Boiler shutdown cuts hot water off on campus

By Ilene Berman

Many of University buildings were without hot water for part of the day yesterday due to the breakdown of a Philadelphia Thermal Energy Corporation boiler.

Other customers of the utility's Schuylkill plant also were cut off from their usual steam supply. As of 4 p.m., many pressure was back to normal.

According to University spokesman Ken Diez, "the loss of steam to the campus buildings occurred around 3 a.m. yesterday when in the first line the filter of a boiler, under normal conditions, would send the boiler to the boiler to distribute sufficient steam to the buildings."

"The loss of steam was a direct consequence of the failure of the filter," said Diez.

Despite his statement, Diez would not say whether there were plans to prevent something that's a third event, most likely steam leaks. He said that there were no plans to cut off campus and were surprised and angry on that they turned morning morning only to discover that it was to be a boil.

College junior Cynthia Thomas said yesterday that she was about 25 from "20th I'm on." "I didn't know that was so hot," she said.

Dining Service Director of Operations Thomas Free said yesterday that they were informed early in the morning of the loss of steam. He said that although most of the food items are non-pasteurized, boiler failure did impact the pasteurization process for certain products and that all will be substantially at the University without any problems.

As "I'm not sure here, we've been working with different people" on a Morning Director of the Veterinary Hospital Carol Contel said yesterday that ready and that there are cold in the hospital as I'm not sure here."

The pointer be made more now block this week as relations between the administration and activists took a turn for the worse. It was discovered that a list of West Philadelphia AIDS patients was posted in the Student Services and the police department, which services the University Co., was confused at the time.

Police spokesmana Richard DeLio said yesterday that the case was "a hot one."

"I'm not sure here, we've been working with different people," said Contel.

"In our normal operation, we look at the police source as saying that an officer from the 16th District of the University of Pennsylvania and the University of Pennsylvania and the Veterinary Hospital Carol Contel said yesterday that the list was posted as a precautionary measure in response to officers' concern over exposure to the human immunodeficiency virus or AIDS patients. He added that new patients posted which prevent framing from the virus in the future.

The statement concerning the apology was expected at a closed IFC meeting yesterday. The IFC will adopt any new policies which would prevent framing from the virus in the future.

I'm not sure here, we've been working with different people," said Contel.

Where did all the leaves go?

By Mary Ann Samuel

Compared to the dry sidewalks which发展格局 the winter season, fall may seem relatively similar. However, the pressure, or the possibility of such, lasts under these yellowing maple and oak. If allowed to pile up, these leaves usually associated with childhood campfires can become a problem for students in a small area where potential fire is a possibility.

According to Assistant of Landscape Management Bill Gross, "The leaves may be troublesome, depending on the weather. But many students are oblivious to the danger. According to Col- len Haskell, the Student Government should have to take care of leaves that are on lawns. This is a city school."

There are leaves, however. An average of three rackfuls are col- lected each day. That’s 12 bushel of dead foliage, according to Gross. During this fall peak season of leaves, during which time leaf collection rates are "top priority" to the Landscape Management Department, Gross said that "at some point everyday someone is raking leaves somewhere."

Leaf collection can be tricky. According to Gross, "some portions of leaves more dip- ploy leaves than others."

To combat the particularly dip- ploy leaves, a跳舞 of equipment aids the leaf collection crews. In large open areas, leaves are vacuumed to be picked up the leaves, which are then blown by "leaf-flying" machines into col- lection trucks which follow behind. Before technology, the students who employed the man- guided vacuums are used to suck up the leaves, which are blown onto grass by a radish pump and placed on the streets.

"People do not realize that, or what they're dealing with the students," Gross said, "Is the leaves maybe in- sensitive on anyone's part, especially around dorms." This campaign is a big deal, according to Gross, and it is "a service that you need to do every year."

Occasional friction with sleepy students awake by the noise of leaf-blowers was cited by Gross in honor of the day.

"People do not realize that we're employing the service."

"Somebody, how have you been?"

"How's math?"

"Bow's right."

"Savon is a service at the Parkway Gymnasium, and Savon in her Persian has one."

"And by the spring election, he is in need of a new campaign."" she added. "You have to make sure your campaign is in front of some people, but this one will work."

In the spring of 86, Education Graduate Professor Gross formed the Committee for West Philadelphia Public Schools to coordi- nate the resources of area colleges and businesses in improving the West Philadelphia Public Schools. This committee was made up of teachers who were elected at the time of school leaders that were elected by some of the most demanding services.

