NIH officials speak on animal research

By ROBERT PAPAZ
National, treasurer and past president of the Philadelphia chapter of the American Society for Ethical Treatment of Animals, said he was appalled to learn this week that the U.S. government has renewed its Contract for Animal Use with the University of Pennsylvania, which involves a series of experiments on vertebrate animals. The contract, which renewes NIH's financial support for the university's research work, was signed by former President Richard Nixon in 1972. It expires in 1984.

Director Karen Flaster said yesterday that the university is committed to respecting federal guidelines and regulations. "We are fully aware of the responsibility of enforcing those policies," she said, "and we are working to ensure that the research conducted at the university is in accordance with all applicable federal laws, regulations and guidelines for animal experimentation."

But back said that the NIH's consent "is not the only protection" because of third parties expressing opposition to the research. "According to the NIH's regulations, the responsible official is the principal investigator. In this case, the principal investigator is the University of Pennsylvania," he said. "It's up to the University of Pennsylvania to ensure that the research conducted at the university is in accordance with all applicable federal laws, regulations and guidelines for animal experimentation."

Raub reviewed the history of the NIH and federal regulations on laboratory animal research. He said that, because of federal guidelines for laboratory animals and the federal government's commitment to the welfare of laboratory animals, there is a high degree of voluntary compliance in this area. He said that the NIH's regulations are designed to ensure that research conducted at the university is in accordance with all applicable federal laws, regulations and guidelines for animal experimentation."

Students in Quad complaining about cleaning services

Students in Quad have complained about the cleaning services provided by the Maintenance Department. They have reported that the bathrooms are frequently dirty and that the cleaning staff is not consistently cleaning the facilities. The students have also reported that the maintenance staff is not always available when needed.

The students have requested improved cleaning services and more frequent inspections. They have also suggested that the Maintenance Department increase the number of cleaning personnel and improve the quality of the cleaning materials.

The Maintenance Department has acknowledged the need for improved cleaning services and has promised to increase the number of cleaning personnel and improve the quality of the cleaning materials. They have also promised to conduct more frequent inspections to ensure that the cleaning services meet the students' expectations.
Draft of Communist program encourages religious tolerance

Hugging is contagious at local U.

Tony Brown visits Drexel University

Tony Brown, hair and executive producer of the award-winning television mini-series, "Tony Brown's Journey," is known for his successful talk show and is invited to speak about his contributions to the black community.

Tony Brown 

Brown will speak on "Black History Month: Making the connections between history and the present" at the Center City YMCA. For information, call 610-965-3200.

Run by Patty Arkin

Hugs are contagious at Hahnemann University today as graduates spread Valentine's Day spirit.

Students are selling huggers which raise money for "The Soul Project," an organization that is responsible for the sale.

1,440-page report, which is required of a girl raped by a boy she was beginning a relationship with. Although the incident involved a minor, it was still considered a rape.

The draft party document also appears to give support to the co-located LiberationTeen in Latin America in which Catholcans and Marxists are viewed as mutually recognizing.

The 187-page document, which has not been made public, will receive final approval at a special party congress in December after debate at the grassroots level.

The draft was prepared by the party hierarchy for a Communist congress last week, and copies have been distributed to the congress.

"Within the party's policy of encouraging national unity, there is no room for discrimination against religious minorities. Instead, they should be encouraged to participate voluntarily and promoted in offices and patronage in the communist party.

This is the second time the party has issued a policy statement that would encourage religious minorities to participate in the party's work.

The proposed policy is consistent with what appears to be a strategic effort by the government to improve its relations with the long-suffering Catholic community, whose leaders often have considered themselves to be outside the Cuban mainstream.

There are now estimated to be 210 priests in Cuba compared with a pre-Castro revolutionary total of more than 800. Catholic aid activities have been severely limited, and the more tolerate attitude was evidenced in the December 1985 release of Father Padre David Cardell with hold a Western Broadcasting license, Penn State, the 179-page book has been Cuba's best seller ever, according to the U.S.

