Convicted murderer Einhorn was '60s guru, 'brilliant' U. student

Daily Pennsylvanian Staff Writer

Ira Einhorn, the '60s guru, was convicted in absentia of first-degree murder yesterday. Einhorn, who fled the country 12 years ago to avoid trial for the murder of Biyn Maddux, is a student at the University of Pennsylvania.

"Einhorn was a brilliant student," said Rosemary Stevens, a professor of history.

"He was communicative and lively, and he had ideas that relatively few other people had, with a kind of verve to add," Stevens said. "I'm not sure what he did with himself beyond not coming to class, but he was a good student." Zuckerman added.

"There was a kind of pathos to that," he said. "I don't really think he was all there. It wasn't like he was a brilliant class day," said Zuckerman. "He was a complete mess, and I think drugs were involved." Einhorn is credited with bringing the Age of Aquarius to Philadelphia, organizing the city's first Be-In in 1967, as well as the subsequent Smoke-In, Earth Day and Sun Day.

"Einhorn was an organizer of sorts," Zuckerman said. "He was charming and constantly surprising with ideas." Einhorn was "a very talented man and I'm very glad we could have him," she said.

"Einhorn was a brilliant student," said Rosemary Stevens, a professor of history. First Manhattan Consulting Group

FMCG will be conducting an information session at the University of Pennsylvania on Tuesday, October 5, 1993 at Steinberg Dietrich Hall, Room 213 at 7 p.m.

First Manhattan Consulting Group (FMCG) has analyst openings each year for graduating seniors selected, in part, for their exceptional intelligence, analytical ability (particularly quantitative analysis), personal computer knowledge, and communication skills. In addition, those selected demonstrate a high energy level, a willingness to work hard, and a belief in their personal responsibility to make the end product better.

The principal task of the analyst is to collect and analyze information to solve client problems. Information collection ranges from personal interviews to secondary research to extracting data from client or industry databases. Analysis includes both qualitative and quantitative work. Much of the analysis uses sophisticated statistical and financial concepts and relies on automated models to test hypotheses and simulate results.

FMCG has a flat organizational structure. Analysts work directly with a senior consultant or partner of the firm and may work on 2-3 projects at a time. This daily contact with senior people and FMCG's merit-oriented culture allows analysts to contribute as much and take on responsibility as fast as they are able. Individual performance is quickly recognized and rewarded.

FMCG is an equal opportunity employer.

Frosh dislike math

MAPLE from page 1
"I hate it," George said. "I think it's a necessary part of college. I need it. I don't even understand why they have to offer both in the first place. That's just too much in college for me."

Others questioned the necessity of the math courses, however.

"I'm taking the highest level of calculus," said Kayla Gómez. "We've only done some assignments, but we didn't even have a test. I spend so much time trying to figure it out, it takes me four hours to do one problem."

College freshman Stephen Slowinski said, "It's just too much math for a freshman level of thought."

"It's way too much math for a freshman level," said Kayla Gómez. "I was never too good with math in high school, but when I took calculus, it didn't help." Slowinski said, "It seems to be something totally different from what we're doing in the math class, or what I have in college."

"I don't see the point of some of Maple's math requirements. They aren't useful in my other classes," said a senior in the business school.

"I think Maple is actually pretty depressing," said a first-year student. "I heard a rumor that people who get a C in it won't get into the Wharton School."

"I think it's a necessary part of college," said a sophomore. "I don't even understand why you have to do it when I took calculus," Slowinski said. "It seems to be something totally different from what we're doing in the math class, or what I have in college."

The professor whose complaints prompted an investigation into The Daily Pennsylvania's confidentiality policy is alleging that the special JIO handling of their claims tainted the University's efforts to resolve the case.

Professor Richard Bowlby claims that Special Jurisdiction Office (JIO) Director Howard Brody ignored his recommendation to convene an open forum to discuss the case.

Instead, Bowlby heard the students' rights of the University's Communications Policies— an offense with which they were never charged. Brody said in a letter.

"It seems that the University has decided that students may invoke the Open Expression Guidelines if they so choose," Bowlby said in the letter.

"I would like to express my disappointment in the manner in which the Open Expression Guidelines were applied in this case," he added.

"The University's commitment to freedom of expression is embraced and protected by the Guidelines," he said. "It is clear that the University has not been following the Guidelines in this case."

Bowlby also expressed concern that the University's procedures may have been violated.

"I would urge the University to consider the possibility of revising the Open Expression Guidelines to address any perceived shortcomings," he concluded.

"I hope that the University will take all necessary steps to address the concerns expressed in this complaint," he added.

"I am committed to ensuring that the University's policies and procedures are followed in a fair and consistent manner," he said.

