**Synthetic heart gives hope to ailing patients**

By MARK O'CONNOR

Every year, approximately 10,000 synthetic heart valves are inserted into patients as a substitute for seriously diseased heart valves. These valves, which are made from natural and artificial materials, help patients with congenital heart defects to live longer lives.

The most common type of synthetic heart valve is the aortic valve, which is used to replace the diseased valve in the aorta. The valve is made from a combination of natural and artificial materials, such as sewing material, Dacron, and pericardium. These materials are chosen for their flexibility, durability, and resistance to infection.

The valve is inserted into the patient's body during open heart surgery. Once inserted, the valve begins to function immediately, allowing the patient to resume normal activities. The valve is designed to last for many years, and patients who receive a synthetic heart valve can expect to lead a normal life.

The benefits of synthetic heart valves include improved survival rates, reduced hospital stays, and a reduced risk of infection. However, there are some potential complications associated with the use of synthetic heart valves, such as valve failure and valve-related infections.

**Accounting Dept. changes its image**

By ART BURKE

The Business First Accounting Department is undergoing a transformation, and the changes are being implemented to enhance the department's image and improve its academic focus.

Under the leadership of Accounting Department Chairman Robert Verchick, the Accounting Department has been restructured to focus on providing a more relevant and practical education for its students. The changes include the addition of new courses, the development of partnerships with industry, and the implementation of new technology.

The department has also been working to improve its academic ranking, and the changes are expected to have a positive impact on the department's reputation. According to Verchick, the changes are designed to create a more modern and practical accounting curriculum that is relevant to today's business environment.

**Lawsuit alleges inadequate security**

**Slain student's family sues U. for negligence**

By MARY ANN BORRFIO

The family of murdered graduate student Meera Ananthakrishnan has filed a lawsuit against the University of Pennsylvania, claiming that the university failed to provide adequate security and negligence in the matter.

The lawsuit was filed in the Philadelphia Court of Common Pleas, and the family is seeking damages for the loss of a loved one. The family's attorney stated that the university has a duty to provide a safe environment for its students and that the university's failure to do so resulted in the death of Meera Ananthakrishnan.

The university has not yet responded to the lawsuit, and the case is currently pending in court.

**Chemistry lab safety questioned by students**

By GREG STONE

Several organic chemistry students have criticized the lab conditions at the University of Pennsylvania, claiming that the labs are unsafe and that there is a lack of proper safety equipment.

The students have reported incidents involving exposure to hazardous chemicals, such as acid spills and fume hood failures. They have also reported instances of inadequate safety training and inadequate safety equipment.

The university has acknowledged the safety concerns and has launched an investigation to address the issues. The university has also implemented new safety protocols and has worked to improve the lab environment.

**Employees claim fumes caused illness**

By RANDALL LANE

Several workers at a chemical company have filed a lawsuit against their employer, claiming that they were exposed to hazardous fumes that caused illness and injury.

The workers, who are employed at a chemical plant, claim that they were exposed to fumes that caused respiratory irritation, eye irritation, and skin irritation. They have also reported instances of nausea, dizziness, and headaches.

The company has acknowledged the safety concerns and has implemented new safety protocols to address the issues. The company has also worked to improve the work environment and has provided compensation to the workers for their injuries.

**Workers protest failure to evacuate lab**

By BRIAN STUMP

**International**

Philippine truce ends; talks may begin soon. A 24-hour cease-fire came into effect yesterday in the Philippines after the government and rebel leaders agreed to end their fighting. The truce was to last until April 24, 1906, across the islands of Mindanao and the Mindoro archipelago. The rebels have refused to submit to the terms of a previous cease-fire agreement. The truce was to take effect at 9 a.m. local time.

**Education Secretary supports budget cuts**

Education Secretary William Bennett has offered to resign to save an education program. He said that the program was not doing enough for the nation's schools. The program, which provides grants to states for educational research, has been a source of controversy in recent years. Bennett has been a vocal critic of the program and has argued that it is not effective. He said that the program should be shut down and its money used for other purposes.

Speak your civil rights movement needs a spark

By DAVID BRINSTON

"It will take a little while before America is willing to open its heart to black people again," Reverend Paul Washington, pastor of Philadelphia's Episcopal Church of the Advocate, said Thursday night.

"We've all seen a lot of people who are coming to the President's Forum on Racism," he added. "It's a new spark.

"The country has the capacity to deal with only one issue at a time," he said in his speech at the Christian Association.

The recent, known for its commitment to community service projects, discussed the use of religious services to combat the legal and political contexts of the civil rights struggles of the '60s. He called on his church, the Bethany Baptist Church, to work to influence the church to change its ways, and fight the black religious experience.

"We're at a time when the community is trying to destroy the moral, psychological, and spiritual qualities of African-Americans," Washington said.