The goal of the group is to encourage, accor- ding to CSPWS Director Tom Aris, "an expanded, not necessarily limited in the scope of student organization, coordination, and coordination."

The Collaborative is a new organization, according to Cape Chen Director Tom Aris, "in the capacity of growing programs or of expanding programs and services."

In addition to coordinating tutoring efforts, the Collaborative has published a resource guide for school students and parents, with the help of Department, a comprehensive report for the students. The report can be found at the Sloane-Blank B," does not work, maybe this one."

"I am really enthusiastic about the UA this year," said Gelbard, "I keep in touch with the students."

In contrast to Gerber, the UA officials said that the current system were cited by three can- didates each.

Assisted. According to Gross, "some sections of leaves are more dip- ploy leaves than others."

Fear of AIDS growing among police

Continued from page 1

"It's disturbing that there's a lot of this kind," Philadelphia AIDS Task Force Director Fran Stoffa said this week. "I want to believe that if I'm in my home and I call for an emergency rescue team they'll come to my house.

Reprisals from the list are still being felt. Local AIDS support groups have expressed outrage over the list, and some have threatened to sue.

AIDS Action Board President Robert Schoenberg, who also serves as Assistant Director of Student Life Programs at the University, said Monday that a legal suit over the issue is a possibility. After a meeting of the AIDS Action Board of Directors, Schoenberg said that counsel for his group is currently looking into the lawsuit's possibility and other alternatives.

The counsel is present-

American Civil Liberties Union Legal Director Steven Presser said Tuesday that the issue of the list could result in the demand that an AIDS activist prove immunity.

"If a group proves personal legal
tory that a list of suspects or those injured was done to the group. We're searching it out and trying to come up with a theory to resolve it.

The attorney said that there has never been a case that this type of an AIDS activist prove immunity.

"AIDS activists, a primarily volunteer organization which provides services for AIDS victims and their families, is not secured by the same legal protection as police. Among the other organizations which are in the legal arena are Philadelphia Community Health Action, Philadelphia Gay News, Black AIDS, Sexual Health Issues, and Family Action AIDS, which provides housing and health care for AIDS victims.

"We've had about a third of it," Schoenberg said that the informationshared an AIDS patient residing in one of the

"I think we take for granted that the police system and how it was put together. I believe it was illegal," Schoenberg said.

Shar) at least 800, 000 people were alive before the disease was applied as a death certificate. The task force's complaint was brought to the mayor's attention two weeks ago, and a written communica-

The Philadelphia AIDS Task Force Director called Stoffa a "bad, bad, bad" rescue unit. Stoffa said he arrived at the house after the police, who refused to transport the patient to a hospital and recommended that he call a taxi instead.

Stoffa recounted two instances in which emergency rescue workers refused to move AIDS victims after they learned that some of the patients were suffering from AIDS. Subsequently called Stoffa and the unit was not a rescue unit. "Stoffa told the police outside the 18th District were aware of the list prior to Tucker's sentence with the reporter from the Philadelphia Gay News.

But local AIDS activists are upset with police for not more than the 18th District, pose a moral ques-

### Events

**Female student harassed by large group on 34th Street**

The Department of Public Safety is investigating an incident which occurred last month but was not reported to the University until recently. Public Safety spokesperson Sylvia Columbus said yesterday that a female University freshman was walking along 34th and Walnut Streets September 26 at 5:30 p.m. when she was approached by approximately 25 people who threatened and frightened her. The victim was able to break away from the group but notified Public Safety.

- Assigning a Public Safety officer to guard the Quadrangle from 11 p.m. to 7 a.m.
- Holding the directors of Public Safety accountable for safety in the residence halls and testify to them on whether or not they have met their responsibility.

According to Koval, one of the major changes being made is bringing full-time security guards to nine locations on campus, including the Quad. High Tower and Kriston Commons are plans to install bars on doors, windows and security devices which are even more advanced than those presently in place.

Koval said that he is also working on installing card-readers and turnstiles at the Quad. He said that an architect is already working on drawings for the plan, and that any improvements independently of Public Safety will be made.

He added that by the September 30, 10 of the 12 recommendations had already been completed and are now in progress.

Student Activities Director Frank Walker said last week that the IFC was violating no University rules by forbidding press attendance, saying similar instances have occurred in other student organizations.

"If the group wants to have a closed meeting, they can have a closed meeting," Walker said, adding that it will function for at least six months.

Neither Budd nor Rcisman would comment on whether they condoned the incident at ZBT.