In an effort to aid these communities, the Philadelphia Anti-Rape and Voyage House, two Philadelphia organizations that help victims of sexual assault, collaborated in the production of an educational comic book as part of the Philadelphia Sex Education Action Plan.

Deborah Lipsky

The program's coordinators said the comic book's approach is needed by adolescents who find it difficult to talk about sexual assault.

Among the conclusions were:
- The Soviet Union has shown no change in the way it handled the legal proceedings of people arrested on criticism of the communist leaders.
- The armed forces of El Salvador, fighting against leftist guerrillas, have "evidence to conduct their actions in a humanitarian manner.
- However, lack of civilian leadership by government forces continues and the military is still able to control the tide of public opinion.

In Spain, civil rights and police brutality continue to be serious problems. Use of arbitrary arrests, torture, and internment and internal exile by the military are not stopping, and serious human rights abuses continue.

In the Philippines, the military is still in control of the government, and although there have been efforts to improve the situation, serious human rights abuses continue.

In an interview with the New York Times, the government said it had received the results of a U.S. State Department report on human rights abuses in the Philippines, and that the military had taken steps to address the issue.

DEA cocaine report

WASHINGTON — The State Department said it is now aware of human rights cases that were not previously known to it.

The report says there have been some "positive developments." However, the report states that the government of the Philippines has not offered any assistance to any of the victims.

"Philippine newspapers now freely print even very harsh criticisms of the government. However, there were five threats to block any international investigation of the cases described in the report," according to the Philippine National Police.

Dr. Erwin Fisher is in front of oxygen equipment at Central City Toyota. Dr. Fisher is the Automotive Engineer for Business and Sales at the dealership. He works with the sales and service department to ensure that the oxygen treatments are running smoothly. Dr. Fisher has developed a method to test the oxygen treatments using a mathematical model. This model allows statisticians to determine the effectiveness of the treatments. Dr. Fisher has been working on this project for several years and has published his findings in several scientific journals. He is currently working on a new project that involves the use of artificial intelligence to improve the accuracy of the oxygen treatments. Dr. Fisher is a member of the National Academy of Sciences and has received numerous awards for his work in the field of oxygen treatments.

Twins part of heart study

By LISA S. SAVIT

Research involving twins and their families may be the latest approach to finding a cure for heart disease. Nursing School faculty and doctoral students have been involved in a new program investigating heart disease risk factors.

"By looking at physical and psychosocial factors we can make a contribution to understanding some of the causes of heart disease," Assistant Nursing Professor and research consultant Lisa Savit said. "It's only been in the last five years that studies have been done on twins and heart disease."

"It's only been in the last five years that studies have been done on twins and heart disease."

Dr. Savit is a member of the cutting-edge laboratory research in heart disease risk factors. Her research is focused on providing laboratory information to the families of the twins. "The project has provided the legal community with significant cross disciplinary information about the patients."

"The finished work was the 'Workshop Digest of Justinian,'" Watson explained. "It was the largest legal collection of Roman material and is the basis of all Western legal systems."

"It was the one most heavily studied." Watson said.

"It's only been in the last five years that studies have been done on twins and heart disease."

Dr. Savit said that the study is the first of its kind to investigate heart disease risk factors in twins. "It's only been in the last five years that studies have been done on twins and heart disease."

"The aim of the study is to determine how much of this can be attributed to genetics and much stem from a child's environmental situation," Watson said.

Campus Events

A listing of University news and events

NOTICE

EVENTS as of noon 2/15/86

Lecture by Robert C. Altevers, Dean of the University of Chicago Law School. 4:30 p.m. Thursday, 2/19/86, 371 South Building.