Bowlby concluded his letter by saying he looks forward to hearing back from the University about the steps it plans to take to address the concerns he has raised.
Sig Ep names Neb. frosh 'balanced man'

By RYAN PAPAN
Daily Pennsyltvanian Staff Writer

Bradley Whiteley is a man for all seasons. At least the brothers of the Sigma Phi Epsilon Fraternity think so. Whiteley was among 150 anxious freshmen gathered at the Sig Ep house Wednesday night for the annual presentation of the Balanced Man Scholarship Award.

Whiteley is this year's winner, beating out the fierce competition. The 30 finalists were chosen from a pool of 200 applicants, up from 20 last year.

The award is based on high school extracurricular activities and community involvement, community service and leadership qualities, said Sig Ep's
troductory meeting to kick off rush.

By PAUL
LaMONICA

The approximately 100 freshmen massed before rush starts, instead of waiting to explain how the Greek system works, said the IFC coordinates, among other things, a blood drive on campus. "You have balance in your view, and balance in your experience," he said.

"In answering the value of a "balanced man," Kreider

The lucky Whiteley was this year's winner, beating out the fierce competition. The 30 finalists were chosen from a pool of 200 applicants, up from 20 last year.

The award is based on high school extracurricular activities and community involvement, community service and leadership qualities, said Sig Ep's

IFC executive vice president for rush, and works actively in the community. "You have balance in your view, and balance in your experience," he said.

"In answering the value of a "balanced man," Kreider said the goal of the meeting was to inform and work actively in the community. "You have balance in your view, and balance in your experience," he said.

Snipping Away

By Scott Gallin

Over the summer, Interim President Claire Fagin promised the University "will not be back to business as usual" when she returned from vacation. The rhetoric of "back to business as usual" set to the U.S. News and World Report college poll, she said, is where College Hall Cronies have only insured themselves that the institution will remain in the Ivy League for years to come. Last week's decision to close three national schools of business and sciences departments only tarnishes our already lackluster reputation.

One day would describe the U.S. News and World Report poll, as "behind the scenes, there is a lot of places, the third time, and we have a lot of indications that the University has sustained some serious challenges, especially in the sciences. Those schools and departments are also the United States have been more competitive. Some of those programs that have achieved excellence have fallen off in the national rankings. Of course, that's a matter of concern. The decision to close the AmCiv, Regional Science, and Religious Studies departments stems from concern that those divisions do not offer the same level of quality as other schools, including the U.S. News and World Report poll, which found that the University was not among the top 20 in those fields.

What you may not know is that the University has been struggling in several areas. In the fall of 1995, the University announced plans to cut the budget by $5 million, primarily due to a decrease in state funding. At the time, the University said it was facing a deficit of $18 million. The decision to close the departments was made to address this deficit.

But regardless of who holds the top two spots in the public eye, it's clear that the University has a serious problem on its hands. The decision to close the departments is a clear signal that the University is facing serious financial challenges.

The decision to close the departments is a clear signal that the University is facing serious financial challenges. It's a step in the right direction, but it's important to remember that the University has a long way to go before it can solve its financial problems. It's important to support the University and to work together to find solutions to this problem.
Field Hockey wins first road game of the year; West Chester at home on Saturday

The back wall has stepped up the components' opportunities inside the Quaker zone and dominated Ursinus in six games, the stingy defense needed it most. Allowing only four goals in six games, the stingy defense has carried the Quakers. "I'm sure the grass was a factor," Purun said. "We only had one practice on the grass before the game, so that made it tough. The ball was hopping and the stick side was just muddier. Even the crease got really muddy." The mud also slowed down the Penn offense. The attack still continued to fail to get several opportunities deep in the Ursinus zone. Posting only three goals in this game, scoring is becoming an increasing concern for the Quakers. Penn continues to dominate games but the recent string of 1-0 wins is not indicative of the team's solid performance. "I think we went out and had fun. That's what we did," Purun said. "We're not getting caught in that fastbreak situation."

"The team as a whole felt that we controlled the ball the whole game," Bajwa said. "I think we went out with a renewed attitude. In the last few games we've been playing defensively - it is a cause, playing not to lose in stead of playing to win. The attitude was log out and have fun that's what we did. It was very relaxed. This relaxed attitude will certainly help to take some of the pressure off the Quaker defense. "I just really think that we have to continue to dominate games but the defense's job should soon break into the national rankings. The victory was a key one for Purun. The Quakers were much more satisfied with the overall performances and are hoping to carry this momentum into the remaining few schedule. This will be critical if the Penn offense hopes to put everything together and starts to click when opponents like Princeton and No. 1 Penn State soon appear on the Quaker schedule. "The game I don't think many people were watching the 14 win," Bajwa said. "We just need to take it games by game. It's hard because we're coming off a season where we have a lot of expectations. The pressure's on us. Last season we had nothing to lose. I think we need to re- gain that attitude."

Yesterday's victory should help the Quakers do just that.

McKinsey & Company, Inc.

McKinsey & Company, Inc., a leading international management consulting firm, cordially invites members of the 1994 University of Pennsylvania senior class to learn more about our 2-year business analyst program.

