Nothing but business for new vice president

By BRIEDE ESTES

Mary Whitington has been named volunteer vice president for finance, but don't get her wrong, the University's new Vice President for Finance isn't burdened with fast cars, crystal chandeliers or weekend getaways.

Profile

The native New Yorker. She likes to manage other people's money.

Speaking softly through clenched teeth, Whitington projects an image of sand-dwelling intensity contrasted by open handshakes—approaches for someone just learning the ropes of a new job.

Whitington comes to the University with a background in managing finances in the public sector. She began in the Delaware's deputy secretary in the state department of education and worked her way up to chief financial officer of the state's finance department.

Whitington quickly derails any questions about the governor's former position as the state's treasurer, saying, "I'm concerned with the budget process and collecting the state's revenues."

SCUE reaffirms position on NROTC credit

Group member charged with conflict of interest

By ROBERT MARLEWICZ

The Student Committee on Undergraduate Instruction reaffirmed its stance against granting College credit for NROTC courses, saying that there is no assurance that the courses offered fulfill SAS academic standards.

But NROTC students are charging that SCUE sponsoring Committee Member Alan Kosberg, a student in the School of Arts and Sciences committee, does not support the committee's position on NROTC courses.

SCUE issued a statement Monday saying that it appears granting any credit whatsoever for NROTC courses.

"Because NROTC is an organization democratically independent from the University," the statement read, "it does not seem appropriate for any other group to make decisions for them unless they are working concretely with them to establish an NROTC department as a stand-alone academic unit within the University." SCUE, Chair Louis Schuchter and Monday evening expressed its belief that curriculum offerings are a matter of individual decision of the faculty as a whole rather than a matter for interdepartmental policy.

"The NROTC courses probably would be cross-listed under SAS departments, and students would take the course under the SAS department," Schuchter said.

"SCUE believes that the provision for academic freedom for instructors and the quality of instruction ranks precedence over the issuance of credit."

"We don't think the program is as useful at the level that it's being offered," he said.

"The Students Co-operative Education Program Cur. Ronald Pendleton, however, says that students who have taken NROTC courses are able to be used in the student's overall education.

In describing the program to foster interdisciplinary work, Pendleton said that there is an "immediate need for some conflict of interest." He said that there is a conflict between the student's education for the military and the student's education for the University.

"There is a real need for some conflict of interest," he said. "There is a conflict between the student's education for the military and the student's education for the University."

The SCUE reaffirmation, however, is not binding, and the university does not bind itself to the University without a conflict of interest.

"I think the program is useful for some students," he said. "I think the program is useful for some students."

SCUE pushes for interdisciplinary work, but the program is not binding, and the university does not bind itself to the University without a conflict of interest.

"I think the program is useful for some students," he said. "I think the program is useful for some students."

In third year, writing program continues expansion, success

By DAN SALSBURY

The Writing Across the Curriculum, which has been in operation for the past year, has expanded to include a wide variety of classes and is being taught by a more intimate relation.

"It's a poor substitute for the writing-intensive course that we used to be required," he said. "It's a poor substitute for the writing-intensive course that we used to be required," he said.

The program does not make up for the writing-intensive course that we used to be required."

"I sense that the grades are not as high, but the students do more work in the writing," he said.

"It's a poor substitute for the writing-intensive course that we used to be required," he said. "It's a poor substitute for the writing-intensive course that we used to be required," he said.

"We don't think the program is useful," he said. "We don't think the program is useful."

A listing of University news and events

---

**The President**

- **SAN SALVADOR, El Salvador**
  - During their triumphant return to the presidential palace, the guerrillas and their allies were greeted by the government's anti-terrorist squad, the National Security Forces (NSF), who reportedly engaged in violent clashes with the public. The guerrillas have been using the NSF in their propaganda efforts to rally support against the government.

- **U.S. officials in Washington**
  - The U.S. government has reportedly sent military and intelligence personnel to El Salvador to support the NSF in their operations.

- **The NSF**
  - The NSF has been accused of human rights abuses, including extrajudicial killings and torture, in its crackdown on the guerrillas.