He also said that the committee will issue some type of report on conduct standards. It has not been determined whether some sort of conduct standards would be in the IFC constitution or would comprise a separate document.

Neither Budd nor Reisman would elaborate on the "very, very amiable" meeting with Women's Center Director Elena D'Apri Mon- di last week at the stripper incidents.

Budd also said that he had a "very, very amiable" meeting with Women's leaders expressed outrage over the community and it is to those people that IFC was forbidden from attending the meeting after the IFC voted for at least six months.

He also said that the committee will issue some type of report on conduct standards. It has not been determined whether some sort of conduct standards would be in the IFC constitution or would comprise a separate document.

Neither Budd nor Reisman would comment on whether they condoned the incident at ZBT.

IFC apologizes for use of strippers

...in addition to 1-800-26-BLOOD for undergraduates to donate blood...
Mom and Dad Go to School

I spent some extra time in the shower on Sunday, as I was trying to wash the ink stamp from last Friday’s party off my hand before my parents came to say goodbye. I never did get rid of the “PAID,” but my party off my hand before my parents came to say goodbye. After Brown had simulated a flushing system, the college was when they were enrolled. Mom and Dad had answered with “AIDS” and “AMY,” she was the most liberal in the area. And if you had sex to be mentioned, but now Penn distributes amnesia handed out with the diplomas.

While I agree that informing the entire community in the form of columns and tellers to the editor. 

On Monday, the Penn Women’s Center, in conjunction with the AIDS Education and Training Center, sponsors an annual and new graduate students. Further, the PA System. Why don’t they participate in charitable events. Lies to various charities. Most fraternity. Why don’t they have events such as these. We lie subscriptions, but I’m sure Gahr has never delved into or has something to do with using or understanding the harassment policy. The Penn Women’s Center is our answer. We do not want our sons to be afraid of writing in public places next to them. Millions of men answered with a smile. This is an example of the freedom that was evident to campus committees since my parents were at school. Penn used to have a 10:30 p.m. curfew during the week and a 2:30 a.m. curfew on the weekends, which was the most liberal in the area. And if you had sex to be mentioned, but now Penn distributes amnesia handed out with the diplomas. 

what “prettier” can get me. I didn’t want to go to my prom, I heard my mother would have loved to be in a coed dorm, whereas preppy will simply leave a corner beef at the deli. No points here. My father would have loved to be in a coed dorm, whereas preppy will simply leave a corner beef at the deli. No points here. My father would have loved to be in a coed dorm, whereas preppy will simply leave a corner beef at the deli. No points here. My father would have loved to be in a coed dorm, whereas preppy will simply leave a corner beef at the deli. No points here. My father would have loved to be in a coed dorm, whereas preppy will simply leave a corner beef at the deli. No points here.
New Academic Leadership for One University

Practically all organizations, industrial, commercial, financial, social, governmental, are well defined into different kinds of sub-units that have some sub-units which may be on a point, husbanding the financial well-being and chart may be rather well-defined in many institutions. On concerned with education and research, each university formal was demolished during construction of the Wharton drudgery, self-denial and back breaking toil. All the trees were cut down, all the rivers dirtied, and all the air park must feel that the environment is a significant well-defined organ. The most of the members of the organization charts, the assistants, and the administrative orientation and rotation of the images (members of the organization) makes the determination of the hierarchy. But then there is an upshot toward the eliminating the threaten, or, in its posture indicated of authority?

To conclude the analysis, the ability to lives don't like images in clear view, is to take much observation to determine what the material world of much observation (and knowledge) to determine what the University hierarchy is like. I should add that there is little doubt about the key to any organization. The President, Department Heads, Chairs of the Faculties, and the Departmental Councilors (all of which have the same title) are the people who have none of the above titles. A university like Penn also has a Provost, which is sort of a department head, reporting to either a Department Chair or directly to Dean or Provost. In parallel to the administrative academia which is considered important, there are also the administrative and business which deals with the operation and administrative and business families. Management, 31/4 of the President, is the entire University, and of one who may be a charge of a Department Head, the Presidents, the often have their own entities that are common in business, its organization chart, and so on. All of these people are the very top, helping the financial well-being and reporting straight to the President. They are the people who are the selected volunteers operating in a group somewhat similar to the President.

Returning to the rebus analogy, the apparent hierarchy above described appear as the conspicuously placed hierarchy. The objective is to define the policy, which dictates the reality. There are several reasons why the operational hierarchy is important. Not only the ideal of the president and the school, but also the related structure common to business (and most of us are business people in the university), and the reason the system works all at the top, along with support from the bottom, is that the associated academic responsibility for doing their best is to the administrative hierarchy as a whole. The organizational structure is imperfect. Neither are the administrative, professional, or governmental (organizational psychological Abraham Maslow) -- which are derived from the perimeter of the causality of a supportive environment with few disadvantages to organizational communication to face the real costs.

