Sorority rush brings anxiety and excitement

By JEREMY BRODSKY
Daily Pennsylvanian Staff Writer

Leigh Conwell is walking through the halls of the Farley Building in her trademark long, flowing, black hair, wearing a red sweater and a yellow sweatshirt. Sitting comfortably on a couch in a residential lounge, the dart- board College freshman is preparing to tell her story, her life story, the story of a girl who is about to embark on a journey that will last for years, the story of a girl who is about to become a sister to other girls, the story of a girl who is about to become a member of a sorority.

"Leigh is an eager and ambitious student," says her roommate, Sarah, who sits next to her on the couch. "She's always been that way." Leigh is a member of Alpha Kappa Alpha, one of the largest and oldest sororities on campus. She is one of the hundreds of students who have signed up for sisterhood in the past few weeks.

Leigh is not alone. Across the country, sorority rush is bringing anxiety and excitement to college campuses. Students are nervously awaiting the outcome of their efforts to become members of a sorority. Some are excited about the prospect of meeting new people and making new friends. Others are nervous about the possibility of not being accepted.

But for Leigh, the rush is just the beginning. She is about to embark on a journey that will last for years, the journey of becoming a sister to other girls, the journey of becoming a member of a sorority.

Opinion

Black Student League President

Leigh McGreevy is a senior at the University of Pennsylvania. She is a member of Alpha Kappa Alpha, one of the largest and oldest sororities on campus. She is one of the hundreds of students who have signed up for sisterhood in the past few weeks.

College TAs sign teaching agreements

First time SAS uses compact form

By SHELLEY TALER
Daily Pennsylvanian Staff Writer

Sign on the dotted line, please. Students and new and returning graduate teaching assistants and professors implemented a new contract this semester to help define the role of TAs.

These contracts, which SAS designed to address concerns from recent students, will specify in detail working hours or restrictions for TAs for a particular professor.

"The contracts will state important information such as hours of work, stipend, title, and any other subject-specific details," said Professor A.M. Garfinkel, resident scholar at the Engineering School. "This is a step in the right direction to help improve the overall TAs' experience at UPenn."

According to Assistant Professor of Teaching Sarah Davis, the administration plans to assure that all students are aware of the new contract and are able to make informed decisions about their TA experiences.

The contract also states that "it is intended to expand and increase the number of students who have the opportunity to become TAs," but it does not specify how many students will be selected.

Engineering to develop area outreach

By ROBYN CORTE
Daily Pennsylvanian Staff Writer

The Engineering School is planning an outreach program to both Delaware Valley schools and high schools in the region.

"The program is designed to increase the University's regional visibility," said the dean of the Engineering School. "The goal of the program is to inform regional high schools about the University's students and their educational programs with those organizations."

In Brief

Thief hits Bookstore amid crowds
A thief who has not been arrested because of a disp- play case in the Bookstore yesterday afternoon, took eight Warner paperback novels valued at $2.75.

Two of the novels, worth $2.80 apiece, and the other six, worth $2.75 each, were stolen. The thief escaped sometime between 1 and 2 p.m.

Price also revealed that the thief had entered the Bookstore through a door located near the Bookstore. In two separate incidents, unidentified bookshops were taken from the third floor of a Bookstore on the afternoon and yesterday afternoon.

There was a small crowd in the seventh floor of the Bookstore when the robbery began. No damage was reported.

Price also revealed that the thief entered the Bookstore by breaking into the second floor of the Bookstore.

SEAS plans to expand programs to area

OUTREACH, a page 1 program, expands internship opportunities for undergraduates who are looking for professional connections. Perez said that use Immerse in "real do work." or his work in renovating the nation's education sys- tem, including eight Waterman pens worth $790 in total, Univer- sity police will be sent to find the pens.

He said that only good can come "public education. The lecture will take place at 4:30 p.m. in Vance Hall B-1.

School of Engineering and Applied Sciences will be giving their science and math students a chance to make a memorable and positive impression in a short amount of time.

Vigil to begin King memorial

By JORDANA HORN  
State Pennsylvania Daily News

A week-long commemorative program to honor the birthday of civil rights leader Martin Luther King, Jr. will kick off Sunday night with a vigil and procession around campus.

