances to win a victory since they are the last team to make the final for the weekend. Usually they play in the final week of the season, but they have always been the last chance to practice the day before the final. The Harriers are expected to make the opening round, but the Quakers prepaired for the Harriers last week. It is an attempt to move past the Harriers.

"We decided we had a really good chance of beating Yale, so we took that easy one," John Chilford said. A further blow to the team's morale came from the news that Yale will have their strongest line-up ready to face them in the final week.

"This is the first race where all the Harriers are off," said Horns coach Charlie Nolles. "It's a little tough to find a win there."

On Saturday, October 10th, In The Warehouse, 4040 Locust St. 1-2 PM, the Harriers will face Yale. The Harriers are favored to win, but the Quakers are expected to make a strong challenge. The Harriers have not scored in the opening round since the 1970s. The Quakers are expected to make a strong challenge as well.

Boothers

(Continued from page 10)
and will do so for an unspecified period. Steve Roddick also, with Tom Miner and a third man, will spend several hours a day, "on the road," he said, "at the road," with the Boothers. According to Roddick, he has been planning a road trip to the west coast, and will spend several weeks there, "on the road," with the Boothers. According to Roddick, he has been planning a road trip to the west coast, and will spend several weeks there, "on the road," with the Boothers.

In last week's game at Columbia, the offensive line of Davis, Jeffran, and Jimmy Mowatt could not master a whole lot of offense, according to Miner. However, the line is expected to improve in the next game, against the Princeton defense. The Boothers were only two games ahead at the time of the game, and had been struggling with a breakdown that could have led to the loss. Davis will be the quarterback, and the team will open the season with a home game against the Boothers.

Another Boothers will move into the starting lineup in midfield, Chris Tye, who has also played well in recent games, will replace the injured John Boothers. Bruce Becker, and Terry Kruse, who have been seen to play three more games, will replace Kinney.

The buck for latter seems to be going on the secondhand. In the next game, against Princeton, the Boothers will have a chance to face Kinney. In the two they have faced, they have faced him, against a physical team like Brown, it is important to get a better and to face him to face him. The Boothers have been hot and have been physical, and will be very tough for the Quakers to come back.

"We're going to try to play the way we did," said Becker. "We want to try to maintain the level of physical game. It is physical, we will play that, we're going to play the way we did, and we're going to try to do our best.

Can Quakers Put The Bruins to Ruins?

Booters See Ivy Foe and Ailments

By DALE ZALZEA

last few games have been a scoreless season that can generally be described as uneventful. Booters booters are finding problems that can be generally described as uneventful.

Well, don't let that lead you to think that's all there is to it. They're finding some new ones as well.

One of the problems is that the offense isn't producing. The defense is doing some pretty good things, but the offense is just not clicking. The Booters have been struggling to score goals, and it's becoming a concern. The offense needs to step up and start finding the back of the net more often. If they can do that, the team's overall performance will improve.

Another problem the Booters are facing is that their depth is not as strong as it could be. They have some good players, but they don't have a lot of depth. This is a concern because it means they won't be able to go deep into games and still expect to win. They need to find some more players who can contribute and help fill out the lineup.

In the end, the Booters need to address these issues if they want to improve their overall performance. They need to work on their offense to start scoring more goals and find ways to use their depth more effectively.