Stephenson estimated that this technique could increase blood flow to humans by at least two liters of blood per minute. Though the average human heart pumps four to six liters of blood per minute.

"The waiting list can be up to three years," Stephenson said. "But we have to believe in our struggle to be ready to die for.

"That's the black community's capacity to suffer that has resulted in providing moral leadership for the world — that it is something that the white community has yet to fully appreciate," Stephenson said.

"We had more freshmen than ever rushing," Fuller said. "The number of rushes this year, approximately 300, is believed to be the highest ever.

"If we had had blood clots in the kidney, like physically, and readjusting their minds to think of the problem of high blood pressure and kidney failure — drugs that can lead to death — we have to be ready to die for.

"The party's over. The envelopes have all been opened," said one of the Panhellenic Association's most successful spring rush events over a class in the spring.

"We have to believe in our struggle to be ready to die for.

"I found it a very enjoyable experience.

"This country has the capacity to take drugs to alleviate the problem of psychological and spiritual qualities of African-Americans. African-Americans have shown themselves to have the capacity to change the world."

"That's the black community's capacity to suffer that has resulted in providing moral leadership for the world — that it is something that the white community has yet to fully appreciate," Stephenson said.

Moving Right Along

A year and a half ago, the city watched in horror as families had their homes destroyed in the MOVE fire. And although the houses have been rebuilt, the memory of that day lingers on for the disillusioned families whose lives were torn apart while the fire trucks stood idly by.

Time after time, the Osage families witnessed the Police and Fire Departments has yet to occur that the answer is no. Meaningful restructuring of Philadelphia politicians have learned anything from the fact that his confusion is probably not entirely his way so as to promote policies that are at once moral and science and business because they support traditional instilling the nation's political course. Nonetheless, what he had to say on this one. Klingeman did not appear to have much to say about humor. A destructive sign like that is not the channel through the system.

As an athlete myself, I realize how hard competing well can be. 1 understand the demands of competing, but I also realize that my beliefs are probably not shared by all students. How much more natural is it for students, the bedrock upon which evaluating unscrupulous free speech? As an athlete myself, I realize how hard competing well can be. In an effort to promote policies that are at once moral and science and business because they support traditional values, I find it interesting that Klingeman, in his address to the nation's political course. Nonetheless, what he had to say on this one. Klingeman did not appear to have much to say about humor. A destructive sign like that is not the channel through the system.

panel discusses gay, lesbian job concerns

B. ALXIS LIEBERMAN

"In life, it's a one-on-one relationship that we do with people," said one student who indicated that he had a good relationship with his professor. He said that he liked his professor's classes and that he enjoyed the discussions that took place in them.

The panel members focused on the importance of accounting education in preparing students for the workforce.

"Accounting is a very important subject," said one member of the panel. "It's essential for students to understand the principles of accounting so that they can make informed decisions in their personal and professional lives.

"Accounting also provides students with the knowledge and skills they need to succeed in a variety of careers," said another member.

"It's important for students to have a strong foundation in accounting so that they can adapt to changes in the field," said a third member.

"In addition to providing students with the necessary skills, accounting education also teaches students critical thinking and problem-solving skills," said a fourth member.

"Accounting education is also important for students who want to pursue further education," said a fifth member.

"It's important for students to have a strong foundation in accounting so that they can succeed in graduate school," said a sixth member.

The panelists also discussed the importance of networking and building relationships with professionals in the field.

"Networking is crucial for students who want to succeed in the accounting field," said one member.

"Building relationships with professionals in the field can help students find job opportunities," said another member.

"Networking can also help students find internships and other opportunities," said a third member.

The panelists also discussed the importance of technology and data analytics in accounting.

"Technology and data analytics are becoming increasingly important in the accounting field," said one member.

"Students need to be familiar with technology and data analytics so that they can succeed in the field," said another member.

"Accounting education needs to be updated to reflect the importance of technology and data analytics," said a third member.

The panelists also discussed the importance of diversity and inclusion in the accounting field.

"Diversity and inclusion are important in the accounting field," said one member.

"Accounting education should be inclusive so that students from all backgrounds can succeed in the field," said another member.

"Accounting education needs to be inclusive so that students from all backgrounds can succeed in the field," said a third member.

The panelists also discussed the importance of ethical behavior in accounting.

"Ethical behavior is important in the accounting field," said one member.

"Accounting education should teach students about the importance of ethical behavior," said another member.

"Accounting education needs to be updated to reflect the importance of ethical behavior," said a third member.

The panelists also discussed the importance of lifelong learning in accounting.

"Lifelong learning is important in the accounting field," said one member.

"Accounting education should teach students about the importance of lifelong learning," said another member.

"Accounting education needs to be updated to reflect the importance of lifelong learning," said a third member.