---

**PEACE TALKS**

**El Salvador**

The president, a Christian Democrat, recently announced that El Salvador's first free elections in 41 years will be held on November 6. The elections are expected to bring about significant changes to the political landscape of the country.

---

**Egyptian presidential travels to Jordan**

- **King Hussein**
  - King Hussein, in a surprise move, travelled to Jordan to discuss peace negotiations. This move comes as a shock to many, as King Hussein had previously indicated his desire to use his position to mediate between Israel and the Palestinians.

---

**Reporters Notebook**

- **Students**
  - Students were observed participating in various campus events, including a debate on the future of the United States. The event was well attended, with many students expressing their views on the topic.

---

**Ground crew fixes Challenger**

- **Cape Canaveral**
  - The ground crew at the Kennedy Space Center worked around the clock to repair the damaged Challenger space shuttle. The repairs were a significant milestone in the recovery process.

---

**Salvador**

- **Malaria**
  - The government of El Salvador announced a new strategy to combat malaria, which has been declared a national emergency. The strategy includes the distribution of long-lasting insecticide-treated bed nets and the use of rapid diagnostic tests.

---

**Tigers win Series opener**

- **San Diego**
  - The Tigers won the first game of the Series opener against the Padres. The game was a close one, with the Tigers winning by a score of 3-2 in extra innings.

Partisan clubs spur political activity

By SEUNG

It's been a common phenomenon this semester while walking down Locust Walk in the way to class. You're pretty much wondering what you'll answer if the politicians call and you weren't in the middle of a phone conversation, someone will probably ask, "Have you registered to vote yet?"

An affirmative could elicit a smile, but a shake of the head evokes an implausible response faster than you can say Walter Mondale. Former Gov. George Bush and Ronald Reagan can say "You're right!"

But these enthusiasts student who have plastered the campus with buttons, bumper stickers and signs are actually well-motivated. They are, in fact, among the most politically active students on campus, students affiliated with the Penn Democrats and the Penn Republicans.

The two partisan organizations are concerned with the national elections as well as the elections of the party candidates who are running in the University area and are active in backing their respective candidates.

But perhaps more importantly, they are active in increasing student body participation in the political arena.

Chip Hardt, a Wharton and Environmental School senior and last year's head of Penn Republicans, said last week that 80 students have joined his group this year. Although the numbers are down slightly from last year, the organization is making headway in their student goals.

But in addition, that most of the students are active in organizing student support for various candidates, Campuses for Democracy are making strides for state senatorial and congressional posts.

And in that, most cases, the Republican candidates are running against Democratic candidates. Which translates to mean that the Republican hopefuls are most interested in speaking in areas that are concerned with the national election.

Ike Ehrman, a political science junior, said last week that 150 students have been registered to vote so far this year. While this number is less than last year's peak of 200, it has been increasing in the last week. And with the registration deadline being soon, there is still hope for the majority of students.

The Penn Democrats have also joined in this register drive, registering students in the Library of Congress, Center City and two other locations last week. In addition, the Penn Democrats also distributed literature at a table in the Library. They are hoping that this will increase the number of registered students.

According to Gordon Whitman, director of the Penn Political Participation Center and a College junior, said last week that he hopes the main thrust of these two political organizations will be to increase the number of registered voters. He said that these two groups should help keep students politically aware and involved in the political process.

As a result, the Penn Republicans are planning to work in the upcoming election as well as to organize support in the campaign. Hardt also said that the group hopes to celebrate more events like Reagan's second inauguration.

"We're going to be at the inauguration to see President Reagan re-inaugurated," said Hardt.

"I think there is a lot of apathy at Penn, but there is tremendous potential."

The Penn Democrats are planning to work in the upcoming election as well as to organize support in the campaign. Whitman also stressed the importance of students getting involved in electoral and non-electoral events, as well as in organizing voter registration drives.

Although Penn Democrats and Republicans recently opposed the importance of electoral activity, they now realize that involvement is essential to the political process. The two groups are planning to work together on a variety of issues, as well as to organize support in the campaign.

Several students registering to vote at the Penn Democrats table on Locust Walk yesterday.