TOMORROW

3611 Locust and Locusi starting 10 pm at Penn will be held Friday, Feb 14th in the Christian Association.

FUTURE

TERTULIA SI Ouieres hacer services at Hillel 5 15 reform services at 7:30 pm and 9:30 pm this Thursday. 2/19/86. To be held in the lobby of the University Center. This Friday 2/21/86. Special meeting to discuss Spring Orientation deadline. Details see CPPS files.

OFFICIAL

The ladies of Alpha Phi Omega are looking for members. Meet them this Thursday 2/19/86 at 8 pm.

TODAY

COME MEET STUDENT services for the University at 3 p.m. in the University Center, Room 250. This meeting will feature presentations by many agencies and services available on campus. All University students wanted. Free refreshments provided.

Guided tours of the University this Thursday 2/19/86 at 3 p.m. in the University Center, Room 250. The tours will begin in the lobby of the University Center. There will be tours to the School of Engineering and Applied Science, the School of Arts and Sciences, the School of Nursing, the School of Medicine, and the School of Dental Medicine.

LA CASA ITALIANA SI invita a prepararla cena de San Valentín, 7 p.m., Thursday, 2/19/86, 1230 Locust Walk. Information and reservations call 386-3697.

LZIA ISRAEL TODAY! An Inside Look at the Palestinian Struggle for Freedom, Wednesday, 2/18/86, 8 pm in the People's Union Building, Room 201.

ISRAEL TODAY! Your chance to hear the newest information about Israel and our people. Wednesday, 2/18/86, 8 pm in the People's Union Building, Room 201.

MUSEUM STUDENTS ASSOCIATION sponsors coffee-house early in March. Call Michael or Patti for information. 387-3640.

REFORM JEWISH CONGREGATION holds special meeting this Thursday 2/19/86 at 6 p.m. in the Student Union. The meeting will feature a discussion on the need for Jewish involvement in the Black community.

SHABBAT SHALOM Friday, 2/19/86, 6 pm. Friday night shabbat dinner at 6 pm followed by Shabbat services at 7 pm. Everyone is invited. Buffet-style dinner. twisted and braided Challah bread. Offertory by Mr. Vincent F. Hennessey.

TENTATIVE! Quinn Library hosts a screening of "The Man with the Iron Heart" on Thursday, 2/19/86, 9 pm. Quinn Library is located on the ground floor of the library building. All are welcome.

VALENTINE'S DAY Dinner and dance will be held Friday, 2/20/86 in the Senior Center Ballroom of the University Center. The dinner will begin at 6 pm and the dance will start at 7 pm. Tickets are $4 for singles and $6 for couples. For reservations call 387-3676.

Wednesday, 2/19/86, 5 pm in the Student Union. The meeting will feature a discussion on the need for Jewish involvement in the Black community.

WEDNESDAY, 2/19/86, 5 pm in the Student Union. The meeting will feature a discussion on the need for Jewish involvement in the Black community.

PSA sponsoring V-Day hotel hideaway special

Penn Student Agency's travel department is sponsoring a V-Day hotel hideaway special at the Warwick Hotel this Valentine's Day.

The Warwick Hotel is offering a package that includes a night at the hotel with a complimentary bottle of champagne, and a ten dollar value for food or drinks in bed, according to the hotel's marketing manager Judy Choe.

Warwick Hotel director Lynn Edwards said that the rooms that will be rented usually start at $125 for a double room. The package is included in the Warwick Hotel's business services, VCR and movie rental and admission for all guests to the exclusive Night club.

There is no minimum age requirement for renting a room, and Chang said that the champagne offered is "courtesy of the hotel — it's all part of the package." Barbara Edwards said that the hotel will continue to offer an age requirement. Guests must be twenty-one to be admitted to the hotel.

They are quite strict about adherence and age on all rates.

Student opinions on the event vary.

"It seems like a nice, romantic idea for couples on Valentine's Day," said a college junior. "It's a little too expensive for me." She added, "I'm cheaper than a pint." Chang said.

"It's the only way I can afford to have a V-Day party." Chang said.

