On the Brink

Vaccine for cancer being developed

By PATY KREIN
Winter Institute researchers may be on the brink of developing a vaccine for cancer. They are currently working to find out whether cancer vaccines for mice, especially patients suffering from melanomas, can become immune to their respective strains of cancer.

The researchers at the Winter Institute have been developing a vaccine that contains a mixture of two elements: a protein that can infect the cell and a chemical that can destroy the protein. The researchers hope that this vaccine will be able to prevent the mice from becoming immune to their cancer.

The researchers are now working on a second vaccine, which they hope will be able to prevent the mice from becoming immune to their cancer. They are also working on a third vaccine, which they hope will be able to prevent the mice from becoming immune to their cancer.

News you can use

Women across the world have

been warned that they could be the next victims of terrorism, but

discouraged from working under a threat in the face of an imminent

attack, is performing well," said

Scott Lee, spokesman for the

Institute for Human Rights.

A taped message was left for the

Chase Manhattan, which

was released to the Associated Press by members of the forum.

"A woman's work is never done." Women are everywhere. But are they treated fairly? They

are considered the most important citizens of the world. But they are not treated as such.

G NP may use housework

A paragraph adopted into the

U. S. Food and Drug Administration

(GNP) in Fneprotr, was introduced to Congress by

the General Accounting Office to the

Congress last July at the U. S. End of

Decade Conference for Women's Rights.

The adoption of the new

bill was part of a joint effort by

the International Women's Commission and

C. N. U. to improve conditions for women in the housework industry.

Focus on discussion to foreign students, jobs

By CHRISTOPHER DONOHUE

The problems foreign students face when returning to their native country with the same of a semester in the Greenfield Interna-

cultural Center.

The workshop, organized by the Caribbean Association, the International Student Center, and the International Programs Office, featured a series of challenges that foreign students face in developing countries.

National Programs Foreign Student Ad-

visor Sally Balzaid said students were mixed in their reaction to the program.

"I talk to students who have great con-

fidence about living here," Balzaid said. "And the con-

fidence isn't always there because they don't feel comfortable having the freedom to go to their native country.

They're not going to the countries and they're not going to the people they want to go to. It's a very difficult transition."
Weight Reduction Strategies

By Marilyn Ross-Bradford

There are no easy solutions to getting excess pounds off and keeping them off.

There are a few key points you should keep in mind:

1. **Diet:**
   - Eating a balanced diet is an important part of weight loss. A balanced diet should include a variety of fruits, vegetables, lean proteins, and whole grains.
   - Choose low-fat, low-sodium options and limit your intake of sugar and refined carbohydrates.

2. **Exercise:**
   - Regular physical activity is essential for weight loss and maintenance. Aim for at least 150 minutes of moderate aerobic activity each week.
   - Incorporate strength training exercises to build muscle mass, which can increase your metabolism and help you burn more calories throughout the day.

3. **Behavioral Changes:**
   - Identify and change unhealthy eating habits, such as emotional eating or overeating during stressful situations.
   - Practice mindful eating to be more aware of your hunger and fullness signals, reducing the risk of overeating.

4. **Support System:**
   - Surround yourself with supportive friends and family who can motivate you and provide encouragement.
   - Join a weight loss support group or online community to connect with others facing similar challenges.

5. **Tracking Progress:**
   - Keep track of your weight and progress to stay motivated and measure your success.
   - Consider using a food journal to monitor your intake and identify areas for improvement.

Remember, losing weight is a journey, and it's important to be patient and consistent with your efforts.

---

**Preparation for an Organization that is jams:**

If you're preparing for an organization that is jams, you may want to consider the following:

- Ensure all necessary materials are assembled and organized.
- Create an agenda for the meeting to keep discussions focused.
- Arrange for any necessary equipment, such as projectors or microphones, to be available.
- Communicate with participants in advance to ensure they are aware of the meeting details.

---

**The Business of Shops:**

When working in the business of shops, it's important to:

- Understand the inventory and stock levels of your shop.
- Communicate effectively with suppliers to ensure timely deliveries.
- Manage customer expectations by providing good service and addressing any concerns promptly.
- Maintain financial records and accounting practices to keep your shop profitable.

