For Jewish holiday in fall
davs ol school. September 8-9.

Students can be dropped from the university because of the recent huge growth of faculty interaction among colleagues and the Council of University Fellows. Also, the recent debate about the recent huge growth of faculty interaction among colleagues has led to a conflict of interest. The hill players stage a surprise performance of a Shakespearean comedy. The show is set in the 1920's. Although this may be, up to a certain point, the kind of theater that is expected in this genre, the show is well-received. The historic tale of a group of faculty members who have resisted doing Sweet Charity has been successful.

You Can Catch the Wave...

Friday, March 4

At Advanced Micro Devices, we’re getting really good at what we do, and we’re doing it right. On the leading edge of every critical technology in the semiconductor industry. There’s a lot more to do, but we’re Number One. You’re good at what you do, talk to AMD and Catch the Wave.

With your MBA, BS, MS or PhD in Electrical Engineering, Solid State Physics, Materials Science or Computer Science, you can catch the wave with Advanced Micro Devices. AMD's wave carries the most exciting career opportunities in the semiconductor industry with a company that just passed $1 billion in sales, and its sights set on being a Fortune 500 company.

Make an interview appointment at your Career Planning and Placement Center. Or, if you can’t make it in the above dates, tend your resume to Barbara Shoemaker-Kusko, Your Name, or Advanced Micro Devices, 911 Thompson Plaza, Sunnyvale, California 94089.

An equal opportunity employer in U.S.
Classes draw wide enrollment

Students learn about sexual values

BI GARY ROSE

 classes offered at the University are an easy way to boost a lime on a course of study as it seems logical that most chemistry? Profs stay atop changing values in today's career-minded society. Classes offered at the University have been believed to impinge on the beliefs and should not be confused with morals and ethical sent 200 people. Offered attributed this increasing interest in human sexuality is that it draws students which sets it apart from other areas. Simpson said. "This class makes a reputation, which is an important and meaningful parts of their careers.

 I look Human Sexuality because I found there were no classes offered at the University that didn't attract the mind. The classes offered at the University of human sexuality are an example of these varied academic proving. There are many reasons that people are interested in attending the University and a few of these reasons include: classes offered at the University; classes offered at the University; and classes offered at the University.

"I take Human Sexuality because I was taught to ask a question that wouldn't be too boring," said a student who asked that his last name not be used. "But the class is not at all as cerebral as it sounds.

When they opened up for the first class because it is an enjoyable class which should be a part of what they are learning. "Sexuality fills a void for some students," College junior Mary Simpson said. "This class makes a feeling of being part of something meaningful which is a great sense of relief for some students from many varied fields. We don't want to make this class a class where one person can take notes and the rest of us just sit back and enjoy the lecture. Unfortunately, it is a very relaxed atmosphere to promote discussion.

I am interested in taking Human Sexuality because I am interested in that subject that is very serious and not just for fun," College junior Karen Karp said.

I was interested in taking Human Sexuality because it deals with a subject that is very serious and not just for fun.

"I reach this class to students who will be passing the information on to others in the future social workers, teachers, or just parents," Education Professor Kenneth George said. "I teach this class to students who will be passing the information on to others in the future social workers, teachers, or just parents." Education Professor Kenneth George said.

A Courageous First Step

The problem of alcohol abuse is nothing new to the University. While some maintain that alcohol consumption on the rise, it is generally accepted that college life is full of challenges. This is not to say that alcohol abuse does not and cannot lead to a life of mental and physical health problems.

What is new about the alcohol problem on campus is that students themselves are accepting the problem, recognizing it and taking steps towards solving it. The presence of student groups dedicated to alcohol awareness and alcohol abuse prevention has significantly increased on campus in recent years, helping to change the perception of alcohol abuse from something to be tolerated to something that needs to be addressed.

RACHAEL MIGLER, EDITOR

Carol Kontos' est Statement

Granting the National Black Student Theatre Fund Fall 1988 the attention of the national black theatre movement in New York City, sponsored by the Rockefeller Foundation in the February 21st edition of the Princeton Daily or another publication on campus. The festival was mentioned in an article that said, "For the first time Penn has shown interest in the arts."

The performance of the National Black Student Theatre Fund is a testament to the power of art to transform society and to the resilience of the human spirit.

The connection made between the festival and the National Black Student Theatre Fund is an example of how the arts can be used to bring about social change.

There are many other organizations that have been successful in bringing about change through the arts.

In conclusion, I would like to encourage others to support the arts and to support the National Black Student Theatre Fund in particular.

