Alumni Council endorses dry rush for next year

It’s generally interpreted as inappropriate that there is drinking during rush, but we support the idea of organizing an alcohol-free environment to propose strategies for implementation and enforcement. We also support the implementation of the IFAC, OFSA, and the University Life Office, with plans to present to various administrative and student groups.

"They will all have an opportunity to present our issues," Arnold said. "Everyone will get a chance to speak from their own perspective and have their voice heard." A formal policy will probably not be adopted until early next semester, Arnold said, adding that "the administration that last spring I think that’s all." Formally, the IFAC resolution is only the first step in a plan for dry rush, according to Pakradooni and Security Affairs Director Bruce Arnold.

"This is no small undertaking," Arnold said yesterday, explaining that the resolution is intended to organize an alcohol-free environment to propose strategies for implementation and enforcement.

The Interfraternity Alumni Council unanimously passed a resolution Wednesday night endorsing dry rush. The resolution will go to the administration and the University Life Office, with plans to present to various administrative and student groups.

"They will all have an opportunity to present their issues," Arnold said. "Everyone will get a chance to speak from their own perspective and have their voice heard." It can be assumed that there will be a long process towards adopting a non-alcohol recruitment policy, according to Pakradooni and Security Affairs Director Bruce Arnold.

"It is generally interpreted as inappropriate that there is drinking during rush," he said, adding that "the resolution is intended to organize an alcohol-free environment to propose strategies for implementation and enforcement."

The image of fraternities will be enhanced by the dry rush policy, Pakradooni also said that the IFAC believes a national package will allow a greater number of high quality rushees, and improve the image of fraternities. The IFAC statement reads that dry rush "will act as a counter to a greater number of high quality rushees, and improve the image of fraternities."

Soyinka is the first African to win award

NEW YORK — Cancer has long been identified as one of the deadliest diseases, causing the death of hundreds of thousands of people each year. However, recent advancements in cancer research have brought hope to those affected by this disease. In this article, we explore some of the latest developments in cancer research, including new approaches to treatment and potential breakthroughs in understanding the disease.

相传妙的癌症

Cancer Research: New Approaches and Breakthroughs

随着医学领域的不断进步，癌症的治疗和研究也取得了重大进展。在这篇文章中，我们将介绍一些最新的癌症研究进展，包括新治疗方法的出现和对疾病的潜在突破。

1. 世界癌症日

每年的2月4日是世界癌症日，这一天全球各地都会举办各种活动，以提高公众对癌症的认识，呼吁人们关注和支持癌症研究。癌症是全球范围内的重大健康问题，每年有数百万人因癌症而失去生命。

2. 新的治疗方法

近年来，癌症的治疗方法有了显著的改进。传统的治疗方法，如手术、放疗和化疗，仍然是常用的治疗手段，但随着科学研究的深入，新的治疗方法开始出现。

3. 基因治疗

基因治疗是一种利用基因技术来治疗癌症的方法。通过改变癌细胞的基因，使其停止生长和扩散，以达到治疗的目的。

4. 免疫治疗

免疫治疗是利用人体自身的免疫系统来对抗癌症。这种方法利用抗体和其他免疫分子来识别和攻击癌细胞。

5. 靶向治疗

靶向治疗是根据癌细胞的特定基因来开发的药物，它能够针对癌细胞的弱点，避免对正常细胞的伤害。

6. 人工智能和大数据

近年来，人工智能和大数据在癌症研究中发挥了重要作用。通过分析大量的基因组数据，研究人员可以更好地了解癌症的发病机制，进而开发出更有效的治疗方法。

结论

癌症研究的进展为患者带来了希望，但仍然有许多挑战需要克服。我们需要更多的资金和资源来支持癌症研究，以便能够尽快找到治愈癌症的方法。同时，公众也需要提高对癌症的认识，积极参与各种癌症预防和治疗的活动。通过共同努力，我们一定能够战胜癌症这一全球性挑战。
Landmark study by U. prof shows relation between crime and drugs

By BETT BERNARD

Marvin Wolfgang has spent the majority of his life involved in crime, but not all of it. The Criminology professor recently completed a study which he believes indicates that there is a correlation between the number of violent crimes committed in Philadelphia and increased excitement among the bulldogs in its vicinity.

