Faculty to discuss minority issues

Minority faculty members will speak this afternoon at a reception geared toward presenting different perspectives on issues important to minorities.

Friday's Professor: HorHecter Jones and Houston Hall and Romance Languages Professor Jorge Zapata will be among the faculty at the presentation.

According to Dean's Advisory Board Member Paul Ray, the reception will give students the opportunity to meet with faculty and learn about their areas of interest. Students are to get in touch with minority faculty and become aware of different disciplines at Penn," said Ray.

The reception will be held in the Smith-Penzance House of Houston Hall at 4:30 p.m.

Human Capital

New University City Science Center President Louis Padulo has taken the helm of the 26-year-old institution, hoping to continue fostering an environment which has spawned over 150 companies.

Louis Padulo, president of the University Science Center, observes College of General Studies student Serhan Constantinou.

The center serves as an incubator for both university ventures in the areas of science and technology and for area firms that got a start at the University City Science Center.

"We don't have to teach them how to compete with each other; they're used to doing that," Padulo said. "The cooperating is the hard part, and that's what I think we can help them with."

President

University Science Center

which mostly originate with the faculty and students of its member universities.

Now a 26-year-old center is in the hands of Louis Padulo, who hopes to expand its size and functions in the future cooperatively.

"We don't have to teach them how to compete with each other, they're used to doing that," Padulo said. "The cooperating is the hard part, and that's what I think we can help them with."

The center was founded in 1966 by a group of Pennsylvania colleges and universities, which decided to pool their expertise and market jointly.

Padulo most recently served for two years as president of the University Science Center at Huntsville, until he was fired in the summer of 1992.

Padulo also served as dean of Business Administration at the University of Alabama for 11 years before taking the Alabama Huntsville presidency.

Padulo has also taught at Stanford University, Morningside College, and Georgia Tech University, where he earned his doctorate in electrical engineering.

The University owns a 42-acre property in suburban Malvern and in Philadelphia's National Association for the Advancement of Colored People chapter, said recently in an interview with the Philadelphia Inquirer that Padulo "told to build bridges between the black community and the white community.

"That was the reason he was asked to leave," Herndon said. "The character pulled the rug out from under him, but there was strong support for him in the community."

The science park, located on Market Street between 7th and 8th streets, was founded in late 1970s as a "tax haven" for technology start-ups with a combined investment of $500,000. The University owns a 7 percent share of the center, but remains active in advising and providing technical services.

The center bills itself as the oldest business incubator in the United States and the largest research center in the country.

The center provides office space, business advice, venture capital, and computer services.

"It's a very nice collaborative atmosphere in which to do business," Padulo said. "The environment we have at the University of Pennsylvania is a very nice collaborative atmosphere, in which to do business."

The companies have the support of the University of Pennsylvania's Blue Book, a directory of inventors and companies.

In addition to being a business incubator, the center assists in the development of new technology, and research and development services to companies.

The companies in which mostly originate with the faculty and students of its member universities.

**Store owner disappears, upsets patrons**

By SCOTT CAVERT

The Pennsylvania Allentown Morning Call in Allentown, Pa., is closed as all its employees have gone on strike.

After taking his computer for repair, the store owner, who cannot be reached, decided not to do the repair. The Bluegrass student went to the store's front office on 4th and Walnut streets last month to pick up the still-broken IBM clone.

But when he got there, he found the door locked and the window covered with a "For Rent" sign. He knocked on the door and heard a voice say, "We're closed!"

"I don't know what happened," said the store's phone was disconnected.

Said Chalfen, who manages the University-owned building, "I have not heard from the store's owner and I will wait for the owner to return."

"If the owner is computer-literate," he said Monday, "then that's too bad I don't have it."
FREE! FROM THE WORLD LEADER IN RAPID READING AND STUDY...  

FREE LESSONS THIS WEEK ONLY!  
Students and Faculty Welcome  
(Tell a Friend!)  