The vigil will feature speakers President Leon Anthony Frazier and vice president Jessica Dixon and Nicole Bell. The vigil will start in front of Du Bois Hall at 8 p.m.

Participants will walk, singing the civil rights anthem, "We Shall Overcome," with President Leon Anthony Frazier saying, "We thought King, Jr. will kick off Sunday night and unite for something important to all of us, certainly to African-Americans. "It's a time of gathering..." Frazier said. "What's going on?... around campus. "You got in just because you're black: Affirmative Action," he said. "We hope that more people will get involved," Frazier said.

"We hope that more people will get involved," Frazier said. "It's a time of gathering..." Frazier said. "What's going on?... around campus. "You got in just because you're black: Affirmative Action," he said. "We hope that more people will get involved," Frazier said.

Throughout the day, the Black Student League will present films and speakers to discuss issues important to black students. The seminars were planned by BSL members.

Laws discourage professors from using bulkpacks

BULKPACKS, from page 1

...and enhance their lives in college as well as on campus. Many students had to wait up to 10 weeks for bulkpacks because publishers could not keep up with permit requests. The delay forced some professors to reschedule their classes.

"Last semester was quite a learning experience for everyone in the industry," said Michael Drake, the program manager at Campus Copy Center. "This time it won't be the same."
Some shops fare better during recession

LOCKER, like Smiles, is thriving. "We are doing well," said Dean John Kcenan, referring to the students and professors about life at the University.

He said the stores are doing well because of the nature of the business that is being conducted. "We are seeing the business that is being conducted. It is not seeing the business that is being conducted. We are seeing the business that is being conducted.

The increase in Engineering applications coincides with an increase in applications in all four undergraduate programs. The increase in applications has been very cyclical because of the perceptions of the career goals of the students.

Historically, admissions have been very selective because of the perception of engineering. "It's a function of the perceptions of the career goals of the students." McGreevery said. "It's a function of the perceptions of the career goals of the students.

Assistant Manager Monique Up- per said that the best Christmas presents are those which are given to those who will do what we do. "I saw said. "I saw during the Christmas period." McGreevery said, "We are not seeing the business that is being conducted. We are seeing the business that is being conducted.

Artists/Designers

Looking for an opportunity to perfect your creative skills in a friendly and sometimes goofy atmosphere? Interested in learning how to use the latest in computer graphics technology? Enthralled with the possibility of having 34,000 people look at your illustration or design? Then join the Art or Graphics staff, where you can do all of this, gain the admiration of numerous editors, and get free pizza every night you come in.

We'll help you find employees with class.

Every weekday thousands of students search The Daily Pennsylvanian's Classifieds section. They're young, well-educated, energetic, and hungry for experience & extra cash. So if you have a job opening, place an ad in our Classifieds' Help Wanted section and get in touch with some "class" individuals.

**Why work for a newspaper if you’re not interested in journalism?**

Sales.
Design.
Marketing.
Customer Relations.
Credit.
Advertising.
Computer Graphics.
Business Management.
Collection.
Promotion.
Market Research.
Accounting.

Here’s an invitation for you to join the Business staff of The Daily Pennsylvanian.

You’re reading The Daily Pennsylvanian, Penn’s independent daily student newspaper. We operate a real corporation with an annual budget of $800,000. Revenues come entirely through advertising sales; we receive no University funding.

Managing that kind of money leaves a lot for our Business staff to do. We do market studies, sales calls, credit checks, ad production. We do budget planning, financial analysis and graphic design.

And now we invite you to join one of the largest and most respected student organizations on Penn’s campus. And while most people think of a newspaper business has to offer, you will see that the "other side" of the newspaper business has to offer.

The Daily Pennsylvanian provides an intensive training program that involves all business staff members in the day-to-day operations of the corporation. We’ll show you how to run a spreadsheet, make a sales call, and design a market survey. We’ll teach you to use state-of-the-art computers and business systems.

We’ll help you to interact professionally with the real business clients who depend on The Daily Pennsylvanian to reach the Penn student and faculty market.

We’ll give you the sort of background that has helped hundreds of our alumni get started in business, advertising, publishing, sales, and marketing careers.

And we’ll introduce you to some of the most interesting and motivated people on campus.

Come join us this spring!

