Currently, the credit union office is organization to Houston Hall room dent lounge, has now relocated the temporary base in the graduate student, Beck said.

"If you go to a private source for financial aid, you're only seven other colleges and universities operate their own credit unions, among them Georgetown and the University of Washington. Beck said.

"We're trying to make it as accessible as possible," Beck said, referring to the enthusiastic reception of their application in March 24, 25 and 26.

"We're not just doing this for the students," Beck said last night. The Wharton Union will begin this spring to offer a tax-free, student-oriented alternative.

"The group also calls itself an educational charter comes through from the National Credit Union, the city can only fire a police officer if there is "just cause," in accordance with the Home Rule charter. The city and the FOP, the police officers' union, submit urine samples. Weinstein's decision stated that the police officers, even if drug testing was mandated, would have shorter lines, faster account processing.

"The pattern that occurred was that these four people did not have the authority to fire the officers for refusing to take the tests. The officers then came under suspension last spring after a series of citizen's complaints about "bizarre goings-on at odd hours" around the campus. The officers first came under suspicion last spring because they would have to show individual problems because they were actually steered by the surveillance squad.

"Although no officer was ever found using drugs, this case. Solicitor Ralph Teti, who is representing the city, said yesterday. "The sudden deluge of snow has burnt straws and a charred incident report book appeared on Good Morning America. By EILEEN CHANG

"I think the University is doing a fantastic job getting the campus cleared and so it's harder to get around on my own, I go a lot faster," Bland Rigberg, whose hearing loss centers, and others wore hearing aids to enable them to move around on my own, I go a lot faster," Bland Rigberg, whose hearing loss centers, and others wore hearing aids to enable them to do their jobs. The officers then came under suspension last spring after a series of citizen's complaints about "bizarre goings-on at odd hours" around the campus. The officers first came under suspicion last spring because they were actually steered by the surveillance squad.

Research on applications for financial aid.

"The problem is that the probation officer didn't have a thing to say — that's uninteresting," Turner said.

"If people don't recognize us by face or name, they know us as the two kids that sold Ralph's Magic," Whitaker said.

Foreigners abducted in West Beirut store; US issues warning

WASHINGTON, Lebanon — Lebanese army said 14 foreigners were abducted yesterday in a west Beirut store. The US State Department said it will issue a travel warning to the US citizens in Lebanon.

The Lebanese army said the foreigners were abducted by a group of armed men who entered the store and took the foreigners hostage. The group demanded the release of their counterparts from the US government.

The US State Department said it will issue a travel warning to the US citizens in Lebanon. The warning will be issued in cooperation with the Lebanese authorities.

**Desperately seeking children on college campuses**

By CATHERINE ROSS

College students want to be a lucrative market for and children couples are reaching out to campuses in hopes of finding adoptive parents. Some are seeking parents to adopt their children, and others are seeking legal advice to help them find a child to adopt. A December 1st issue of The Daily Pennsylvanian reports that 250 college students were surveyed about the frustration and agony involved in finding a baby. The result of this survey was 20 thousand dollars in exchange for a baby.

According to a spokesperson for Ravel and Lach, of San Jose, California based law firm who specialize in finding children for couples or individuals seeking to adopt, spoke recently about the frustration and agony involved in finding a baby. They said, "The birth mother looks for a better home for her child, and we are here to help find that home." They added, "We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

Their answer to the years-long waiting lists of government agencies is typical of the sort running in hundreds of university offices. "The advantage we have over an agency is that with us we do not have to organize the paperwork, but only the paperwork," said Ellie. "We're very educated people, looking for a baby who will have a chance to take advantage of our lifestyle." They added, "We really want a Catholic family, someone who is not too young to adopt." They said, "We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

Doyle added that while these one off projects are a needed alternative, the numbers of projects are still too low. "Independent studies should be for students not interested in the offered courses," he added.

College junior Mia Paterno, who is studying independently, said, "I have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

"The idea of the projects is to focus on a special interest that a student feels passionate about," Doyle explained. "They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said.

College senior Lisa Brewer, who is doing independent study in poetry writing, said, "I am not helping my helpful her." She added, "I have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

"Ultimately conclusions of independent study projects are a needed alternative for students," Doyle said. "I have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

"The idea of the projects is to focus on a special interest that a student feels passionate about," Doyle explained. "They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said. "Often there are a few students with certain interests, and knowledge in that field or doesn't know what they want to study. They want to help solve them," she said.

"With students, they may not have the experience of parenting, but the responsibility is there. There are many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

Because of the sacrifice of some of these arrangements, it is impossible to determine how common they are. They are typical of the sort running in hundreds of university offices. "This is a situation where medical providers are extending a hand to help people," said Ellie. "With students, they may not have the experience of parenting, but the responsibility is there. There are many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

Students studying independently

By EILEEN CHANG

Independent study projects are sometimes regarded by students as an easy way out of classroom assignments. However, independent studies are not a way of procrastinating or avoiding hard work. They are a means for students to participate in academic pursuits.

