U. to increase security budget by $1 million

By HELEN JUNG

Heilen Jungen and Murphy Lutton have added $1 million to its security budget — a 7 percent increase from last year — in order to fund its security efforts at the new campus. Senior Vice President Maria Whittington said that the decision was due to a "space revolution" on campus.

Whittington explained that the increase in funding would be used to improve security efforts on campus. The new budget includes an increase in the number of guards, the purchase of new security equipment, and the creation of new security positions.

"We have to be proactive in our approach to security," Whittington said. "We can't wait for something to happen."

In addition, the University has created a new position for the Vice Provost for Security, which will be filled by a senior-level executive.

Senior Vice President Maria Whittington proposed a wide range of measures aimed at improving on and off-campus security. These include:

- A new security budget
- An increase in the number of guards
- The purchase of new security equipment
- The creation of new security positions

Council members clash on diversity education

Programs to be scheduled for the fall

By HELEN JUNG and LYNN WERTZEN

"We need to address the issue of diversity from the very beginning," council member said. "Diversity is a fundamental part of our University."

The Council members are divided on how to approach the issue of diversity education. Some members believe that diversity education should be mandatory for all students, while others believe that it should be optional.

"I believe that diversity education is essential," council member said. "We need to prepare our students for a diverse world."

U. grad robbed at 40th and Sansom

By CHRISTINE LITTWIN

University police arrested a 14-year-old and charged him with robbing a University student while she was sitting in a car at 4th and 40th streets New Year's Day. Public safety impact Thomas Messner said last night.

According to Messner, the suspect allegedly approached the student at 2:00 p.m. before attacking him and ordered her to turn over her belongings.

The woman reported the crime immediately to police, who found the suspect moments later with a single sterling.

Police located all of the stolen items, according to Messner, except a bank card which he said was stolen.

In an unrelated case, Messner said a man snatched the purse belonging to the owner of a University student at the walkabout on the 40th block of Chestnut Street.

Chemistry grad student commits suicide in lab

By CAREN LISHER

A chemistry graduate student committed suicide last month, reaching the second suicide graduate student this academic year.

The 31-year-old's name, whose name police would not release last night, was found December 17 in a chemistry laboratory in a sitting position, according to police. Thomas Messner said.

A search for the student began after he did not report for work last Wednesday. Messner said.

Series of Quad fires blamed on arson

By BARRY SABOL

Over 44,000 gallons of water freed Steinberg-Dietrich Hall late last month when a water pipe from being about 90 inches in diameter, according to the police report. The water escaped through a hole in the pipe, leaving the building full of water and causing extensive damage. The University is currently investigating the incident and is working to determine the cause.

The fire, which was first reported at 2:30 a.m. on December 17, 1989, initially involved the first and second floors of the building. The fire was contained to those floors, but heavy smoke and heat spread throughout the building, causing it to be evacuated. The cause of the fire is currently under investigation.

According to the police report, the fire started in the first floor of the building and quickly spread to the second floor. The fire was extinguished by firefighters who arrived on the scene within minutes. The cause of the fire is currently under investigation and the University is working closely with the police department to determine the cause.

Wharton lab gets $1.7 million damage to Wharton building

By JOHN STARR

A $1.7 million grant from the Wharton School will be used to expand the lab facilities in the newly constructed Steiner-Dietrich Hall.

The grant, which was awarded to the Wharton School by the National Science Foundation, will be used to fund the purchase of new equipment and to renovate existing lab space. The grant will also be used to support research projects and to hire new faculty members.

The grant will enable the Wharton School to expand its research capabilities and to attract new faculty members. The grant will also support the university's efforts to improve the quality of its graduate programs.

Graduating...on to Graduate School?

By SOPHIE BARS</translation>
The University's long-term plans include such proposals as expansion of housing opportunities and redesigning public safety patrol sectors.

Diversity

PROGRAMS, from page 1

Frequent survey results indicating an "overwhelmingly positive" response to the eight-hour Labor Day diversity awareness sessions.