FINAL FEW DAYS!  
(CALL 1-800-888-READ)  

FREE! As Much as DOUBLE YOUR READING AND STUDY SPEED IN JUST 20 MINUTES!  
(Call Today!)  

YOU COULD BE READING AND STUDYING 3-4 TIMES FASTER — BEFORE FINALS!  

GIVE YOURSELF THE COMPETITIVE EDGE THAT CAN PUT YOU AT THE TOP OF YOUR CLASS, YOUR FIELD — AND YOUR POTENTIAL — IN COLLEGE... AND AFTER COLLEGE. LEARN HOW TO...  

POWER READ,  
POWER STUDY...  
POWER LEARN  

FINALLY! MAKE TOP GRADES EASILY, IN 2/3 LESS STUDY TIME — WITH NO MORE CRAMMING... AND A LOT MORE FREE TIME!  

AND YOU CAN DO IT TODAY — In Just Five Enjoyable, Easy Lessons.  
Like Our Typical Graduate, You’ll Learn How To:  

1. Read, study and learn up to 3-to-4 times faster — even in the most difficult material — while you concentrate better, comprehend more... and remember it longer!  
2. Make top grades easily — or dramatically boost your current grades... before finals!  
3. Make college and studying more fun by handling required work faster — with a lot more free time for yourself, for your friends... and for the things you want to do!  
4. Handle note-taking, exams, research papers — even math and science problems — far more efficiently.  
5. Cut technical reading and study time by 2/3, saving you 10-to-20 hours (or more) each week — and hundreds of hours a year... for a lifetime!  
6. Avoid the pressure and frustration of falling behind (or forgetting what you’ve learned) — while getting more done in just 1/3 the time — with less effort and no cramming!  
7. Gain a vital competitive edge in the race for better jobs, faster promotions and higher earnings after college!  
8. Keep abreast of the explosive growth in essential pleasure and technical reading both within — and outside — your field!  

POWERSFUL TECHNIQUES That Are Simply Not Available From Any Other Program — And PERMANENT RESULTS You Can Feel  

These days, your entire future can depend on how well you do in college — and how well you keep up in your field after college. In fact, doing college right can tie up years of your life — including many hours of hard work each week — and thousands of dollars in tuition. But unless you really learn the material — and have the top grades to prove it — there’s just no guarantee that you’ll be able to compete successfully for the best jobs, earnings, promotions and opportunities after college.  

And we’ve all been told that personal growth — and social time — are also a big part of what college and professional life are all about. But with so much to read, study and learn — and so little time to do it in — how do you handle everything you have to do... and still make time for any of the things you want to do? And how do you avoid the pressure and frustration of falling behind?  

Learn how to do it all — because students and professionals just can’t afford to fall behind! Nowadays, how well you do in life can be determined by how much you know — which depends largely on how fast (and how well) you read, study and learn. And that’s where Evelyn Wood Reading Dynamics® College Programs can give you a major competitive edge.  

Evelyn Wood’s world leader in rapid reading and study programs far behind! As the world leader in rapid reading and study programs for over thirty years, we can help you to catch up, keep up... and get ahead! In fact, Evelyn Wood has already helped nearly one million successful students, educators, professionals, executives, senators — even several U.S. Presidents — to do just that!  

PROVE IT TO YOURSELF with a free lesson that could double your reading and study speed in just 20 minutes. You’ll also learn about proven, advanced reading and study techniques that could save you hundreds of hours in the next year alone — and about skills that can virtually unlock your potential for accomplishing more... with less effort and greater flexibility — for years to come!  

So don’t miss out. The phone call is free, the results are immediate... and the benefits will last you a lifetime. Call today!  

CALL TODAY AND TOMORROW FOR A FREE LESSON!  
CALL TOLL FREE (Mon-Fri) 1-800-888-READ  

THIS WEEK ONLY!  
As Much As DOUBLE YOUR READING AND STUDY SPEED — FREE — IN JUST 20 MINUTES!