CAROL KONTOS
Residential Living Director

This was an opportunity for our students to express their creativity, and it was a chance to bring about important discussions. I applaud the National Black Student Theatre Fund for taking the risk and for making a difference.

We Stand Corrected

In the December 2 issue of the Bloom County B Commentary, "Political Correctness in America," we mentioned that the Princeton Daily was an example of a "saintly" paper. In fact, the paper is not a "saintly" paper at all. It is an example of a paper that is not afraid to take on controversial issues and to discuss them in a thoughtful and respectful way.

The Princeton Daily is committed to providing a platform for a wide range of voices and perspectives, and it is committed to promoting open and respectful discourse on important issues.

We apologize to the Princeton Daily for any offense we may have caused and for any inaccuracies in our article.

Death, Taxes and Tuition

By Lauren Coleman

The dollar is an Even for the University this year, and while some might view this as a cause for concern, it is important to remember that the University is a large and complex organization with many different elements.

The University's financial situation is determined by a number of factors, including the overall economy, the cost of living, and the University's investment strategy.

In conclusion, while the University's financial situation is of concern, we should recognize the efforts of the University administration and the University community to manage the University's finances in a responsible and sustainable way.

Letters to the Editor

The Talented Ten

To the Editor:

Carolin T. and D. Anthony Broti, if no one else under our black community was spotted over our group's recruitment season, then perhaps it was us. And if no one else was watching our organization, then perhaps it was us. And if no one else was aware of the efforts we put into our recruitment season, then perhaps it was us.

U. upgrades chilled water system

by Owen Edmondson

The University is expanding its central air-conditioning water cooling system to provide chilled water to Wistar Institute, Anatomical Museum, and Biology, at 39th and Spruce streets.

The $1 million project, which began last fall, is being handled by the university, which plans to use the system two years from this spring.

The current source of the project's requirements is the underground water line from the University's chilled water system in the footings of William Hall to the Institute.

The William Hall complex is one of four such cooling systems, which provide 44,000 square feet of water cooling capacity to buildings.

Concurrent with the construction of the University's facility, plans are being made to install additional lines connecting William Hall to a second Chilled Water Center in the Medical Education Building. While the construction is completed, a new water-cooling system will be installed to provide a second cooling system to handle the increased demand.

Excavation on the line across 39th Street to the Wistar Institute will begin in the near future, with the line to be completed by April. The project will then be done next to the Wistar Institute.

Initial excavations for the connecting line to the Medical Education Building will also begin next week at the intersection of Hamilton Walk and 36th Street. Workers will begin moving water lines, and the new chilled water system will be operated to supply the Wistar Institute with chilled water for a period of time during the week. The Medical Education Building cooling systems operate from March until November. It is expected to be put into operation by the end of the spring.

The University also plans to supply the Wistar Institute with chilled water for the remainder of the year.

The University will also increase its reliability because it will pay a new, larger, and more reliable cooling system. The problem with research is that there are many unknowns, and it is important to maintain a more reliable cooling system.

The temperatures are too extreme, and our animal will die. Our animal will die. The problem with research is that there are many unknowns, and it is important to maintain a more reliable cooling system.

The University and its expanding chilled water system will provide a second cooling system to handle the increased demand.

The project will be on time and give chilled water by first semester, he said. "We hope to have all underground piping and repairs finished within the next 10 weeks. We'll then go to maintain the temperatures in the building to maintain the temperatures in the building."

Students give award to Hackney
Plaque celebrates Dutch-U.S. relations

BY BETH SCHLEY

Three students presented President
Student Hackney with a plaque yester-
day celebrating the bicentennial of relations
between the United States and the
Dutch Republic. President Hackney
accepted the plaque on behalf of the Dutch
people.

College president Emeritus Rico Neter
and Cindy Koppelt, and President John
Van Tijelle presented the plaque to
President Hackney.

"I think it's a very good idea because
it's a way of making the international
students feel that they are part of our
community," Hackney said. "I think it's
very important that we have international
students here at the University of
Pennsylvania. They bring a lot of diversity
to the school and contribute to a
meaningful and respectful exchange of
ideas and cultures."

The plaque included a trip to the
Netherlands for students and a meeting with
the International Student Union. The trip
included a visit to a university in the
Netherlands, and a trip to Amsterdam to
take a boat tour and see the city's
architecture.

"This is the first of its kind for us, and
we are very grateful to the students for
their efforts," Hackney said. "We hope that
this will be the beginning of a long-term
relationship between the University of
Pennsylvania and the Netherlands."
U. updates recruiting bulletins

"Penn" replaces "Pennsylvania" on logo

By LAUREN CHAIMAN

The University has updated its recruiting and information bulletins, some of which will be mailed by students on the advice of the University's print department.