"It's a good idea," said a college sophomore. "It's a way to get away from people." Chang said.

"We're trying to emphasize that this is a meeting in celebration of gay and lesbian campus community, not just those who are actively involved with LGAP," he explained.

Three students chosen as Thouron recipients

By DANIEL ZIMMERMAN

From The Award Thouron recipients were chosen last weekend during a day-long selection process that was held at the University of Pennsylvania, in Philadelphia. The Thouron Program Office, under the direction of Geoffrey Thouron, announced the winners at a news conference yesterday.

Three students were chosen from a pool of over 100 candidates. Two were U.S. students, and one was a foreign student.

The process began with a committee of five members who were appointed by President Sheldon Hackney. This year's committee, chaired by Medical School professor and former Provost Julian Gee, was composed of two Trustees, John "Tiger" Thouron and Jane Raub, a School of Nursing professor and former Provost, and John "Tiger" Thouron and Jane Raub, a School of Nursing professor and former Provost.

The winners were chosen by a committee whose members are approved annually by the University of Pennsylvania's Provost. The committee's decisions are final, and the University of Pennsylvania's Provost has no input in the selection process.

The Thouron recipients were chosen last weekend during a day-long selection process held at the University of Pennsylvania's School of Business. The purpose of the fund is to provide financial assistance to students who will be good ambassadors for the University of Pennsylvania.

Battle of the Sexes

Initiator Writes on

Her View of Penn

To the Editor:

Regarding your article "Battle of the Sexes" (3/6), I am the one who started this battle of the sexes. I must confess that I was somewhat surprised when I read the article. Here is my point of view.

When I was a student here at Penn, I was very much concerned with campus security. I am sure that many other students felt the same way.

I am writing in response to Jan's letter, "Letters to the Editor" (2/18). I am very surprised to read that Jan believes that the campus community is not concerned about campus safety.

I am concerned because I have seen firsthand the dangers that can arise from poor campus security. I have witnessed incidents where students have been injured or harmed because of inadequate security measures.

I believe that it is important to communicate our concerns about campus safety to the university administration. I hope that the university will take our concerns seriously and take action to improve campus security.

Sincerely,

[Student's Name]

Letters to the Editor

Merton Letter

Blasted as Being Homophobic

To the Editor:

I am deeply concerned about the recent letter by a professor who accused the author of a previous letter of being homophobic. The accusation was made without any evidence or evidence of understanding the context in which the letter was written.

I believe that it is important to address this issue because it raises important questions about the treatment of gay and lesbian students at Penn. It is imperative that we create an environment where all students, regardless of sexual orientation, feel safe and supported.

I urge the university to take action to ensure that all students are treated fairly and respectfully. I believe that this is essential for the well-being of all students and for the future success of the university.

Sincerely,

[Student's Name]
Mia, Will you be my Valentine? I love you.

Hey, Happy Valentine’s Day! I love you.

 replies to be without a pony!

Tiger (Ha, Ha), Dear Paul, Iris, Tim & Chris.

Mike K., Jeff K., Mark K., Hey Babes! You’re my Babes Happy V Day

Chris Sakuma. I love you but I am too shy to tell you. Please look for me.

Giberto, Sarily about the men — I know I stop saying SOMRY HAPPY VALENTINE DAY

- Velo

Galagher’s Steak House!!

DEPRESERELY SEEKING TURDOY: To one so special and so dear, it would be too hot, to have you near — but Happy V-Day, and although you’re still close by within my heart, Happy Valentine’s Day All my love, D.

- Velo

P.S. J.E.,

Next year, you’ll be the reason I won’t stay at work all night doing this. I can’t wait. I LOVE YOU. — EDJ

Rey Napolitano, I love you! — PARANIZNO

Paddy, You’re my one and only exalted Happy Valentine’s Day The Love of my Life

Peter, Thanks for all of the love and effort you put into this issue, she couldn’t have done it without you. Happy Valentine’s Day — the OF the gang

P.S. I love you, Kevin M. I hope the Germans appreciated those gorgeous blue eyes! Glad to see you’re back.