Dutch people aren't all blondes. They don't all wear wooden shoes. And they don't all sing folk songs about dancing on the sea.
Quink, a Dutch a capella group, will prove this last tale wrong when it sings in the University Museum's Harris Auditorium this weekend. Quink, which consists of three women and two men, has built up a 1978. Their selections spanned from Renaissance and Baroque madrigals, through the German late Romantic and French Impressionist periods, to 20th century a capella music and folk songs.
"It will be very good," Music Department Chairman Thomas Conkmann said.
Although this is the group's first tour in the States, Quink has already established itself throughout Europe, and has the distinction of being a premiere of the famous English King's Singers. The ensemble has cut three records, which mostly in miniature represent the six, fourteen and thirty sections of the group's "Songs of the Netherlands." Quink's "Hymn to St. Cecilia," covering the group's "signature" style, may be essentially unmatchable.
Quink's appearance at the University Museum is sponsored by the Music Department and the Dutch Studies Program. The latter will hold a reception after the performance.
Dutch Studies Program Director Gertrude Reithelbach said that the performance is the first of its kind for the program.
This is the first concert we have activity in the Harris Auditorium this is the first specifically Dutch group to come," Reithelbach said.
In addition to the concert on Sunday, Quink will give a master class and a workshop in the Hamill House rooftop lounge at 7 p.m. on Monday.

Conversation Cafe closes
Hall said that he is using the new mail as a "bargaining chip to remain in Houston Hall.
"We bring a lot of traffic into the hall," he said. "If we don't move there, we'll be moving to the new hall." Hall also added that if his store is not allowed to move into the space, it will consider relocating at the 34th and Walnut street mall, "If we're moving," Hall said, "We bring a lot of traffic into the hall."
"We don't dare to be overconfident," Hall said. "We don't dare to be overconfident."

And in celebration of our grand opening, present this ad and enjoy $5 off a dinner check of $25 or more; $10 off a dinner check of $15 or more; $10 off a dinner check of $12, and $8 off with student ID. Expires November 14, 1985.

In addition to the concert on Sun-
ty Museum's Harrison Auditorium on Sunday at 3 p.m. Tickets are $13 and $12, and $6 for with resident ID, and are available at the Annenberg Center Box Office.

they must handle and yet it is not a

stream to stream. Russia needs dis-

sarmament. [Levine] said. "I think it

better not to cause as much concern.

In the past it was used to say that a continuation of

sarmament will work for the United States. But we can

weaken it. It is not based on a cor-

comprehensive analysis of the systems," he added.

"They have all the data they need to make

disarmament, despite bad relations with

during the war, or maybe, even,

thanks to."

The Economics Professor Harold

Levine said yesterday that strains on the econ-

omy may influence the Soviet

the way. He added that he thinks more important is the threat of

rapid technical changes in military

strategy that is illustrated by Star

Wars." The Soviet economy is not good

on making technical leaps because of

the whole bureaucratic nature of the

Soviet economy," he added.

"Dealing with the Cold War adds

input from a wide array of sectors of

the economy. The Soviets face big

prices for accomplishments, but it's not big enough usually to

overcome the risk aversion endemic in

bureaucratic societies." Levine said that he envisions few

solid accomplishments arising from

the summit. "But it means that neither wants the summit to fail and success is a very difficult

thing to define," he said yesterday.

"But on the big issues pertaining to

arms control, I imagine that they will

agree to agree on different approaches to make agreements." Levine said. "On the other hand I

don't think someone as apparently

clever as Gorbachev really expects to

come out of the summit with much
desired espionage."

"I think the Geneva the Soviets will

be quite anxious and very appropriately

purse some control over Star Wars." Levine said. "On the other hand I

don't think someone as apparently

discerning as Gorbachev really expects to

get very much from the summit."

"I think [Gorbachev] wants as much as a way to get public attention for some of

the new Russian developments -

there is a lot of momentum there and they are

very much a beginning."

"But Economics Professor Harold

Levine said yesterday that he does not believe any major issues

will be resolved at the Geneva Sum-

mit, for he feels Gorbachev and Reagan for the same reasons to return with some

accomplishments."