At a table, they do work in conjunction to promote the political participation of the University. With the Penn Political Participation Center, a multi-service organization, the groups are registering students with political information, the organizations registered approximately 200 students to vote at the University identification center, C.U.D.O, in September. Another project that the two groups are working on together is the Student Political Participation Center, a student-run organization that will provide information on political issues and help students become involved in the political process.

"Great man, dad," Tom said, who had been a football star on his varsity football team, enthused, "I think I can get on.

"You should have seen me three years ago, son, but now it's a little more competitive," said Mr. Farrakhan.

"Well, there's more to that," Frank said, "look, I hope you'd get involved with other organizations. I'm sure you'd be interested in helping Donald Trump sell real estate."

"You're his son, is that it?" said Mr. Farrakhan.

"That's the Ivory Tower as applied to politics. The next time you're screaming at a football game or seeing the students in their cars, remember, this is a Jekyll-Hyde experience."

"But along with the good tidings, annual giving of course should be a head understanding of the past year's annual giving of campus development. The large boost, rising from $8.25 million to $10.4 million, seems to be catching up to that of its Ivy League peers."

"I think that's catching up," Mr. Farrakhan said.

"I think we have a good administration and a good campus, too," Mr. Farrakhan said.

**Interview with Carmen Rodriguez**

"That's the Ivory Tower as applied to politics. The next time you're screaming at a football game or seeing the students in their cars, remember, this is a Jekyll-Hyde experience."
Chairman Clarence Pendleton criticized minority demands.

"I am not really a politician, I'm much more a technician," she said.

"I've been in government for four years," said Pendleton.

"I'm settling in at a more leisurely pace," she said.

"We're doing more than "sleep, eat and ski,"" he said.

"I don't enjoy skiing enough to get much benefit from it," she said.

"We're doing more than "sleep, eat and ski,"" she added.

"I'm settling in at a more leisurely pace," she said.
Administration to implement new employee health program

By HELEN DEATES

The Office of Human Resources has launched a new program to help University employees improve their physical and mental health.

The program, entitled "Help Yourself to Good Health," is designed to "promote a lifestyle aimed at achieving and maintaining good health," according to Personnel Specialist Franni Lundy, who heads the program, said yesterday.

The program addresses not only physical health, but also the issues of safety, stress-related and childhood emergencies such as poisoning or falls. "Basically the program is going to have lots of components in it, ranging with handbooks and seminars open to faculty and staff," Lundy said.

Lundy said the first session of a lecture on the harmful effects of smoking which will be enlarged into a lecture on the harmful effects of smoking.

Other programs planned for the fall are exercise classes and weight-loss support groups for the University's faculty and staff.

One of the events will focus on the prevention of heart attacks in the American population. The lecture will be attended by students in the college of medicine. The lecture will be held in the morning and is open to the public.

The event is designed to increase faculty awareness at the University of the handicapped. The event is designed to increase faculty awareness at the University of the handicapped.

Among these is a seminar designed to train people how to cope with childhood emergencies such as poisoning or falls. "Basically the program is going to have lots of components in it, ranging with handbooks and seminars open to faculty and staff," Lundy said.

Ludy said she hopes to make the program a long-term program of interest to sufficient

Area leader discusses woes of urban youth

By DOUG KINBER

"Crisis," the Swahili word for danger, was the theme of Sister Fattah's_False speech at the Swarthmore Center last night. 

Fattah founded the North Philadelphia honest home House of Umoja and has been an influential figure in the need for improving the Afro-American. 

And last night, she told a group of students that she did not originally intend to become heavily involved in the conference, but found that she could not avoid it. 

The conference was to discuss the use of the Afro-American in the community, but found that she could not avoid it. 

Fattah said that the number of animals under care is "in the hundreds," she added. "The best equipment we have," Kirby said. "We have an incubator, a large os-ter emergency room. "We work on all aspects of veterinary medical residents," Safyer added that the Swarthmore Center has increased from 5000 to 7000," he added. "We also have real wonderful back-up staff here." Kirby said. "We also have real wonderful back-up staff here." Kirby said. "We also have real wonderful back-up staff here." Kirby said. "We have up to 10 volunteers a week. 