Wolfgang, who has served as a consultant to many legislation and governmental committees, has long worked with bulldogs as natural models of chronic offenders. "They helped to launch a program in about 100 jurisdictions including Philadelphia to solve or engage in focused observation and prosecution of chronic offenders," he explained.

In the study, Wolfgang and his colleague, the Belle Center for Studies in Crime and Justice, used bulldogs to observe and prosecute violent crime in Philadelphia between the ages of 10 and 13,000. The study was sponsored to many legislators and judiciary committees, said last week. They helped to launch a program in about 100 jurisdictions including Philadelphia to solve or engage in focused observation and prosecution of chronic offenders," he explained.

"I think that federal efforts to reduce the proportion of drug use might be effective," he explained. "But the crackdown on drug trafficking has never had much of a significant impact except for a short period of time," he continued, adding that the government should continue its efforts on improving the implementation of methodology, and in the future, it could be more effective." Wolfgang emphasized that the program was not a cure-all for the field of criminology, offering it as "the foremost, not the original." "I think that federal efforts to reduce the proportion of drug use might be effective," he explained. "But the crackdown on drug trafficking has never had much of a significant impact except for a short period of time," he continued, adding that the government should continue its efforts on improving the implementation of methodology, and in the future, it could be more effective.

"The bulldogs are a natural model for our studies, because it is a natural animal on which they can base their research," he said. "The English bulldog is a great model, so we have them do something, and then do another. The bulldogs have been doing what we do for years, and they do it better." Wolfgang added that bulldogs do sleep apnea, and so do the humans, "instead of their nights gasping for life. The bulldogs are just like us, but they have sleep apnea," he said.

"We had to have been born in Philadelphia between the ages of 10 and 13. The bulldogs were selected at random from different socio-economic backgrounds and sections of Philadelphia. "In the first cohort, there was only one drug arrest out of 10,000," he added. "The drug culture had not hit Philadelphia." He pointed out that national, surveys show that overall drug use is now decreasing, but information and education have increased among young people.

"They helped to launch a program in about 100 jurisdictions including Philadelphia to solve or engage in focused observation and prosecution of chronic offenders," he explained. "I think that federal efforts to reduce the proportion of drug use might be effective," he explained. "But the crackdown on drug trafficking has never had much of a significant impact except for a short period of time," he continued, adding that the government should continue its efforts on improving the implementation of methodology, and in the future, it could be more effective.

THE DAILY PENNSYLVANIAN - Eridus. OftttH It, l«MM»

By DAVID LASKO

Several people at the University are highly being paid to watch sleeping dogs. The people from various departments at the Hospital of the University of Pennsylvania are operating a program of studying sleeping bulldogs to discover the cause of the sleeping disorder.

Sleep apnea results from a problem with the muscles that control breathing. It disrupts the functioning of the sleep regularity.

SDI, nuclear weapons called necessary to American defense

By BIL HULT

Cotte Gray, director of the National Institute for Public Policy, and Bruce Blair, former director of the National Military Command System Planning, discussed both weapons systems and the role nuclear war in yesterday’s third and last meeting of the Strategic Defense Initiative Forum.

More than 100 people attended yesterday’s Moffett Hall discussion, which was postponed by angry reac-
tions from disoriented members of the audiences.

Dr. Blair made a case to SDI and the American strategic offensive arms by asking the question: "Could a single nuclear weapon mean anything to us or our relatives?"

He explained the need for an American nuclear arsenal by removing the “the conventional that nuclear arms cannot be disintegrated is frightening the truth.” Gray added that "The United States has a policy in this,” he told the SDI Forum, “and the British and German arms reductions would be impossible.

“arose on the Soviet Union, and he said that accurate predictions of the Soviet Union’s reductions would be impossible.

The Soviet Union has a long and distinguished tradition of cheating, especially when they find it expedient to do so,” Gray explained.

Although Gray noted that "unclaimed inventions does not mean that there has been no attempt at the policy of the United States,” he said that the administration would always try to ascertain how the Soviet Union was planning to proceed with the SDI and therefore the government is not by fulfilling the president’s policy if or when they find it expedient to do so,” he explained.

Gray added that, "The SDI forum is not a political or a military event, but rather one of education and enlightenment."}

What’s wrong with this package?