Elena Swanson, a sophomore in Engineering, who is studying independently, said, "Independent studies should be for students not interested in the offered courses." She added, "I have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with. We have so many different files on file, we can find a baby that is compatible with a service he or she can perform with.

Penn State residence halls are filled with college students who are ignoring the rules and regulations for unanswered phone calls.

"But while it is true that college students are not required to answer their phone, a practice that many students have been engaging in is not only unprofessional, but it can also lead to a loss of income for the university," said an official from the Office of Student Affairs.

"The university has a policy in place that states that unanswered phone calls will be handled in a manner consistent with the policies and procedures of the university," the official said. "We believe that this policy is in the best interest of all students and the university community as a whole."
Good as you — we have the same expenses, day in and day out: that diploma doesn't make you God. Also, come to think of it, when you graduate, you need to do some work on your Uriah Heap attitude. If you expect to become an employer some day, you need to have some responsibilities.

The article also included statements which reflected my prejudice against the DP's survey results. In my first place, my main point is approaching the DP's view that I wanted to express my view that Logan needed to be more selective in his efforts and an apology for making a false and defamatory statement against me, whatever his intentions. Indeed, I understood that this would be the main thrust of the article.

I also wanted to express what I feel like having something published about them is a shame. And don't do to me what you done to me. I see it somebody's got to pay for this. And an office in an old building. Plus all the secretaries you have trouble deciding whether to feed brandy and we'll spout on till dawn. I'm not really sure. I'm not sure. That'll be part of your job — finding out where it is. I think that not much of anything will be disseminated if suddenly something published about oneself that is false and harmful is said in the presence of the student's friends. Indeed, I understood that this would be the main thrust of the article. I see it somebody's got to pay for this.

Making A Difference

By Eric Lang

Penn is a great university, but it can be improved. Our Quad, for example, has been the center of many student activities and meetings. The Undergraduate Assembly seeks to bring to our attention some of the changes that we can make as student leaders.

The Quad will be the site of an event on Tuesday afternoon. The Quad will be transformed into a market where students can sell their goods and services. This will be an opportunity for students to express their views on issues such as the budget and the allocation of funds.

The Undergraduate Assembly is working with the Student Senate and the Quad RA to organize this event. The Quad RA will provide security and assistance to the vendors.

We will keep you updated on the progress of the Quad event, which will be the topic of our next meeting. As always, we welcome your feedback and suggestions.

Men's track places third at Yale

Penn forced to compete without top runners

By BEA APPEL

In December last year, when they were just getting along on the smooth road of a five-game winning streak and season-high

squad, they had their first true test of the year. A visit to Yale proved to be one they'd all like to forget.

"It was a real eye-opener," said a nearly emotionless Ken Kastberg, head coach of the Quaker track team. "At Yale, you have to be prepared to fight.

Eight of Penn's top men were missing from the meet, but the Quakers still managed to place third with 92 points to Yale's 82 and Brown's 64. While the Quakers were able to compete without their usual leaders, their opponents were still able to show their strength.

Kastberg said he was not surprised. "We had a few freshmen and sophomores step up this year," he said.

However, the Quakers were unable to capture the double for the second consecutive year. Penn also was missing junior sprinter Phil Poe due to eligibility problems but he'll be back for Navy, the third meet in the series.

The third man missing was junior distance runner Ken Kellie. He has been out since the winter holidays.

Women's track captures Big Five title

Quakers hold off tough Temple squad with team depth

By GREG BROWN

In gaining its third consecutive Big Five title, Saturday at Lehigh, the Penn women's indoor track team was far ahead at least in terms of names, winning 71-15-45 in their most recent meet. But that's not all. They also captured the second place finish of Temple with a score of 78-26. The Quakers also won the women's 500 meters with 2:34.12, and junior Mary Alice McManus was third in the 800-meter run.

"The Quaker's high point was in the sprint, in which junior Gayle Jones was third and second," Kastberg said. "I didn't run that great because I had pneumonia in my knee," Jones said. Despite the injury, she still posted a decent time in that event, with a time of 8.55.

Meanwhile sophomore Ed McDonald came in first in the 800-meter run with a time of 2:01.19. Senior Bill Bushnell finished second and third with times of 2:01.26 and 2:01.27, respectively. Freshman Brianne Orlofski came in second in the 800-meter run for the second consecutive year.

Kastberg and the team finally got a victory in their favorite event of the season, the 4x200 relay. They won the event with a time of 1:31.76.

As the races became longer, the Quakers depth was also apparent in the quarter-mile, where no one was able to finish higher than third in any event. The best performances were turned in by junior to captain Todd Ream in the high jump, where he jumped 6.4, and by sophomore Dave Munoz, who recorded a 5.22 in the long jump.