"I think that both the Russians and

the Americans want the summit to succeed and success is a very difficult

thing to define," he said yesterday. "But it means that neither wants the

summit to fail and so there will pro-

bably be some agreements or relative-

ly non-contradictory things."

"I think both Reagan and Gorbachev

know that all they have agreed to agree

Forum to examine health care

By SEAN BIERCHLEY

The Wharton Health Care Club is sponsoring an all-day seminar on health care careers and will offer innovative ideas being used by the health care industry to provide service to urban areas.

Wharton Health Care Club member Andy Orlf said that the health care industry is changing rapidly and farm hospitalization is a service to customers and will make the patient's stay more comfortable. He also said that the conference will cover the applications of management skills to the delivery of health care services and discuss how to apply them to the urban health care environment.

The conference will be on the business side of health care industry," said Orlf, a fourth-year medical student. "The speakers will be concerned with the medical industry's need to cut costs. The keynote speaker will be Dr. Vladimir Eibov, president of the United Hospital Medical Center, who will speak on the advancement of medical care.

Holocaust

According to page 1,

"The conference will end with the presentation of an important but tragic event," said Wharton senior Ray Caucci.

The keynote speaker will be Bruce Viadish, president of the United Hospital Medical Center, who will speak on the advancement of medical care.

Unfortunately, this production of Before Sunrise was interrupted by a series of problem solved by the researchers, and the solution was found.

"People can walk by here and think about the things that are so important. The researchers are not only solving problems, but they are also trying to find a cure," said one of the researchers.

It takes many different talents, many different specialties, many different backgrounds to make up a complete retail team.

It's not all razzle dazzle. It's not all color accent and the hardest job is not from the water. Merchandising is an art, yes but it's also big business.

Minority groups assail Wharton student's arrest

The strength of Blood Knot lies in the theme, immediate impact that Fugard, and Moshe's Zack conveys. The play is a political statement on the importance of education and the need for individuals to stand up for their rights. It deals with themes of oppression, violence, and the need for unity and understanding between different cultures and backgrounds. Blood Knot is a play that challenges the audience to think critically about the issues it presents and to consider their own role in creating a more just and equitable world.

Freshmen end season at Cornell

BY JON VON DEHLIN

The Penn women's tennis team, which lost its match at Princeton, saw its season come to an end in mid-November. The Red's season was over, and it had not been a good one. The team was not happy with the way it had performed, and it was looking forward to next year. The Red's season was over, and it had not been a good one. The team was not happy with the way it had performed, and it was looking forward to next year.

Soccer concludes campaign at Harvard tomorrow

Continued from back page

the Quakers will try to pick up where they left off last year, when they lost to Cornell in the Ivy tourney, and a similar run this year.

McDougald is a freshman who played most of the season on the outside, and his style of play is similar to that of the Quakers' regular starters. He is a solid, hard-hitting player who is a threat to score goals. He is also a good passer, and he has the ability to create chances for his teammates. In his first season, he scored five goals and assisted on three others.

The Quakers' offense is improved, and they have the ability to create chances for their players. They are a team that is willing to work hard and play well together. They have the ability to score goals, and they are a team that is willing to compete. They are a team that is willing to work hard and play well together. They have the ability to score goals, and they are a team that is willing to compete. They are a team that is willing to work hard and play well together. They have the ability to score goals, and they are a team that is willing to compete.
Soccer faces Crimson in final match

By MARK BENDERHOF

The Penn soccer team moved its loyal fans one step closer to the Ivy League championship with a 2-1 win over the Tigers Saturday afternoon at Karcher Stadium. The win moves the Quakers into a tie for second place in the Ivy League, and guarantees the team a favorable seed in the upcoming post season tournament.

The Tigers will have a hard time matching the Quakers' record breaking season. In a sharp contrast to Penn, who have won 11 games against one loss, Princeton, who have four losses, is having a tough time getting their season started. Princeton has lost four games in a row and are looking for their first victory against a team with a winning record.

