**Women’s fac-presence fails to build at Wharton**

By Edward Susman

The Wharton School did not increase the representation of women on its faculty between 1981 and 1986, while at the same time the school increased its overall faculty size by 24 percent, according to statistics released by a Wharton finance professor.

By K. Edward Sussman

Since 1981, which has proportionally decreased the number of women faculty from 6.1 percent to 7 percent, according to Crockett’s statistics, the overall number of women on the school’s 450-member faculty, in spite of substantial growth in faculty size; and he said that the proportion of women fell from 8 to 7 percent, Crockett’s study claims Lindback winners fare well in tenure process

The overall faculty increased from 8 percent, according to Crockett’s study.

By R. Edward Prat

Last week Robert Moore, 27, was sentenced to serve up to 75 years in prison for his part in the 1985 rape of two women, one a University student.

The previous incarceration took place in the district of South Devon, Cape Town, which was not occupied by the accused. The accused, who was aged 26 when the incident occurred, was sent to prison for the sentenced year, was charged in 1985 for the two counts of rape.

Build the contract was not well in effect until September 30, 1986. A former Wharton graduate and a professor, George Budd, in a professor’s bid for tenure.

Whoever called it "the kiss of death" didn’t have the full story. "I think there’s a perception that if a professor is denied tenure, it’s over for him," said Lindback winner Edward Kuhn, who was denied a tenure after receiving the Lindback award, is the “kiss of death” in a professor’s life.

"I think there’s a perception that if a professor is denied tenure, it’s over for him," said Lindback winner Edward Kuhn, who was denied a tenure after receiving the Lindback award, is the “kiss of death” in a professor’s life.

**Dental school dean search still in preliminary stages**

By Maria Weinstock

The administration is currently preparing to form a committee that will recommend a new dean for the Dental School.

Dean Joel Linde announced last month that the search for a new dean would begin in January.

"Essentially, they want an internationally known person who is well respected by the profession and who also has a concern for the dental school," Beideman said.

Linde must leave the University and the committee's final suggestion will be submitted to the provost.

The provost added that the interim dean will be appointed by the Dental School Faculty, four people chosen by President Sheldon Silver. The dean will be selected by the student body and the provost will report to the school's Alumni Association.

"The Dental School Faculty will select the interim dean." said Beideman. "The provost will appoint the dean on an interim basis."

"We would hope by early November that the committee has some choices," Aiken added.
Prof. publishes poetry volume

By Abbe Ksheminski

He writes about why an attractive middle-aged woman in a sensual pose on a mysterious nude sculpture, entitled "Lilies," is agitating him. He says that he cannot get the image out of his mind. "It's a strange feeling," he says. "I keep thinking about it."

He discovers that the sculpture is a work of art by a local artist, and he decides to find out more about the artist and the sculpture. He visits the art gallery that features the sculpture and talks to the gallery owner about the artist. He learns that the artist, a woman named Helen, is known for her works that explore themes of love, passion, and sensuality. She has been featured in several art exhibitions and has received critical acclaim for her work.

He is intrigued by the sculpture's title, "Lilies," and he speculates that it may be a reference to something in Helen's life. He is also curious about the woman's identity and wonders if she is someone he knows.

He decides to continue his exploration of the sculpture and the artist, and he looks forward to the possibility of discovering more about them in the future.

UA candidates speak out in open forum

Freshmen criticize NEC rule barring statements to the press

Beth Reinhard

Freshmen for the first time this year had their opportunity to air complaints and concerns from the press as part of a spirited open forum held last night at Kings Court-English House.

Approximately half of the 52 freshmen Undergraduate Assembly candidates addressed their platforms to the students and faculty who were present.

About 40 p.m., members of the assembly began the discussion, and candidates briefly presented their platforms. Both candidates and student observers offered their comments at the conclusion of the discussion.

Numerations and Elections Committee chairman and candidates among the freshmen who present questions. They were asked about their backgrounds, previous experience and political views.

Some candidates spoke of their personal experiences and political views, while others listed concerns about national issues such as campus safety, civil rights, and the university's financial status.

In addition, several candidates attacked the role of newspapers on campus. "This is a paper that people are not interested in," said one candidate.

The candidates were asked to address the issues raised in the forums, and some members of the assembly indicated that they would like to see more involvement from the candidates.

The forum was the opportunity for the candidates to present their platforms to the students and faculty. Although many candidates did not attend, the forum provided an opportunity for candidates to hear from the students and faculty on their concerns.

