**AT0 hearing rescheduled for tomorrow**

At 4 p.m. today, the University and several residents will hold a hearing at 4210 Locust Ave., with a Court of Common Pleas judge setting a schedule for tomorrow morning. The hearing was to begin at 9 a.m., but university spokesman Charles H. Breslin said that it was rescheduled.

Frank Checkoway, of the Philadelphia Parking Authority, yesterday said that "this hearing is concerned with the way we are doing the permit system in the residential area." Checkoway said that the hearing will be open to the public, and that the judge will decide whether any further legal action will be necessary. "Either Judge Growden himself will handle it or we will have another judge," Checkoway added.

The university said that it did not know whether any other students would be affected, but that the hearing would be open to the public. "This is not an attempt to hide, but to make the public aware of what is happening," said President Sheldon H. Hackney yesterday.

**FRESHMAN EXPERIENCE NOT ALL GOOD, SURVEY SAYS**

By LAUREN COLEMAN

Students who live off campus may be in for a rude awakening when they start this summer, a survey suggests. The survey, which will be released tomorrow, indicates that one-third of the students who live off campus say they will have to move to different neighborhoods in the city.

The survey was conducted by College junior John Rabinowitz. "What is surprising," said Rabinowitz, "is that so many students who live off campus are not aware of the unit's regulations." Rabinowitz said that his survey was the first to be conducted in the area.

**Students call Rizzo 'a liar' on fiscal issues**

By ROYDES PAUL

Dr. William Goode went on the offensive last night in a news conference at his Center City office, accusing him of being a "liar" and of "obstructing justice." The news conference was called by his spokesman, Bob Frumkin.

"Once again, Frank Rizzo is not telling the truth," Goode said. "He is not telling the truth about his 'budget cuts.' He is not telling the truth about his 'taxes.' He is not telling the truth about his 'cuts.' He is not telling the truth about his 'financial management.'"

**Freshman sues NCAA, ECAC over eligibility**

By MICHAEL NADIS

A College freshman is suing the National Collegiate Athletic Association and the Eastern College Athletic Conference, challenging their policy of barring transfer students from participating in sports for one year. The lawsuit, which was filed in U.S. District Court, claims that the NCAA and ECAC have not made a "fair and adequate" decision in the case.

---

**Clayton Chapman, horse owner, is seeking to have the NCAA, ECAC, and the ECAC's eligibility committee reverse its decision on his son, Bill Chapman, a member of the University's men's equestrian team.**

Bill Chapman, who graduated from the University last spring, is seeking to have the NCAA, ECAC, and the ECAC's eligibility committee reverse its decision on his son, Bill Chapman, a member of the University's men's equestrian team. Chapman was denied eligibility to compete in the 1992 Olympics because he was a member of the University's men's equestrian team, which is part of the NCAA's and ECAC's eligibility rules. Chapman was denied eligibility to compete in the 1992 Olympics because he was a member of the University's men's equestrian team, which is part of the NCAA's and ECAC's eligibility rules. N.C. State takes NCAA title, 54-52
ALBUQUERQUE, N.M. — North Carolina State's 10-year reign still was far from immovable Thursday night, giving the Wolfpack a 54-52 victory over top-ranked Duke for the NCAA basketball championship.

"We're going to have a good time," coach Mike Emovon said.

The Wolfpack's second consecutive NCAA title came after Duke's first since 1983. It also was the third title in nine years for N.C. State, which won its first NCAA title in 1983.

The championship game is the first to end in overtime since 1981. It was the first overtime game since 1976, when Duke beat North Carolina 73-70 in double overtime.

Duke, which had not won an NCAA title since 1982, was seeking its 11th title overall. Its last NCAA title came in 1982, when it beat North Carolina 71-67.

Duke senior center Robert Davis scored 17 points and grabbed 12 rebounds, both career highs. He also had a career-high 10 assists.

North Carolina State senior forward Ben McDonald scored 12 points and had 11 rebounds. He also had six assists.

The Wolfpack led 27-21 at halftime but the Blue Devils rallied in the second half. Duke scored the first six points of the second half to take the lead back.

The Blue Devils' final lead was 35-32 with 3:31 left in the game. But the Wolfpack scored 10 straight points to take the lead back and stay in front.

North Carolina State, which had the ball last, managed to hold off Duke's Final Four memories.

The Wolfpack's victory was their fourth in a row over Duke. They beat the Blue Devils 84-76 in the regular-season finale.

But North Carolina State was not the only team that had a strong year. The Blue Devils finished second in the ACC, but they still had a strong season.

"We're excited about the future," said coach Mike Krzyzewski. "Our guys played hard and we're looking forward to next year."
the problem. By teaching about 800 students each year, "he said. "If it continues, it will be very difficult as reading a newspaper or filling out a form."

The Center addresses the problem of increasing illiteracy from two directions. Some students prefer to study individually with a trained tutor, while others seek to become a larger classroom, with as many as 30 other adults. Gaul said that both methods have been successful.

"There are students who function better in a classroom setting because they have the support of others," he said. "There are others who have chosen to do it alone." But helping students overcome illiteracy is not the only obstacle the center has faced. Finding funds for the program has been a constant battle, and until recently, it has been a never-ending struggle.

The center educates its students free of charge, yet it needs an annual budget of $50,000 just to stay afloat.

Richard Parrett, development coordinator of the Center for Literacy and vice president of Audubon Bank, said that the spectacular impact of new media coverage of the center has created an increasing demand on the center.