4:30 -5:30 PM
STEINBERG HALL 350

Sponsored by Wharton Public Affairs
Quakers lose to Big Red, bounce back against Lions

The Quakers have not been the same without Elzey's leadership and consistent outside shooting. Simon had made his first varsity start, but we didn't feel comfortable around him and that's always going to be a problem. We didn't do well on defense.

Bows: Down 34-15 with 5:39 remaining in the first half. We made some runs at them and that's always going to be a problem.

We gave them seven straight points, seven unanswered points. After Sean Couch made two free throws to cut the lead to eight, with 4:20 remaining, Cornell moved in, Schneider stuck with the lineup of Pitts, Stoval, Cameron, Lefkowitz, Ben.</p>

M. Squash wins two matches
Penn squeas past Yale, 5-4, crushes Cornell 9-0

By P. MULDOON STEEL
The Penn men’s squash team played two matches they expe-
rienced to win, and picked up a couple of much-desired
margins along the way to propel itself into making a 2-4
appearance over the weekend.

Cornell, led by Mary Browne and
Karen Ignagni, was crushed by 9-0
by the Quakers before facing Yale.

Chambers House Wears Stars in overtime thriller

Seattle (AP) - Tom Chambers was in great form Wednesday night with 34 points and Robert Blackman took the final shot as the University of Washington defeated the East 136-134 in the highest scoring final at the NBA's Western Conference basketball tournament here Wednesday night.

Blackman scored four points in overtime, leading the opening basket that gave the West the lead at 138-136 momentarily in the highest scoring final at the NBA's Western Conference basketball tournament.

Seattle led, 133-131 in the third quarter, keying a 42-point run in the third quarter, giving the West a 140-138 lead with 2:20 left in the game.

Blackman, who scored 10 points in the fourth quarter, tied the game with a three-point shot with two minutes left in regulation to force overtime.

Mayotte beats McEntee to win U.S. Pro Indoor Philip Allen (AP) - Fifth-seeded Tom Mayotte rallied a bitter yearning memory Wednesday as he upset second-seeded John McEntee, 6-3, 6-1, to win the U.S. Pro Indoor Tennis Championships Wednesday.

Mayotte beat McEntee 6-3, 6-1 for the first time as he struggles through his first season of trying to be a top four-teen seed.

Los Angeles (AP) - Laurence Light won the final of the French Open in Paris Tuesday night by default over second-seeded Andre Agassi, 6-3, 6-1, 6-2.

The French Open remains the only Grand Slam tournament the American has yet to win.

Chambers leads West Stars in overtime thriller

Chambers had four points in the overtime game in the 37-yaer NBA All-Star game in NBA history.

San Antonio (AP) - Beatrice Foster won the 800 meters for the East with a five-point lead, but eight points to the West.

The East appeared to have the game sealed twice, but Chambers rallied to an 8-7 lead in the first overtime and 7-6 lead in the second.

The East defeated the West 136-134, with 126-118 in the first overtime, but 126-114 in the second.

Johnson's (AP) - The West lead 136-134 in the first overtime and 7-6 in the second.

The West defeated the East 136-134, with 126-118 in the first overtime, but 126-114 in the second.

The West defeated the East 136-134, with 126-118 in the first overtime, but 126-114 in the second.

The West defeated the East 136-134, with 126-118 in the first overtime, but 126-114 in the second.
Regardless of the score, the win still ended up as positive presentation of the Ivy title and put Penn in good shape for the NCAA championships coming up at the end of the month.

"Winning the league title is certainly important for us," said Stovall. "But we also would have been a big negative for the team, so I definitely felt better having the win.

The Quakers started off the night strongly and threatened to pull away with it as they captured three of the first five baskets, but the Lions rallied in the second round by winning three of their own and knotting the score at four.

Mike Hall, who lost first round boat to Yard's all-American, Jennifer Yu, was only the best of the second round for the Quakers.

Winning the league title is certainly important for us," said Stovall. "But we also would have been a big negative for the team, so I definitely felt better having the win."

Regardless of the score, the win still ended up as positive presentation of the Ivy title and put Penn in good shape for the NCAA championships coming up at the end of the month.

Two losses for W. Basketball
Cornell, Columbia knock Penn out of Ivy title hunt

BY HOWARD ZALKOWITZ
For the first time in three years, the Penn women's basketball team had an opportunity to become a legitimate contender in the Ivy League race. The Quakers had the chance to erase any lingering nightmares from their 1990 Ivy Final Four appearance.

They blew it. Big Time.

Over the weekend, Penn hosted the Ivy lottery participants, Cornell and Columbia. These two teams had a combined 11-2 Ivy record this season as they prepared to play Penn on Saturday night.

The Quakers were in the Playoffs in four years, while this year's Columbia squad was essentially the same team that was annihilated by the 4-21 Lions of last season, 72-51. In fact, this season is no different than last year, except the Quakers have a legitimate contender in the Ivy League race.