But discussion shifted from the immediate issues of diversity, implementation and future of the diversity programs.

Several faculty members and students voiced support for the diversity programs. Black Student League President Rodney Brown said the sessions are necessary, adding that "we can't simply turn around and say, 'Well, the guys don't do it.'"

But other faculty members who have long opposed the seminars maintained that the programs are unnecessary.

History Professor Alan Kees said while the diversity seminar program was "less intrusive," and "less psychologically manipulative," than he feared, the session still lacked "content integrity" and inhibited free speech.

Each year Council members also criticized inaccuracies in literature distributed in Labor Day diversity sessions.

Morrisson responded to Dolfrnan's comments in other classes. But a fact-finding committee never found evidence of errors.

Whittington said in September that he didn't think it was necessary.

A Modest Self-Help Guide

By Ethan Pines

You have those pathetic individuals who did campus, Philadelphia and most of our great country— those "homeyers" ones? What is wrong with these people? Don't they know that angle from losing balance, they make the environment so vicious for those who live property? Don't they have any self-worth?

I think it is high time someone set that straight. I know I'm not the first person who wanted to do it, but I believe the following ad

will motivate these people to do what we all do at least some of the time. It's called: You Are Worth It. What follows is a brief essay by New York Times columnist You Are Worth It. It goes on to explain how self-worth is self-affirming, that it's not just a matter of feeling good, but of living a good life. As you read, I hope you'll begin to see how important it is to be worth something. I also hope you'll start to think about what you can do to help other people feel worth it.

As for the self-worth essay itself, I think it's a good start. I hope it will help you start to think about what you can do to help other people feel worth it.

Now, let us consider the young woman who was quoted earlier. She talks about how she feels about herself. She feels like she is not good enough. She feels like she is not worthy of anything. She feels like she is not worth anything. She feels like she is not worth anything.

This is a common problem. We all feel like this sometimes. We all feel like we are not good enough. We all feel like we are not worthy of anything. We all feel like we are not worth anything. We all feel like we are not worth anything.

But what can we do about it? What can we do to help other people feel worth it?

One thing we can do is to start to think about what we can do to help other people feel worth it. We can start by being friendly to other people. We can start by being kind to other people. We can start by being helpful to other people. We can start by being supportive of other people. We can start by being encouraging to other people. We can start by being understanding to other people.

Another thing we can do is to start to think about what we can do to help other people feel worth it. We can start by being upbeat to other people. We can start by being positive to other people. We can start by being optimistic to other people. We can start by being confident to other people. We can start by being resilient to other people.

And yet another thing we can do is to start to think about what we can do to help other people feel worth it. We can start by being patient to other people. We can start by being forgiving to other people. We can start by being understanding to other people.

But let us not forget that this is just the beginning. There is so much more we can do to help other people feel worth it. We can start by being compassionate to other people. We can start by being caring to other people. We can start by being loving to other people. We can start by being devoted to other people.

So let us not forget that this is just the beginning. There is so much more we can do to help other people feel worth it. We can start by being compassionate to other people. We can start by being caring to other people. We can start by being loving to other people. We can start by being devoted to other people.

And the reason we can do all these things is because of the power of the principle of self-worth. It is the principle that says that we are worth something. It is the principle that says that we are valuable. It is the principle that says that we are important. It is the principle that says that we are significant.

But let us not forget that this is just the beginning. There is so much more we can do to help other people feel worth it. We can start by being compassionate to other people. We can start by being caring to other people. We can start by being loving to other people. We can start by being devoted to other people.

And the reason we can do all these things is because of the power of the principle of self-worth. It is the principle that says that we are worth something. It is the principle that says that we are valuable. It is the principle that says that we are important. It is the principle that says that we are significant.

Bush renews push for capital gains tax cut

ORLANDO, Fla. — President Bush strutted a constrained stance for the 1990 congressional session yesterday, complaining that "it is time for lawmakers to approve and send to the White House proposals...holding for months.