The most recent change in the publications puts the word "Penn" atop recruiting and information bulletins, with the words "The University of Pennsylvania" printed underneath.

Faculty of Arts and Sciences Acting Dean Donald Fitch said Monday that he believes the change will enhance the University's recruiting potential.

"Flourish sounds more like the image," he said. "I think it will help our image problem that it is unique."

The course guide will now combine undergraduate course listings with those of graduate and doctoral programs. The record guide will now include introductory information in each major, including training and graduate and undergraduate courses. Further, the course guide will combine undergraduate course listings from 149 through 4999.

Fitch added that the new system would allow students to see a larger selection of graduate programs in one place.

The change is part of a larger review for Philadelphia: Applications and of professional or professional programs, which will include separate bulletins.

The University's print department said that the change will allow for a more efficient use of resources.

"It is a more efficient way to use the resources," Fitch said. "There will be a more efficient use of resources by the University's print department."

No. 1 in New Orleans

Almost as exciting as the back seat of a '55 Chevy.

The title helps supply the requisite slang and unrepentant alliteration to the description of the show, and the boldface type promises to deliver a certain cachet to the evening, but the real excitement begins when the show begins. To say that the star is appealing is like saying that the moon is full. There is a quality of originality and elan in the way the show is put together that makes it impossible to categorize it. It is not simply a revue of songs and sketches, but a genuine work of art, a confection of brilliant ideas that are somehow combined into a whole. The cast, which includes some of the finest actors in the country, is splendidly varied, from the hilarious to the tragic, from the mundane to the surreal. The show is a triumph of imagination and execution, and it is a joy to see.

Penn Weekend

(Continued from back page)

"We're going to fight as hard as we can," Nuttall said. "It's our goal every year to win enough games to go to the NCAA championships. Hill has already qualified for the hurdles. It's our goal every year to win enough games to go to the NCAA championships. Hill has already qualified for the hurdles. But his education is not only academic. He's a well-rounded individual."
W. Fencers face Cornell for League title

By JOE SPINARE

Normally at the end of the season, a team works on perfecting its domination. But for the Penn women's fencing team (11-1 overall, 1-0 Ivy), the job has been open working on conditioning.

"We've been running a lot," senior foil and sabre Kristin Seigel said. "In the conditioning room you can never train too much."

The Big Red's top fencer is senior American-Christian Methner, who placed second at the Junior Olympics last winter in a tough, regional tournament. Methner said he plans to enter the national championship next season, in January.

The Quakers will face Cornell (7-3, 0-0 Ivy) tomorrow in a showdown for the Ivy League crown. The Quakers will then face the Big Red (11-1, 0-0 Ivy) on Saturday in a showdown for the Ivy League crown.

"We're running a lot," senior foil and epee Lauren Jaeger said. "In the conditioning room you can never train too much."

The women's fencing team has been "talking about conditioning," Jaeger said. "Our team has been very heavy on conditioning."

The women have been working on conditioning for the Ivy League title.

"We're running a lot," senior foil and epee Kristin Seigel said. "In the conditioning room you can never train too much."

The Big Red's top fencer is senior American-Christian Methner, who placed second at the Junior Olympics last winter in a tough, regional tournament. Methner said he plans to enter the national championship next season, in January.
W. Squash ends season in Providence
Quakers favored in two-meet against Brains and late-entry Wellesley

TOM HARMETT
In case you've been watching the news, there's a challenge for the women's squash team's head coach this weekend. He has to add Wellesley to the weekend's agenda in Providence.

The Quakers are favored to win both matches, but it's a challenge they'll face alone this weekend. The team has been inconsistent, and the addition of a late entrant could mean the difference between a good and a bad weekend for the Quakers.

The meet opens tomorrow at 11 a.m. with a match against Brains. After that, the Quakers will play Wellesley at 1 p.m. The team has been inconsistent, but they are favored to win both matches.

W. Cagers head for Alaskan tournament

B. RUDIGER HARRIS
How many people can say they drove a sailboat and played perhaps the best women's basketball team in the country? One weekend.

On the other hand, few college basketball teams can say they have a chance to play in the prestigious Northern Lights Invitational. An invitational tournament for the nation's best women's basketball teams.

The Northern Lights Invitational is an invitational tournament for the nation's best women's basketball teams. The Quakers are favored to win both matches, but it's a challenge they'll face alone this weekend.
