Earthquakes not just for California

(Continued from page 1)

Pennsylvania, all below about 10 feet elevation. The low-lying areas are particularly susceptible to flooding, as the water levels can rise significantly during storms. Moreover, the damage caused by earthquakes in these areas is often exacerbated by the destruction of the infrastructure, such as roads and bridges, which are typically built on or near the ground level.

In conclusion, the importance of earthquake preparedness cannot be overstated. With the right precautions and measures, we can mitigate the impact of these natural disasters on our communities and ensure a safer future for all.

Eva Moskowitz: Promoting political activity

THE DAILY PENNSYLVANIAN - Tuesday, October 14, 1982

On The Record

Eva Moskowitz: Promoting political activity

Moskowitz: Some things we've been somewhat more successful at than others. Of course the vote registration drive did get a lot of people involved - we did do somewhat better than last year. I don't think we were as successful as we could have been. In fact, because we were doing the same thing. Because it was one way for them to become involved, we got a lot of physical contact with people. We had a very good response from the political science dormitories. We were putting out a political calendar which is coming out. We had gotten organized to do a lot of events that they're sponsoring, so we've already approached one or two of them. I think it will be a much different year. We're getting organized to do a lot of events that are related to the campus.

On The Record

Moskowitz: We are trying to deal exclusively with external politics and the relationship between political organizations on the Penn campus and the relationship between the amount of internal political and external politics in the college political system. And by external politics, I mean those political, those people are concerned with what goes on in American politics, and so forth, and in my opinion, that is how it is unfortunate. As students, educated students and political student leaders, I don't think we can afford to do just be interested in what's going on at Penn. We've been in the news, do you think students arc simply a habit, and if it can be institutionalized, then people will vote. Perhaps there are more radical students in other campuses?

Student Health wishes to say GOODBYE and a warm thank you to Lin Brodsky and WELCOME to Rosemary Auth, who has recently been hired as the gynecology nurse practitioner.

DP: Why, do you think, are students so abstinent today? Do you think that the problem is people aren't interested, then we're going to have to come in and educate and I'm still trying other approaches. We're going to try a different educational goal. If we make it specific and clear to the students, and I think it's not a matter of making it more accessible.

Student political participation, how do we get students to the voting booth, become educated about the issues, and having a very firm grasp on them, expect from students. Students should be able to fill out a registration form, get the form in on time, go to the polling booth, and the panic for economic security is certainly one. And the more that they're interested in other than their immediate future. I think another reason is that they haven't really been taught or taught to get in the habit of expressing their political opinions. Through the medium of student organizations, there isn't that much political professional leanings, it is somewhat less political on outside the universities, and to forsake that in my opinion is unfortunate. As educated students, we don't think we can afford to only be concerned with what's going on at Penn.

DP: As a new organization on campus, have you had much difficulty getting yourself established?

Moskowitz: To be honest, I don't understand the answer to this question. We wouldn't be here trying to get people all the time for economic security is certainly one. And the more that they're interested in other than their immediate future. I think another reason is that they haven't really been taught or taught to get in the habit of expressing their political opinions. Through the medium of student organizations, there isn't that much political professional leanings, it is somewhat less political on outside the universities, and to forsake that in my opinion is unfortunate. As educated students, we don't think we can afford to only be concerned with what's going on at Penn.

Moskowitz: In fact, we're trying to sink to external politics. We're going to try a different educational goal. If we make it specific and clear to the students, and I think it's not a matter of making it more accessible.

COUNTER POINT

Levi Schapal

By David R. Meiselman

Some of the points raised during the course included:

1. The University's policy of allowing socially conscious groups to use the facilities is not necessarily benefi
cial to the University's community. The policy allows for the use of facilities by groups whose views may not
be shared by the majority of the University community. This can lead to a breakdown in the unity of the
University's community.

2. The University's policy of allowing socially conscious groups to use the facilities only serves to further the
interests of those groups, while neglecting the needs of the broader community.

3. The University's policy of allowing socially conscious groups to use the facilities is a violation of the
University's commitment to freedom of speech and the freedom of expression.

4. The University's policy of allowing socially conscious groups to use the facilities is contrary to the
University's educational mission.

5. The University's policy of allowing socially conscious groups to use the facilities is a violation of the
University's commitment to providing a safe and pleasant environment for all students.

College alumni to discuss careers
Workshops will explore job paths

By ELLEN FLAX

Two prominent College alumni will be on campus today as part of a program to help students explore career possibilities. The alumni, who are Faculty of Arts and Sciences Visiting Fellows, will address a political science class, hold a workshop, give career counseling to individual students and appear at an assembly.