An Addressee

DEAR LEWIS (Kool), You’re the best BOSS, Better than Springsteen, better than the Mohe, Better than God Himself. But we still love you! Love, Adam

Dear Kent, Happy Valentine’s Day BEAST! And thanks for this weekend. Love, Julia

Dear Abby, I love you always, Love, Scott

To Monica, My only Valentine and most favorite cat. Happy Valentine’s Day With love, Adam

Tigerbay — (September) The one who sends you can hold on.

To my old mates Dan, Pat and Seth, with love. — Adam

Angel Rose

Bunny Hunches, too, I love you. — J.C.

Mich. I’LL love you. Get payed up! AFLLAUR

Little "D" I Love You

SARA, I love you. — CURTIS

SARAH, I love you.

Lori W. Although I’m more comfortable worried about you. I feel free, and able to love.

OBSESSED!

Love, Mike

Jen, I love YOU Pat

Your Penn Sweethearts

Love, Scooter

To Dear Kenny, Happy 79th V. Day. I love you.

To Ryan, I love you. — J.R. & K.L.

To the Beautiful One in my History 308 Happy Valentine’s Day

Sandy, I miss you big time. Happy Valentine’s Day!!! Love, Meg

J.E., I’m truly not as much. If you’ll get to know me better you’ll find I’m more the sensitive, Alan Alda.

C.C. Gently, and without any Coaxilitation or other aggravation, — R.
Dearest Michelle,
With all the problems, we've still made it this far. I'm sure it will last long enough. I'll always love you, Michael.
Ending Abuse

U. students help fight drug problems at high school

By RUH COHEN

Project Mantua is getting the university to high school with a program designed to end substance abuse among high school students.

The project, named after the West Philadelphia area where it is located, will address a variety of problems at the school with programs such as academic tutoring, counseling and orientation of historic buildings.

Project Director Herman Wine, a social work student at the Wharton School's Beach Center, said many high school problems are caused by a lack of professional help.

"It's need, neglect and misunderstanding that's created those problems," said Wine, a University student.

Wine also said he plans to use the high school as a model, eventually expanding Project Mantua into other area high schools.

"We're starting at University City High School and it's spreading," he said. "The people are asking for it." Wine said he would like to see the relationship between the university and the high school grow closer.

"Even though there are two universities within four blocks of where they go to school, they fail to understand that the university and the high school faculty can be reached by a hands across the border approach by both students and faculty." he said.

"I'm most impressed with (President Sheldon Hackney's) approach," he said. "He's done a great deal about setting the tone for this University to extend itself to the city. I think the administration has to extend itself beyond the borders of Penn and educate the high school in their approach." Project Mantua volunteer Rob Ducette, a Lincoln College graduate student, said, nevertheless, that the program's unique approach allows students to design solutions to the high school's problems.

"They would like a more active voice in the problems of the school," he said. "The other aspect of the program is to go directly to the people (students) - the faculty, the administration, the students and the community."

"It's always an ongoing process," Ducette said. "We are not waiting for someone to say what needs would be - it's eliminate the drug problem - and out of (that) come other programs, like tutoring, eliminating graffiti (and) improving the school's appearance."

Ducette also said he feels the program is expanding.

"The goal is to reduce substance abuse, but what we have discovered is that there are so many symptoms of substance abuse that it's hard to identify one cause and feel that the environment of the high school's problems can be eliminated by something to do with it."

"The school students in the group created a need for tutoring and helped identify areas where it was needed," he added.

Ducette, who is a substance abuse counselor for the program, said much of the high school's difficulties come from the school system as a whole.

"It's a reflection of my school," he added. "The people that are from the community and the students going on to college."

"Ultimately, this borders on teenage pregnancy," said Martin, adding that the program has mushroomed.