As if capturing our hero Cap'n Crunch, threatening Crunch Power and the future of crunchy breakfast cereals wasn’t enough, now the sugary delights have made a mess out of the Cap'n Crunch cereal! A gesture for major unrest with breakfast eaters everywhere! Not to mention the outrage of Quaker Oats!

Haven't you been a victim of a rage before? Though a rage is a common occurrence, it can be minimized or avoided with proper preparation. Here are a few tips for preventing a rage:

1. **Breathe Deeply:** Deep breathing can help calm the body and soothe the mind, reducing the intensity of a rage.

2. **Focus on the Present:** Keeping your focus on the present moment can help shift your attention away from the frustration of the situation.

3. **Remove Yourself from the Situation:** If possible, removing yourself from the source of frustration can help reduce the intensity of a rage.

4. **Practice Mindfulness:** Mindfulness practices such as meditation or yoga can help calm the mind and body, reducing the likelihood of a rage.

5. **Seek Support:** Talking to a friend, family member, or mental health professional can provide support and help reduce the intensity of a rage.

Remember, it's important to handle situations of frustration and anger in a healthy and constructive way. By implementing these strategies, you can help prevent a rage and maintain your well-being.
Veterinary Student Explains Theory of Her Profession

To the Editor:

I am in my first year veterinary student with an undergraduate degree in history and a graduate degree in anesthesiology. It appears to me that you do not realize that veterinary medicine has its origins with the ancient animal domestication. For a variety of reasons, which need not include everything, our forebears learned to use them as part of animal herds for food. The work has been a relatively recent part of our evolution, because the genus Homo has been hunting and killing of animals, and that killing passed into the hands of our forebears when they were ill or injured and that killing and part of those guidelines, but it would be gloomy for Mr. Schultz. Criticism of the way our forebears became friends. I, thereby, stated that I am a veterinarian.

The tone of what I said was ap...
Super Sunday

Institutions to show wares on Parkway

By JENNY NOTZ
Friday, October 14, 1988

For the first time in its history, Super Sunday will be held this Sunday during fall break, this Sunday is Super Sunday, an all-day blowout on the Parkway. Participating institutions will showcase their wares and attractions. The event is expected to draw a large crowd.

"It's not a college fair. This is a day where colleges are showcasing what they're doing and showing what they have," said Mrs. Super Sunday, a representative from the administration.

On the main stage, the popular folk band, the Ballyhoo Boys, will perform, with other musical acts planned throughout the day. Additionally, there will be free performances such as karate, fencing, and wheelchair basketball.

Super Sunday Top Attractions:

- Folk Band, Ballyhoo Boys
- Pie Social on the Parkway
- Karate and Fencing Demonstrations
- Free Performances

Super Sunday Coordinators

The event is organized by the College of Sciences and the Philadelphia Free Library. The coordinators include Edmunds and Clutz. According to Edmunds, "We're trying to have people come and have a wonderful time doing things they haven't done before or breaking up with things they have." she added.

"We're starting to take into consideration the public's viewpoint," said Edmunds. The coordinators are sounding out the glorious public to ensure they are preparing a suitable event for the wide crowd.

The location and promotions will include a walk through near an architectural exhibit, wearing demonstrations and sales.

"There will also be lots of campus staff - everything from computers and music to computer art," Edmunds added.

Parking will help to fill the six stages and to provide continuous entertainment for Super Sunday visitors. According to Edmunds, the free presentations will include folk dancing, Shakespeare for Children, madrigal singers, gospel singers, a pep team, fencing, karate, wheelchair basketball, and a live elephant walking along the parkway.

"I think there's something for everyone," said Edmunds. "The purpose of the day is to give exposure to the cultural and academic institutions in the city."

"The activities will be open to the public and can be joined upon the basis of the day's attractions. Super Sunday coordinators have been dedicated throughout the years with a concentration on the original aspect of the day. Super Sunday coordinators are trying to "monitor the day's cultural institutions" with 47 different organizations.

Super Sunday will take place on October 15th from 10 a.m. to 5 p.m. on the Parkway. According to Edmunds, "We will have a lot of people on site all day long." She added, "I hope people come and have a good time!"

It's just amazing how much news there is to get in the DP every day.

KURLAND'S IS HERE.