Connie Homer, College '64, will talk with students about careers in journalism. She has served as deputy assistant of state for science and technology, and is a former visiting fellow of state in science education. Homer is the founder and executive director of the National Journalism Center, a Washington, D.C., organization that sponsors fellowships for journalists. She is a member of Sigma Delta Tau and Phi Sigma Sigma sororities and an honorary member of Sigma Delta Tau and Alpha Delta Delta sororities.

Henry Jackson, Her husband is an associate professor of political science at the University. She has taught at the University since the program's inception in 1969.

Jackson said that the purpose of the program is to inform current undergraduates, primarily those in the arts and sciences, about possible job paths.

"Each time we try to find another field," she said, "we found that the four previous visiting fellows had gone into journalism, law, retail, and the arts and sciences, about possible job paths.

"There are a number of students who have found their foundation in the arts and sciences, and wonder if they can do it all," Jackson said.

According to Reuling and Bubalo, student involvement in sororities at the University has not always been steady, stable growth reflecting awareness on campus. Wilson added that she has seen a surging interest in many chapters who would like to return. "There are many chapters on this campus but when we look to the future, it's not Duke or Howard or Johns Hopkins," she said.

"Phi Sig did come back but it was not as strong as it was originally," Reuling said. "There are many sororities who want to return." Bubalo added. "There are a number of sororities on campus," she said, adding that the four previous visiting fellows had gone on to careers in journalism, law, retail, and the arts and sciences.

"It's an opportunity to meet interesting people who have found there is definitely life after Locust Hall," he added.

(Continued from page 1)

By the time college baccalaurate students receive a degree and graduate, they are expected by the alumnae mothers of the sororities to become full-time members of the sororities. However, many chapters on this campus today do not have members from the University, and some chapters have more than 50 percent of their membership from other universities, Reuling said.

"There are chapters that need to recruit a married couple. She said that when the program was first started, the question was always: 'What is the purpose of the program?'

**Technique may ease transplants**

**Med School prof develops new procedure**

A Medical School professor may have found a way to overcome the body's resistance to transplants without using immunosuppressant drugs.

Home Genetics Professor William Silvers and his colleagues have cleared the transplanting hurdle which makes the tissue acceptable to any recipient.

Silvers last week explained that the matching of donor and patient takes place in the so-called Major Histocompatibility Complex (MHC). Silvers believes that if two people do not have the same MHC, the organ recipient will reject the graft. This belief is what traditionally has stood in the way of transplanting.

Silvers and his colleagues found that transplantation antigens in the donated tissue work with the body's immune system. If the tissue is transplanted in an immune-reactive system, the recipient's immune system will not reject the transplant.

The study showed that some white blood cells, macrophages, infiltrate with the body's ability to accept foreign tissue. But if these white blood cells are removed from the donor's tissue, the rejection is prevented and the transplantation is accepted without the use of drugs.

"The findings indicate that if a macrophage can be eliminated from the transplant, it may be incapable of responding with, impace, but only by MHC incompatible recipients," he said. "Thus these cells have a different role, the graft is not rejected and accepted.

This theory would facilitate transplanting, since incompatible recipients are more common than compatible ones.

Silvers has eliminated macrophages from various endocrine transplanting fields by adding certain white blood cells to the donor tissue. He found that the tissues underwent the transplant work, the body's immune system with any patients of the macrophages that control the level of substances. Tissue removed from the bodies outside the body and exposed him to high levels of antigens he said.

He found that the tissue undergoing the transplant work, the body's immune system with other incompatible recipients than compatible ones. In fact, these grafts were better than fresh grafts that had been transplanted to compatible animals.

"We have previously shown that cultured endocrine grafts are often accepted when placed in a small number of donor blood cells, macrophages, interfere with the body's ability to accept foreign tissue. But if these white blood cells are removed from the donor's tissue, the rejection is prevented and the transplant is accepted without the use of drugs.

New alumni president takes over

BY JANE CHEUNG

Newly elected General Alumni President John Hellwege said he plans to make the group a more visible force on campus.

Hellwege, a graduate of the class of 1984, said he plans to increase the visibility of the Alumni Society, which has become somewhat invisible in recent years.

Another way to strengthen the Alumni Society is to seek offers to bring alumni back to campus, Hellwege said.

For example, on October 25, the president and vice presidents from Penn Alumni Clubs across the nation will gather in Philadelphia to discuss new ways to bring alumni back to campus. "Let's work them, share and come up with ideas," Hellwege said.

He added that the move to the Quad-
grande is important because it will enable the Alumni Society to make a greater impact on the campus.

"It's a pity we don't have one," he said. "It's a pity we don't have one."

Hellwege added that he plans to focus on improving the visibility of the Alumni Society, which has become somewhat invisible in recent years.

"It's a pity we don't have one," he said. "It's a pity we don't have one."

He added that the move to the Quad-
grande is important because it will enable the Alumni Society to make a greater impact on the campus.

"It's a pity we don't have one," he said. "It's a pity we don't have one."