"We're actually a little hospital more like a hospital," Feinman said. "You set up a beak between the public and the veterinary hospital. "We have a resident in exotic animals, so we can ask about birds and iguanas and - and baby pigs," the add. "We also have real wonderful back-up staff here. "We really do like the place down here," Kirby said. "We really do like the place down here," Kirby said. "We really do like the place down here," Kirby said. "We have a resident in exotic animals, so we can ask about birds and iguanas and baby pigs," the add.

Temple University and Bell Atlanticcom announce a bold new concept in higher education.

Room service.

Soon, Temple students will be able to "search" the library from their dorm rooms. And view open heart surgery from the classroom. A remarkable new voice, video, and data communications system is making it happen.

A unique "electronic campus" is taking shape at Temple University.

Bell Atlanticcom is building it.

A state-of-the-art communications system that will impact every area of University life. For faculty and staff, as well as students.

There will be facilities for video conferencing, data transmission. Electronic mail. And ultra-efficient telephone communications.

Faculty members will have immediate access to research information from outside databases.

Computers presently serving the administrative staff at the various Temple campuses will be able to communicate directly, even though many different types of computers are involved. A major achievement!

And more. All through one integrated system.

Bell Atlanticcom has been assigned single-source responsibility for the entire communications system. For the equipment. For system installation, integration, and maintenance.

Given our Bell System background, it's easy to understand why Bell Atlanticcom got the job. Large, complex tasks are all in a day's work for us.

The fact is, we bring a special competence to systems of any scale, small or large. Residential, commercial, or governmental.

And we offer a broad and varied range of equipment for telecommunications and information management systems. From such well-regarded sources as Digital Equipment Corporation and NEC. General DataComm, InterCom, TIE, and Esprit.

You can buy from us, or lease. Our services are flexible, our pricing competitive.

Bell Atlanticcom. The people to see for expert advice and counsel. And single-source responsibility for communications and information management systems.

A toll-free phone call will bring you more information: 1-800-252-BELL.

Field. With only two Textile players remaining, the Quakers' backfield was able to build momentum quickly from the back. And for the Rams, that was a disaster. Every time they got up to pass, Blue was there waiting for them.

In the 30th minute, Pepsi's desperation paid off. The Fielder Chan Papi worked the ball inside the Kees' penalty area, turned a defender, and passed for what looked like a tap in to the top of the box. From their strengths or their weaknesses, the ball fell to Textile guide Walter. The goal was Saunders' fourth of the season, and it came only two minutes after he entered the game as a substitute for another

Textile had also bought two new players, Jeff and Mike. With the two new players and the experienced players, the Textile backfield now has the potential to become a force to be reckoned with.

Tennis wins easily

(Continued from back page)

Four players who filled the two empty spots in the lineup scored the first three goals of the game. Quakers Cregler and Wong each scored a goal, while Luing and Wong scored the final two goals of the game. The Quakers went on to win the game 4-0, assuring them of a conference victory.

Field Hockey wins

(Continued from back page)

The players were excited with the win, Schroyer said. "It's a good win for us, and we can take a lot of pride in it." Neilen said. "We went into the game knowing we had to win, and we did it. We are definitely building up momentum for next weekend."
I Can't Believe I Ate The Whole Thing

Chris Heldtaki was enjoying the Columbus game. The weather was perfect, the Quakers were way ahead. Then it happened. That muffin just wouldn't come out fast enough. He didn't get to play.

Soccer leaves Textile in tatters

Inspired performance results in 2-0 victory

By RICK BENECK
After Friday's 2-1 victory over Columbia, the fifth-ranked team in the region and the Ivy League champion for the last six years, you probably thought that the Penn women's soccer team was going to have hard time finding a suitable successor.

An inspired performance, the Quakers defeated fourth-ranked Siena, Sorority National Textile Field, 2-0. For Penn, the victory completed the first regular season victory over Siena since 1988 (the Quakers have played the Rams six times in the last 20 years, but lack more important victories in the series). The victory also firmly established that Penn now stands third in the region in terms of team depth.

