Schuykill reopens after tanker fire

The Schuykill River was reopened yesterday afternoon, almost three days after a 3000-gallon oil tanker fire caused a
flood that left much of the city under water. The fire started on October 16, and since then the river has been closed to
traffic due to the threat of more oil spills. The cleanup efforts are still ongoing, and the river remains a
highly visible symbol of the city's ongoing environmental crisis.

U. fails to promote smaller classes

The University of Illinois at Urbana-Champaign has announced that they will not be promoting
smaller classes in the fall semester. According to the university, the decision was made due to a lack of
resources and a desire to focus on other initiatives. Some students and faculty members have expressed
concerns about the quality of education in larger classes, but the university maintains that they are
committed to providing a high-quality education to all students.

New magazines are written for college crowds

By James Griffin

Advertisers have finally realized that there is a market for magazine exposes, but many publications may be sacrificing too much for a quick buck.

Normal, the prominent campus publication, was founded in 1980 by the University of Tennessee College of Medicine journal.

The magazine, founded by a group of University of Tennessee students, has since expanded to 318 campuses with an annual net income of over $1 million.

The students are now the owners of Esquire, Good Stuff and various other publications.

Further Support For NROTC Credit

To the Editor:

I have been asked to relay the remarks of a student attending College '87 who attended the NROTC credit seminar held yesterday. This student, who is majoring in political science, feels that the seminar was very informative but would like to see more emphasis on the academic aspects of the program. He stated that he felt the seminar was more oriented towards the practical aspects of the program and that he would have liked to hear more about the academic courses that are available.

In addition, the student expressed concern about the lack of information regarding the specific academic requirements for the program. He suggested that the university should provide more detailed information about the program's academic offerings and the requirements for students who are interested in pursuing a career in the military.

I hope that the university will take these concerns into consideration and that they will provide more information about the academic aspects of the NROTC program.

Sincerely,
[Your Name]
Freshmen to vote for UA reps

By LEE HARRIS

Freshmen will choose seven representatives to the Undergraduate Senate today and tomorrow in the library's commons. Voting begins at 4 p.m. and continues through 10 p.m. today, and at 10 a.m. to 10 p.m. tomorrow.

In addition, freshmen and all undergraduates can vote in the commons today between 2 and 6 p.m. Students can cast their ballots at the table at the reading room's entryway.

Greek Affairs Director Reuling

Gone are the days when freshmen were treated as a fringe group on campus. Now they are treated like students, said director of Greek Affairs John J. Reuling Sunday.

"The chief problem for freshmen is going to be to carve a path to success here," Reuling said. "It sounds simple, but it's not."

"If you're going to do well here, you have to be a part of class parties, which are a big part of the social scene," Reuling said. "That's the way freshmen are made to feel welcome here."

After the session, students will have the opportunity to voice complaints and suggest changes in the Freshman Code.

University officials have said the code is needed to ensure the future of the existing chapters.

The NEC will announce election results at 8 p.m. today in Thompson Library. Voting on the referendum will end at 10 p.m. today, in front of Van Pelt Library, and at 10 a.m. to 10 p.m. tomorrow, in the House from 4-6 p.m.

CANDIDATES’ STATEMENTS

1. Thomas A. Harris
   (T&T Dynamoite)

   Why do you want to run for the Undergraduate Assembly? I really care about what goes on at Penn. As a freshman, I will stay away from the "politics" aspect of the UA until after the student body can decide who should represent them. I want to make sure that the freshmen are not overshadowed by the upperclassmen. I've decided that the UA needs someone to stand up for the freshmen and try to maintain a balance between the two. So I have decided to run for the UA.

2. Tiffany Murray
   (T&T Dynamoite)

   What is your background? I am a member of the Class of 1987, a native of Springfield, PA, and a resident of the Rockville, Maryland area. I attended Stone Ridge High School in Maryland and have been an active member of the Penn community for the past four years.

3. Andrew Diamond
   (One World)

   Why do you want to run for the Undergraduate Assembly? I want to make sure that the freshmen are represented in the UA. I believe that the freshmen should have a voice in the decision-making process of the UA. I am running to ensure that the freshmen are not ignored and that their interests are represented.

4. Noomp Breakstone
   (One World)

   What are your qualifications for the UA? I have been active in student government for the past four years and have held various positions, including President of the Freshmen Class. I have a proven track record of representing the interests of the freshmen.

5. Michael Gordon
   (One World)

   Why do you want to run for the Undergraduate Assembly? I want to make sure that the freshmen are represented in the decision-making process of the UA. I believe that the freshmen should have a voice in the management of the university. I am running to ensure that the freshmen are not ignored and that their interests are represented.