Hellwege said he believes that both students and alumni must work together to strengthen the Alumni Society.

"The attitude of the alumni when they look at their diplomas is crucial," he said. "If they look at it with pride, they'll surely talk about the University, and people will know that we have a stronger alumni society."

Supporting the president of the Alumni Society is an opportunity to speak directly to the University, and people will know that we have a stronger alumni society.

"It becomes increasingly necessary for us to speak with pride," he said. "Our feelings will then become more congruent, and we can continue to enhance the alumni society."
W. Cross County wants to regain trophy

Villanova the team to beat at Big Five championships

By GARY EDLESTEN

The Penn women's cross country team has one major goal in sight this season: win the championship trophy back.

"Two years ago," senior Mary Turner said, "we were the man and got the trophy, but last year Villanova took first. It was hard and definitely not pleasant— having it taken away. Since this is a different situation for us, we think we get back the trophy.

Penn recently defeated Temple, La Salle and St. Joseph's last weekend in the Temple Invitational— in which Villanova did not run... so it should be a two-way race between the Quakers and Villadans at the Bel Air Pre-Meet this weekend. But to make matters worse, Villanova is the team to beat. We have to beat a Villanova team that should qualify for the NCAA Meet.

"We're not really concerned with any of the teams, but Villanova," Turner said. "Villanova is not as good as they were last year and we are so good, it should be a close race." Against Villanova, Penn will have to run the way it has for its first three meets. The Quakers have won its first three races and is running strong and maintaining an unusually secure finish in its first five finishers. Even though some runners were not in top form, they still finished in the top three places. Penn runners have consistently taken a majority of the top six in recent meets.

CAREERS IN BUSINESS MANAGEMENT

Challenging opportunities are offered in the following areas of business management:

- Finance
- Contract Administration
- Retail Management
- Food Service
- Inventory Analysis and Purchasing
- Transportation and Distribution
- Fuel Planning and Analysis
- Computer Systems
- Operations Analysis

Visit representatives of the U.S. Navy Supply Corps to learn how your degree in accounting, economics, business administration, computer science, or engineering can prepare you for an exciting business career.

An Equal Opportunity Employer
Soccer looks for confidence at Lehigh
tomorrow, 1 p.m.

By DAVID GOLDBERG
Penn soccer fans can blame the importance of tomorrow’s game at Lehigh.
"We still haven’t talked about last week’s game against St. Joseph’s," said assistant coach Tom Scudder. "We’ve just got to win this weekend and we’ll be okay."

Scudder spoke the truth, but the overall picture isn’t as plain as that.

The Quakers have been playing better soccer than their 2:4:3 (3-1-3) record indicates.
The Quakers may have only scored four goals, but three of them were against the funny St. Joe’s defense and they were all scoreless in the two prior games.

That should make a 2:3-1 record a little more acceptable, but the Quakers must break free of their scoring habit.

"I think it’s important to score," said midfielder Mark Petrich.

"We’ve scored a goal a game against five in the last four games, so we know we’re not scoring the breaks. We need to start getting in on goal-scoring opportunities." But Lehigh does not have that good a team. They are struggling at 3:6 through its first two games of the season.

The Quakers lost that game but they did get a glimpse of their opponent’s talent.

Penn assistant coach Tony Stannard noted the Princeton game and turned a detailed report to Stannard.

"The scoring report says that this is a very ambitious team," said Ed." "This team has the feel of a good school and we’ve had great success with them. They’re prone to make mistakes. They’re the team we should beat, but it’s a tough team to come against."

The Quakers practiced on Thursday night and have a good chance to win on Saturday.

"We haven’t played them for the six or seven years," said Scudder. "But I remember the first time I saw them and they had a very quick team and it made it difficult for us.

"Now’s their year and I’m glad ou can’t have Lehigh’s defensive strength."

The scoring report says that they have an offside threat," Petrich said.

"The final report and a whole week’s worth of work is the key," said Stannard. "Penn is a very good team."

The Quakers will get a chance to display their improvement— and most importantly, their improvement— and maybe even a chance to catch them in their three to four chances into the tournament.

The quakers will get a chance to display their improvement— and maybe even a chance to catch them in their three to four chances into the tournament.

After splitting its first two games, the Penn freshman football team looks to end the season on a high note.

"The team has worked very hard and is starting to get the experience," said coach Bob Schmidt.

But the record does not show the progress made by the team this season.

"We haven’t played them for five or six years," said Schmidt. "But I think we’ll have a chance to get the win this week."

The Quakers lost that game but they did get a glimpse of their opponent’s talent.

Penn assistant coach Tony Stannard noted the Princeton game and turned a detailed report to Stannard.

"The scoring report says that this is a very ambitious team," said Ed." "This team has the feel of a good school and we’ve had great success with them. They’re prone to make mistakes. They’re the team we should beat, but it’s a tough team to come against."