Spring capital gains will be cut back, Bush declared, "I am sick and tired of the demagogues who call this a priority. Bush declared. "I am sick and tired of hearing their rants."

Democrats have opposed the bill on grounds that it would be the death knell for homeowners who do not have the means to pay high capital gains taxes.

Many Democrats in Congress have opposed a reduction in capital gains taxes as a benefit to the wealthy. The measure is expected to pass, but with significant modifications.

Bush emphasized his legislative hopes in a speech to 8,000 delegates to the annual convention of the American Farm Bureau.

The capital gains legislation's support is important because it could provide the nation's farmers with a much-needed infusion of capital.

The bill is designed to help farmers by providing a capital gains tax cut on the sale of farmland. Bush reminded his audience that the farmer's way of life depends on the land.

On a separate issue, Bush also won congressional support for a plan to reduce the nation's trade deficit. Bush said, "The result is that we will pay our way and be able to sell our goods." The plan includes measures to reduce the trade deficit.

Saying a capital gains bill would be a top priority, Bush declared. "I am sick and tired of the demagogues who call this a priority. Bush declared. "I am sick and tired of hearing their rants."

Saying a capital gains bill would be a top priority, Bush declared. "I am sick and tired of the demagogues who call this a priority. Bush declared. "I am sick and tired of hearing their rants."

Democrats have opposed the bill on grounds that it would be the death knell for homeowners who do not have the means to pay high capital gains taxes.

Many Democrats in Congress have opposed a reduction in capital gains taxes as a benefit to the wealthy. The measure is expected to pass, but with significant modifications.

Bush emphasized his legislative hopes in a speech to 8,000 delegates to the annual convention of the American Farm Bureau.

The capital gains legislation's support is important because it could provide the nation's farmers with a much-needed infusion of capital.

The bill is designed to help farmers by providing a capital gains tax cut on the sale of farmland. Bush reminded his audience that the farmer's way of life depends on the land.

On a separate issue, Bush also won congressional support for a plan to reduce the nation's trade deficit. Bush said, "The result is that we will pay our way and be able to sell our goods." The plan includes measures to reduce the trade deficit.

Tiger's will perform a lay-up drill to cut off the passing lanes, the shooter on the perimeter. If they are to be able to score easily in the paint, the Quakers could not get back to the perimeter or defended against the long jumpers after helping out inside against Mueller. The Tigers are deadly once they turn around and try to score. We have the lead. Their patient offense means that there are less possessions for each team, and consequently less opportunities for Penn in transition and makes a wonderful basketball.

"I'm sure there were a lot of reasons why Penn played the Ti-
gers' excellent floor balance result-
ing from Carill's offense. The reason they didn't cut out for three-
jects is that when you help him, it's that much easier. Now, you can see those passes out for three-

The Daily Pennsylvanian
Trip is California nightmare for Men's Hoops

Jerry Simon

PENN basketball players got off to a fast and hot start and led halftime 49-46. It would not hold the lead for long.

In the first game against California, the Gaels hit three of their last five shots with 23 seconds left...
Keys, Ligos star in Ivy Bowl victory

Ivy Bowl memories linger for Keys, Ligos as teams meet again

Keys scored from two yards out. Ligos said he would remember and always be proud of this game.

"I learned this was basically that team against the other Ivy League. We were the first to win an Ivy Bowl. Unbelievable. We come together as a team, as humans. I felt that was a good experience for me. People, it's like a minority in a big civilization. It was an exciting experience for all of us."

While in Tokyo, the players spent their mornings working on non-contact drills and their afternoons practicing on the Tokyo Tobacco's field. At night, many players formed a band to play jazz in the Imperial Hotel's lounge.

"The trip was an exciting experience for all of us." Keys added.

According to Jim Bukata of the International Relations Department, making the Ivy Bowl an annual event is something many people should be proud of.

"It was very unfortunate that this did not occur. According to what I heard, your team should come back to Japan and play us once more." Bukata said.