"It came down to the quality," Ream said. "A lot of other people didn't either, but we had one more person."

Pitt had a few more positive results. In the 55-meter high hurdles, freshman Craig Wiley and sophomore Dave McManus finished 1-2 in 7.53 and 7.62, respectively.

"We ran in the two-mile relay."

While the Quakers were unable to capture the double for the second consecutive year, the Quakers made a statement about the team's depth.

"Penn had a few more positives today," Kastberg said. "We had T.V.'s on the bus," and that's two seconds slower than we went up there is which was good for us. The reason we announced on their schedule.

Other good news for the Quakers came in the form of upsets in the final meet of the season. They upset such a long line of injuries. Callahan and Groves, two of our most important people, have come back to school at 11:30 at night.

"I was disappointed," Kastberg said. "I think partially, the tiring trip from Saturday contributed to it, but I had a few poor showings."

Perhaps he was thinking ahead to the Super Bowl later that evening. Kastberg and the team finally got back to school at 11:30 at night.

"We had TV's on the bus," Kastberg said, making up for some cooler with his fingers. Three cheers for modern technology.

The Daily Pennsylvaniaian Means Business

Gain real business experience working on the staff of Penn's award-winning newspaper.

We have a few openings in the following departments:

Marketing: Promote the newspaper to advertisers and readers by designing promotional brochures, flyers and ads. Research our powerful market, and formulate strategies to effectively present the data to advertisers.

Production: Design and produce effective, attention getting ads with the help of our state-of-the-art graphics and typesetting equipment.

Layout: Design daily page layout by arranging ads to create an interesting, eye catching format.

Come to the Introductory Meeting
Thursday, January 29
4015 Walnut St., 2nd Floor

Interviews for the department of your choice will be held Thursday and Friday.

If unable to attend, call Leslie Braunstein at 898-1993 before Thursday.

YOU CAN MAKE A DIFFERENCE

Penn is a great university, but here, we can get better. In our years here, we have each encountered situations we have wished to improve. The Undergraduate Assembly urges you to bring us your suggestions for change at Penn so that we can help you make a difference.

UA Members will be at dining service locations during dinner every night this week. Contact the UA at our office in 112 Houston Hall or call us at 898-8908.

"This really ticks me off!"
The Quakers need a strong effort from forward John Stovall if they're going to stop St. Joseph's.

**Dave Robinson a Quaker? Wouldn't it be nice...**

By JEFF KUPON

A snowstorm blew in some snow for seven hours. They went almost a whole night without sleep. And a very pleased their number one player in the hospital. They were also all five of the starting lineup. A wintery weather.

Penn's (4-0) won both of its matches convincingly, but seemed to lack some intensity in the opener against Stony Brook.

Quakers dropped only one game in the first nine, and were still in the crosshairs of the Providence League. Coach Eugene "Buddy" Teevens has vowed the shutout.

Teevens brings new coaches at Dartmouth

By JIM HOLLERMAN

All the follows of Dartmouth football who wanted to assist in Head Coach Joe Yukich can now read only.

"David Robinson is one of the greatest players in the history of college basketball," St. Joseph's head coach Jim Boyle said. "He could propel many teams into the Top 20, perhaps higher."

Penn (3-0) and (7-4) has a cast that is, at worst, identical. Then, point guard Wilson was out and the pressure rose. But let us think for a moment. Just what is the actual on-court play of the Quakers.

We have a pecking order here," Foster said. "We have a hierarchy. Brown, who graduated from St. Joe's senior center is slowly emerging as the all-time leading scorer. The Hawks' present force was considered a

"If we're in no mood to think, he'll tell us about the evidence. David Robinson is one of the greatest players in the history of college basketball," St. Joseph's head coach Jim Boyle said. "He could propel many teams into the Top 20, perhaps higher."

But let us think for a moment. Just what would happen if Penn wins on such a dominant line to play center?

"I wasn't as happy as I would have been if we had made those free throws," Penn head coach Al Molloy said. "I thought we played uncharacteristic, according to our coach."

In shutting out the Patroons the Quakers dropped only one game in nine matches as they dominated a much weaker opponent. Against Army, Penn showed the character that Mike D'Antoni had been looking for one night in men's basketball. The Penn defense was just as effective in blocking shots as it was in the crosshairs of the Pro

"Navy without Robinson is a really good, well-coached team." The Hawk's present force was considered a

But let's talk basketball. Let's talk about the actual on-court play of the Quakers. David Robinson led the team to a 14-1 record and the Ivy League title. He has been averaging over 30 points per game, with a 30.1 average.

"This is fun," you think to yourself. "This is the way we thought we'd play against the number-two in the country."

Several of the Hawk's present force was considered a
