Morris rejected in bid for tenure
Lindback award winner denied in second stage of tenure review

By PAUL HERMAN
Assistant Political Science Professor Jeffrey Morris, a Lindback Award winner, was forced to leave the University at the end of June after his tenure review was rejected last semester.

Morris said last night that he will not file a grievance against the decision. The negative decision came as the second level of the tenure-review process, the School of Arts and Sciences Personnel Committee.

Specializing in the field of political science and teaching courses for the College of Arts and Sciences, Professor Morris was a second-year member of the http://www.external.ca/committee that reviewed his case.

Through his attorney, Doris Hickman added that the Lindback Award winner was denied tenure without a publication record. "It's tough to get tenure without a publication record," Hickman said. The Lindback Award winner denied in his prime duty is to find a new job elsewhere.

The Lindback Award, the University's most prestigious teaching award is presented annually to four

ULM blasts fliers

By NEIL MALONEY

The United Mestican Council loudly criticized the portrayal of Mexican students in a recent series of flyers distributed around campus recently. The group has taken several actions to publicize crime statistics and students to answer problems on campuses nationwide, and several occasions to promote fraternities.

Hot Skates
Melissa Thomas, a second-semester senior, will be an Athlete Liaison to the United States Olympic Team this month at the Calgary Winter Olympics. Back Page.

ULM reps meet to improve job quality

By PATRICK ODONNELL

A committee of workers from the University Laboratory Animal Research Institute has been meeting with management since September in an attempt to improve conditions for employees.

Both workers and management in

tabled several positive steps taken since the committee's formation, but some committee members said that they believe the University should consider a wider range of topics for the meeting.

Shadley Robinson, the committee's chair, said yesterday that the committee's work has been to open the lines of communication between ULM workers and management.

"We are seeing an open line of communication and there are some changes being made to make it better, but the committee is limited in the types of issues we can discuss," Robinson said.

If we can't talk about these things we can't have any options to make a bargaining unit," she added.

The Chairal Advisory Committee was formed this fall to allow employees to express their concerns to management. Employees from the Medical School central laboratories and north from the Veterinary School, both of which form ULM. Although the groups are a whole met with management only the emergency groups have met with their supervisors several times.

U.M. may establish collection center

By VICKI SHAW

Following this month's city-wide blood shortage, University officials are considering the establishment of a permanent blood collection center on campus.

Many people involved in blood drives at the University have said that although campus blood drives have been frequent, fewer have been scheduled.

"It's a good idea to have a collection center on campus," said former center coordinator.

American Red Cross Representative Doris Hickman added that the Red Cross has strength ened recent efforts to establish a collection center on campus.

Campus freshman Rossen Evans applies pressure to her arm after giving blood at Hill House last week.

There are two ways: get an A or fail, when you are running for number one."

Russell Palmer

Wharton School Dean

"We should be proud of the contribution each of you makes to the University," he said. "We shouldn't feel sorry for ourselves."

Palmer said that his effort to recruit talented faculty has paid off. Several Wharton departments are among the best in the world, he said. "The rest are all in the top ten."

"The power of the presentation, the students, the faculty, the brand of the School, they were all impressive," Palmer said. "The forum that the students were impressed with was the presentation and the open forum for applications, career opportunities, and students, and I think it was a great opportunity for them to see what the School has to offer."

"I think it was a good opportunity for Wharton students to see what the School has to offer," Palmer said.

Tenure

"I'm not sure if it's the right time to make the decision," he said. "I think it's important that we continue to work on this issue."

"I think it's important that we continue to work on this issue," Palmer said. "I think it's important that we continue to work on this issue."
Drexel's planned expansion causes neighbors to fear 'student ghetto'

By JENNY NOTZ

To many students, the idea of the University of Pennsylvania being transformed into a "student ghetto" seems far-fetched. But it is not difficult to see how a college campus can come to dominate a neighborhood if one examines the history of the area.

The University's expansion was "a mixed blessing" for the community, said longtime Powelton Village resident and Drexel's "Curator of Student Life," Mrs. Helen Woodward. "In the fifties, it hardly looked like a college campus to me," she said yesterday. "Today I think it's one of the finest urban campuses in the country."

Under President Sheldon Hackney's administration, the University has built a series of major additions that have changed the landscape of the community. The most recent addition is the construction of a new building called "The Superblock," which houses a number of student services, including the Student Services Center.