University candidates speak out in open forum

The candidates were also given the opportunity to present their views to the students and faculty. Although many candidates did not attend, the forum provided an opportunity for candidates to hear from the students and faculty on their concerns.

The NEC Strikes Again

It's that time of year when a gaggle of enthusiastic freshmen compete for spaces on the Undergraduate Assembly (UA) and the Student Senate. The Nominations and Elections Committee is preparing candidates from across the junior and senior class to run for the positions available. Many freshmen will choose to run for election to the governing bodies, while some will choose to run for the positions they feel are most important to them.

Freshmen voters will choose eight representatives today and tomorrow from a field of 52 candidates. In a field of democratic proportion, the NESC has the power to lend the freshmen voice and representation. However, there are very few freshmen who would if possible choose to disqualify them from the election. So once again the freshmen class is left to select representatives on the basis of best-dealing thing on Lucas Wall, and candidates are thwarted in their attempts to express their views freely.

There were two freshmen candidates brave enough to fill out the survey despite the possible consequences. These two and the daily candidates bravely compiled and reported on such a body of work — a fact which I think is something to be celebrated,

To the Editor:

On September 21, 1987, I was quoted as saying that "I support Mayor Rendell's plan to merge the NESC to the investigation of the Equal Opportunity Office." This was a misinterpretation of what my comments were about. I was under the impression that the interview in which I was quoted was an editorial column and not a story about my own involvement in that area of scholar

I was under the impression that the interview in which I was quoted was an editorial column and not a story about my own involvement in that area of scholarship.

Tiffany's Response To the Editor:

I was not discussing a politics - women's matters, and I wish you could read that. As I stated to the reporter, this is a political issue. In the long-term, that's what this is all about.

We are not trying to make a case that the entire system is closed to women, but that the current system is closed to women. The Women's Center, the Women's Resource Center, and other women's organizations are all working to help women in this situation, but we cannot speak for them. I think it is important to recognize that there are women who are being discriminated against, but we cannot speak for them. I think it is important to recognize that there are women who are being discriminated against, but we cannot speak for them.

Fighting the Stereotype

By Jim Hymen

Over the last two weeks, many articles, letters and columns have been written on matters concerning the fraternity system. This column contains some answers and some questions. In the past, the fraternity system has been tremendously popular, but it is no longer. There is a need for reform in the fraternity system. How does the U.S. government want to change these fraternities? How does the U.S. government want to change these fraternities?

Soccer hosts Explorers

By Dan Beerholzer and Markery Dolan

The Quakers will host the University of Pennsylvania on Sunday afternoon (Franklin Field, 2:30 p.m.) in the final game of the season. This will be a very meaningful match for both teams as they attempt to fulfill the special requests of their fans and show the respect they have for each other.

The most effective way the Quakers can best prepare for this game is to work together and play as one team. In the past, the Quakers have struggled in the midfield, often losing possession of the ball. In this game, we will work together to dominate the midfield and control the game.

Activists gather to condemn U.S. aid toNicaraguan Contras

By Robert Wiseman

Permitting national and local leaders to take up the call to fight for an end to U.S. support of the Contras in Nicaragua is the task of the Benjamin Linder Peace Tour. On Tuesday and Wednesday, Linder spoke to Penn students, faculty, and community members, along with other activists at the University. Linder discussed the importance of ending U.S. support for the Contras and spoke on the need to mobilize public opinion against the government's policies.

“Benjamin Linder was a great young man. He died in 1992 from a landmine explosion in Nicaragua. He was working on a project to demine the area around the fight and the Contras. According to Linder's friend, he was a hero in the struggle for peace and justice. He was a true inspiration to us all. His legacy lives on in the efforts of the Benjamin Linder Peace Tour,” said Linder’s brother, John Linder.

Linder, a graduate of the University of Pennsylvania, was a robotics engineer who volunteered in Nicaragua to help with landmine detection. He was killed in the line of duty while working on a project to clear mines from a village in northern Nicaragua.

Linder was a devoted peace activist and a vocal opponent of U.S. support for the Contras. He was a co-founder of the Benjamin Linder Peace Tour, which is dedicated to raising awareness about the Contras and the need to end U.S. support.

Linder's death was a tragic loss for the peace movement, but his legacy lives on in the work of the Benjamin Linder Peace Tour and the ongoing struggle for peace in Nicaragua.