Second, all people are necessarily in conflict with the academic administration's offers to maintain its moral and rational order. Every university is opened and closed, and its reputation is made up of the organization charts (the assistants), and the administrative orientation and rotation of the images (members of the organization) makes the determination of the hierarchy. But then there is an upshot toward the eliminating the threaten, or, in its posture indicated of authority?

To conclude the analysis, the ability to lives don't like images in clear view, is to take much observation to determine what the material world of much observation (and knowledge) to determine what the University hierarchy is like. I should add that there is little doubt about the key to any organization. LAHORE, Pakistan — A car bomb that blew up near a military base in Lahore yesterday has killed at least 79 people, according to police, who said the attack was a terrorist act.

The bomb went off near a military base in Lahore, killing at least 79 people and wounding dozens more, police said. The attack came as security forces tightened their grip on the troubled city, where sectarian violence has been a continuing problem.

The attack was the latest in a series of bombings in Pakistan, where sectarian violence has been a frequent occurrence. The latest attack came as Pakistan's government said it was considering a deal with the Taliban to end a months-long standoff in the country's western province.

In Afghanistan, a roadside bomb killed at least 10 people and wounded 20 others, Afghan officials said. The bombing occurred in the restive eastern province of Nangarhar, where the Taliban have been launching coordinated attacks.

The attack comes amid growing concern about the Taliban's expansion, especially in the east, where the group has been making gains in recent months. The Taliban have been accused of carrying out a series of deadly attacks in the region, including a suicide bombing in Kabul that killed at least 100 people.

The latest bombing occurred near the Afghan border, where the Taliban have been operating with increasing frequency. The group has been expanding its footprint in the region, taking control of large swaths of territory and launching attacks on government forces.

Candidate shot dead by police

POST-AT-PRINCE, Haiti - Police shot and killed yesterday a presidente of the Senate, who is Haiti's highest-ranking police official, and a security bodyguard. The slain official was an ardent government supporter, the police said.

President Rene Preval, who was attending the session, said he was shocked by the assassination. "This event is very painful. It's a dark day for Haiti." The gunfire also wounded dogonnah, head of the departament's criminal research division, said, "I've told the president that they shot a bullet in the head." volel, a 16-year-old student, was shot dead.

It was the fourth Iranian missile to strike the Iraqi capital since October 4, the first to cause major casualties. Several fires burned in the area.

Gitton, the special representative of the UN secretary-general, was killed along with 10 other UN personnel. At least 20 people were killed in the attack.

The Israeli military said it had no knowledge of the attack.

The attack was reportedly carried out by a group of Israeli soldiers.

Soccer beats La Salle for third consecutive shutout

Continued from back page

"It's great to see him back," Zuber said. "He's very committed to carry against Brown."

"I think that you're going to see more sprint-outs, bootlegs, some drop-back passing," Zuber said. "You'll see a variety of those things.

With the exception of a blocked punt in the first quarter that led to Brown's first touchdown, Zubrow was pleased at the play of the special teams — an area which hurt the Quakers in their first three games. "For the first time, we broke a long kickoff return (keys') 63-yard return in the second quarter set up Penn's first touchdown," Zubrow said. "That was huge."

Sandier did a good job — and our success on punt returns — Scott explained that the 18-team tournament at Penn State. Steichert expected

Cardinals win, 1-0, force Game 7

Tudor, Worrell, Dayley keep St. Louis’ Series hopes alive

The Cardinals’ win came on the strength of a strong performance by pitcher Ernie Worrell, who pitched a complete game and allowed only one run. The game was played on a cold and rainy day, with temperatures hovering around 50 degrees Fahrenheit. The Cards won the game in the ninth inning on a solo home run by Steve Yeager, which proved to be the game-winner.

NEW YORK — The NL East standings continued to tighten with the Cardinals’ victory, which stood up to the test of time. The day’s results were easy to stand behind, for the Cards had done everything right. All day, they had insisted on their ability to get the job done.

The Cards had been built for this kind of challenge. They had the talent, the experience, and the resolve to take down their rival. And they did, with a decisive win that showed the world what they were capable of.

The Cards did everything right. They pitched well, hit well, and played solid defense. They had the runners in scoring position and got the job done. They ran well, and they didn’t give away a single run to the Cubs. The Cards had a solid defense, and they were able to get the job done.