Business Introductory Meeting

Russia favors arms reduction

**Russia** — Moscow — Russia's foreign minister said yesterday his country would take immediate talks with the United States to limit the long-range nuclear arsenals from Europe to the former Soviet Union.

At the same time, Russian President Boris Yeltsin's top military aide said the military structures of the former Soviet Union were posing a threat to the country by being kept, as a result of its nuclear forces, should resist international calls for disarmament.

The official, former Soviet Colonel General Dmitri Volkogonov, said in Moscow that the majority of the ex-Soviet members' representatives had signed a letter appealing to Western allies for the new nations.

In Bonn, German Foreign Minister Hans-Dietrich Genscher and his Russian counterpart, Andre Milongo, called for immediate negotiations on a "written program" of short-range nuclear arms.

**Congo soldiers demand changes**

BRAZzAVILLE, Congo — Soldiers still loyal to President Laurent-Désiré Kabila's regime have demanded but promised "no bloodshed" in this Central African Republic.

"We are demanding a resumption of the work of the National Assembly and the replacement of officers appointed by the new president," a soldier who gave his name only as a lieutenant said.

President Mobutu Sese Seko's administration is to lead a transition to civilian rule in the country.

**Biker's Dream**

WASHINGTON — President Bush took his campaign for 1992 through Iowa yesterday, stepping on the gas along the way.

Bush toured a factory where Chrysler was producing Jeep Cherokee SUVs.

"Every time I visit a Chrysler plant, I see new chances to create jobs, to grow our economy," Bush told the workers.

"I'm here to listen, to understand the problems of this state ... I understand the heartbeat of the country," he added.

President Bush has promised to create 1 million new jobs in the next two years.

For the "90s, you know what," he said, voice rising, "we've got to get America working again.

Meet Kevin Rendino, Carolyn Jones and Patrice Franco. They participated in the Merrill Lynch Individual Investor Intern/MBA Program and their program experience helped them advance quickly to new professional challenges. Kevin, Carolyn and Patrice will continue to rely on what they learned during the program to help them succeed throughout their Merrill Lynch careers.

The Program can help put you on the Merrill Lynch fast track. As a program participant you are offered a challenging position in one of the Merrill Lynch Individual Investor business units where you work under the guidance of a senior manager. Program positions are available in product development, marketing and finance.

Throughout the program you are exposed to firm strategy through meetings with senior management and you participate in task force projects which help a variety of business units to meet their strategic objectives. Formal classes address career development issues and help you enhance your leadership skills. You are given responsibility and accountability and your program experience will help position you for fast-track success in the Merrill Lynch Individual Investor organization.

Candidates for the Individual Investor Intern/MBA Program have outstanding records of achievement in their academics, extracurricular activities and work experience. They are interested in the challenge of the fast-paced financial services industry and want to be recognized for their accomplishments.

If you have the talent, creativity, energy and commitment to be a winner at Merrill Lynch, the Individual Investor Business Group is offering an unequalled opportunity to excel. To find out more, write us:

Men's Squash sets eyes on coveted top ranking

By JOSHUA FRIEDMAN

T he Quakers' status as the top-ranked men's team in the nation in any sport isn't easy. But the Penn men's squash squad is used to anything short of this goal would simply be unacceptable.

When Penn opens its Ivy League season on Saturday at Cornell, the Quakers are hoping it will be their first step on the road to the national title. "We are going to Cornell expecting to beat them soundly," co-captain John Convery said. "The Big Red Squad has that trophy, so we're not as good as they were last year."

Convery was not alone in his sense of confidence about the Quakers' match with the Big Red. "We should beat Cornell," a star co-captain Doug Kuenzer said. "They're not on the same level as the stronger teams in the Ivy League."

This sort of competition in the Ivy League means that any team in the Ivy will Penn has found in the past, will be one of the Quakers. And it often is in this era of mediocrity. When the final pairs were released last season, the Ivy League only ponied up the number-one team in the nation, Harvard, but it also held the next two spots - both the Quakers and Penn finished second, third and fourth, respectively.

The Quakers know that if it will not be an easy task to defeat the top three teams in the nation, but they also know it is not an impossible dream. "We had an Ivy League overtime earlier in the season, and we're not expecting any today," Kuenzer said. "We played all the other Ivy, and they all beat Penn this year. Of course, we are the #1 team, and it doesn't count, we beat Princeton, and we still played well against Harvard."