The Benjamin Linder Peace Tour is a grassroots organization that works to educate people about the Contras and the need to end U.S. support. The tour aims to raise awareness about the Contras and the need to end U.S. support and to mobilize public opinion against the government's policies.
M. Tennis seventh at ECAC's

By Tiffany Sparks

Over the weekend, the Penn men's tennis team won the Ivy League Championships. Head coach Virginia Vitali, who has been at the helm since 1981, said the team is "excited to be going to the NCAA Division I championships for the second consecutive year.

The victory came in the form of a 6-1 defeat of Yale in the first round of the tournament. Penn then went on to win 4-0 against Brown in the semifinals and 3-1 against Dartmouth in the finals.

"We're really proud of our guys," Vitali said. "They've worked hard all season and it's great to see their efforts pay off."

Cornell wins on top of Ivies

Continued from back page

The Ivy League tennis championships were held over the weekend at the University of Pennsylvania.

Cornell head coach Mauro Basaglia said, "Cornell is the best team in the Ivy League. We're the only team that can beat Harvard."

But it didn't look that way at first. In the first round, Cornell defeated Harvard 3-2.

"We were nervous," Basaglia said. "But we got a break in the tie-break and we won the first set."

In the semifinals, Cornell faced Dartmouth. Again, it was a close match, but Cornell came out on top 4-0.

"We played well," Basaglia said. "We were ready for this match and we showed it."

In the final, Cornell faced Penn. It was another tough match, but Cornell emerged victorious 4-0.

"We played our best," Basaglia said. "We were ready for this match and we showed it."

Cornell finished the season with a 5-1 record in the Ivy League, while Penn finished with a 4-2 record.

"We're happy with our season," Basaglia said. "We've had some ups and downs, but overall we're happy with the way we've played."

The Cornell team will go on to compete in the NCAA Division I championships, which will be held in May.

"We're excited to see what we can do at the national level," Basaglia said. "We've worked hard all season and we're ready for this challenge."

**Brown freshmen beat Penn, 21-6**

By Jill Krupp

Last Friday's freshman football game between Brown and Penn was noted more for its talent than its traditional rivalries. An unexpected outcome, however, did prevail as the Quakers managed to edge the Bears, 21-6.

The Quakers led by seven in the first half of the game. The contest began with a 42-yard touchdown pass from junior quarterback Bob O'Brien to fullback Jon Rosan. The Quakers then added a field goal from senior kicker Rich Friccdrubg to widen the score to 10-0.

**Brown's football team lost its second consecutive game, Friday, this time to the Brains, 21-6.**

Penn head coach Charlie Powell said, "There were 41 seconds between our first and fifth runners. We really cut them down." Powell then attributed the loss to the times they were inside the 20-yard line. "...we didn't put it in the end zone. It really cut us down." Powell went on to say, "We couldn't control our own defense. We were out of position, but we didn't correct them." Powell also complemented the Quakers by saying, "We were stopping to help patch them. So they really got good, quick reactions and he seems to be gelling better." These two factors combined to help the Quakers jump ahead by two touchdowns in the first quarter. However, the Quakers failed to maintain their lead, allowing the Brains to score on a late touchdown pass on the run to flanker Jon Rosan.

**Brown freshmen beat Penn, 21-6.**

"We're getting better," Powell said. "We're not making the same mistakes that we did last week. We're improving." O'Brien completed 18 of 28 passes for 152 yards and two touchdowns on the afternoon, and kept the offense moving.

"He's got good feet," Wagner said of O'Brien. "He's got good, quick reactions and he is beginning to feel comfortable." Wagner added that O'Brien is "going to be an offensive leader." In the first quarter, the Quakers had racked up turnovers, Colletti grabbing the ball after two Brains fumbles and intercepted Quakers' quarterback Roger Vernete three times, consequently giving the offense a good field position. All the Quakers' possessions led to touchdowns.

In the first meeting, Quakers' passing game hurt the Quakers as they won the game 32-27. In the second meeting, however, did not present a problem. The Quakers had seen before when they were wearing longer spikes, and by taking other precautions necessary to avoid injuries.

The Quakers' defense was on task, holding the Brains to two touchdowns and two field goals. The Quakers' defense caused turnovers, but we couldn't take advantage of them. The Brains' offense was led by junior quarterback Bob O'Brien, who completed nine of 18 passes for 152 yards and one touchdown. O'Brien, however, did not have the same success as he did last week. O'Brien completed 14 of 27 passes for 152 yards and two touchdowns on the afternoon, and kept the offense moving.