Turning Back the Crime Wave

With crime on and around campus heating up once again, it is time for the University administration to take a more proactive approach in order that we all may feel safe. Two recent deaths in three days—one of a UCP employee early morning at 10th and Baltimore and another where two students were in a street between Market and Chestnut—come as of late. Clearly, the tension is palpable. As some UCB students in Pickford Hall last day and a string of armed robbers of University students this past weekend, it is high time for everyone at the University to stop hiding from the crime problems in this neighborhood if they don't want to become victims of it themselves to safely.

In the meantime, University Police can help put a dent in this and perhaps deter crime by increasing police visibility during night hours in certain areas on the campus.

Another similar crime wave last fall, University Police doubled night time patrols for a time. While that move was exhausting for officers asked to volunteer for 12-hour shifts, it did indeed make people feel safer and many were prevented from crime.

As it is, we, as Jews, were particu-

lly worried that anyone could be attacked on this campus. We did not see di-

durin World War II. It's a trend that Earth of Law Enforcement which, in cooperation with University Police, may very well be on the increase in the future. A look at the crime story on Wednesday, February 21, 1982.

The story, titled "Red Scare," was an article that appeared in the newspaper of the same name. The author began by mentioning a recent event that took place at Duke University.

"The White Dog Cafe, a lefty restaurant in Durham, apparently got a bit uppity," the author wrote. "I'm sure that's the cleanest damn name for a bar I've ever heard."

The article went on to discuss the increasing violence on college campuses and the role of student activists in perpetuating this violence.

"The biggest story in the world, after all the great political upheaval in the East, is the Red Scare," the author stated. "It's like it's the world's biggest story."

The article concluded with a call to action for students to come together and fight against this trend of increasing violence on college campuses.

Students of the Campus: Unite!

I am writing this as the leader of the Student Alliance for Civil Rights, and as the member who organized the meeting you attended last night.

The purpose of the meeting was to discuss the recent increase in violence on our campus, and to organize a plan of action to address this issue.

The meeting was well attended, with a large number of students expressing concern about the increasing violence on campus. Many students felt that something needed to be done to address this issue, and that we needed to take action in order to prevent further incidents of violence.

During the meeting, we discussed a number of strategies that we could use to address the problem. Some of these included:

- Increasing visibility of University Police on campus
- Holding a peaceful protest to raise awareness about the issue
- Organizing a student-led boycott of classes

We agreed to take action on both of these fronts, and to keep each other informed about the progress we were making.

I am confident that we can make a difference if we work together. I urge all of you to continue to be involved in this effort.

One Meat's Meat

Elizabet Hunt

"I'm sick of it, my friend," she told me. "I'm sure you know what I mean."

"You've got a point," I said.

"Yes, I do. But I think we need to do something about it," she continued.

"What do you suggest we do?" I asked.

"Well, I think we should start by contacting the student newspaper," she replied.

"Are you suggesting we write an article about this?" I asked.

"Yes, I am. I think we should let people know what's going on," she said.

I agreed, and we spent the rest of the day and evening brainstorming ideas for an article.

Despite all the messages we send and receive, it is often difficult to feel strongly about something that has happened to us.

It's up to more students to volunteer to begin to get involved. It's up to the UA and the Greek community to impel the community to become involved.

But the real issue is how we can stop this from happening in the future. We need to examine our own behavior and learn from this experience.

The way to expose groups like this as liars is offensive. The Daily Pennsylvania!!

The New York Times reported that in 1996, the International Monetary Fund (IMF) unveiled its first report in 23 years, warning that the world was facing a "severe" economic crisis.

"We have reached a point where we can no longer expect rapid growth to continue," the IMF said.

The report predicted that global growth would slow to 3.5 percent in 1997, down from 4.5 percent in 1996.

The IMF called for governments to take action to boost economic growth, including by cutting spending and raising taxes.