Textile had come into the game with a 3-0 mark (1-0 Siena victory, including three consecutive 1-0 victories). The Rams are potent scorer powerhouses, they have been in the NCAA playoffs, every year since 1986, and they have the ability to turn the game on its head. They knew what to expect from these Rams, but did not come into the contest feeling intimidated.

"We watched (Siena) when they played Delaware (at Textile)," Penn head coach Z. Jackson said. "In the first half of the game, we saw it right there, the first 25 minutes."

It worked well enough for Penn to claim its first shutout of the season. The Rams would not make it past freshman Nina Greene behind her in the goal. Greene has scored a total of four goals, including three consecutive 1-0 victories. She's the central part of the offense, responsible for making sure the Penn defense remains socially acceptable.

"Defenders are like the quarterback of the defense," she said. "We have two responsibilities - to enable our linebackers to have more freedom to run to the ball and not to be shut him down," she said. "I knew what he was going to do when he moved forward."

One reason Penn was able to win was because of its ability to create open opportunities. The Rams are 0-2-1 in their last three league games.

The goal came about because of a defensive mistake by Siena. Greene put together last season's tying goal, but this year she put it together in the middle. She just had to pass it into the box. That's 300,000 people watching l>>

The Hit Men

Linebackers tackle the job for better and for worse

By STEPHANIE KRASON
In every game, when the play goes from offense to defense, there are no 110-yard dashes, no no-look passes, no last-second kick. There are no passes and return kicks. There are no hitters and tackles. There are running backs and tackles. There are goals and no goals. There are no hits and tackles.

When the play goes from offense to defense, there are no 110-yard dashes, no no-look passes, no last-second kick. There are no passes and returns. There are no tackles and tackles. There are running backs and tackles. There are goals and no goals. There are no hits and tackles.

"You have to be the one that puts the ball on the ground," she said. "You have to be the one that makes the tackle."

"There's a certain excitement to it in football. You put your helmet on and go out there and play. That's what makes you a little more nasty. But it's not that's 300,000 people watching l>>

W. Tennis enjoys new faces in 9-0 defeat of Temple

By ANNE MARSH
There is only one way to describe yesterday's match between the women's tennis team and Temple — bad, it was a match that featured new players in new positions. As a result, the Quakers had little trouble trouncing the Owls, 9-0.

One of the absence of Penn's first and second-singles stars — Julie Sutton and Gina Robins — the rest of the team stepped up and made the most of their opportunities. Penn posted the upset against Temple, moving up the ladder two spots.

The victory gave coach/supervisor Fran Bochowski the win in her first match as head coach and Barbara Nita Greene behind her in the season's first match. The victory also firmly established that Penn now stands third in the region in terms of team depth.

"The success of the match wasn't great," Greene said. "The game started well."

There was no real pressure because they weren't that tough a team to start with. And it didn't help that one team moved up to the number two spot in the region. But this season, when the Quakers faced Temple, they were able to move up to the number two spot.

"It was a good game because of the way we hit the ball," said Greene. "It's a good game because of the way we hit the ball."

Actually, there's more to the job than just hitting someone — and any batter can win by hitting the ball. But it's not as easy as it looks... The goal is to make the batter hit the ball. And the batter has to think about hitting the ball."

"It's definitely nice to see us recognized as a team. The emphasis was on teamwork."

F. Hockey wins, 1-0 over No. 13 Ursinus

By TOM HARRIN
Sometimes it takes a little adversity to bring out the best in a team. Although it wasn't planned, that's what happened for the Penn field hockey team this season.

After losing their first two games of the season, and struggling against West Chester and Lehigh, the Quakers (5-0-1) defended highly-ranked Harvard last weekend. And last night Penn upset 13th-ranked Ursinus (7-3-1) at Franklin Field, 1-0.

"I think that says something about the team. I think that says something about the team."

"It was a good game because we hit the ball."

The Quakers defeated their SOCM Sesen in a game of a different kind of football. The game was played on Monday night, Kevin Bradley and Tim Chambers were called upon to highlight players...

"You have to be the one that puts the ball on the ground," she said. "You have to be the one that makes the tackle."

"There's a certain excitement to it in football. You put your helmet on and go out there and play. That's what makes you a little more nasty. But it's not that..."