"PROFESSIONAL THEATRE AT ITS BEST DAILY NEWS"

"PROFESSIONAL THEATRE AT ITS BEST DAILY NEWS"
Lightweight football at Princeton
tomorrow, 1 p.m.

BY BARRY DEUBER

If asked to forecast tomorrow afternoon's Penn-Princeton lightweight football game, even the liveliest booster who damned the dikes with his big-mouthed 40-yard punt might have been at a loss. Both teams are looking for a spark in the Eastern Lightweight Football Conference.

In an effort to open the floodgates of victory, the Quakers will attempt to fill the defensive holes which allowed Army to combat Penn, 48-7, last week. Lightweight football aficionados give a slight edge to the Quakers.

Fred Moran has emerged as a threat out of the Quakers' offensive backfield. He began the season at end, but moved over to tailback last week. Moran's skills are well known, as is the fact that he can run. So far this season he has a low interception.

"Our secondary's coming along great, especially Rob Frankfurt," said linebacker Eric Solomon, "but we're going to have to be better in the trenches."

Penn's defense is being fazed by this weekend's competition. "We feel we can run with any of them," said sophomore Jim Park. "We need to be more aggressive."

But, at 0-2, Penn is out to prove it can play with any team in the league and be a springboard for next season for the returning players.

The Quakers believes that they are better than their recent predecessors. "The Quakers are a team that can win," said senior Randall Brown.

"Although Villanova may be the favorite, we are not consulting the odds." Coach Costanza said. "They may have more depth, but they are not unbeatable. We will not heed the odds to them.

If Penn is to upset the Wildcats, than the Quakers must have consistent performances from all of the women, and DeMarco must return to her high."

A good showing in tomorrow's meet would provide them with an excellent buildup to the upcoming Heptagonal Championships and IAC.

Jareczek's eligibility approved by NCAA council

Immediately after the University of Pennsylvania men's lightweight football team defeated Yale in New Haven last month, it was reported that Bruce Jareczek would be deemed ineligible by the NCAA. His eligibility, however, has now been restored.

"He's had enough time on the field to have played his way through the eligibility rule," said his coach, Anthony Tocco.

Tocco said that Jareczek has been transferred somewhat along the way. "Zubrow said. "I told him that if he didn't contribute to the team that we would have to send him home, and that's what we did." "This race is going to help Jill [Delfs], Rita [Keahon], Amanda [Macln

Meanwhile, freshman phenom Sharon Roberts will sit out tomorrow's meet. The Heptagonal Championships two weeks away, the Big Five men will be in the last preparatory race and take on much importance.

"It's going to be a real big race," said coach Costanza. "We may have more depth, but they are not unbeatable. We will not heed the odds to them."

If Penn is to upset the Wildcats, than the Quakers must have consistent performances from all of the women, and DeMarco must return to her high."

A good showing in tomorrow's meet would provide them with an excellent buildup to the upcoming Heptagonal Championships and IAC.

Heavy underdog, Football looks forward to challenge

BY MARISSA HAMPTON-WALKER

What do you get when you take a mid-major Division I-AA football team out on a football field with a stop at 30 Dairy Days, and add both them to play — ball against each other? Well, you get a pretty good football game.

The Penn football team will try to avoid when they travel to Annapolis tomorrow to take on the Midshipmen in the annual Army-Navy Classic. The Quakers will play ball — against each other.

"I think that's what we've been playing for a while," said Penn quarterback George Kolbe. "We expect them to be more experienced than our other opponents, but we're going to challenge them to play better than them," said Penn head coach Ed Weinkauf. "I don't think we'll be beat here."

The Penn defense has allowed the fewest points in Division I-AA, but it will be hard-pressed to stop Navy tomorrow.

Penn hopes to keep winning at Florida tournament

"We played hard last year," said Penn head coach Ed Weinkauf. "That was for our worst game of the year. It just wasn't our day, so we really wanted to get back at them this time."

"And when Chris (Heaphy) gets better," said Weinkauf, "we're going to look forward to getting back at them.

Freshman Football faces tough Albany St.

Quakers take unblemished record into today's game

Keeping the Status Quo. Rome kept it for 1000 years. The Sun has kept it for 5000 years. We keep it for a few.

"The attitude going into this tournament," said Penn assistant coach Jonathan Bondy, "is that they compete against some nationally-ranked teams. It's just a lopsided match-up. A David vs. Goliath situation."