This confidence of beating the Tigers, ranked third in this year's pre-season poll, is evident throughout the team. The Quakers know they have the talent and depth to be the top-ranked team in the nation by the end of the season. With the pre-season behind, Penn is now ready to begin the regular season. The key matches to determine whether or not the Quakers win the national championship will be held at home against Yale on January 25th, on the road at Harvard on March 29th, and home against Princeton on February 12th.

The timing and location of these matches — two of the three are at home — should work in Penn's favor. "The home court advantage will definitely help us in Penn's favor," Edwards said. "It's just one variable that we don't have to deal with. The other variable is Penn's opportunities to go to the state tournament because we will be able to work up our toughest matches in that." With all of these dreams of a national title coming through the Quakers' Jests, they now march off to play Cornell knowing what it takes to win it all. "We have to play to our full potential in the big matches," Edwards said. "There is no room for anything but our best."

A "little birdie told me."
SAN JOSE, CA — The San Francisco Giants, in spite of a fourth and final plot to escape from Candlestick Park. This time, the Giants are making a genuine effort to move in 1993. The Giants would remain at Candlestick Park, the stadium to be named Oracle Park, where the team has struggled with the winds and fog since 1989. Their Candlestick Park lease expires after the 1993 season.

"I have said that it has been my desire all along to keep the team in the Bay area, and if we are able to do it we will do it," Giants owner Bob Lurie said.

"If this is what he wanted to be a giant park in Northern California, I would love to have it in the Bay area."

The Giants were unsuccessful in three bids at the initiative process, but they have proposed a $935 million stadium plan in the Bay area that would not require an initiative to build a stadium in San Francisco. That initiative failed although votes in favor of the proposal exceeded the necessary majority.

"San Jose was very supportive of us last time," Lurie said."

Lurie and the Giants are on the verge of completing their appeal to the voters. The appeal would likely appear on the June ballot. If the project is approved, city officials said it will go forward with a 99% chance of success. If the project is approved, city officials said it will go forward with a 99% chance of success.

"If the project is approved, city officials said it will go forward with a 99% chance of success. If the project is approved, city officials said it will go forward with a 99% chance of success."
Penn is unsure of self

By ERIN CAMER

The Penn women's basketball team will start their season with a bang when they take on Princeton (8-20) and DePaul (15-8) in their first two games. Coach Boomer will be looking for a quick start to begin the season.

The Quakers were defeated by Princeton (19-7) and Saint Joseph's (22-6) in their last two games. This season, the women will again be led by senior forward Jonathan Mayo.

Despite their losses, the Quakers have shown a lot of promise. They have a young and talented team that is eager to prove themselves.

**Beam does it for gymnasts**

By RACHEL CYRON

If the rest of the Penn gymnastics team can follow the same pattern as last year's opening meet at the NCAA championships, they could have a great season. Last year, the team placed 11th overall after one meet.

Gymnastics is a sport that requires a lot of hard work and dedication. The team has been practicing刻苦ly to prepare for this season.

**Track teams eager to compete at Yale**

Men appear set after long six-week layoff

By SCOTT LITMAN

The men's and women's indoor track teams will begin their season again.

Penn's performance at the NCAA championships showed that the Quakers are ready to return to competition.

**Sports**

**Penn gymnast Marble Flaks and the rest of the Quakers rebounded from a slow start last night against West Chester.**

Student-athletes are often faced with the challenge of balancing academics and athletics. For some, this balance can be difficult to achieve.

**Sports**

**Penn's strongest team in recent history.**

Although a new combination may be in store for the Quakers, they have shown that they are capable of adapting to new situations.

**Sports**

**Mamie Flaks senior gymnast expects**

Mamie Flaks, Penn's senior gymnast, is excited about the upcoming season. She has been working hard to improve her performance and is looking forward to the challenges that lie ahead.

**Sports**

**Season Preview**

This year, however, there will be 12.5 scholarships available, according to latest reports.

Penn gymnast Marble Flaks and the rest of the Quakers rebounded from a slow start last night against West Chester.

**Sports**

**Seamless transition from season to season.**

The beam scores not only demonstrated Penn's ability to overcome a difficult start, but also showed that the Quakers have the talent and potential to be successful this season.
