The Illustrated Book 1500-1600

This exhibition surveys European book illustration during the sixteenth century. Examples, which run from the very best to the merely typical, all come from Penn's rich collections of sixteenth-century European printing. Their wide variety of styles and subjects illuminate what early modern book illustrators provided readers in an environment visually far less rich than the one we take for granted. Religion, labor, science, warfare, costume, medicine, portraits, exotic places, and more — all these topics found their way not only into words but also into pictures. Opening up Penn's books not for their texts but their illustrations offers a different way to see them. Organized in rough chronological order but lacking space for even a one-book-per-year “comprehensive” approach, the exhibition contains a tiny fraction of all that might have been included in such a show.

WHAT DID BOOK ILLUSTRATION LOOK LIKE IN THE FIFTEENTH CENTURY?

Hartmann Schedel, 1440-1514

Registrum huius operis libri cronicarum cu[m] figuris et ymag[ini]bus ab inicio mu[n]di
[Nuremberg: Printed by Anton Koberger for Sebald Schreyer and Sebastian
Kammermeister, 12 July 1493]

Copy 1. Rare Book Collection. Gift of Charles W. Burr.

Copy 2. Rare Book Collection. Gift of E. B. Krumbhaar.

Copy 3. Long-term deposit from the Yarnall Library of Theology (Saint Clement's
Church, Philadelphia, PA).

Penn has three copies of this late fifteenth-century book (1493), usually called the “*Liber chronicarum*” or the “Nuremberg Chronicle.” Dr. Hartmann Schedel’s book is a universal history. It begins with the Creation as described in Genesis and comes down to its own present, Nürnberg at the end of the fifteenth century.

Each copy on display is open to a city view. Such illustrations make this one of the best-known illustrated books of the fifteenth-century. (The Nuremberg Chronicle has been called the first “coffee-table book,” meant to be displayed and looked at but not read.) Widely scattered throughout the volume, these are views labeled “Verona,” “Ferrara,” and “Damascus.” What reader would *not* take these labels at face value? But all three woodcuts are the *same* woodcut, re-used each time to represent a different place. Most readers might not notice that it appears several times in the volume, bearing another city’s name at each appearance. The *only* change is the labels. With additional copies of this book, we could display the same woodcut bearing the names of still more cities.

What, then, did late fifteenth-century readers *see* when they came upon these woodcuts? The Nuremberg Chronicle treats many cities this way — and not only cities but also popes, emperors, kings, and other figures. All are illustrated by repeated woodcuts. They bear different names but are otherwise the same cuts. Over 1800 woodcuts appear in the book. More than 1100 of them are repeats.

Should we assume that late fifteenth-century readers didn’t notice? Or that they didn’t care? Or that they had a sophisticated sense of the difference between a “representation” and the “reality” it purports to represent, so that mere similarity (indeed, the literal *identity*) of woodcuts would not have challenged their sense of what illustrations are supposed to do?

Of course, that we in 2010 know any better than they in 1493 “what illustrations are supposed to do” is itself an interesting notion. As Ernest Hemingway makes Jake Barnes say at the end of *The Sun Also Rises*, “Isn’t it pretty to think so?”