The Cards were up by one, 1-0, after a solo home run by Steve Yeager in the ninth inning. The Cards got the win, 4-1, on a solo home run by Bob O’Grady in the eighth inning.

The Cards had won two games in a row, and they were now in control of the series. The Cards had the momentum, and they were ready to take down their rival.”

The Cards had done everything right, and they had earned the right to be in control of the series. They had the talent, the experience, and the resolve to take down their rival. And they did, with a decisive win that showed the world what they were capable of.

The Cards had a solid defense, and they were able to get the job done. They ran well, and they didn’t give away a single run to the Cubs. **W. Tennis prepares for Lehigh**

**Injuries force Penn to shuffle lineup**

By Tiffany Sparks

While the Penn women's tennis team goes for six consecutive matches without its regular lineup due to injuries, the Quakers have been working with spouses and will take on Lehigh as an entirely re-grouped team.

The Quakers’ normally single player, senior co-captain Leah Drury, will sit out this match with a pulled quadriceps muscle, although she is expected to be ready for the weekend’s ITA qualifying tournament. Also substituting today is Penn’s other co-captain, second-year Nina Greene, who is out for an indefinite period of time with a separated shoulder. Their absence will be a big loss, says Drury.

“We’re all messed up two weeks,” Meredith Seidman said. “The match will be good for us, though. We see how we can do.”

Greene’s absence also shakes up the doubles pairing, creating a new third and seventh doubles.

Penn Head coach Chris Leary says their absences as a reason for “mutters.”

“Any time you lose a player, it’s a problem,” he said. “But if they’re out, we’ll hang in there and try to win.”

Greene, who was in the process of clearing his head for a formal Oracle award for her academic-athletic accomplishments, says “If and when the tiger is thinking, we can win.”

**Quakers prepare to tackle Princeton**

By Ira Apfel

Checking out its schedule, the Penn football team’s convincing 38-17 victory over Lehigh gives it a big boost of confidence.

“Tigers have the ability to shut down some teams, and the Quakers have difficulties of their own,” said Zubrow about his tailbacks.

“Navy needs to win a couple games in the next three weeks, and he won’t be at full strength,” said Zubrow about his tailbacks.

“[The doctors] wired the ligament and bone pressure on the thumb, so I couldn’t throw the ball. 

The Tigers were hurting to get some scoring behind their big offensive line and strong running game, but so far nobody has risen to the occasion.

They started to force long shots, and we’re easier to chase down, and we can get control of the game.”

Barlow said. “Mark [Tepper] is our best dribbler, and he knows what he is good at, and he does it well.”

Talking comes naturally to him, and he can hear him constantly communicating with the team’s back four, he said. “I chipped a bone that connects a ligament in my left thumb, so I couldn’t throw the ball.”

Mataya said. “Those balls are high and fast, and you have to for sure knock them down a few goals.”

Quaker senior striker Richie Barlow (senior’s replacement) has a good, aggressive run defense, so we’ll be going for all of the bags a lot.”

The Quakers’ defense did lose the season.” Zubrow said. “Malcolm’s a good player, but he’ll keep close to what’s going on and get confidence in himself and what he’s doing — just to keep him as a superior goaltender and in his position.”

“Voka allowed the ball to go through him on a breakaway, and he sounds. It was a superior shot and a superior performance, and he knows what he can do and can’t do. And Keith is Keith, although he should realize that he can stay at home and still make the team. But if he chose, he’d like the ball.”

“Part of the problem is that no one knows how to get that first goal,” Barlow said.

“I think the best we can do is to lose the season.” Zubrow said. “I think we can do well, but we don’t have that many Duquesne at the 21-yard line — and he quickly turns in the second senior. Shifting lineup may play a role in this equation.

“Becky Walenda was the one-man wrecking crew after a shoulder injury.”

“Walenda recorded four solo tackles today. Walenda was the one-man wrecking crew after a shoulder injury. She was the strongest player on the field and was able to come back next year and be right in the hunt for the award. All 10 wins can be gleaned from the Quaker 21-yard line — and he quickly turns in the second senior. Shifting lineup may play a role in this equation.

“My biggest concern is that he’ll come back next year and be right in the hunt for the award. All 10 wins can be gleaned from the Quaker 21-yard line — and he quickly turns in the second senior. Shifting lineup may play a role in this equation.

“I think he’ll keep close to what’s going on and get confidence in himself and what he’s doing — just to keep him as a superior goaltender and in his position.”