The Superblock is a "mixed blessing" for the community, said Woodward. "I think it's a mixed blessing. On the one hand, it's a good thing for the University, on the other hand, it's not a good thing for the neighborhood."

According to Woodward, more students and faculty are moving into the area, which is causing some concern among residents. "We're afraid we're going to be overwhelmed by the student population," she said.

The University's expansion is an "about-face" from its role in the neighborhood. In the past, the University was more of a "private club," but now it is becoming more of a "public institution," said Woodward. "I think the University is trying to be more of a public institution, but it's not happening fast enough."
Rally held to protest Contra-aid

B. MARK KLEINHAUSER

A hundred of University students, faculty, staff and alumni today gathered in University Hall to protest the proposed funding for the Contra-aid program. About 12 students, many representatives of the Contra-aid committee, and several University alumni joined in demanding the Senate's rejection of the measure presented by Senate Majority Leader Bob Dole. A speaker's list, currently over 25 names long, includes students, alumni, and other University members.

The rally began at 4:30 in the 17 Logan High Rise Lounge and was addressed by several speakers, including Wharton Students' Shaun Shah, 243-4728, and the former City and County Controller, Robert Brand, a representative from the Democratic Party in Pennsylvania. Today's rally is part of the nationwide Contra-aid campaign. The rally will end tonight with the vote on the Contra-aid package in the Senate.
ULAR workers meet with management

ULAR, from page 1

One of them was to explain the procedure for the preparation of such an offering.

"This campus promotes an atm-

"in which we want to be accountable for our actions." said Ms. Human.

The university had previously been a target of complaints from the American Civil Liberties Union.

"We are committed to addressing these issues," said Ms. Human.

Her remarks echoed those of President William Edward Henry, who had previously told reporters that the university was taking the issue seriously.

"We are committed to ensuring that all students feel safe and respected," said Henry.

However, the university’s response was met with skepticism by some members of the community.

"I don’t think we’re doing enough," said one student." "I think we need to do more to address these issues." said another.

But others believed that the university was taking the issue seriously.

"I think they’re doing everything they can," said one faculty member." "They’re working hard to address these issues." said another.

Meanwhile, the university continued to work on addressing these issues.

"We are committed to making sure that all students feel safe and respected," said Henry.

The university’s response was met with mixed reactions.

"I think we’re doing everything we can," said one student." "I think we need to do more to address these issues." said another.

Unfair Compensation?

By Tommy Leonard

The Wharton Image

To the Editor:

I have just read the article entitled "The Wharton Image: Perfect Together?" in the January 25 Daily Pennsylvanian. I would like to respond to this article and the comments that Mr. Charles Cohen has made.

Although I do not agree with Mr. Cohen's views in regard to the Wharton School or his statement that the Wharton School in a bad light. It is true that many Wharton students do not feel that the School prepares them for the real world. However, this is not the case for everyone. Some of us are able to wade through the issues and problems that we face every day.

Tillard's angry accusations that "First Step is insincere in its claims of commitment to the cause." is not true. I have spoken with Tillard and I believe that he is committed to the cause. I also believe that the Wharton School is committed to the cause.

Mr. Cohen's statement that "We need a lake." is also not true. We have a lake on campus. It is called "Lake Penn." It is a beautiful place. It is a great place to relax and unwind.

Mr. Cohen's statement that "We have the rest of our lives to worry, so why overdo it now?" is also not true. We have a lot of things to worry about. We have to worry about the economy, the environment, and our future. We cannot afford to overdo it now.

Tillard is correct. The Wharton School should not be held accountable for all of the problems that we face. We need to take responsibility for our own actions. We need to take responsibility for our own problems. We need to take responsibility for our own futures.

Tillard's statement that "I hope that the DPs will review these issues and strive to give us a better understanding of the University community." is also correct. The Daily Pennsylvanian should review these issues and strive to give us a better understanding of the University community.

Letters to the Editor

Lake Penn?

By Michael Karz

The University needs a lake. Lake Penn — a central site in the heart of campus, easily accessible to everyone. A place of shady tranquil, with mid-sized palm trees, you can escape from the chaos of the outside world. You can relax, you can unwind. You can just be.

Lake Penn would bring students and faculty together. It would be a place where students could reflect on their day and have a chance to talk to each other. It would be a place where faculty could have a chance to talk to each other.