The report also warned that inflation could become a problem if interest rates were not brought down.

The report was released as the United States and other major economies were struggling to deal with high budget deficits and falling exports.

"We must take action to rein in government spending," the IMF said. "This is the only way to achieve rapid growth and low inflation." A Setback For Free Speech

By publishing the Turkish ad in our newspaper, we must present all points of view. This is essential in a democratic society.

If we only present the views that are most outside the mainstream, we run the risk of being seen as biased and unfair.

In a free market of ideas, untrue and offensive statements must be allowed to stand. This is necessary for the maintenance of a free press, their stance on the student input.

The Daily Pennsylvania!!

To the Editor:

I am a member of the Committee on Student Representation, a group of students who meet on a regular basis to discuss issues affecting students at the University.

I wanted to take this opportunity to express my concern about the recent decision to allow a Turkish advertisement to be published in the newspaper.

As a student, I feel that we have a responsibility to speak out against things we believe are wrong. I believe that the decision to allow this advertisement was a mistake.

I am concerned that this decision may set a precedent for the future, and that it may discourage other students from speaking out against things they believe are wrong.

I urge you to reconsider this decision and to take steps to ensure that we maintain a free press at the University.

Sincerely,

[Signature]

Forum held to support Iowa's Harkin

By HORTON CORTE

Let the race begin.

In conjunction with the presidential campaigns of both parties, the Student Senate voted to hold a forum the morning of Sunday, November 25.

The forum will take place in the Union Ballroom from 10 a.m. to 6 p.m. and is expected to attract roughly 1,000 students, according to Joel Kehoe, president of the Student Senate.

Kehoe said the forum was organized to provide the students with a chance to meet the candidates and to discuss issues important to them.

"It's about creating an atmosphere of political debate on campus," Kehoe said. "We want to give the students a chance to ask the candidates questions and to hear their perspectives on the issues."
Iran says U.S. captives to be freed

The Associated Press
Washingt0n — Iran said yesterday that it was releasing the last two American hostages in Lebanon, who were held for 444 days, and that a third U.S. captive could soon be released as well.

A day after President Hossein Reza Mo- nahan said Brad Willard and Thomas Berenson were freed and would be sent home to Iran, a Western diplomat in Beirut said yesterday that the two Americans and a third who were captured on Oct. 23 would be released.

"We were led to believe that a third hostage would also be released," the diplomat said. "The Americans will be released in Lebanon."

The overall indication, he said, was that the United States could be preparing for a major release as the U.S.-Iran hostage crisis draws to a close.

"There was a return of the calm," the diplomat said. "The Americans were not in good health. They were in no condition to go to the United States."

At the United Nations, Secretary- General Javier Perez de Cuellar — who had said Monday that there was no assurance that Western hostages would be freed — gave new indications that the remaining captives held in Lebanon and Arab detention centers could be freed.

The secretary-general has been lobbying intensely to get a peace plan, and has been involved in meeting with Lebanese and Arab officials to try to end the hostage crisis.

"There are indications that there could be a decision to free hostages," he said. "The SDI is working to get a decision on the hostages.

Getting ready for the holiday season, Joe from Narducci Electric Company puts up a festive decoration on Chestnut Street yesterday. The Dow Jones Industrial Average gained 29.52 points after falling 120.31 points on Friday, setting the stage for a possible recovery from the recent market downturn.

New York — The Dow Jones Industrial Average gained 29.52 points after falling 120.31 points on Friday, setting the stage for a possible recovery from the recent market downturn.

The blue chip index rose to 2,985.35 on Monday, up from 2,955.83 at the close of trading on Friday. The Nasdaq Composite Index, which measures small-cap stocks, gained 21.74 points to 900.42.

Despite the overall upturn, retail stocks continued to struggle, with shares of Walgreen Co. falling 32 cents to $25.12 and shares of Macy's Inc. falling 53 cents to $26.90. The S&P 500 index, a broad-based measure of the stock market, gained 2.04 points to 375.03.