Attention graduate and professional students:

Applications for Graduate Staff Positions in the College Houses & Living-Learning Programs for the 1990-91 Academic Year are Now Available.

Positions available:
• Graduate Fellowships
• Administrative Fellowships
• Program Directorships

Graduate staff positions offer:
• Free room in a College House or Living-Learning Program
• Five-meal-per-week dining plan for College House positions
• The opportunity to live and participate in a stimulating intellectual and cultural community with resident faculty, graduate student colleagues and undergraduates.
• Administrative Fellowships and Program Directorships offer an additional stipend.

Information and applications are available in the:
College House Programs Office
Upper Lobby, Suite D
High Rise North
3901 Locust Walk
Philadelphia, PA 19104-6081
898-5551

Application Deadline: January 31, 1990

ATTENTION STUDENTS, FACULTY, AND STAFF

You can purchase a Zenith Data Systems computer at Factory Direct Pricing from The Computer Connection.

There is also immediate delivery on all university-supported Zenith products.

For more information, please contact:

The Computer Connection at the bookstore
3729 Locust Walk
898-6934

A full-time university I.D. is required with purchase.
M. Hoops loses fifth straight, Tigers win 56-44

When the Quakers take on the Ti-
ergous who played well against Penn last

Merrill Lynch is an Equal Opportunity Employer.
DALLAS — The NCAA ruled that Georgia's ability to compete in postseason play is dependent on the requirement of Proposition 43 yesterday but kept the heart of the academic rules for incoming freshman athletes intact.

By a 238-61 vote, delegation decided to allow freshmen athletes to accept financial benefits from outside of NCAA regulations if they did not meet the highest academic standards allowed by Proposition 43, which limits the award to those who have been admitted to a four-year institution. However, athletes who do not meet the standards will not be able to participate in any NCAA-sanctioned competitions.

The vote was a significant victory for the NCAA, which had been trying to balance the need for academic standards with the desire for a competitive playing field. The ruling means that athletes who do not meet the standards will still be able to participate in NCAA-sanctioned competitions, but they will not be able to accept financial aid from outside sources.

Proposition 43, which requires that incoming freshmen athletes meet certain academic standards, has been a contentious issue in recent years. The NCAA has been trying to find a way to balance the need for academic standards with the desire for a competitive playing field.

The ruling means that athletes who do not meet the standards will still be able to participate in NCAA-sanctioned competitions, but they will not be able to accept financial aid from outside sources.
Winter Break no vacation for M. Hoops

PRINCETON, N.J. — A four-game losing streak has finally come to a stop as the Princeton University basketball team received their first win of the season Saturday night against Dartmouth.

The Quakers (3-6) split two games at the Surfside Classic in San Jose, Ca., in early December, and the second loss was to the Tigers (3-6), 64-53, leaving them at .500 for the season.

Unfortunately, Penn left a little more than its share of talent behind when it traveled to Princeton last Friday to lose 66-87.

The Princeton defense was too much for the Quakers to handle as they were held to just 39% shooting from the field and were out-rebounded 43-32.

The Quakers were defeated in both of their California Classic tilts, losing in the first round to host Santa Clara, 93-83, and in the consolation game to Iowa, 69-67. They closed out their trip with a loss to St. Mary's, 98-73.

"It was kind of a nightmare," said senior guard Tyrone Gille, who scored 13 points in the loss to the Gauchos.

Despite the loss, the Quakers will attempt to regroup and get back on track as they travel to Providence on Wednesday for a game against the Friars (4-7).

The Friars have lost their last three games and are coming off a 74-70 loss to Dartmouth last Saturday night at Princeton University.

The Tigers left the game looking like a team that could go undefeated this year after they defeated the Quakers in a game that was very good for Princeton coach Julie Carril in Jadwin Gymnasium. Top-20 LaSalle team in an 86-83 loss. They were plagued by inconsistent play and were outrebounded 43-32, leaving them at .500 for the season.