Lake Penn would be a place of beauty. It would be a place of peace. It would be a place of tranquility. It would be a place of relaxation.

Lake Penn would be a place of cooling. On hot days, you could take a dip in the lake. You could cool off and refresh yourself.

Lake Penn would be a place of fun. You could have picnics and parties by the lake. You could have bonfires and campfires by the lake. You could have concerts and events by the lake.

Lake Penn would be a place of history. The University has a long and rich history. Lake Penn would be a place where students and faculty could learn about the history of the University.

Lake Penn would be a place of hope. In a world that is often brutal and cruel, Lake Penn would be a place of hope. It would be a place where you could find comfort and solace.

Lake Penn would be a place of beauty. It would be a place of peace. It would be a place of tranquility. It would be a place of relaxation. It would be a place of fun. It would be a place of history. It would be a place of hope.

Lake Penn would be a place of beauty. It would be a place of peace. It would be a place of tranquility. It would be a place of relaxation. It would be a place of fun. It would be a place of history. It would be a place of hope.

Lake Penn would be a place of beauty. It would be a place of peace. It would be a place of tranquility. It would be a place of relaxation. It would be a place of fun. It would be a place of history. It would be a place of hope.

Lake Penn would be a place of beauty. It would be a place of peace. It would be a place of tranquility. It would be a place of relaxation. It would be a place of fun. It would be a place of history. It would be a place of hope.

Off the Wire

The origins of the unrumored, round-cut, 3.09-carat diamond are shrouded in mystery. Its latest owner was Boston jeweler Sidney DeYoung, who bequeathed it to the Smithsonian before he died in 1986. DeYoung, who was one of the first to sell diamonds in China, was closely associated with the Smithsonian's only one of the Smithsonian's only one be displayed publicly anywhere in the world. The other two are in prison hands and their whereabouts are unknown.

Because of their rarity, the red-brown diamonds are of incalculable value. A 13.5-carat diamond weighing a little less than one carat was auctioned last April in New York for nearly $1 million, a record price for a diamond of that size. The Smithsonian's are estimated to be worth at least $5 million, although Smithsonian experts doubt that its true value is that high.

Smithsonian displays red diamond

NEW YORK — Grand Central Terminal, neglected during the decades since it opened, celebrated its 75th birthday yesterday, cheered by those who fought to save the majestic Beaux-Arts architectural masterpiece.

"This is the Big B, the Gateway to New York City," Grand Central, said the mayor, who often speaks in capital letters.

'Happy Birthday!"

A major piece of a corporate campaign against the company had an annual profit of $1 million, and international union representative Lynn Koch gestured across the width of the concourse, a 300-by-120-foot expanse that rises 125 feet to a vaulted ceiling decorated with a mural of the zodiac and the five skylights in the upper level. Low in the mid- to upper-20s, the weather was cloudy, and rain and heavy overcast were expected.

Papers workers rally at Capitol building

WASHINGTON, D.C. — An estimated 1,400 union members marched to the Capitol yesterday to express their opposition to a proposed package that would have cost each worker about $1,400 a year and was aimed at keeping the railroad financially competitive.

"We agreed last week to withdraw," Biblical Studies Association Chairman Charles Cox said yesterday. "We don't know exactly when it will happen — it's in the courts."

Quaker Tones

"The benefits of that victory for the US and the BSA might be connected again are dim," he said. "We would certainly like to talk further," he said.

Experts feel government gauge points to recession

WASHINGTON — The government's latest index of economic activity, another key indicator of recession, fell in December for the second consecutive month. This brings to 12 the total number of declines since the index started being calculated eight years ago, all but one of which has been in the December-February period.

In an address to Congress yesterday, the Commerce Department reported that the index of leading indicators fell 0.2 percent in December to 103.3, the lowest since the index began, culminating in a decline of more than 10 percent during the economic downturn.

The index, which is based on 10 different factors, including new orders for durable goods and the number of building permits issued, declined in 8 of the 10 categories tracked last month. The only category that increased was the average workweek of production workers.

"This is one of the leading indicators of domestic activity," said Robert Fredrickson, head of the National Bureau of Economic Research.

Since the leading index is created to predict economic activity, the one-year decline was of special concern, with a 3.0 percent drop in consumer spending, a 5.5 percent increase in production and inventory, and a 1.7 percent decline in capital spending.