We will be having a presentation and reception for interested students on Monday, October 4, 1993 at the Alumni Hall of the Faculty Club from 7 p.m. to 9 p.m.

We look forward to seeing you there.
Iraqi oil embargo may be lifted

MADANAl, Babulal — The chief U.N. official moni-
toring Iraq's oil exports said today that "they could be leveling off in cash" within six months if sanctions are
lifted.

Rolf Enevoldsen, a Swedish diplomats who heads the U.N. Special Commission, spoke in Baghdad on the eve of
his departure for Baghdad, where he is to hold talks with Iraq's deputy prime minister, Tariq Aziz. The meeting
could lead to an accord clearing the way for eventual lifting of the U.N. oil embargo imposed on Iraq three years
ago when it invaded Kuwait.

Enevoldsen hopes to work out details of long-term moni-
toring of Iraq's oil and to get an agreement on how any oil tax would be divided.

The embargo has lifted Iraq's economy. Enevoldsen said there had been no significant increase in
petroleum prices since sanctions were imposed.

The Gulf War cease-fire resolution says Iraq must destroy its weapons of mass destruction and meet oth-
er conditions, including long-term monitoring.

The embargo has lifted Iraqi's economy. Enevoldsen said that it could lift within six months if Iraq cooperates.

"It will be a big deal for Iraq," he said. "Iraq reported roughly 4 million barrels of oil a day before the war.

**Salomon Brothers**

**Quantitative Research Analyst**

Salomon Brothers is an international investment banking firm that makes markets in securities and provides a broad range of underwriting, financial advisory and research services to governments, corporations, and institutional investors.

**The BOND PORTFOLIO and EQUITY PORTFOLIO ANALYSIS GROUPS work with Sales, Trading and Investment Banking to help Salomon Brothers' clients quantify and implement investment, capital raising, hedging, and asset allocation strategies.**

Salomon Brothers is responsible for the development of new theoretical models for securities valuation, statistical analysis of data, and the development of customized client presentations. Quantitative Analysts often act as generalists for up to two years, after which they specialize in one or more of the following areas:

- **Modeling financial products such as mortgage-backed securities and options**
- **Portfolio structuring and/or asset allocation**
- **Analysis integrated with Sales, Trading, or Investment Banking activities**
- **Analysis of stock and bond market returns and yields**
- **Analytical systems development.**

Qualified candidates will have a B.S. in a quantitative field such as Computer Science, Engineering, Finance, Mathematics, Operations Research, or Statistics. Good analytical and computer skills (C/Unix preferable) are required. Because so much of the analyst's work involves direct interaction with the Firm's clients, strong interpersonal, written and speaking skills are also important. While a background in finance or economics is helpful, we believe that an analyst with exceptionally strong quantitative skills can come to a deep understanding of the financial markets.

Training for quantitative analysts includes:

- **An introduction to securities analytics**
- **A period of internships in different quantitative groups**
- **Immediate hands-on training with professionals working on various projects**
- **Licensing with the securities industry regulators**
- **Additional technical training as needed to handle newly assigned tasks.**

The Quantitative Research Department will be interviewing on Campus December 2, 1993

**Resume should be submitted to:**

The loss extends the Pittsburgh Pirates' losing streak to four games. The Cardinals took the lead in the 6th inning with a two-run home run by Albert Pujols. The Pirates made it 3-2 in the 7th inning with a home run by Gary Sheffield, but the Cardinals scored two more runs in the 8th inning. The Pittsburgh Pirates end their scoring streak at 10 games.
Quakers look to stay on a roll

Football hosts 0-3 Fordham

By ADAM HERTZOG

Daily Pennsylvanian Sports Writer

This week’s win against Bucknell, about 60 men clad in blue must have before 1 p.m., so that when it faces an apparent mismatch in talent, the Quakers are not overlooking the Fordham squad that most recently suffered a 7-0 loss to Columbia. Despite an apparent mismatch, the Quakers look to stay on a roll.

Just how bad is the Fordham offense? The Penn field hockey team has scored just 11 points in three games. That’s an average of 3.66 points per game. The Quakers rank 1st in A-10 with a 23-6 scoring margin and have been inside opponents’ red zones 59 times, but have only nine points to show for it.

Fordham, in its fourth season at the varsity level, has a 1-3-0 record. The Quakers have scored 14 goals against them, while Fordham has managed only a pair of scores in their only two encounters.

"We are totally evaluating between the lines of the game and between the posts," Quaker coach John Laigetty is unsure of his starters for tomorrow’s game.

"Fordham may be 0-3, but they’re a very physical," Penn coach Al Bagnoli said. "They woke up."

Tomorrow marks the second meet-

The Pean football team faces Fordham on Thursday at 1 p.m. at Franklin Field at a perfect 3-0 against the 0-3 Rams, a team that is 4-3 since moving to Division I-AA in 1989.

Squeezable prognosticators you pet-bumper to carpet-bumper.

The Boss was kind enough though to yet another win.