"One barometer that we saw was the absence of vandalism (and) improving the relationship between the University and the high school. That helps you by opening up your mind to what is being taught."

"It's obvious that the professionals haven't faced a solution," he said. "In my opinion, the problem is that the school system as a whole is not addressing the real needs of the students.

"The students aren't able to identify with what they are being taught in school."

"A teacher tells them they have to read Macbeth," he added. "You sell me a kid an economic and socially deprived environment can forget that he is having food and clothing and a roof over his head and problem with standardized curriculums that don't take the student's problems into account."

"The students need to see it through their own eyes."

"The program did not have both large and small successes."

"The students have learned that one student in the program stopped a robbery while it was happening in school," he said, adding that the student did not believe he would have occurred before the program's intervention. "It's a reflection of our school, he said. "We're not gonna to stand for it."

According to University City High School Principal David Martin, the philosophy of Project Mantua is simple.

"Whatever we're really trying to do is to create a sense of 'belonging,'" he said. "This is a 'belonging' program. We want to deal with that.

Martin also said the program addresses a broad spectrum of problems.

"As you work on improving drops, you improve the graffiti problem, you improve the discipline problem and you improve the number of students coming to college," he said.

"Ultimately, this borders on teenage pregnancy."

"The interaction between the University and the high school is beneficial to both parties, according to Martin. "I'm very representative of the vice principal," he added. "We make ourselves better."

"It turns out we are a symbiotic relationship," he added. Wharton senior Jason Magidson said he spends up to 15 hours a week on Project Mantua, adding that the work fits right into his studies.

"I'm taking courses in the social sciences and the business division off the Wharton school," he said. "The core of the program is planning - the idea is to provide community assistance and help them plus for themselves. Wherever as a resource to the high school students, Magidson said and his tutor student have been important to the project, especially those of University students outside of the University.

"We're going to be in touch with students with a different background from the average Penn student," he said. "That helps you open up your point of view."

"I was aware of (he neglect. "I wasn't aware of the area they mop and wax the floor, but I never thought they would clean up the halls. Ihe bathrooms were also cleaned. However, we are concerned about is that the convention center will bring thousands of visitors to the market," he said.

Although Gardiner said he is not sure if customers will clutter up the aisles of the market without buying much and will scare away their regular customers, he feels he can adjust to the change.

"We have to have overtime employees," he continued. "I don't think we will be able to meet their expectations on our food, and we're concerned about the Abduction causes real problems," he said. "We have had people complain in the past about the cleanliness of our food, and we have noticed that it has been reduced," he added. "We'll be working on that."
Look for it February 25 in The Daily Pennsylvanian.
The Penn women's squash team will pull up a few players on the team, and will have a few more matches. "We're really excited about getting some good matches," said Davis. "The team is really starting to come together as a team, and we're really starting to win a few matches."

The match will be a good test for Penn, and the players are looking forward to it. "We're really excited to see how we do," said Davis. "The team is really starting to come together as a team, and we're really starting to win a few matches."

Fencers in Minneapolis

(Continued from back page)

had our first good time since the season started. "Because of her special experience (epee)," Minchak said, "I feel that Linda has a very good chance to do well this weekend." Last season, Penn fencers finished very high at the National Championships. They captured three of the top eight positions. Senior Mary Jane O'Neill finished second, Hall came in sixth and tied for eighth. As a result of their strong performance of the fencers, it is very tough competition will make it very difficult to make any predictions.

"It is hard to say who will break through the season," Minchak said. "Also, out of this top half a dozen fencers you won't know who is going to come on top. Someone like the High School seniors (Evelyn (Penn, Mon.) could be a big surprise." The outcome this weekend is pretty much up to the air, except for the fact the Quaker fencers are planning on doing well as well as last year. However, winning is not the only reason these senior Penn fencers are planning on doing well. Their journey trip out to Minnesota.