He said that he hopes the financial growth of the center can accommodate the increasing number of students.

"If you had 100 students at a cost of $500, then you have a $50,000 budget," he said. "But if the number of students is twice that, then you’re looking at a problem of $1 million or more." The center now has a budget of $250,000.

Parrett hopes that the recent national federal job training may be a new source of funding. A small portion of the $45 million allocated for job training could be set aside for literacy education, and Parrett hopes that it could fund a program to train the students whether or not it will receive any portion of that money.

But Parrett added that he is optimistic about a public positive reaction to the problem.

"The prospects of a major response to the illiteracy problem of Philadelphia are good," he said.

Parrett said a recent article in The Inquirer’s Sunday magazine by former City University of New York English teacher Linda Jacob has generated public support for increasing illiteracy programs.

"We need to recognize the issue," Parrett said.

Parrett said copies of Jacob’s article were sent to both the Governor’s Mansion and the White House. And at a news conference on Thursday, Mayor William Green was expected to announce the creation of new programs.

"This race will be the key to the causes of illiteracy and other social problems to the problem — at least in the elementary and secondary stage and the adult illiterate," Parrett said.

The conference will consist of 20 people with a longstanding interest in overcoming the city’s illiteracy problem. School of Education Dean Del Haggens has been asked to join the panel.

Although Jacob praised the efforts of the center and programs like it, she said Philadelphia’s literacy problem is severe.

"Despite the dozens of reading programs available in the city," she wrote in her Sunday magazine article, "the problem of adult illiteracy — along with the crime, unemployment and poverty that accompany it — is likely to get worse before it gets better.

"And Jacob cited the continually increasing demands of the workforce and the increasing deficiencies of the nation’s educational system.

"Many people now have to go back to school and many, many have made careers have gotten more complex," she said. "As the same time, public schools ..., are being forced to teach more and more and are falling even to accept it to us.

Eventually, Jacob’s grave concern has been a boon to the Center for Literacy. As a result of the publicity, the students who come to the center have increased. And at a news conference on Thursday, Mayor William Green was expected to announce the creation of new programs.

"I think that their work has been a boon to the community," Parrett said. "I think that their work has been a boon to the community."
Letters to the Editor

Questioning the Coverage

To the Editor:

I was quite surprised in response to Peter Canestrini’s column, “Justice and Injustice.” After reading the Student Affairs section systematically like the people who were not in favor of the freeze to see if there was any truth to his argument, I was pleased to see that the students only wanted to express their opinion. As a student who supports the freeze, I was willing to listen to those who were against the freeze. However, I was not willing to hear the same thing over and over again. The whole idea of discussing the seriousness of this allegation can be simplified as the presence or absence of a violation. While we can see that there are some members of the administration who were “different,” it is not this simple. There are more things to consider when discussing the validity of these allegations.

In writing such a column, Canestrini has shown that he has a personal agenda, which he failed to recognize.

To the Editor:

McCombs or Mr. Georgefferson had such a Mink and Wolf show that they would have noticed “The Red and Blue” again. McKenna and Wolf do not care about the University as a whole, but rather, they are part of the big picture. Their decisions are not based on the best interests of the students, as they seek to maintain a healthy society, it is important to point out the issues. Their most important function is to ensure that the proper organization on campus it is a system. In this professional function, it is important to point out the issues. Their decisions are not based on the best interests of the students, as they seek to maintain a healthy society.

Two Sides of the Issue

It is important to note that the students who are against the freeze only need to focus on the people who support the freeze. However, the students who are in favor of the freeze need to consider the students who are against the freeze. This is the basis for the discussion.

Finally, it is necessary to keep in mind the need for having debates such as the one concerning the freeze. These debates provide an opportunity for the students to express their opinions without having to face the administration alone. As a result, it is important to have a healthy and balanced discussion.

Not So Goode

To the Editor:

I was surprised by the recent debate on campus. It seems that the debate was focused on the issue of keeping or removing the works of this artist. However, it is important to note that the debate was not centered on the issue of keeping or removing the works of this artist. The debate was focused on the issue of keeping or removing the works of this artist. "With all our resources, there will be no medical problems."
FAS faculty to vote on TA training plan

By LAUREN COLEMAN

The Faculty of Arts and Sciences will vote today on a proposal to train foreign teaching assistants in language and teaching skills.

The Committee on Undergraduate Education has proposed that the dean of FAS form a panel to review the training program, which would be implemented if the proposal is accepted.

The proposal states that foreign teaching assistants who do not achieve their potential in the classroom must be given more time and resources to further develop their teaching skills. The committee believes that the current training program is not sufficient to prepare foreign teaching assistants for their roles as effective instructors.

The proposal would involve the creation of a series of workshops and seminars to help FAS teaching assistants improve their instructional skills. Additionally, the proposal suggests that foreign teaching assistants be paired with more experienced colleagues to provide mentorship and support.

The faculty will vote on the proposal during the regular faculty meeting Tuesday at 3:30 in the Franklin Room of Houston Hall.

U. staffers gives good answers on 'Family Feud'

By CARA HARRIS

Richard Stone is pursuing or again this summer, the University engineer is planning to record the first Tape of TV commercials for a Columbia campus.

Stone, who is a member of the faculty and research assistant in the Geology Department, will spend the summer recording TV commercials in California and Texas. The commercials will be used in the University's television program, "Family Feud." The commercials will be recorded on a tape and distributed to the University's TV stations.

"We are interested in seeing how the commercials are received by the public," Stone said. "We hope to use the recordings in our future research on the subject."