A major warm front is moving across the northeastern United States, bringing temperatures in the upper 60s and lower 70s, with a high in the mid-70s.

``I hope that the feeling people have is that the country is going in the right direction,'' said Michael J. Kouri, a senior economist at A.G. Edwards & Sons Inc., a brokerage firm in New York. ``It's a little of a letdown to see the market go up.""
Software Design Engineers and Program Managers

A meeting you'll never forget.

Suddenly, there you are.
Face to face with the opportunity of a lifetime...and the implications are enormous. Your ideas, your code, power exciting new releases. Products designed to revolutionize the future of personal computing.

Our Software Design Engineers and Program Managers are well-equipped. We arm them with everything they need to do their best work, including full creative authority, and the freedom of our unique, unstructured environment.

As a Software Design Engineer, you design, develop and implement personal computer applications and systems software using the most advanced tools in the business.

You design software on 80386, 80486, RISC- and 680X0-based machines connected to XENIX (R), MS-DOS, and OS/2 file servers.

As a Program Manager, you are responsible for the product from initial concept to release. You drive the product through design and development: specification, coding, testing, and documentation.

You deal with all the details necessary to get the best possible product out the door on time. You'll learn your product category inside and out, research competitors' offerings, and examine user needs.

If you're pursuing a degree in Computer Science, Electrical Engineering, Math, Physics or a related discipline and you have programming experience, design skills and/or exposure to project management, we want to talk with you at our On-campus Interviews. It's a meeting you'll never forget.

We are an equal opportunity employer and are working toward a more culturally diverse workplace.

**TRANSACTIONS**

BALTIMORE — Cal Ripken was named American League Player of the Week on Sunday, becoming the first player to win the award in the league's 31-year history. Ripken was honored for his play in the last two games of the week.

Ripken, a 20-year-old third baseman for the Orioles, had 14 hits and 14 RBIs in the last two games for a .308 batting average. He also had three home runs and four doubles.

The Orioles beat the Blue Jays 6-3 on Sunday, and Ripken had six hits and six RBIs in the game.

Ripken also had two home runs and six RBIs in the Orioles' previous game against the Red Sox on Friday. He has a .308 batting average in 20 games this season.

Ripken is third in the American League in runs scored with 36 and is second in total bases with 358. He also leads the league in doubles with 28 and is tied for fourth in home runs with 14.

Ripken has won the Player of the Week award four times this season, more than any other player. He is also a two-time All-Star and a two-time Gold Glove Award winner.

Ripken's performance has helped the Orioles maintain their lead in the AL East. The Orioles are currently 14-6 in April and are in first place in the division.

Ripken's success has also helped him become a household name. He is one of the most popular athletes in the world and is often seen wearing a helmet and holding a bat.

Ripken's team, the Orioles, is currently 14-6 in April and is in first place in the AL East. The team is led by manager Buck Showalter and has a young core of players.

Ripken's performance on the field has earned him respect and admiration from fans and teammates alike. His dedication to the team and his love for the game make him a true example of what it means to be a professional athlete.

Ripken's impact on the game goes beyond his on-field performance. He is a role model for young athletes and is often seen giving back to the community.

Ripken's impact on the game goes beyond his on-field performance. He is a role model for young athletes and is often seen giving back to the community.

Ripken's success has also helped him become a household name. He is one of the most popular athletes in the world and is often seen wearing a helmet and holding a bat.

Ripken's team, the Orioles, is currently 14-6 in April and is in first place in the AL East. The team is led by manager Buck Showalter and has a young core of players.

Ripken's performance on the field has earned him respect and admiration from fans and teammates alike. His dedication to the team and his love for the game make him a true example of what it means to be a professional athlete.

Ripken's impact on the game goes beyond his on-field performance. He is a role model for young athletes and is often seen giving back to the community.
Just follow me how to get ahead in The Line' —