However, Princeton will not be an easy foe for the Quakers. Penn and the Tigers are tied for the Ivy League lead, and Princeton is a tough team to beat. The Quakers will have to be at their best to beat Princeton, and will have to play a strong game to keep their chances of a championship alive.

The Ivy League tournament begins in just a few weeks, and the Quakers will have to be on top of their game to make a deep run. The team is confident in their ability to win, but they know that they will have to play their best if they want to make it to the NCAA tournament.

The Quakers hope to paste Colgate

By ANNE MADDEN

In the wake of the women's basketball team's last game for its fourth straight, ten-game winning streak, the辗on of the women's swimming and diving team's last game for its fourth straight, ten-game winning streak, the

final match seem to be ending the same way for the Quakers. John Fletcher (9) fights for the ball against Temple Saturday, October 21 at the Palestra. Fletcher was fouled, and Temple was awarded a free throw. Temple won the game 74-69.

Fletcher was one of only four Quakers to score in the game. Fletcher scored 19 points, and the team's leading scorer, Dolores Davis, scored 10 points. The team's other leading scorer, Tina Scott, scored 9 points. The Quakers' total score was 69, while Temple's was 74.

The Quakers' season started off with a 67-63 loss to Temple, but they have since won six straight games. They have scored a combined total of 352 points, and have only allowed 307 points. They are currently ranked 12th in the nation in the Associated Press poll.

The Quakers' next game is against Temple on Saturday, November 4. They are looking forward to the game, and are confident in their ability to beat Temple.

Volleyball plays D.C. tourney

Quakers face Terps, Colonials in Coca-Cola Classic

By BILL BROWN

When do they mean when they call it a "classic" tournament? The Coca-Cola Classic? Do they mean that only Classic Coke will be sold by the contestants? That their opponents are sponsored by Coca-Cola? That the New Coke is being phased out? That the Committee is in a competitive spirit even though the Cherry Coke Tournament of Champions is about to end? Or that the players participate in a tournament that is the closest thing to a high-stakes game?

No, no, no, no, no, no. Their approach is the same as in the previous three years. "We're going to go in there and have one of our best games," said Quaker coach Joe Sagula, a former coach of the Quakers. "It's a classic tournament, it's a classic game, it's a classic victory for the Quakers."

Sagula has won four games in the Coca-Cola Classic over the past three years — a couple of concertos for the Quakers. Because a strong performance will mean that the team can move up in the rankings, the Quakers will have to play well in order to be successful.

Looking at the records of George Washington and Maryland against common opponents, Penn seems to match up evenly if not favorably. Maryland lost to Princeton, 3-1, while Penn beat the Tigers in five games. George Washington took five games to defeat Temple, while the Quakers beat the Owls in four.

Jim Cross said, "This tournament is not unimportant, but it's not a major thing in our mind. We are really going for the final push for the Ivy League." While it is common knowledge that the team's major goal is to win the Ivy League Championship from Princeton, the Quakers have a chance to win the tournament if they play well.

The Quakers face the Terps and Colonials in the Coca-Cola Classic this weekend. The Terps are the top team in the Ivy League, and the Colonials are the top team in the country. If the Quakers can beat these teams, they will have a strong chance of winning the tournament.

DP Swamis

It was only a routine checkup, Dr. Dobbs pointed out, that the Swamis trip to the dentist this week turned out to be a wake-up call to the entire team. The Swamis were not aware of the seriousness of their dental problems until they were examined by the dentist.

"It's true, there is much more to a checkup than just getting your teeth cleaned," Dr. Dobbs explained. "We were surprised to find that the Swamis had not been to the dentist in over a year."

"We were alarmed by the results," Dr. Dobbs continued. "The Swamis had cavities, gum disease, and even a few missing teeth."

"We couldn't believe our findings," Dr. Dobbs said. "The Swamis had been living in their own bubble, never realizing the extent of their dental problems."

The Swamis were shocked by the news and decided to take Dr. Dobbs' advice seriously. They made an appointment to see the dentist and set up a plan to improve their oral hygiene.

"We're taking this very seriously," Dr. Dobbs said. "The Swamis are committed to improving their oral health and making sure that these problems do not return."