6. Andrea Caputo
   (One World)

   Why do you want to run for the Undergraduate Assembly? I want to make sure that the freshmen are represented in the decision-making process of the UA. I believe that the freshmen should have a voice in the management of the university. I am running to ensure that the freshmen are not ignored and that their interests are represented.
Salvadoran defends opposition movement

**By BILL MCMURTRY**

Alberto Arené, an El Salvadoran anti-Communist, defended the opposition movement in his country in a speech at the Law School yesterday.

Arené, speaking before a group of more than 100 students, criticized the current government of El Salvador and proposed solutions to the country's problems.

Arené said he is working for an independent, non-aligned settlement to the conflict.

The audience was generally appreciative of Arené's presentation, whether or not they supported him.

American Indian speakers recall injustices

By ROBIN JUTHE

Indian leaders have long been denied land, water, and other rights, according to two Indian speakers at a Pennsylvania Political Forum last night.

"We speak one - a real issue of American Indian literature, the Delaware Valley, and other black presses, according to former Rutgers University student who is a political scientist, is speaking at a local forum. The week's event was also a dead-end for land rights, including water rights, for American Indians.

The Delaware Valley spokesman David Jordan said last night. "The Indian right to remain is "so small." Jordan, a Mohawk Indian, called American Indian Rights, said, "I have no wish to return to my country in chains to await my trial." Jordan also added that the potential for American Indian Rights is "improved by the relationship between the two countries," he added.

Sophomore invests time, energy as stockbroker

"Sophomore invests time, energy as stockbroker. It was a great experience," Brower said last night. "I started investing in Kinetic Energy last year. It was a good experience." Brower added that he enjoys being an investor, and that he has a good chance of success in the University community.

Gottlieb says he believes there is a potential for Kinetic Energy to be considered independent of the city, which would "improve the relations between the city and the community," he said.

"I am very excited about the possibility of Kinetic Energy," Gottlieb said.

"I have always been on the lookout for businesses to add to an investment portfolio. I have invested in Kinetic Energy," he said.

"I have a lot of different interests, and I enjoy being an investor," Gottlieb said.

Through all our meets in the past, Two running plays lost a yard.

Minutes later, down 27-20. Penn was irascible. Bid Ann Hard had reached the final of the Westgate, which was definitely to my advantage.

Bid Ann, a girl with a knock for a 2-yard gain. She gave up the drive, and my team was in the lead for Penn is that this was a game I had once heard. It's hard to lead when not in the game. I have to lead by example. It was so much a leadership thing. I didn't think of it, but I controlled the game. I don't think there are more than eight.

We just go playing away."

Lori's match was key, she continued. It was a rough match much. Lory said, "We lost the lead in the third quarter, but I think we can come back."

Newly lost Todd Stage and Tracy Tater played single in the third round of the tournament with his usual four points to win. The team of Illinois and the lead in the race you feel like you have a lot better. It builds up your confidence.

BY TOM BAUMAN

Changing a lineup or formation of a struggling team is rare, but not impossible. If it works, it will get the team to regain its top form. But if it doesn't work, it can create additional problems, as coach Phil Weckman found out this weekend.

Weckman said that both the men's and women's teams looked at different formations during the weekend, having learned from previous experiences. The women's team, he said, was working on a 3-4-2-1 formation, and the men were experimenting with a 4-3-3 formation.

Weckman said that the women's team had been using a 3-4-2-1 formation throughout the season, but that they tried a 4-3-3 formation this weekend.

The men's team also used a 4-3-3 formation, but also experimented with a 5-3-0 formation.

The women's team used the 4-3-3 formation in the first half of their game against Ursinus, when they scored two goals. In the second half, they switched to a 3-4-2-1 formation and scored two more goals.

The men's team used the 5-3-0 formation in the first half of their game against Swarthmore, when they scored two goals. In the second half, they switched to a 4-3-3 formation and scored three more goals.

Weckman said that the teams will continue to experiment with different formations in the future, and that they will use the one that works best.

The women's team will use the 4-3-3 formation in their game against Swarthmore, while the men's team will use the 5-3-0 formation in their game against Ursinus.

The women's team will then try out the 3-4-2-1 formation in their game against Swarthmore, while the men's team will try out the 4-3-3 formation in their game against Ursinus.

Weckman said that he is confident that the teams will find the right formation that works for them, and that they will continue to experiment with different formations in the future.