The Commerce Department's index of leading economic indicators, which measures future economic activity, was first calculated in 1951. It is based on such statistics as the number of building permits issued, new orders for durable goods and the number of jobless claims.

According to the government figures, the index fell during the last 12 months by 0.9 percent. In the last 12 months, the index has fallen 1.3 percent.

In an effort to prevent any delay or oversight, the Commerce Department said that it will work to improve the accuracy of the index and to reduce any statistical error that may have occurred in the past.

The Commerce Department index is the third economic indicator that has been released since the beginning of the year. The other indicators were the consumer price index and the personal income and spending report.

Recent economic indicators have been disappointing, with the unemployment rate remaining high and the housing market continuing to struggle.

The Commerce Department index is calculated by the Federal Reserve System and is used by economists to predict future economic activity. It is released monthly and is considered a key indicator of economic health.

In recent months, the index has shown signs of weakness, with several key indicators falling.

In summary, the Commerce Department's report suggests that the economy may be entering a recession, although it is not yet clear if a recession is imminent. The government's economic indicators will continue to be closely watched as they provide important insights into the state of the economy.

Shultz making moves for West Bank order

WASHINGTON — Secretary of State George Shultz yesterday sent Secretary of Transportation William N. transit services, particularly for the West Bank and Gaza Strip.

This move is part of a broader effort by Secretary Shultz to restructure the US government's presence in the Middle East, particularly in the West Bank and Gaza Strip, following the 1987 peace agreement between Israel and the Palestine Liberation Organization.

The move is seen as a step towards improving the delivery of transit services to Palestinians in the West Bank and Gaza Strip, who have been struggling to access basic services due to the ongoing conflict.

Secretary Shultz told Congress that the US government is committed to providing support to the Palestinian Authority to ensure the delivery of basic services to its citizens.

In addition, the move is seen as a step towards improving the delivery of transit services in the West Bank and Gaza Strip.

Micahnik tallers superb record for fencing program

"I think that my performance this past season was one of the best in the history of Dartmouth fencing," Micahnik said. "I came into the season with a goal of being ranked in the top 10 in the nation, and I think I accomplished that."

Micahnik has achieved a great deal of individual success, but he also has a strong interest in team success. He has been a contributing factor to the team's success in both the national championship and the NCAA team championships.

"I think that the team's success is what is most important," Micahnik said. "I am very grateful for the opportunity to train and develop in this environment."

Micahnik's men's and women's teams have each won a national championship, and he has achieved a great deal of personal success as well. In 1989, and the women did it in 1988.

"Having both competed and coached," Micahnik said, "has given me a T Ruddick becomes star for fencing program in fencing."

The Tigers featured three sweeps in front of the Penn women's seniors. But they did not内分泌 their best records in the 1990 and 20th century.

Although Columbia's name does not often surface in division-I sports, it was an integral part of the Quakers' junior varsity basketball team. And this weekend was no exception. Bronze medals in the United States Olympic Committee's 1984 Games, and second to the Quakers. A Division III

Notes

Depth and talent gave the Quakers a clear advantage, whereas Swarthmore -a team with relatively few seniors- looked to its older players to lead the way. The Quakers were early, 24-8.

But Micahnik's victory paved the way for Penn's victory, as the Quakers managed to score more points, 73-74, en route to an easy victory.

McMahon twists right ankle; Duncombe tries to shed weight

By THOMAS HILL

McMahon is now a second-semester senior. She will be a part of the Quakers in the upcoming season. As a coach, he expects the same dedication to the sport of figure skating and the same determination to succeed that he has shown in his role as an athlete.

Peter Thomas leaves for Friday, she'll have completed her final season with the Quakers. She will feel the need to watch every move that they make when I'm the figure skating judge, she said. I think it if we want a couple of years after I quit skating, I would be a lie

The Tigers trailed Yale Saturday for most of the game, before taking over in the final minutes, and winning 73-74.

The Tigers dominated the rest of the game, and solidified their status, along with Penn's, as one of the top teams in the Ivy.

The j.v.

McMahon

trip to the Olympics to Calgary

The year was 1985, and Melissa Thomas was at a crossroads. After devoting years to figure skating—she was a freshman at nine, a senior at 17—she was finally ready to make a decision. She had spent 13 years training for the Olympics, and she was ready to make a choice for her future. She was ready to move on to the next stage of her career, and she was ready to make a statement. She was ready to compete.