Wrestler

(Continued from back page)

"This will be a changeover for the fencers, because it will be a different format," Minchak said. "Since we have the regional and nationals coming up, it's good that they get to use an event more apparent in the U. S. match that they are used to having." To all valentine's cupids who sold, typed, coded, cut, pasted and proofread: Thank you. Thank you. Thank you.

Hey Stace! Thanks for my Jan. sick leave. Hugs & kisses to the best staff, mi novio J.R., the Szeae, GKNee, 3 & 4 Brooks - Leidy & Hi to Mark and even you, Mr. Fleece.

Robyn-Prod.

Penn students are on the move. Now is the time of year when over 10,000 students are looking for off-campus housing for the next academic year. They will rent homes throughout Philadelphia, and they will need to furnish them. The Guide to Off-Campus Living gives landlords and retailers the chance to reach this targeted group of consumers during the height of apartment and house-hunting season.

The Daily Pennsylvanian
Quakers play Dartmouth, Harvard

(Continued from back page)

The team, however, is still looking for its first Ivy league win. Sophomore "Wizardry," wounded in the right leg earlier in the season, will return to action in a limited capacity.

Randall, last year's Ivy Player of the Year, scored more points, pulled more rebounds than any player on the Dartmouth roster last season. He also led Dartmouth in steals and minutes played. He was the only Dartmouth player with five driving and passing.

Randall's type of player, "...that is to push the ball up the floor, from corner to corner, ...And we're just going to have to have him get back on defense and stop his generation because that's what he can really do the best."

Kilroy is a 6-4, 185-pound forward who averages 11.2 points and 8.9 rebounds per game. He is also the league's most versatile player, topping all players with 114 assists.

Kilroy hurt us more here last year. Stovall, who has been a key player all season long, has been a key player all season long. They're gonna be kind of a surprise to a lot of people. They're gonna be kind of a surprise to a lot of people.

Over the last few games, Kilroy's shooting percentage has increased from 42% to 60%. This has led to increased confidence and a noticeable improvement in his play.

Stovall said, "...We're just going to have to be more on the outside. We're just going to have to be more on the outside. We're just going to have to be more on the outside.

Edelman-Murphy explained, "...There are four teams ahead of us right now. Stovall said. "...They're gonna be kind of a surprise to a lot of people. They're gonna be kind of a surprise to a lot of people."
Wrestler slashed in Harvard Square last weekend after meet

BY THOMAS HILL

A wrestler of the Penn wrestling team was slashed on the head, face, and leg during an altercation in Harvard Square last night in Cambridge, Mass. The team had come from Boston to compete at Dartmouth.

The wrestler, junior Otisfield Embree, was assaulted in Harvard Square at approximately 11:30 p.m. on Saturday. According to reports, the suspect, James Barry of Boston, was arrested at the police department, the fourth person to be arrested at police stations in Cambridge in the past week.

Embree was slashed in the face and head by a group of men, who fled the scene. He was rushed to the hospital, where he received stitches to his head and leg.

Meanwhile, Embree told the reporters that he had been drinking in the bar, and that he was uninvolved in the altercation. Embree said that the incident occurred after a group of men entered the bar, and began to fight. Embree, who was in the bar at the time, was slashed in the face and head by the group.

The incident is under investigation by the police department.

Harvard and Dartmouth bring identical 7-2 marks into this Saturday's showdown, which will decide who is Ivy champion.

"It is really close," head coach Janet Cantwell said. "We have to play our best game of the year to win.

Harvard, led by the nation's leading scorer, Jim Barton, is currently 7-2 in the Ivy League, while Dartmouth, led by the Ivy League's leading scorer, John Macka, is also 7-2.

The Quakers have not won a game in the Ivy League since 1984, and are looking to end their losing streak against the Big Green.

Meanwhile, Dartmouth is coming off a 61-54 win over Penn last weekend, and is looking to improve their record to 7-2 in the Ivy League.

The game is scheduled to tip off at 8 p.m., and will be held at Harvard University.
